Courses

Active Learning Strategies

214637

Lecturer

izv. prof. dr. sc.
Rona Bušljeta
Kardum

Course Description

The objective of the course is to foster students' critical reflection on educational strategies that inform the conceptualization, planning, and design of the teaching process in alignment with contemporary scientific insights into educational theory and practice.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define key concepts, including cognitivist approaches to learning, active learning, student-centred instruction, and teaching strategies.
2. Differentiate among theories that explain the learning process.
3. Differentiate among theoretical perspectives that explain the process of learning.
4. Evaluate the advantages and limitations of specific teaching strategies for active learning.
5. Define the objectives and learning outcomes with respect to the process of active learning.
6. Compare the integration of active learning strategies within educational practices in Croatia, Europe, and globally.
7. Apply approaches that promote students' active knowledge construction.

Study Programme Learning Outcomes

Croatian Latinity

Generic competencies

think in an interdisciplinary manner and respect diverse scientific methodologies and views on specific issues

Dual-major studies

Communication Studies

Develop competences in professional and interdisciplinary teamwork

Croatology

History

Present complex scientific and non-scientific content in written and oral form

ECTS Credits 3.0

English Level L0

E-learning Level L1

Study Hours
15
15

Grading

Students are required to prepare and submit a seminar paper incorporating a selected active learning strategy in order to be eligible to sit the written examination.

History

Present complex scientific and non-scientific content in written and oral form

Sociology

Understand the social mechanisms of interaction

General Competencies

Upon completion of the course and fulfillment of its requirements, the student will be able to

Define key concepts, including cognitivist approaches to learning, active learning, student-centred instruction, and teaching strategies.

Differentiate among theories that explain the learning process.

Identify teaching strategies that foster active learning and the active construction of knowledge by students.

Evaluate the strengths and weaknesses of specific teaching strategies for active learning.

Define the objectives and learning outcomes in relation to the process of active learning.

Compare approaches to integrating active learning strategies within educational practices in Croatia, Europe, and globally.

Apply methods that promote the active construction of students' knowledge.

Screening of student's work

³
ECTS

Week by Week Schedule

1. Presentation of the course objectives and learning outcomes; modes of instruction; students' rights and responsibilities; required and recommended readings.
2. Defining the key concepts of the course: cognitivist approaches to learning, active learning, student-centred instruction, active knowledge construction, teaching strategies, and methods for active learning.
3. Differentiating among major theoretical perspectives on the learning process (behaviourist, socio-cognitivist, and cognitivist approaches).
4. The concept of student-centred instruction as a paradigm shift in teaching and learning.
5. Teacher competencies for the twenty-first century.
6. Teaching strategies as a foundation for active learning.
7. Selecting teaching strategies that effectively promote active learning.
8. Teaching methods, forms, and resources as constructs of active learning.
9. Illustrative examples of active learning methods (e.g., mind mapping, the cube technique, think-pair-share, reciprocal teaching, etc.).
10. Formulating learning objectives and outcomes in relation to active knowledge construction.
11. Curricular content and the active construction of students' knowledge.
12. Collaborative learning.
13. Problem-based and project-based learning.
14. Inquiry-based learning.
15. Assessment of student engagement – assessment for learning and assessment as learning.

Arabian Philosophy

213957

Course Description

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the most important authors of Arabic philosophy.
2. Analyze teachings and reflections on specific topics and selected texts from Arabic philosophy.
3. Analyze and compare Arabic and scholastic philosophical texts and the issues in them in the context of their cultures.
4. Evaluate the general value of Greek philosophy in the medium of another language, Arabic.
5. Reconstruct and evaluate important theses and arguments in thematic discussions.
6. Show students the influence of Arab and Jewish philosophy on medieval European philosophy and its importance for understanding the scientific culture of the West and European identity.

Study Programme Learning Outcomes

Dual-major studies

Philosophy

Analyze main problems of contemporary philosophical disciplines

Formulate different arguments, possible contradictions and construct counterexamples

Integrate different models of philosophical thinking specific to individual philosophical disciplines into a unique ability of philosophical and critical thinking

Explain the specifics of contemporary philosophical disciplines and their development

Encourage the development of professional and scientific excellence and integrity and determine the need for lifelong learning and professional development

Archivistics for historians

202954

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

The aim of the course is to acquire theoretical and practical knowledge of archives and archival material in general in order to acquire the knowledge required for the research work of historians when searching for new historical sources. In this way the student will be introduced to the way archives function, how they are organized, learn how historical sources are made and their path from origin to the status of historical archives.

The aim of the course is also to provide the student with theoretical and practical knowledge on how to access the source he found in the archive, how to make his analysis (internal and external characteristics of the document, stamps and seals, letter, transcription, etc.) and how to present it in written scientific form.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the types of archives, how they are organized, how they are created and what they serve
2. Reproduce a historical research plan for the work of searching for new historical sources within any archive
3. Classify archives catalogs and inventories
4. Reproduce internal and external analysis and transcription of historical sources, especially when it comes to manuscripts
5. Use archival material appropriately
6. Differentiate the analysis of documents of recent times from the analysis of medieval sources

Course Description

The goal of the course is to familiarize the student with deep learning techniques for understanding and creating natural language. The course consists of a recapitulation of logistic regression, artificial neural networks, recurrent neural networks, LSTM networks, autoencoders and transformers. The student will learn to implement all these architectures in HuggingFace, over selected data sets, as well as learn to work with the OpenAI functional interface.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply LSTM networks for Croatian language processing and text generation. Understand how supervised machine learning systems are used as unsupervised machine learning systems in processing sequential data (text, voice, recording)
2. Apply autoencoders for data preprocessing and transformation
3. Analyze transformers and their application to natural language processing and the creation of dialog systems, as well as to generate image descriptions.
4. None

Bibliotherapy in the Literature Class

172612

Lecturer

prof. dr. sc.
Davor Piskač

ECTS Credits	3.0

English Level L1

E-learning Level L1 (5%)

Study Hours

15
15

Course Description

Goals

1. Education from bibliotherapy as an educational method
2. Acquire the skills of noticing the causal-consequent processes between the thinking, emotions and actions of characters and / or actants in the literary work
3. Recognizing the way of thinking of characters and / or actants in a literary work
4. Identifying the emotions of characters and / or actants motivated by thinking
5. Understanding and defining the behavior of characters and / or actants motivated by emotions.
6. Recognizing and selecting relevant information
7. Developing insights into the subject matter
8. Encourage discussion
9. Communicating new values and attitudes
10. Creating awareness of similar emotional patterns of characters in literature
11. Recognizing a realistic and alternative solution with regard to the issue.

The theory of applied bibliotherapy suggests that quality literature gives a unique contribution to the perception of emotional-emotional relations, especially when interpreted by an educated bibliotherapist.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the mindset of the characters
2. Describe ways in which thinking motivates the emotions of characters
3. Describe events that are motivated by the emotions of the characters
4. Argue and generalize the contribution of characters in fictional life presented in a literary work
5. Identify similar patterns of thought-emotion-action in the real world and life

Study Programme Learning Outcomes

Croatian Latinity

Generic competencies

apply different methods to explain, comment and interpret all literary scientific works written in Latin or Croatian language
critically evaluate diverse descriptive and prescriptive beliefs and points of view on human nature and place in the world

Bioethics

201425

Lecturer

izv. prof. dr. sc.
Ivana Greguric

ECTS Credits	3.0
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

The final grade is a combination of grades from seminar work, oral examination and assessment of the quality of participation during the classes.

Course Description

Through the Collegium Bioethics students will analyse and evaluate the characteristics of scientific and technological progress within the social environment and the reasons for bioethics to be oriented in key dilemmas of bioethical challenges-from ethical aspects of use and abuse of power and authority, analysis of the deontological and utilitarian approach of certain bioethical cases of improvement and misuse of the human body and mind in technical and biomedical research.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and assess the characteristics of scientific and technological progress within the social environment and the reasons for the emergence of bioethics
2. Define and describe the fundamental concepts, persons, authors and works essential for the development of bioethics
3. Explain the fundamental circuits of bioethical problems and their social observations
4. Apply learned through the endeavour to protect life, nature or the environment
5. Define the key moral dilemmas and debates in contemporary bioethics
6. Apply principles of interdisciplinarity and pluri-perspectivism, and integrative thinking
7. Compare different philosophical and ethical teachings that influenced the creation and development of bioethics
8. Apply the techniques of argument analysis to critique the arguments of bioethicists and philosophers

Study Programme Learning Outcomes

Dual-major studies

Philosophy

Analyze main problems of contemporary philosophical disciplines

Integrate different models of philosophical thinking specific to individual philosophical disciplines into a unique ability of philosophical and critical thinking

Create written and oral presentations of complex academic and

non-academic content

Explain and evaluate different theoretical, methodological and practical concepts

Encourage the development of professional and scientific excellence and integrity and determine the need for lifelong learning and professional development

Chapters and Monasteries: Centres of Medieval Civilisation

202860

Course Description

In the framework of this course medieval chapters and monasteries are being studied. These were the institutions which were the leaders of the cultural, social, legal and religious life of the Hungarian-Croatian Kingdom. The main research objectives: institutional history, incorporation into the legal system, relations with the centres of the power, prosopography, influence on the society.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Indicate the main trends in the history of the chapters and monasteries.
2. Analyze the diplomatic, legislative and narrative church sources of the Middle Ages
3. Explain the development of the ecclesiastical institutions
4. Identify the most important canons, monks, friars and bishops Croatian Middle Ages.
5. Point out the development of the chapter and monasteries in Croatia during the Middle Ages.
6. Analyze comparatively Croatian and European ecclesiastical history

Childhood Pedagogy

226199

Lecturer

izv. prof. dr. sc.
Katarina Dadić

Course Description

The aim of this course is to train students for a critical discussion of childhood in relation to the concepts of culture and globalization from a domestic, international and comparative perspective, bearing in mind the perspective of the child himself. The course is aimed at familiarizing students with contemporary phenomena that characterize childhood (globalization, consumer environment, local culture, technology, media, migration, etc.) and focuses on the concept of childhood, which is approached from different perspectives (history of childhood, sociology of childhood, among with a significant emphasis on the pedagogical discourse) with the aim of developing a critical attitude towards different theoretical and social perspectives, as well as constructions of childhood.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic terms (childhood, pedagogy, culture) within the educational sciences
2. Describe and interpret the most important ideas, trends and periods in childhood development
3. Explain the place and role of childhood within educational sciences
4. Analyze theoretical discourses in relation to childhood and establish similarities, but also differences between them
5. Present the results of recent theoretical research in the field of sociology of childhood, history of childhood and pedagogy of childhood
6. Illustrate the acquired theoretical knowledge with examples from children's lives, taking into account the child's perspective
7. Interpret the functioning of the interdisciplinary concept of childhood, as well as strategies for its quality development within the framework of various social events and cultures

Clinical Psychodiagnostics

130561

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

Course Description

Students will understand the specifics of the classification and diagnostic of psychiatric disorders. They will develop the skills needed for clinical assessment: interviewing, observation and application of psychological instruments. They will know to write psychological report and procedures that follow after diagnosis.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the clinical symptoms of various psychological disorders
2. Plan a clinical assessment appropriate to the clinical symptoms
3. Select appropriate psychodiagnostic measures and instruments
4. Arrange the data collected with clinical assessment for writing psychological report
5. Write psychological report
6. Distinguish and classify the clinical symptoms of various psychological disorders

Study Programme Learning Outcomes

Psychology

Argue the similarities, differences and usability of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences

Choose models of psychological assessment and counseling in work with individuals, groups and organizations

Create professional and scientific reports based on empirical data using scientific literature and choose appropriate methods of data processing and reporting on the results of research and professional work

Support cooperation in interdisciplinary team work and create constructive professional relationships with experts of collaborating disciplines

Assess one's own oral and written professional communication skills and create complex communications and interdisciplinary cooperation in different professional environments

Assess the compliance of psychological practice with prescribed ethical principles of psychological activity in various areas of

Clinical Psychology Reports/Clinical Report Writing

286523

Course Description

The aim of the course is to train the students to write an independent opinion of the psychologist in clinical practice, with regards to the purpose and objective of the clinical assessment.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Select relevant information from clinical interviews, medical history and heteroanamnestic information, medical records and observations of client behavior
2. Write a quantitative and qualitative analysis of data obtained by means of applied psychodiagnostic methods
3. Summarize relevant information obtained by the above procedures
4. Create a case presentation on the basis of relevant information
5. Write formal and substantive findings, depending on the purpose and objective of the clinical assessment performed
6. Write an independent opinion of the psychologist, depending on the purpose and objective of the clinical assessment
7. Write findings of neuropsychological assessment of the client
8. Explain the importance of teamwork in the decision-making process on the client and further treatments

Study Programme Learning Outcomes

Psychology

General Competencies

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Create professional and scientific reports based on empirical data using scientific literature as well as select appropriate methods of data analysis and reporting on the results of research and professional work.

Forms of Teaching

» Seminar

» Seminars will be held once a week for two hours, accompanied by numerous practical examples and clinical case scenarios

» Vježbe u praktikumu

» Students will have the opportunity to talk to the patients

ECTS Credits 3.0

Study Hours 30

Grading

Attendance - exercises, active participation, individual writing task - finding. Final score is derived from data on exercise attendance and accomplishment of particular tasks - students need to write five independent findings graded with any of the passing grades. A large part of practical training takes place at worksites - at University Hospital Centre Zagreb (Department of Psychological Medicine and Department of Psychiatry)

at the Clinics, to conduct an interview, to get the test results and to independently produce the clinical report

Week by Week Schedule

1. Clinical report as the ultimate outcome of quantitative and qualitative analysis of the results of the clinical evaluation.
2. Formal structure of clinical written report.
3. Content of a clinical written report.
4. Basic elements of clinical written report.
5. Specifics of a clinical written report according to its goal and purpose of the clinical assessment.
6. Specifics of case study presentation.
7. Case study presentation - examples.
8. Specificity of children's and adolescences' psychological assessment and report writing
9. Specificity of writing report depending on the experts it is intended for.
10. Neuropsychological assessment and writing report.
11. Written report of psychological assessment - examples.
12. Written report of psychological assessment - a case study presentation and writing report - exercise.
13. Neuropsychological report writing - a case study presentation and writing report - exercises.
14. Selection of relevant information from clinical interviews, medical history and heteroanamnestic information, medical records and observations of the behavior of the client and the results of psycho-diagnostic treatment.
15. Final considerations - most frequent difficulties in practice.

Grading

Two partial written tests - up to 80% of the course grade (2x40%); group presentation (with discussion) - up to 20% of the course grade

Course Description

The aim of this course is to introduce students with the fundamental paradigm of cognitive psychology, the information-processing paradigm, and related approaches that empirically model human cognition and mind (including possible advantages and limitations).

The course seeks to build upon knowledge of specific cognitive subsystems covered at the undergraduate level of psychology studies (attention, working and long-term memory, intelligence), while also systematically introducing cognitive processes and structures not previously addressed (knowledge structures, mental representations, problem solving, decision making, inductive and deductive reasoning, artificial intelligence- AI). Each thematic unit will include a conceptual definition and an overview of the neural basis of the relevant cognitive subsystem or process, accompanied by a presentation of key theoretical models and recent empirical findings.

Through the preparation and oral presentation of seminar papers, as well as participation in small-group discussions, students will be encouraged to deepen their understanding of the application of cognitive psychology across other domains of psychological science.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and critically judge the basic paradigm of cognitive psychology and its basic approaches and methods
2. Distinguish and organize neural basis of cognitive processes and structures
3. Explain specific aspects and components of essential cognitive processes and structures
4. Compare basic features of specific cognitive processes and structures and by using this comparison to successfully distinguish them
5. Classify and combine empirical findings for specific theoretical model of the observed cognitive structure/process, and by using this evaluate the model
6. Arrange occurrence of the same cognitive constructs and structures in different cognitive processes and thereby construct logical and integrated presentation of mind in the frames of information processing paradigm
7. Identify the importance of cognitive psychology in other fields of psychology and related disciplines

8. Argue on controversial, but also conventional phenomena of cognitive psychology
9. Evaluate scientific research and proofs in the domain of cognitive phenomena

Study Programme Learning Outcomes

Psychology

Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour

Critically evaluate professional and scientific literature from psychology and related disciplines and create new scientific knowledge

Determine the neural and other biological mechanisms of specific psychological processes and behaviors, their developmental changes, protective and risk factors, and choose appropriate procedures for their examination and measurement

General Competencies

Appraise fundamental theoretical knowledge of psychology and its relationship with different branches of applied psychology.

Establish links between the theoretical models about the specific components of human cognition (attention, memory, language, problem solving, judgment and decision-making, cognitive development, consciousness) and the theoretical psychology and/or psychological practice.

Identify the neural and other biological mechanisms of specific psychological processes and behaviours, their developmental changes, protective and risk factors, and select the appropriate methods for their testing and measuring.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Week by Week Schedule

1. Introductory lecture: Course syllabus

2. Definition and historical development of cognitive psychology. Paradigms, research approaches and methods: Information processing - fundamental paradigm in theories and research of cognition; Research approaches and methods of cognitive psychology.
3. Attention: Definition (construct and neurological) and the role of attention in human cognition; Contemporary models and attention types; Measuring different aspects of attention
4. Working memory: Construct and neurological determination and the role of working memory in human cognition; Contemporary models of working memory and the relation with other cognitive subsystems; Measuring different aspects of working memory.
5. Memory structures and knowledge structures: Construct and neurological definition of memory; Types and structures of long-term memory; Organization of declarative and non-declarative knowledge
6. Mental representations: Visual representations, propositions and mental models: theory, phenomenon and research findings; Spatial cognition and cognitive maps
7. Language: Components and characteristics of language. Processes of language comprehension.
8. Problem solving: definition and steps; Good and bad structured problems; Factors which facilitate and hinder problems solving.
9. Decision making: definitions, models; Research findings and phenomena in decision making; Heuristics
10. Deductive and inductive reasoning: Deductive and inductive reasoning: definition and classification; Deductive conditional and syllogistic reasoning: logical basis and psychological phenomena; Inductive causal and categorical conclusion: logical basis and psychological phenomena.
11. Contemporary cognitive models of intelligence: Models from information processing approach to intelligence; Neural-based models of intelligence
12. Artificial intelligence and expertise: Artificial Intelligence - definitions and approaches; Expertise (definition, properties and relationships with problem solving)
13. Additional areas of cognitive psychology: Cognitive approaches to creativity
14. Feedback and course evaluation
15. Test.

Concepts and Theories of Media Effects

187977

Lecturer

doc. dr. sc.
Vanesa Varga

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours
15
15

Grading

100% exam. Exam with
15 questions. Eight
correct answers for 2 (8/9-
2, 10/11-3, 12/13-4, 14/15-
5). Orally examination for
best grade

Course Description

The aim of the course is to familiarize the students with the long history of the idea of the media influence, as well as with the theoretical perspectives of the scientific research on the impact of the media. Furthermore, to contribute to fundamental knowledge on the effects of the media on the society and individuals through analysis of theoretical approaches and schools, as well as insight into the underlying trends and theories.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use key scientific terminology for the study of the influence of the media.
2. Explain the complexity of the phenomenon of media influence.
3. Identify key patterns of media activity and media content.
4. Use the principles of methodological approach in empirical research of the impact of the media.
5. Explain the historical development of the empirical research of media effects.
6. Identify a power of different media contents and the power of possible impact to the individual as well as to the society.
7. Identify and explain concepts like media agenda, spiral of silence, frame.
8. Use the key scientific terminology in the theory of media effect.

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Define and describe the disciplines of contemporary communication studies, the history of their development and central problems, and use professional terminology in different areas of communication studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Coordinate discussions and provide explanatory comments on a

number of issues primarily of a communication nature, but also of a social, cultural or political nature

Use different scientific and research methods of social sciences and independently conduct scientific research in the field of communication studies and write scientific papers in a clear and organized manner

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize the needs and readiness for lifelong professional development

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Present different information and points of view and critically assess the credibility of claims, assumptions and arguments mediated through various media

Show the application of theoretical knowledge of communication studies

Distinguish practical applications of practical knowledge and skills from journalism and public relations

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

Develop oral and written communication skills

Develop competences in professional and interdisciplinary teamwork

Professionally apply acquired specialist, theoretical and practical knowledge in the sphere of media, i.e. journalism, public relations and scientific research in communications

General Competencies

Apply, classify and distinguish the professional terminology in various fields of communicology; Identify, distinguish, evaluate and critically assess media effects and their impact on the media audiences and society as a whole; Identify, evaluate and use a variety of scientific-research methods in the social sciences, which are applied in the field of communicology; Conceptually clearly present different information and perspectives, and critically assess the credibility of statements, assumptions and arguments mediated through a variety of media.

Course Description

The aim of the course is to develop knowledge about the demographic conditioning of overall development, along with the ability to analyze the issue in question, to demonstrate and prove its importance for Croatia by understanding the emigrant potential, and to shed light on the population-based development concept with fundamental approaches from social, humanistic and interdisciplinary scientific fields.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic theoretical approaches and concepts within the framework of contemporary international migration trends
2. Develop understanding of new approaches to international migration research
3. Define the causes/motives and consequences of contemporary international migrations in the area of reception and origin of migrants
4. Develop understanding of the spatial and temporal dynamics and specifics of international migration flows at the world and European level
5. State the flows, causes and consequences of large migrations to Europe
6. Explain the characteristics of external migration of the Republic of Croatia and the causes and consequences of contemporary migration movements of the population of the Republic of Croatia
7. Define the features of external migration of Bosnia and Herzegovina and the emigration of Croats from Bosnia and Herzegovina
8. Develop in students the skill of presentation and presentation in front of colleagues and the public, and the skill of participating in discussions

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Carry out analytical and scientific procedures of forecasting and modeling the future

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant

potential and the overall development of Croatia

Develop a scientifically independent opinion on demographic and emigrant issues

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Interpret data on Croatian and global population and emigration

Course Description

Contemporary sociological tradition and approaches to the society have their foundation in the attempts of resolving and explaining the dichotomy between modernity and tradition. Social processes of the new age (20st. and 21.st) are carrying the new challenges for explaining the society and social. According to that, the main goals of this course are as follow; introducing and analyze relevant theoretical concepts that explains the post-war (world war II) social state.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate concept of modernity and postmodernity
2. Analyze postmodernity as a term
3. Use theoretical concepts in the analysis and interpretation of the contemporary phenomena
4. Explain the basic premises of the contemporary sociological theories
5. Explain the different approaches to modernity in sociology

Study Programme Learning Outcomes

ECTS Credits	6.0

English Level L2

E-learning Level L1

Study Hours

Grading

1. Written exam / colloquia: 60% 2. Seminars: 25% 3. Oral exam: 15%

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems thorough the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic theoretical conceptions of contemporary sociological theories with the emphasis on their mutual dependencies.
2. Recognize specific and common problems of contemporary sociological theories.
3. Analyze systemic differences of modern theoretical constructions.
4. Evaluate and connect different theoretical approaches.
5. Recognize new social phenomena in the context of contemporary sociological approaches.
6. Compare different approaches to solving of theoretical approaches.
7. Use contemporary analytical tools in analysis of contemporary social phenomena.
8. Synthesize sociological theoretical debates.
9. Plan and write complex science papers.
10. Compare and oppose sociological theories.

Study Programme Learning Outcomes

Sociology

Analyze the social effects of certain globalization processes

Evaluate social impact of social changes in society

Implement an appropriate method to research social phenomena

Explain the role of sociology in society

Describe the elements of social dynamics

Recognize the generators of conflicts in contemporary society
 Recognize the elements of cultural/collective memory
 Apply knowledge of sociological theories in managing conflict situations
 Interpret certain social processes using knowledge of sociological theories
 Discuss about current geopolitical issues
 Understand the social mechanisms of interaction
 Compare different theoretical traditions in sociology

General Competencies

Upon successfully passed exam, students will be able to:
 Use the general knowledge of society and of social processes.
 Explain the key structural factors that are shaping society.
 Explain the social change using classical and contemporary sociological approaches.

Corporate Communications

125909

Lecturer

Zdeslav Milas,
v. pred. mr. sc.

Course Description

The aim of the Corporate Communications course is to build student understanding of the basic goals and forms of corporate communication in enterprises, to familiarise them with the specific features of corporate media relations, internal communication, public affairs, and investor relations. Attention is also paid to access to strategic communication with key corporate stakeholders. Finally, students will be able to compile a communication plan for a specific campaign.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Compare different corporate communication models
2. Identify goals and instruments of public affairs
3. Apply communication instruments in investor relations.
4. Choose goals and instruments in internal communication
5. Identify strategic communications problems of a enterprise
6. Design a corporate communication plan

Study Programme Learning Outcomes

Communication Studies

General Competencies

Apply knowledge of the basic concepts of public relations, primarily related to corporate communications and public relations. Define, explain and critically analyze the characteristics of public relations, primarily in the corporate sector. Apply skills and techniques of public relations. Effective self-fulfilling work tasks.

Corporate Demography

269807

Lecturer

izv. prof. dr. sc.
Tado Jurić

Course Description

The course aims to acquaint students with the importance of demographic data in business and to present several examples in which the private sector uses the same data for marketing purposes, population profiling, and location analysis.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the theoretical assumptions and motivation for the emergence of geodemography
2. Analyze or conduct a cluster analysis with the aim of profiling the population in small areas using domestic and foreign public and commercial databases
3. Explain the importance of verifying the results of geodemographic classification
4. Describe and explain trends in data science and GIS in different types of industries
5. Explain location factors of different types of industries and service facilities
6. Analyze or carry out network and location analysis for the needs of locating stores

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Use statistical, quantitative, graphic and geographic software packages

Carry out analytical and scientific procedures of forecasting and modeling the future

Interpret data on Croatian and global population and emigration

Mraović

Course Description

The goal of the course is to introduce the basic sociological, theoretical and practical concepts of social aware action - through the encouragement, tracking and evaluation of the conceptualization and implementation of student social awareness projects.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use the social theory in the development of social aware project
2. Describe the phases of the social aware project
3. Explain the possibility of realization of project
4. Define the project plan
5. Explain the division of the work in project
6. Evaluate project impact

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Describe the elements of social dynamics
- Recognize the generators of conflicts in contemporary society
- Apply knowledge of sociological theories in managing conflict situations
- Understand the social mechanisms of interaction

Correlation Practicum in the Methodology of Teaching

201262

Lecturers

doc. dr. sc. izv. prof. dr. sc.
Marjan Ninčević Katarina Dadić

Course Description

The aim of the course is to practically equip students for hospice in primary and secondary schools to which they are obliged to go during the course of this course, with particular emphasis on the subject's correlation between the subjects.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Evaluate the importance and necessity of correlative relationships across subjects.
2. Explain the principle that different teaching content requires a different methodological procedure both within its subject matter and with respect to individual subjects of the curriculum.
3. Practice correlation independently.
4. Write arrangements for the successful maintenance of correlation in teaching and learning.
5. Write a homeroom class Curriculum.
6. Prepare and practice quality parenting meetings
7. Judge the quality of the content and didactic-methodically prepared lessons.

Study Programme Learning Outcomes

Croatian Latinity

defend personal scientific insights and positions in concrete cases rationally and by providing valid arguments

Generic competencies

conceptually clearly present diverse information and positions. and critically evaluate the credibility of claims. assumptions and arguments presented through various media

cooperate successfully with diverse individuals and groups in discussions and in finding answers to various theoretical and practical issues

follow and adequately reproduce written and oral presentations of complex academic and non-academic topics

Dual-major studies

ECTS Credits	6.0
English Level	L0
E-learning Level	L1
Study Hours	15 30

Teaching Assistant
dr. sc. Martina Horvat

Grading

Students are evaluated for regular attendance and participation in discussions and analysis of classes (1 ECTS), Development of a Plan and program of the homeroom class and development of a Plan for one parent meeting (1 ECTS), Maintenance of two correlation lessons of 2x45 minutes (2 ECTS), and fulfillment of hospice obligations (2 ECTS credits).

Philosophy

Screening of student's work

ECTS ¹ Pohađanje nastave [EN]

ECTS ¹ Seminarski rad [EN]

ECTS ² Praktični rad [EN]

ECTS ² Ostalo 1. (upisati) [EN]

6
ECTS

Week by Week Schedule

1. Since this is a Correlation exercise in the subject teaching methodology, the lectures are kept to a minimum and refer only to the professor's brief instructions and comments and / or suggestions on the correlated teaching lessons on the subject, students' written lessons and the analysis of the hospitals held in schools.
2. Writing prepares and maintains two correlative teaching hours with topics of choice, but in accordance with the Curriculum of the chosen subject and the National Framework Curriculum. Namely, in this subject students of different study groups (history, philosophy, psychology, croatology, sociology, Latin language and literature...) are mixed with the aim of better and more successful realization of correlative lessons.

3. Students will be reminded of the importance of homeroom class lessons as a form of work that should aim to get to know students, their needs and problems, to get closer to students, and to provide a more complete educational work. Students are expected to create and present a Classroom Class Plan and Program
4. Students are expected to create and present a Homeroom Class Plan and Program
5. Elaborating the importance and necessity of family-school cooperation, or holding quality parenting meetings, with an emphasis on the need to encourage parents to be active participants rather than passive listeners when it comes to their children's upbringing and education.
6. Performing teaching praxis for students in primary or secondary schools (vocational and high schools). Teaching praxis is provided in such a way that the student is obliged to listen for 2 hours and to work 5 lessons.
7. Correlation exercises/practicum - maintaining correlation in teaching and learning process
8. Correlation exercises/practicum - maintaining correlation in teaching and learning process
9. Correlation exercises/practicum - maintaining correlation in teaching and learning process
10. Correlation exercises/practicum - maintaining correlation in teaching and learning process
11. Correlation exercises/practicum - maintaining correlation in teaching and learning process
12. Correlation exercises/practicum - maintaining correlation in teaching and learning process
13. Correlation exercises/practicum - maintaining correlation in teaching and learning process
14. Correlation exercises/practicum - maintaining correlation in teaching and learning process

Croatian Catholic Missions

238017

Lecturer

izv. prof. dr. sc.
Wolffy Krašić

Course Description

The aim of the course is to acquaint students with the role of Catholic missions in preserving Croatian national and ethnic identity in emigration. The connection between confessional and national identity maintains the continuity of Croatian identity, which requires constant confirmation specific to a foreigner in a certain social framework in an uncertain and undefined space between two identity bases.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the importance and significance of Croatian Catholic missions in emigration and their role in preserving the Croatian national identity among emigrants and their descendants.
2. Recognize the connection between confessional and national identity, which reflects the continuity of Croatian identity, especially in times when the homeland was ideologized and atheized society, and the national and national identity was threatened by the repressive state apparatus.
3. Explain the historical development of the Croatian foreign herd and its organizational structure.
4. Explain the purpose and methods of operation of the network of Croatian Catholic missions
5. Recognize the role of Croatian Catholic missions in preserving and building elements of Catholic and Croatian identity in the diaspora and transnational social spaces

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Develop the ability to terminologically understand demographic and immigrant terms in students

Grading

Regular attendance at classes. Independent reading of prescribed reading. Active teaching in the processing of prescribed reading. Independent production of colloquium essays. E-learning: short weekly assignments in an e-course.

Week by Week Schedule

1. Practical instructions for the study of children's literature.
Introduction to the study of children's literature. Concepts for children's literature and adolescent literature. An image of a child and an image of children's literature. Historical non / fixation of ideas.

Seminar: Interpretation of the image of a child in the canonical text of older Croatian children's literature. Example: Children's poetry of Krunoslav Kuten and Milka Pogačić (late 19th and early 20th centuries).

2. Children's literature as a literary system: connection with other literary and non-literary systems. Croatian children's literature field: publishing field, historical development of the publishing field, literary production, literary reception.

Seminar: Juraj Dijanić: Horvatzki decze priatel / Hižna knjižica (translated in 1796)

3. Croatian children's and adolescent literature as pedagogical activities? The production of meaning in the context of Croatian children's literature.

Seminar: Štefka Batinić: "Black Pedagogy" in Croatian children's magazines XIX. century. Example of Pobratim magazine (year 1891).

4. Croatian children's literature and stereotypes: monitoring of the communication system. The question of taboos in Croatian children's literature. Censorship or protection?

Seminar: Tito Bilopavlović: Peacock (1978). Jože Horvat: Waitapu (1984).

5. Croatian children's literature: A concise historical review. The concept of functional and non-functional books in the context of the history of Croatian children's literature. The older period of Croatian children's literature.

Seminar: Daniel Defoe: Robinson Crusoe (1719). Antun Vranić: The Younger Robinson (1796).

6. Croatian children's literature: A concise historical review. Recent period of Croatian children's literature and contemporary Croatian children's literature.

Seminar: Sanja Pilić: All the Best of Moms (1990). Anto Gardaš: Miron in a Pulpit (1999). Zoran Pongračić: Gumi-gumi (2001).

7. Types of children's literature: picture book. Pedagogical, psychological, psycho-analytical, narratological and semiotic approaches to the picture book.

Seminar: history of the Croatian picture book. Ivana Brlić-Mažuranić / Vladimir Kirin: Children's reading book on health (1927). Dušan Vukotić, Rudolf Borošak: The Cow on the Moon (1969). Svjetlan Junaković: The Great Book of Portraits (2007).

8. Types of children's literature: children's poetry.

Seminar: A canonical / anthological approach to Croatian children's poetry. Reading Croatian children's poetry (canonical authors).

9. Types of children's literature: a fairy tale. Authorship of a fairy tale. Extrinsic and intrinsic approaches to the fairy tale. Structural analysis of the fairy tale (Vladimir Propp). So called fairy tale biology and sociology (Max Lüthi). Philosophical analysis of a fairy tale (Andre Jolles). Psychoanalytic approach to a fairy tale (Bruno Bettelheim, Marie-Louise von Franz).

Seminar: Ivana Brlić-Mažuranić: Fisherman Palunko and his wife. (1916) Jagor. Toporko Lutonjica and nine mayors (1926). The story of Zorko Bistozorkom and happiness (1932).

10. Types of children's literature: a fantastic story. Animalistic. An introduction to fiction theory. Dieter Petzold: differentiating a fairy tale from a fantastic story. A brief introduction to children's literary animal science. Ana Batinić: In the realm of animals.

Seminar: Vladimir Nazor: White deer (1913). Božidar Prosenjak: The Wild horse (1989).

11. Types of children's literature: a children's novel. Adventure story / novel, novel / orphan story, novel / toddler / boyhood story. Adventure story theory. Berislav Majhut: Adventurer, orphan and children's company.

Seminar: Croatian children's novel until 1945. Ivana Brlić-Mažuranić: Čudnovate zgode šegrta Hlapića (1913). Mato Lovrak: The Train in the Snow (1933) or Družba Pere Kvržice (1933).

12. Types of children's literature: a children's novel. Continuation.

Seminar: Croatian children's novel of the second half of the 20th century. Ivan Kušan: Uzbuna na Zelenom vrhu (1956). Pavao Pavličić: Trojica u Trnju (1984) or Zlatko Krilić: Forbidden Doors (1985).

13. Types of children's literature: an allegorical story / narrative.

Seminar: Antoine de Saint-Exupery: The little prince (1943). Damir Miloš: The white clown (1988).

14. Types of children's literature: adolescent literature. Introduction to adolescent literature: structure, definition, ideas.

Seminar: Hrvoje Hitrec: Smogovci (1976). Sunčana Škrinjarić: Ulica predaka (1980). Nada Mihelčić: Bilješke jedne gimnazijalke (2005).

15. Concluding remarks and considerations. Evaluation of student work in the course. Student competency assessment.

Seminar: Analysis of e-learning results.

Croatian Cultural Tourism

213951

Lecturer

prof. dr. sc.
Vanda Babić
Galić

Course Description

To increase the knowledge, skills and understanding of the key and functional relationship between the structure and movement of the population and the economic, social and geographical legitimacy and processes of the emigrant economic, financial, academic, demographic and any other wealth and the overall development of Croatia.

To develop the ability to recognize, identify, clarify, implement and defend the need for the analysis of population and diaspora in service of societal and political decision-making.

To contribute to the development of personal traits of a student, particularly by developing a value system. This value system is defined by Croatian identity values within the framework of total population of Croatia without which it would be impossible to further analyse and focus the issues of demography and diaspora within academic and general frameworks.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop ability for correct and precise insights of cultural traces in accordance with appropriate social and political context.
2. Define fact overview of spiritual and material products of Croatian culture from ancient history until nowadays.
3. Explain synthesis of domestic cultural achievements and foreign phenomena found in that area as well as foundation of their correlations with Central European and Mediterranean cultural circles.
4. Develop ability for critical consideration of cultural heritage as a valuable tourist potential.
5. Develop interest for research Croatian emigration as an irreplaceable element for Croatian tourism development.
6. Relate with European cultural politics and develop ability of recognizing models optimal for implementation in specific geographical and cultural scope.
7. Define different features of local, regional and national cultural tourism models in Croatia.

Study Programme Learning Outcomes

Croatian Diaspora and Public Action

226937

Lecturer

doc. dr. sc.
Ozana Ramljak

Course Description

Course objectives: introduce students to the concept and basic theories of publics, public space and public opinion, as well as models of public action

with special emphasis on culture, politics and the media in the Croatian diaspora; to raise awareness of the public activities of the Croatian diaspora as a platform in a series of predetermined sociological, political and cultural assumptions, but also the broadest understanding of the nature of media; consciously and/or unconsciously articulates and builds on their own content and perception of themselves, Croatia, connecting and joining the new environment and the concept of Croatian development; develop students' critical thinking about issues of responsibility, ethics, influence and manipulation in the national and global environment in the context of the Croatian emigrant position in the public; to create the prerequisites for understanding, analysing, creating and acting within "media mediated reality" in the Croatian diaspora,

Croatia and in general; consider the role of the Church and other Croatian institutions in preserving the national identity of the Croatian diaspora; to introduce students to the institutions of the Croatian diaspora as well as their role and contribution.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the theoretical and methodological concepts of the public, public spaces as well as the legitimacy of the public emigrant space
2. Explain and analyse models of public activity in the Croatian diaspora
3. Explain the possibilities of applying established concepts in public action and their influence with respect to the emigrant context
4. Explain cultural, political and media processes in the Croatian diaspora
5. Create suitable content and communicate it in emigrant and other public spaces
6. Apply the scientific approach in explaining, analysing and synthesising the underlying concepts of emigrant public activity

Study Programme Learning Outcomes

ECTS Credits	2.0
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Attendance and discussion during class, seminar work, classroom and oral exam. In addition to classical ways of conducting lectures, seminars, exams, interviews, tests and the like, independent research works are specifically evaluated and, through mentoring, students are extended to the meet the academic requirements to be able to present and participate in scientific and professional meetings or write articles suitable for publication in appropriate journals. This particular aim is for students to develop their independence and to confirm their cognitive abilities. In this way, students can already publish and develop the required skills for future work and employment in research teams

dr. sc. Tamara Bodor

Course Description

The aim of the course is to get acquainted with the history of the development of Croatian media in different environments in the diaspora, to get acquainted with the circumstances in which they arose, the ways in which they developed or extinguished, the difficulties they encountered, etc. Special attention will be paid to specific circumstances in certain emigrant communities, also in Croatian autochthonous communities in the diaspora, because they are very different from each other.

To a large extent, it will be considered to what extent new technologies and media have influenced the development of emigrant media as a whole, but also the shutdown of individual publications. The role of the Croatian language in the development of the Croatian media in the diaspora from the 19th century to the present day will also be discussed, as well as the extent to which it is suppressed by the language of the majority community with new generations.

Students will independently research, discover and discuss new electronic media and new forms of media activity. They will consider the role of the media in the social life of emigrant and minority communities (cultural events and various other meetings, sports activities, schooling and education system, entrepreneurship, religious life, cooperation with the homeland, etc.).

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain why newspapers are an important medium for communities in the diaspora and how newspapers and public media activities can influence the social, economic and political inclusion of emigrants in the development concept of Croatia.
2. Reproduce the meaning of different genres within the press and public activities in the diaspora and their role in preserving the Croatian emigrant identity.
3. Recognize the importance of Croatian radio and television programs in the diaspora.
4. Recognize and accept as a new wealth the diversity of the media, portals, etc. of the Croatian emigrants and minority communities.
5. Analyze the advantages and disadvantages of the classical way of reporting and new technologies and media.

6. Reproduce basic cognitive, critical and analytical competencies related to classifications, typification, analysis, prediction and evaluation of the content of individual media and other patterns of public action in the diaspora.
7. Compare the basic differences between the press and other forms of public action on individual continents, as an additional emigrant wealth.
8. Recognize the basic differences between the press and other forms of public action in minority communities compared to those of emigrants.

Croatian Emigration and the Homeland War

238018

Lecturer

izv. prof. dr. sc.
Wollfy Krašić

ECTS Credits	3.0
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Course Description

Acquaint students with the basic causes, course and consequences of the Homeland War and, in this context, develop awareness of all kinds of contributions that the Croatian emigration made to the defense of Croatia and Bosnia and Herzegovina from Serbian armed aggression.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Acquisition of systematic knowledge about the causes, course of events consequences of the war
2. Acquiring knowledge about the role and difference I read the various types of contribution of the Croatian emigration to the defense of Croatia against Serbian armed aggression
3. Understanding that without unity and cooperation with the Croatian emigration, Croatia would most likely not be able to defend itself, and in any case it would suffer far greater casualties in terms of people and material goods
4. Awareness of the benefits and usefulness of social solidarity and togetherness
5. Acquiring knowledge about finding and working on original archival material
6. Acquisition of professional skills for independent research of the Homeland War, Croatian emigration and other topics from contemporary history in emigration and homeland

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Croatian Language Policy

226960

Lecturer

Mario Grčević,
prof. dr. sc.

ECTS Credits 3.0

English Level L0

E-learning Level L1

Study Hours 30

Grading

Teaching activity and knowledge of literature are assessed.

Course Description

The aim of the course is to acquaint students with the basic facts of Croatian language political history and language planning, with the basic concepts of language theory and linguistic typology, so they can analyze different models by which the existence of the Croatian language is typologically determined / described today. / standard language, Croatian as a separate language, Croatian as a variant of the Central South Slavic diasystem or Serbo-Croatian). The Croatian language situation will be compared with other more or less comparable cases. Students will then be introduced to the instruments of implicit and explicit language policy and trained to understand contemporary language policy developments and influences on the Croatian language and its language community. They will learn to interpret and evaluate the existence of extremely different language policies in recent Croatian history: on the one hand, the language policy aimed at preventing the profiling of Croatian as a special (literary and / or separate) language and on the other hand the language policy aimed at the opposite

Learning Outcomes

On successful completion of the course, students will be able to:

1. Introduce students to the Croatian language reality in the 19th, 20th and 21st centuries. century.
2. Explain the existence of philological schools (Zagreb, Zadar, Rijeka).
3. Distinguish the principles of standardization (language and spelling level).
4. Assess the impacts of state language policies on Croatian standardization processes.
5. Observe socio-political influences on language development.
6. Interpret the links between standardization, language planning and language policy.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Croatology

Define linguistic policies in relation to Croatian language

Explain and apply the facts of Croatian linguistic norms in

written and oral expression

Croatology

Grading

Students are expected to write and present an essay on a selected topic, and the level of information acquired is tested through an oral exam.

Course Description

This course enables students to detect historical and social parallels between the context of the works of Croatian latinists and an international base of ideas, themes and motives throughout the Renaissance and the Early Modern Ages. This pool of ideas is closely connected to the term of *Res publica litteraria* and the Latin language as *lingua franca* of Europe's culture and science. The students will learn of the reception of Croatian latinists' works outside of Croatian lands, as well as of their integration into contemporary European trends. This way the students - future teachers - will be able to appreciate and emphasise the importance of Latin in European and Croatian culture and identity.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Translate texts from all periods of Croatian Latinity and in every functional style
2. Analyse the text on a linguistical level and prepare it for educational purposes
3. Analyse the text on a literary-stylistic level and prepare it for educational purposes
4. Connect the text with classical and medieval tradition
5. Synthetise the knowledge of a latinistic work in the form of an essay
6. Contextualise a certain work according to the contemporary socio-political contexts and the author's biography
7. Teach about the latinistic works through a historical, literary or cultural aspect
8. Explain the manner of influence on the Croatian Latinists through the *Res publica litteraria*

Grading

At classes, active participation and preparedness are graded, at midterm exams understanding and contextualisation of the texts will be assessed. The final grade is given at an oral exam.

Course Description

The goal of the course is to make students familiar with literary genres of Croatian Latinity and their representatives. We will observe the development of the genres with regard to the medieval core of Latin literature in Croatian territory, as well as its interaction with contemporary phenomena in European context.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Translate a Latin text
2. Describe, distinguish, and recognise properties of Neo-Latin
3. Produce a linguistic commentary of a Latinist text
4. Produce a literary-stylistic analysis of a Latinist work
5. List main authors, works and historical development of Croatian Latinity
6. Describe literary and non-literary genres of Croatian Latinity

Study Programme Learning Outcomes

Dual-major studies

Croatian Latinity

Define and describe the contemporary disciplines of literature, linguistics and auxiliary historical sciences, the history of their development and their main problems

Integrate critical models inherent in literature and linguistic disciplines into the unique ability of philological thinking in the interpretation and processing of a text

Constructively encourage and promote the development of knowledge of Croatian Latinity based on the principles of scientific rationality, international recognition, and scientific excellence

Use various methods for explaining, commenting and interpreting all literary and scientific works written in Latin and Croatian

Recognize and interpret the common theoretical starting points of different linguistic disciplines, the science of literature as well as other disciplines

Interpret, evaluate, comment, translate and prepare works

and/or writings from the Croatian cultural heritage for print, especially Latin ones, in accordance with contemporary philological customs and requirements

Think interdisciplinary and respect different scientific methodologies and views on specific issues and problems

Class effort 20%, exam 60%, class attendance 20%.

Course Description

The aim of the course is to familiarize the students with the main developments in the Croatian linguistic normative efforts in 20th century, from the early 20th century to the early 90s. The students shall be taught to understand more recent normative tendencies.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain why in the first decades of the 20th century a mix of older and more recent ortographic and linguistic rules was observable in Croatian literature (that of the Zagreb school of philology and that of Croatian vukovci);
2. Identify language policy guidelines in the first Yugoslavia, NDH and the Socialist Federal Republic of Yugoslavia, and their relation to ideology;
3. Explain the facts from the diachronically and structurally oriented normative effort;
4. Describe the major grammatical handbooks in the 20th century
5. Describe the major ortography handbooks in the 20th century
6. Describe the major dictionaries of the Croatian language in the 20th century

Study Programme Learning Outcomes

Dual-major studies

Croatology

Critically relate to mastered content and argue your conclusions in written and oral form

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Croatology

General Competencies

Define the basic normative guidelines in recent Croatian linguistic history. Understand and explain the normative divergence in recent Croatian linguistic history.

Croatian Political History

202693

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

The aim of the course is to familiarize students with the main characteristics and guidelines within the Croatian political history and beyond in the 19th and early 20th century. The backbone of the course is to explain how the turbulent events such as annexations, wars and political movements have changed the policy and how each individual political community reacted to these changes and to identify how these changes have caused the emergence of dictatorship in political communities across Europe.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Show the underlying data of the Croatian political history of space and environment in the 19 and early 20th century.
2. Analyze trends and guidelines of Croatian politics during the period.
3. Compare Croatian politics of the 19th/20th. century in a European context.
4. Explain the differences in the perception of policy among the different social classes and their politics.
5. Describe the political systems that have shaped the Croatian and European political action.

Study Programme Learning Outcomes

Dual-major studies

History

Design discussions and provide comments that enable the explanation of a number of issues of a social, cultural or political nature

Present complex scientific and non-scientific content in written and oral form

Determine and justify the basic ideas and principles on which modern democratic societies rest

History

ECTS Credits	4.0

Croatian Spring: Intellectual and Political History 285735

Lecturer

doc. dr. sc.
Danijel Jurković

ECTS Credits	3.0

English Level L0

E-learning Level	L1

Study Hours 30

Teaching Assistant
Tomislav Brandolica, mag.
hist.

Grading

To be eligible for the oral exam, it is necessary to have a completed seminar paper.

Course Description

Students are introduced to the multilayered history of the multifaceted movement of the Croatian Spring from the mid-1960s to the end of 1971, with emphasis on its political, social, cultural, and intellectual aspects. Special emphasis is placed on understanding the Croatian Spring in the context of socialist Yugoslavia, including the relations between the federation and the republics, Party dynamics, and the role of the League of Communists of Croatia. The course encourages critical reflection on the role of intellectuals, students, and the media in shaping national and democratic aspirations within an authoritarian system. Students will analyze relevant literature and sources including memoirs, journalistic writings, archival material, and contemporary scholarly works, thereby developing the ability to interpret and draw well-founded conclusions on this subject. This strengthens competencies in understanding Croatian history within the broader context of socialist society, as well as historical literacy and methodological skills, particularly through the application of interdisciplinary approaches in interpreting modern political and social movements. The course also fosters an understanding of the long-term consequences of the Croatian Spring on Croatian political culture, national identity, and democratic processes in later decades.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the historical context of the development of Croatian political and intellectual history in the socialist period
2. Define the chronological sequence of key events, actors, and social groups associated with the Croatian Spring
3. Identify and describe the main political, cultural, and intellectual issues that determine the multifaceted nature of the Croatian Spring movement
4. Contextualize the Croatian Spring within the broader historical, ideological, and social framework of socialist Yugoslavia
5. Analyze the causes, course, and consequences of the Croatian Spring by employing historiographical methods and critical approaches
6. Critically interpret relevant historical sources and literature, including journalistic writings, archival material, memoirs, and scholarly works

7. Compare historical developments during the Croatian Spring with parallel processes within the Yugoslav federation
8. Assess the role and influence of various social actors – intellectuals, students, politicians, and the media – in shaping the movement and its reception

Study Programme Learning Outcomes

Dual-major studies

Apply the legal basis of the teacher's profession and the ability to interpret the related laws of the rights and obligations of employees of the educational institution

Apply different methodical principles and procedures in planning, conducting and evaluating teaching

History

Discuss with different individuals and groups with the aim of finding answers to various theoretical and practical questions

Formulate arguments for and against mutually opposing points of view

Critically judge and evaluate personal historical understandings and attitudes

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Connect and evaluate different historical points of view, including the points of view of Croatian historians in the context of the history of science

Apply established historical terminology and nomenclature

History

Discuss with different individuals and groups in order to find answers to various theoretical and practical questions

Formulate arguments for and against mutually opposing points of view

Critically judge and evaluate personal historical understandings and attitudes

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Connect and evaluate different historical points of view, including the points of view of Croatian historians in the context of the history of science

Apply traditional historical terminology and nomenclature

Consider the justification of various theoretical and practical proposals, taking into account the specificities of various areas of life and work environments

General Competencies

Upon successful completion of the course, students will be able to:

- Explain the historical context of the development of Croatian political and intellectual history in the socialist period.
- Define the chronological sequence of key events, actors, and social groups associated with the Croatian Spring.
- Identify and describe the main political, cultural, and intellectual problem areas that determine the multifaceted nature of the Croatian Spring movement.
- Contextualize the Croatian Spring within the broader historical, ideological, and social framework of socialist Yugoslavia.
- Analyze the causes, course, and consequences of the Croatian Spring by applying historiographical methods and critical approaches.
- Critically interpret relevant historical sources and literature, including journalism, archival material, memoirs, and scholarly works.
- Compare historical developments during the Croatian Spring with parallel processes within the Yugoslav federation.
- Assess the role and influence of different social actors—intellectuals, students, politicians, and the media—in shaping the movement and its reception.
- Produce an independent seminar or research paper that demonstrates the ability to interpret sources, construct arguments, and apply scholarly methods.

Croatian Woman in Emigration

238015

Lecturer

izv. prof. dr. sc.
Wolffy Krašić

Course Description

The objectives of the course are:

Getting to know the basic issues of contemporary global and regional female migration.

To define the key conditioning of women's migration and emigration decisions.

Consider the meaning and role of Croatian emigrants in the integration processes of the receiving countries as well as their role in the socio-cultural space.

To analyze the phenomenon of feminization of migration in contemporary Croatian society.

Understanding the correlation between the actions of women and the preservation of Croatian identity in emigration.

Get to know the life and work of Croatian women in the diaspora such as: Ruža Bajurin, Julienne Bušić, Ivona Dončević, Queen Katarina Kosača-Kotromanić, Zinka Kunc, Nedjeljka Luetić Tijan, Helen Merill (Jelena Ana Milčetić), Adela Milcinovic, Blessed Marija Propetoga Petković, Nada Kesterčanek Vujica, Milka Trnina, Milka Vukušić and others.

To acquaint students with the importance of women in emigration in the demographic and overall development of Croatia

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic terms and prepositions regarding women migration
2. Explain different migration theories and how to apply those theories on women migration
3. Identify and qualify different factors of woman population migration
4. Recognize and analyze the most important conditions of women migration
5. Explain social, cultural and economical forms of women migration
6. Distinguish different aspects of women migration in social, political, cultural and economical context

Teaching Assistant
dr. sc. Tamara Bodor

Grading

Attendance and discussion in class, conducted research, seminar paper and oral exam. In addition to the classic methods of monitoring through lectures, seminar papers, exams, interviews, tests and the like, independent research papers are especially valued and through mentoring they are raised to the level of possible student performance at scientific and professional gatherings or publication in appropriate journals. This is a special motive for students in developing their independence and in confirming their cognitive power. In this way, students can already publish during their studies and create assumptions for future work and employment in research teams.

7. Define the status of woman in diaspora in case studies

Study Programme Learning Outcomes

Demography and Croatian Diaspora

- EN ishod -Conduct relevant research on the Croatian resident and emigrant population

Develop knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Develop a scientifically independent opinion on demographic and emigrant issues

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Course Description

To introduce the students to the basics of literary science. Adopt a scientific approach to literary texts. Investigate the recent Croatian literature in correlation and references to the European literary space.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and formulate key concepts of national literature in relation to the chronologically corresponding European literary flows
2. Identify individual literary works of the national literature in the context of European and world literature;
3. Explain and independently process selected topics in literature and literary science;
4. Write a short functional academic paper in the field of literary science (biographical lexicon unit, annotation, introductory text, etc.).

Study Programme Learning Outcomes

Dual-major studies

Croatology

Interpret and critically judge literary text

Describe and classify the legacy of other cultures within Croatia

Recognize and classify Croatian writers of European and world references

Recognize, explain and single out the characteristics of children's literature

Croatology

General Competencies

Formulate and describe the key concepts in national literature in relation to the chronologically corresponding European literary flows. Identify individual literary opuses of the national literature in the context of European and world literature.

Screening of student's work

Course Description

Course objectives:

- develop in student scientific knowledge on the importance of Croatian diaspora in general, with particular emphasis on the Federal Republic of Germany
- equip students to understand the difference between and the meaning of migration disparities and particularities using the case study of Croatian population in Germany
- provide students with the overview of the important role Croatian diaspora plays in processes and of the correlation between diaspora and entire development
- teach students skills which will enable them to explore, identify, and define diaspora-related terminology, categories, and laws using the case study of Croatian diaspora
- encourage students to undertake independent research study on the relation between diaspora and development of Croatia and Germany
- encourage students to apply standard and specific methods and techniques for research of the correlation between Croatian diaspora in Germany and development
- help students become aware of the value of Croatian diaspora in general and in particular of Croatian diaspora in Germany · encourage students to apply forecast models for development and spatial models, using case studies of Croatian diaspora in Germany
- explain the potential migration, re-emigration, and immigration conditionality that applies to the development of Croatian geographical territory and society
- equip students with skills that will enable them to understand, elaborate, and model future diaspora and developmental issues, patterns, conditions, and consequences in relation to Croatian diaspora and general Croatian population in Germany
- help students develop scientific knowledge on the recent emigration and its potential to cause vulnerability of fundamental systems in Croatian society and territory
- provide students with the knowledge on wealth and value of Croatian diaspora in Germany

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the demographic and migration theoretical and methodological concept and system on the example of the Croatian emigration in FR Germany
2. Explain the logic and functional organization of the expatriate development potential on the example of the Croatian emigration in FR Germany
3. Explain the general and regional concept of the organization of emigration using the example of Croatian emigration in FR Germany
4. Explain the strategic importance of emigration using the example of Croatian emigration in Federal Republic of Germany

5. Define the importance of emigration in Croatia's development concepts

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Develop the ability to terminologically understand demographic and immigrant terms in students

Develop a scientifically independent opinion on demographic and emigrant issues

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Cultural History and Latinity: The Middle and Early Modern Ages 200546

Lecturer

doc. dr. sc.
Lucija Krešić
Nacevski

ECTS Credits 3.0
English Level L0
E-learning Level L1
Study Hours 30

Grading
The final grade will be based on active participation in classes and taking a written exam

Course Description

Introducing students to the peculiarities of Latin in the context of wider cultural history. Connecting cultural aspects of social and literary productions with the Latin heritage of the Middle and New Ages. Enabling students to contextualize and genre-determine the corpus of literary creation in Latin

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe connection of Croatian Latin works with those created in the vernacular
2. Analyze the Latin text with regard to contemporary political and social circumstances and the person of the author
3. Describe the connection of the context of the origin of the work of Croatian Latinity the context of the origin of the work in Latin in the literatures of other nations
4. Explain the heritage of Croatian Latinity
5. Explain the context of the origin of a particular Latin work
6. Analyze the literary and cultural reception of a Latin work

Study Programme Learning Outcomes

Dual-major studies

Croatian Latinity

Conceptually clearly present different information and viewpoints and critically assess the credibility of claims, assumptions and arguments mediated through various media

Coordinate discussions and provide comments on a range of issues of a social, cultural or political nature

Use various methods for explaining, commenting and interpreting all literary and scientific works written in Latin and Croatian

Monitor and adequately reproduce written and oral presentations of complex academic and non-academic content

Recognize and interpret the common theoretical starting points of different linguistic disciplines, the science of literature as well as other disciplines

Recognize and interpret the interdisciplinary nature of historical research, connecting its individual segments with corresponding segments of other humanities and social sciences

Promote and defend the fundamental ideas and principles on which modern democratic societies rest

Cooperate with different individuals and groups in discussions and finding answers to various theoretical and practical questions

Clearly and innovatively present complex academic and non-academic contents in written and oral form

Course Description

The development of democratic change as a precondition and basis for the emergence of the modern Republic of Croatia is an important topic for understanding contemporary Croatian society. This period spans more than ten years during which Croatia has moved beyond the administrative unit within socialist Yugoslavia, which has recognized states independently and internationally. Due to the importance of these topics, it is necessary to define a logical connection between the actors, both domestically and internationally, who influenced their independent Croatia, as well as its structure as a parliamentary democratic state. For this reason, this course aims to fill the historiographic void that is now insufficient for them on this important topic, and the students of the graduate study of history provided basic information through which they understood the character of the society in which they live.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic problem of interpretation of historical development
2. Describe and discuss about the context of historical events on micro and macro level
3. Describe, connect and be able to conclude things about certain events.
4. Describe and include interdisciplinary way of thinking about certain historical theme
5. Analyze certain conclusions about historical themes and events
6. Describe and define particular importance of certain historical period

Demographic Aspects of the Greater Serbian aggression in Croatia 1990-1998

239760

Course Description

The aim of the course is to present the theoretical and methodological concept of considering the demographic causes and consequences of the Serbian aggression on the Republic of Croatia, as well as the historical laws that conditioned that aggression.

ECTS Credits 2.0

English Level L0

E-learning Level L1

Study Hours 15

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop knowledge about events in the period 1990-1998. from the demographic aspect within the theoretical understanding of the population
2. Explain the difference between aggression, civil war, occupation, military coup and the like, and especially the demographic consequences of aggression in the Republic of Croatia
3. Define the meaning of wartime demographic destruction in spatial processes, relations and security issues
4. Develop the ability of independent scientific research related to learning the truth about the aggression against the Republic of Croatia
5. Explain the specificity of branch methodologies for considering aggression against the Republic of Croatia
6. Develop the application of demographic projection methods related to direct and indirect war losses
7. Explain the war conditioning on later demographic processes and trends

Grading

Regular attendance of classes, discussion in class, independent preparation of the seminar assignment and passing of the written exam

Study Programme Learning Outcomes

Demography and Croatian Diaspora

- EN ishod -Conduct relevant research on the Croatian resident and emigrant population

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop a scientifically independent opinion on demographic and emigrant issues

Interpret data on Croatian and global population and emigration

Dual-major studies

Demographic Projections and Simulations

269704

Course Description

To equip students with knowledge and understanding of population movement projections and the importance of social and economic carriers

activities in the creation of macroeconomic policies.

To develop skills, abilities and competences for the successful execution of projections and simulations on the basis of which it is possible to direct and plan

necessary economic, social, educational, health and other capacities

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the dynamics of age-structured and interactive populations
2. Describe the indicators of aging and how to evaluate them
3. Prepare data for population projection
4. Predict population development using the cohort-component approach
5. Define scenarios in terms of aggregate indicators
6. Explain the basics of microsimulation models

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Use statistical, quantitative, graphic and geographic software packages

Carry out analytical and scientific procedures of forecasting and modeling the future

Interpret data on Croatian and global population and emigration

Dual-major studies

Week by Week Schedule

1. Matrix record
2. Modeling and simulation of nonlinear populations
3. Programming in R statistical software
4. Dynamics of interactive populations
5. Generation of fertility and mortality scenarios using the Brass method
6. Projection of households
7. Projections of selected countries
8. UN projections
9. Croatian population projections

Course Description

To introduce the field of demographical research and methods which are used in demographical analysis

To explain a interrelation of the demographical components

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the causality of social and territorial processes
2. Explain the processes of social structures in the functional organization of territory
3. Describe the importance of development of all social systems and their interrelation
4. Detect the existing social and territorial disproportion
5. Use a different research methods

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Analyze the social effects of certain globalization processes
- Evaluate social impact of social changes in society
- Discuss about current geopolitical issues
- Describe demographic processes
- Describe the elements of social dynamics
- Recognize the elements of cultural/collective memory
- Recognize the generators of conflicts in contemporary society
- Apply qualitative and quantitative data processing programs

Demographic Revitalization Patterns

253187

Lecturer

izv. prof. dr. sc.
Monika
Komušanac

Course Description

- introduce students to the basic analytical and substantive concept of demographic revitalization
- explain to students the basic principles and principles of demographic revitalization
- explain to the students the complexity of the revitalization basis in accordance with the scope of the revitalization and the systems in which it is implemented
- explain to students the specifics of individual revitalization patterns and possible limitations
- train students to apply standard analytical and special methods and techniques in considering revitalization
- encourage students to apply previous interdisciplinary knowledge in terms of defining spatial issues
- train students to understand, explain and predict future demographic trends and conditions
- develop students' awareness of the importance of the population as a fundamental factor in guiding overall development

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic terminologies - substantive and analytical understanding of revitalization and revitalization patterns
2. Explain the basic approach, principles and principles of demographic revitalization
3. Distinguish basic quantitative and qualitative projection (demographic) patterns
4. Define the connections and relations of the population towards other systems and the role of the population in functional planning and organization of space
5. Develop the ability to independently define revitalization measures, taking into account all spatially conditioned specificities

Course Description

The goal of the course is to train students for the proper application of scientific methods and techniques in research, and the application of theoretical and practical knowledge acquired during studies in the preparation of a complete demographic study.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain demographic data using appropriate statistical methods
2. Differentiate between different statistical methods for the needs of demographic data analysis
3. Apply theoretical and practical knowledge acquired during studies
4. Explain different data
5. Explain the results of the research

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Course Description

Getting to know with scientific basics of the course, methods of demographic research and techniques statistical data analyzing.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define demography as social science.
2. Classify the basic demographic indicators.
3. Explain the changes in the population structures.
4. Explain types of population policies.
5. Explain the basic types of demographic data sources
6. Explain the fundamental social causes of demographic change

Study Programme Learning Outcomes

Communication Studies

Sociology

- Analyze the social effects of certain globalization processes
- Describe demographic processes
- Describe the elements of social dynamics
- Organize data to create strategies
- Recognize the generators of conflicts in contemporary society
- Recognize the elements of cultural/collective memory
- Apply qualitative and quantitative data processing programs
- Evaluate appropriate ways of intervention of a certain social issue
- Discuss about current geopolitical issues
- Develop and select different problem-solving strategies

General Competencies

Combine the society related data in the coherent written and oral form.

Outline the opposing viewpoints and alternative hypotheses in the various social issues.

Outline causal relationships between the social phenomena.

Demonstrate the social impacts of the public policies.

Organize the teamwork with co-workers from various disciplines, of different attitudes or value orientations.

Developmental disabilities of Children and Youth 214006

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Introduce students to the developmental difficulties of children and adolescents that clinical psychologists most often encounter in practice.

To enable students to acquire skills and abilities to determine the suitability of modern therapeutic techniques based on appropriate theoretical background and skills and abilities to plan, evaluate and evaluate the achievement of treatment

children and adolescents.

Understand, evaluate and know the processes and dynamics of working with children and adolescents and their parents.

Develop sensitivity and personal capacity to work with children and youth with developmental disabilities.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and distinguish the most common developmental issues of children and adolescents.
2. Identify and assess the appropriate use of modern counseling and psychotherapeutic techniques with regard to developmental issue
3. Assess one's own ability to apply certain techniques and their interpretation critically
4. Evaluate critically one's own professional role in working directly with people
5. Assess the importance of specific communication skills for successful psychological practice
6. Apply previously learned theoretical knowledge to psychology practice

Course Description

The aim of the course is to introduce students to a systematic review of scientific concepts and insights in the field of developmental psychology, with particular emphasis on phenomena during adolescence, and to enable students to connect theory with practice: handling developmental concepts and applying knowledge about the specificity of adolescence in organizing classes, monitoring student progress and understanding of individual differences in physical and mental development.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the developmental traits and achievement of each student in the psychomotor, intellectual, emotional and social fields
2. Design facts and rules for class according to the developmental achievements of classes and individuals
3. Identify deviations and reasons for deviations of the individual student from the average developmental path
4. Support healthy learning and motivation in accordance with an understanding of Positive Psychology
5. Develop constructive cooperation and parents' counseling regarding student development
6. Support quality social relationships in the classroom and develop the classroom as a learning community

Development in the Social Context

53863

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Course content enables students to interpret human behavior and development through a multidimensional approach. Students will be introduced to a biochemical approach to the study of the impact of physical, social and psychological environments on the development of children and young people and to differentiate the environmental impacts from the individual characteristics of the individual to interact in everyday life. Through critical analysis of various development theories and contemporary research, students will gain insight into the outcomes of environmental factors at different levels of the ecological model of development and to compare the behavior of children and young people with regard to the social and cultural context. Students will distinguish between the risk of microsystems, mesosystems, exosystems and macrosystems on parenting behavior and the development of children and young people. Students will analyze the importance of different ecological systems on the behavior of children and young people, the consequences of transition and one system to the other, and the impact of the quality of interconnection between systems, especially in the social context. Students will discuss seminar work and workshops independently, but also in groups, to discuss the relation of the subjects with the basis of developmental, social and clinical psychology, review their own attitudes and gain the experience of presenting scientific research in a group context. Also, students will be constantly encouraged to reflect on the possibilities of developing and implementing preventive and intervention programs and strategies for children and young people at all levels of the ecological model.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the main concepts and propositions of the biochemical theory of human development
2. Define and differentiate the paradigm of research in developmental psychology with regard to whether they can make conclusions about the impact of the interaction between the characteristics of a person and different levels of environmental context on individual development
3. Interpret the Macro and Exposure Implications of the System to Functioning and Possibilities of Development of Poor and Socially Excluded Families, Children and Youth, as well as other vulnerable and marginalized social groups

ECTS Credits	4.0

E-learning Level	L1
Study Hours	30
	15

Teaching Assistant
Jelena Flego, mag. psych.

Grading

Conditions for taking the course include the signature of the teacher as proof of regular attendance (maximum of 3 absences), the seminar paper and the oral exam are presented and presented. Evaluation of seminars and presentations is up to 40% of the total grade of the course, 10% of the final grade is obtained on the basis of the regularity of the lessons, and the remaining 50% of the marks are the points that can be collected on the final oral exam, which corresponds to the volume, content and the corresponding ECTS points course throughout the semester. The oral exam includes essay-type questions, and the assessment of the content of the course, its presentation, as well as the correlation with the related degree and the critical reflection on the topics of the seminar will be evaluated.

4. Describe the main demographic, economic and social changes in the contemporary society that affect the life of young people in transition at an adult age
5. Analyze and compare how the research results of child and youth development in the Croatian social context can be related to the results of foreign research and to explain the intercultural similarities and differences
6. Demonstrate ethical sensitivity for working with people and collaborating with experts beyond their own social context and suggest interventions to encourage positive development
7. Develop ethical sensitivity in working with people and collaboration with experts outside their own social context.

Study Programme Learning Outcomes

Psychology

Assess one's own oral and written professional communication skills and create complex communications and interdisciplinary cooperation in different professional environments

Evaluate theoretical concepts and scientific knowledge in the creation of interventions and programs that will improve the living conditions and development of individuals, families, organizations and communities

Evaluate the impact of the social context and social changes on human development and the behavior of individuals, groups and systems

Value the importance of lifelong professional development

General Competencies

Students will:

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Evaluate the impact of social context and social changes on human development and behaviour of individuals, groups and systems.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specificities of their environmental and societal context.

Development of psychological research

201199

Lecturer

izv. prof. dr. sc.
Maša Tonković
Grabovac

Course Description

The aim of the course is to improve the students' competence in the field of research methodologies and to train students for the effective application of acquired skills and knowledge in professional work. Through successful fulfillment of obligations, the students will improve their competence in the selection and application of research methods and design, will improve their skill of independent planning, organizing and carrying out research, and scientific reporting. An important aim of the course is to improve the competencies of analytical and critical thinking of students.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the research process and the principles of planning, organizing, and conducting a research project.
2. Analyze and evaluate the strengths and limitations of different approaches to conducting a research project.
3. Identify and assess key elements, risks, and challenges in the planning and implementation of research.
4. Apply acquired knowledge to independently plan, organize, and conduct a research project.
5. Design a comprehensive project plan and develop concrete research procedures. Demonstrate research results in written and/or practical form.
6. Demonstrate research results.
7. Evaluate research projects (own or others').

Study Programme Learning Outcomes

Psychology

Analyze and, in the context of European and/or world research on the subject phenomenon, interpret and evaluate the findings of similar psychological research conducted in Croatia.

Create basic and/or applied psychological research and construct and metrically evaluate psychological measuring instruments

Create professional and scientific reports based on empirical data using scientific literature and choose appropriate methods of data processing and reporting on the results of research and professional work

ECTS Credits 4.0

English Level L0

E-learning Level L2 (5%)

Study Hours
30
15

Grading

Student Obligations / Requirements for Course Credit: Regular attendance at classes Defense of the research proposal (group oral presentation in class during the first half of the semester) Participation in the implementation of the joint research project and group analysis of one research problem (presentation of research results is not mandatory, but provides an opportunity for students to be exempted from the oral exam) Oral Examination – verification of learning outcomes through individual presentation of the research results analyzed during the semester. Students may be exempted from the oral exam by collecting points during the semester (maximum 100 points). Points are earned through different activities: Class attendance: Presence (up to 2 absences): 5 points Active participation: up to 5 points Defense of the research proposal: 50 points Oral exam / presentation of research results: 40 points Final grades are determined based on the total number of points earned: 51–63 → sufficient (pass) 64–75 →

Critically evaluate professional and scientific literature from psychology and related disciplines and create new scientific knowledge

good 76–87 → very good
88–100 → excellent

Critically judge multivariate statistical procedures with regard to their limitations and to the satisfaction of theoretical assumptions in concrete application situations

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures and the specifics of their environmental and social context

Assess one's own oral and written professional communication skills and create complex communications and interdisciplinary cooperation in different professional environments

General Competencies

At the level of the Master's program in Psychology, this course serves to systematize and consolidate knowledge in the areas of research methodology, statistics, multivariate methods, and courses related to psychological measurement. Particular emphasis is placed on developing competencies for integrating and applying this knowledge in real professional and research contexts.

With regard to the specific intended learning outcomes, it is expected that the course will enhance students' ability to:

Learning Outcomes - Intellectual (Cognitive) Skills

Explain the research process and the principles of planning, organizing, and conducting a research project.

Analyze and evaluate the strengths and limitations of different approaches to conducting a research project.

Identify and assess key elements, risks, and challenges in the planning and implementation of research.

Learning Outcomes - Practical and Generic Skills

Apply acquired knowledge to independently plan, organize, and conduct a research project.

Design a comprehensive project plan and develop concrete research procedures.

Demonstrate research results.

Evaluate research projects (own or others').

Connection of Learning Outcomes and Grading

The project assignment will assess learning outcomes 1–4.

The oral examination will assess all learning outcomes.

Deviance at the Workplace

269857

Lecturer

prof. dr. sc.
Irena Cajner
Mraović

Course Description

The main objective of the course is to improve students' understanding of the diversity of deviant behaviour in the workplace. The course provides an overview of the most significant theoretical concepts and the most recent empirical data in the field of deviance at the workplace. Students will be given the opportunity to familiarize with different theoretical, empirical and practical approaches to deviance in the workplace in different countries. The course enables students to understand, manage and further explore different forms of deviant behaviour at the workplace.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe typologies of deviance at the workplace
2. Explain the key issues in understanding patterns of destructive and constructive deviance at the workplace
3. Explain the key issues in explaining patterns of workplace incivility
4. Explain the key issues in explaining patterns of substance abuse at the workplace
5. Explain the key issues in explaining deception and theft at the workplace
6. Explain the key issues in explaining corporate deviance, corruption, scams, fiddles and sabotage at the workplace
7. Explain the key issues in explaining patterns of violence at the workplace
8. Identify the major personal and organizational predictors of deviance at the workplace

Study Programme Learning Outcomes

Sociology

- Create a project proposal
- Organize data to create strategies
- Apply knowledge of sociological theories in managing conflict situations
- Understand the social mechanisms of interaction

Didactics

96487

Lecturer

doc. dr. sc.
Marjan Ninčević

Course Description

The objective of the course is to acquaint students with didactics as the theory of learning and teaching, didactics research subjects throughout history and today, didactic epistemology, foundations of didactics in social sciences and humanities, and above all didactic teaching procedure structured through planning, delivery, and evaluation.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret correctly the basic concepts of didactics as a science
2. Analyze the historical development of didactic thought (Ratke, Komensky, Rousseau, Basedow, Pestalozzi, Trapp, Herbart, Ziller, Humboldt, Willmann, Weniger, Montessorri, Otto, Steiner and Scheibner)
3. Interpret social-scientific and humanistic foundations of didactics
4. Compare didactic theories
5. Explain the scientific method of didactics
6. Evaluate the social-scientific and humanistic nature of the subject matter of didactics (intrinsic and extrinsic genesis of human individuality, ethical and social-theoretical frameworks of the human being, partial theoretical foundations)
7. Interpret the main characteristics of didactic epistemology (didactic theories, scientific methods of didactics, didactics and its references, different ways of defining didactics)
8. Apply the theories of didactic procedure in teaching (planning, delivering and evaluating the teaching process)

Study Programme Learning Outcomes

Grading

Students personally register their attendance at every lecture, they check the record the following time, and lead discussion with the professor and the colleagues (20% of the final grade). Students also conduct individual additional literature research on a specific didactic problem, report on it in front of all the students and lead a discussion about it, participate in seven similar projects of other students (30% of the grade) and take a written exam (15 questions) based on obligatory literature (50% of the grade).

Interpret and critically judge literary text

Critically relate to mastered content and argue your conclusions in written and oral form

History

History

Psychology

Sociology

Modify the explanations and basic terminology of sociological tradition to target population

Sociology

General Competencies

At the level of the programme, Didactics makes students capable of:

Correctly interpreting of teaching and learning as the principal contents of Didactics and explain while is Didactics considered in the modern didactical literature as the theory of teaching and learning.

Week by Week Schedule

1. Contemporary teacher training in Croatia: Who can perform teaching jobs? What competences must a teacher have? How to acquire the needed competences? An overview of teacher training at Studia Croatica of the University of Zagreb. Theoretical aspect. Practical aspect.
2. Teacher's environment (principal, vice principal, School Council, colleagues, students, personnel, the Ministry of education, local authorities, parents, university, place, city/town, scientific associations, teaching associations, cultural organizations, economy, unions, school owners, political parties).

3. Three centuries of didactic thought. Two to three lessons are dedicated to acquainting students with the reasons behind the appearance of didactics as a science and practice and introducing fifteen most representative theoreticians and their ideas, used in contemporary didactics when reflecting on didactic theory or organizing didactic practice (see 2.4.).
4. Didactic etymology from the earliest times until today. Things in common: teaching activity, persons who teach, necessary qualifications for teaching, main contents that are taught, teaching media used, teaching environment, learning as the student's main activity.
5. Contemporary understanding of didactics (theory of teaching and learning, theory of school teaching, theory of educational contents, theory of learning processes management, theory of applying psychological knowledge in teaching and learning).
6. The basic concepts of didactics (teaching-tuition, learning, upbringing, education, school, dialectic interaction).
7. Didactic forms (didactic triangle, didactic quadrangle, didactic polygon).
8. Teaching forms (teaching oriented towards obtaining new knowledge, skills, educational attitudes, and open teaching structure).
9. Contemporary teaching principles (differentiating/individualizing, motivating, visualizing/realism, activation/self-engagement, structuring teaching contents, multiform perspectives, goal-orientedness, ensuring success).
10. Routine teaching planning (individual concept of the teacher, using professional literature, knowing the course/subject curriculum, a big number of textbooks, intellectual dialogue with colleagues, attending seminars, whence the teaching planning procedure can start, turning programme objectives into teaching objectives).
11. Time and shape of the working group (the role of place in teaching, the student's sitting place in the classroom – students oriented towards the teacher or working in groups, the U organization, individual work, students facing each other (one group versus the other), students in the circle, direct discussion).
12. Self-testing of the teacher (sufficient familiarity with the course and programme curriculum, precise formulation of the teaching unit objective, using sources and other materials, knowing the competences and experience of the students, envisaging various activities, personal conduct quality, equal activation of all students, the issue of attention, interest, and motivation, feedback information, special needs of students).
13. Realization of teaching (dialectic interaction, teaching objectives must become the student's objectives, personal activity of the teacher, flexible reactions, managing student attention, routine use of social forms of work, the rules of teacher behaviour, directions in cases of class obstruction).
14. Homework (evaluating homework, the role of homework, the types of homework, the objectives of homework, differentiating according to interests, competences, inclination, learning tools, environment, timing, and the ways of assigning homework).
15. Three types of teachers (authoritative, indolent, democratic - with the view of the following criteria: space, objective choice, activities, relationships, participation, evaluation).

Digital activism

285535

Lecturer

doc. dr. sc.
Vanesa Varga

ECTS Credits 5.0

English Level L0

E-learning Level L1

Study Hours 30

Grading
Kolokviji i pismeni ispit.

Course Description

Digital activism involves online mobilization of citizens, dissemination of ideas, gathering members, collecting donations, promotion, strengthening social movements, organizing protests, communicating with citizens, collecting signatures, informing and exposing social injustices. The course explores the relationship between the internet, social movements and social change. The theoretical framework consists of the theory of social movements and the theory of the networked society. The aim of the course is to provide insight into the analysis and criticism of strategies, methods and tools of online activism using examples from around the world and Croatia.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the role of the internet in social movements and change.
2. Explain key concepts such as mobilization, video activism, hashtag activism, etc.
3. Recognize examples of digital activism.
4. Analyze digital campaigns and what strategies were used to attract public attention.

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Coordinate discussions and provide explanatory comments on a number of issues primarily of a communication nature, but also of a social, cultural or political nature

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize the needs and readiness for lifelong professional development

Recognize and interpret with arguments the interdisciplinary

nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Present different information and points of view and critically assess the credibility of claims, assumptions and arguments mediated through various media

Show the application of theoretical knowledge of communication studies

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

Develop oral and written communication skills

Develop competences in professional and interdisciplinary teamwork

Develop social skills

Command of professional English

Digital Sociology

227716

Lecturer

doc. dr. sc.
Erik Brezovec

Course Description

To familiarise students with the basic terms and concepts of digital sociology in the context of Croatian and world society.

To conduct an analysis of the process of digital transformations of classical patterns of sociability and to develop new methodological-conceptual sociological tools.

To enable students to understand and apply theoretical concepts and empirical analysis of digital-technological and social context of society.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify digital processes in society itself
2. Recognize the basic characteristics of digital processes in the Republic of Croatia and in the world
3. Apply the acquired knowledge to understand the relationship between the technological and social dimensions of the digital age
4. Explain the positive and negative effects of the digitalization process at the global and national level
5. Describe the consequences of the digital transformation of social space
6. Explain the basic theoretical postulates of digital sociology
7. Relate the process of digitalization and the transformation of modern social communities

Study Programme Learning Outcomes

Sociology

Evaluate social impact of social changes in society

Explain the role of sociology in society

Interpret certain social processes using knowledge of sociological theories

Course Description

Diploma thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;

6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

Study Programme Learning Outcomes

History

- Integrate critical models of thinking belonging to historical sciences into the unique ability of historical thinking
- Use methods of explanation and interpretation of historical
- Critically judge various descriptive and normative beliefs and attitudes
- Support the further development of the historical profession based on the principles of scientific rationality, international recognition, scientific excellence and integrity
- Present complex scientific and non-scientific content in written and oral form
- Apply traditional historical terminology and nomenclature
- Prepare and present written and oral presentations of complex academic and non-academic content
- Conduct scientific research in the field of historical sciences and write historical papers in a clear and organized manner

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

Diplomatic and Consular Affairs

269809

Lecturer

izv. prof. dr. sc.
Kristian Turkalj

Associate Lecturer

Ivica Kinder,
nasl. doc. dr.
sc.

Course Description

To acquaint students with the main issues of diplomatic and consular activity and to consider the international regulations governing these relations.

Develop students' knowledge of how international relations function.

To analyze in more detail the international legal sources of diplomatic and consular affairs.

To train students for involvement in work in diplomatic and consular affairs and to acquaint students with basic protocol rules

behavior in the international environment.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the diplomatic-consular conditionality of the development of relations and the ability to analyze the issue in question through the understanding of emigrant potential
2. Explain basic diplomatic and consular terms and their use in professional-scientific and public explanation of the issue
3. Analyze the key relationships between the emigrant and resident population through diplomatic-consular activities
4. Describe the demographic and emigrant issues in the context of diplomatic and consular activity
5. Explain the basics of consular protection of EU citizens

ECTS Credits 2.0

English Level L0

E-learning Level L1

Study Hours
15
15

Grading

Attendance and discussion in class, preparation and defense of the project and oral exam. In addition to the classic methods of monitoring through lectures, seminar papers, exams, interviews, tests and the like, independent research papers are especially valued and through mentoring they are raised to the level of the student's possible performance at scientific and professional gatherings or publication in appropriate journals. It is a special motive for students in developing independence and in confirming their cognitive power. In this way, students can already during their studies publish and create assumptions for future work and employment in research teams.

6. Describe the differences between institutes that regulate diplomatic affairs and those that regulate consular affairs
7. Analyze the international legal norms that regulate diplomatic and consular affairs with regard to the extensive relations of the Republic of Croatia with other countries, its emigration and membership in international organizations

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Develop the ability to terminologically understand demographic and immigrant terms in students

Develop a scientifically independent opinion on demographic and emigrant issues

Dual-major studies

Week by Week Schedule

1. Introductory lecture
2. Sources of international law and rules for concluding international agreements
3. Subjects of international law
- 4.
5. A man in international law
6. Protection of the rights of ethnic minorities - protection of Croatian minority communities
7. Diplomatic relations
8. Diplomatic negotiations
9. Diplomatic privileges and immunities
10. Diplomatic missions
11. Diplomatic correspondence
12. Diplomatic protocol
13. Consular relations
14. Consular functions
15. Final lecture

Economic History of Croatian Modern Society

202692

Lecturer

izv. prof. dr. sc.
Vlatka Vukelić

ECTS Credits	4.0

English Level L1

E-learning Level L1 (10%)

Study Hours 30

Grading

Assessment will be based on active participation in class, and on written and oral exam

Course Description

The basic aims of the course are to acquaint students with the basics of economic history, its development on European soil from the Middle Ages to modern times, and in this context to explain the economic opportunities on the soil of Croatia. In doing so, the aim is to develop constructive causal and critical development of how the global European economic conditions directly influenced the development of the economy in the territory of the Croatian lands. Particular emphasis will be given to the structural period of Croatia's modernization within the state structures in which Croatian countries were located.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic historiographic thesis about economic history of middle and early Modern Times
2. Describe and analyze the most important processes that had shaped economic history of Europe
3. Explain the cause-and-effect relationships of official policies and economic development, both in Europe and in the territory of Croatian countries,
4. Describe and compare the development processes of (for example) agriculture, crafts or trade in different historical periods
5. Describe and analyze the economic doctrines that were popular in certain historical periods and explain their reflection on the European and Croatian historical space
6. Describe and analyze the peculiarities of the development of economic thought in Croatia in relation to European and American examples

Study Programme Learning Outcomes

Dual-major studies

History

History

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Connect and evaluate different historical points of view, including the points of view of Croatian historians in the context of the history of science

Present complex scientific and non-scientific content in written and oral form

Prepare and present written and oral presentations of complex academic and non-academic content

Conduct scientific research in the field of historical sciences and write historical papers in a clear and organized manner

Consider the justification of various theoretical and practical proposals, taking into account the specificities of various areas of life and work environments

Determine and justify the basic ideas and principles on which modern democratic societies rest

Economic Potentials of Emigrants

269804

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

To develop in the participants knowledge about the economic potential of the Croatian emigration.

To analyze in more detail the specificities of individual emigrant communities according to their basic characteristics.

Consider the regional-economic aspect of emigration.

Acquaint students with the overall migration cycle: departure, stay, interest in returning, economic integration and return.

Consider the reference circle of European countries; net migration-economic balance.

Train students for inclusion in the work of migration-economic institutions.

Train students to preserve, strengthen and develop the economic links of the Croatian emigration with Croatia.

Establish a model of economic development in Croatia according to the potential of Croatian emigration.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define economic migration cycles and trends and migration areas according to economic parameters
2. Explain the economic role of immigrant communities in countries of immigration
3. Analyze the economic cooperation between Croatia and countries with a significant Croatian emigrant population
4. Recognize the potential of expanding the scope of activities of Croatian institutions that serve or can serve for the economic/investment connection of emigration with Croatia
5. Recognize areas of possible branch economic connection between emigration and Croatia
6. Prepare appropriate studies and reports in the function of economic connection between expatriate and domiciled Croatia

Study Programme Learning Outcomes

ECTS Credits	3.0

English Level L0

E-learning Level L1

Study Hours

15
15

Teaching Assistant
dr. sc. Natasha Kathleen
Bužić

Grading

Attendance and discussion in class, report and oral exam. In addition to the classic methods of monitoring through lectures, seminar papers, exams, interviews, tests and the like, independent research papers are especially valued and, through mentoring, they are raised to the level of the student's possible performance at scientific and professional gatherings or publication in appropriate journals. This is a special motive for students in developing their independence and confirming their cognitive powers. Thus, students can already publish and create assumptions for future work and employment in research teams

Demography and Croatian Diaspora

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Carry out analytical and scientific procedures of forecasting and modeling the future

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Dual-major studies

Screening of student's work

Educational Psychology

53870

Lecturer

Andreja Brajša-
Žganec,
nasl. prof. dr.
sc.

Course Description

Familiarize students with the knowledge of the individual characteristics of students that can affect their academic achievement, theories and approaches to teaching and learning, theories of motivation and learning motivation, desirable features and characteristics of teachers, and how to create stimulating environment for teaching and learning in the school educational context. Throughout the course, students will become familiar with different theories, approaches and methods in the field of educational psychology and will be able to apply them in educational work.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe how individual students characteristics affect their academic achievement.
2. Describe and differentiate special needs students.
3. Compare and evaluate different theories and approaches to learning.
4. Describe and compare different motivational theories.
5. Differentiate and compare methods of teachers work evaluation.
6. Differentiate and compare methods of grading and evaluating students work.
7. Describe stimulating environment for teaching and learning.
8. Describe and argue desirable teacher characteristics for successful teaching.
9. Synthesize existing knowledge and apply them in designing workshops.

Study Programme Learning Outcomes

Psychology

Critically judge the outcomes and consequences of one's own professional work, as well as one's own professional competences, knowledge and skills in accordance with changes and standards of the profession and national and European regulations

Assess one's own oral and written professional communication skills and create complex communications and interdisciplinary cooperation in different professional environments

Self-evaluate responsibility, autonomy and initiative in work

ECTS Credits 4.0

English Level L1

E-learning Level L2

Study Hours
30
15

Teaching Assistant
dr. sc. Ana Petak

Grading

Students are evaluated continuously during the semester. The final grade is based on following elements: two tests or final written exam (80 points), and group assignment (20 points). In total, students can gain 100 points. A minimal requirement for passing the course is 60 points, with a condition of passing both tests during the semester or a final written exam with a minimum of 50%.

General Competencies

Appraise fundamental theoretical knowledge of psychology and its relationship with different branches of applied psychology.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Learning Outcomes - Intellectual (Cognitive) Skills

Critically evaluate theoretical knowledge from core areas of psychology and its relation to various branches of applied psychology.

Evaluate the impact of social context and societal changes on human development and the behavior of individuals, groups, and systems.

Learning Outcomes - Practical and Generic Skills

Apply acquired knowledge in work within school and educational contexts.

Connection of Learning Outcomes and Grading

Explain and critically evaluate various theories, methods, and approaches in the field of educational psychology.

Screening of student's work

Electoral Systems

238021

Lecturer

izv. prof. dr. sc.
Monika
Komušanac

Course Description

To enable students to acquire basic knowledge and develop knowledge about election laws, systems and models.

To consider the legality of Croatian national and local elections and elections for the European Parliament and their reflections on the organization of the Croatian political system and society.

Show and confirm the application of democratic standards in elections in Croatia.

By comparing the Croatian electoral system and the electoral systems of European countries of developed democracies, realize the need for harmonization.

Draw a correlation between the electoral system and the overall development of Croatia.

Familiarize students with electoral units and ways of their selection.

Point out the uniqueness of Croatian constituencies, especially the 11th and 12th constituencies.

To notice the existing discrepancy between electoral units and the demographic conditions of their allocation.

Acquaint students with the need to harmonize the voter list with the permanent population in Croatia.

To develop in students the ability to scientifically approach choices, projections, potentials and probabilities.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic election systems and models
2. Analyze electoral processes, determination of electoral units, electoral competition, voting and conversion of votes into mandates
3. Explain the importance of electoral systems as fundamental elements of representative democracies
4. Describe the political system, electoral models and the constitutional and legal order of the Republic of Croatia

ECTS Credits	2.0

English Level L0

E-learning Level L1

Study Hours 30

Grading

Regular attendance at classes, attendance at at least 12 teaching units, writing a seminar paper and taking a colloquium

5. Explain the largest electoral systems and electoral models in the world
6. Argue the need to include the Croatian emigration in the political life of Croatia

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Propose political and legal solutions based on scientific research of demographic and emigrant content

Compare the values of different methods used in expert-scientific research on population and emigration in planning and development services.

Elementary Greek

200545

Lecturer

doc. dr. sc.
Lucija Krešić
Nacevski

Course Description

The basic objective of the course is learning the basics of the Greek language (alphabet, correctly reading, writing and accenting of words in the Greek language, the basics of phonology and morphology). The goal is that students can observe the basic characteristics of the Greek text and gain competence for independent translation of simple sentences and short texts from Greek to Croatian language.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the Greek nominal and verbal forms and describe their rules of flexion,
2. Distinguish simple syntactic phenomena and compare them with those of the Latin language,
3. Apply the knowledge to read the Greek alphabet
4. Apply accent rules and write in Greek on a computer using the Antioch program,
5. Use reference Greek aids (encyclopedias, dictionaries, grammar, digital databases).

Study Programme Learning Outcomes

Dual-major studies

Croatian Latinity

Integrate critical models inherent in literature and linguistic disciplines into the unique ability of philological thinking in the interpretation and processing of a text

Monitor and adequately reproduce written and oral presentations of complex academic and non-academic content

Recognize and interpret the common theoretical starting points of different linguistic disciplines, the science of literature as well as other disciplines

- EN ishod -Use standard professional and scientific terminology in contemporary linguistics and literary science

Clearly and innovatively present complex academic and non-academic contents in written and oral form

Emperors, heretics and monks: shaping late antique and early medieval Christianity

284993

Lecturer

prof. dr. sc.
Mladen
Tomorad

ECTS Credits 3.0

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistant
dr. sc. Marko Marina

Grading
The grade will depend on the activity in the discussions and the quality of the seminar paper.

Course Description

This course focuses on the study of Christianity from its origins in the 1st century to its institutional consolidation in the 6th and 7th centuries. Particular emphasis will be placed on conflict, charisma, and the establishment of religious authority. The starting point is to consider the emergence of Christianity within the framework of Second Temple Judaism and the religious pluralism of the Greco-Roman world. Students will critically analyze the processes through which internal diversity – doctrinal, ritual, and social – was gradually controlled, disciplined, and often suppressed through theological polemics, ecclesiastical power, and imperial support. Key topics of the course will include the problematics of the formation of the categories of “orthodoxy” and “heresy,” the role of martyrdom and persecution in the construction of identity, and the emergence of Christian asceticism and its relationship to both ecclesiastical and imperial centers. Students will have the opportunity to actively work with a variety of primary sources (Latin and Greek), including hagiographic texts, heresiological debates, council decisions, and imperial edicts. In addition, students will become familiar with relevant secondary literature (Croatian, English and/or French) in order to better approach the interpretation of sources.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify key individuals and acts that have shaped the development of Christianity from the 2nd century until the 7th century
2. Explain the diversity of late antique and early medieval Christianity and the way in which this diversity influenced the formation of the categories of “heresy” and “orthodoxy”
3. Interpret key sources using contemporary research approaches and methodologies
4. Explain the relationship of church centers towards marginal phenomena within the Christian world
5. Explain the role that Christianity played in the process of the birth of the European and Mediterranean Middle Ages

6. Distinguish polemical strategies and rhetorical labeling from a reflection of the reality of relationships within late antique and early medieval Christianity

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Formulate arguments for and against mutually opposing points of view

Integrate critical models of thinking belonging to historical sciences into the unique ability of historical thinking

History

General Competencies

At the end of this course, students will be able to:

- a) Understand the role that Christianity played in the process of birth of the European and Mediterranean Middle Ages
- b) Distinguish polemical strategies and rhetorical labels from the reflection of reality of relations within late antique and early medieval Christianity
- c) Identify and critically evaluate key moments that contributed to the transformative process that was the late antique

Study Hours	30

Course Description

This course introduces students to the key stages in the development of the European Union and the functioning of its principal institutions. It builds on students' prior understanding of the main narratives and approaches to public policy analysis of the EU as a political and economic community of 27 member states.

Delivered in cooperation with the European Parliament Liaison Office in Zagreb, the course combines lectures with hands-on field activities. Students will participate in workshops, lectures, and international conferences at the "Experience Europe" Centre, gaining direct insight into the work of EU institutions, the EU legislative process, strategies aimed at building resilience, the adoption of integrated approaches to conflict and environmental crises, the priorities of the European Parliament, and EU programmes targeting youth.

Teaching is largely based at the "Experience Europe" Centre. As part of the course, students will also take part in an interactive role-playing exercise in which they assume the role of Members of the European Parliament and engage in a simplified legislative procedure based on a series of fictional policy proposals.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the emergence of the European Union and its institutions
2. Demonstrate and interpret data related to the institutions of the European Union
3. Demonstrate and interpret data related to the institutions of the European Union
4. Analyze Europe within the framework of the sociology of everyday life.
5. Identify EU public policies
6. Analyze the aspects of the European Union's common challenges.

Study Programme Learning Outcomes

Dual-major studies

Apply different methodical principles and procedures in planning, conducting and evaluating teaching

Sociology

Analyze the social effects of certain globalization processes

Describe the elements of social dynamics

Evaluate appropriate ways of intervention of a certain social issue

Sociology

Analyze the social effects of certain globalization processes

Describe the elements of social dynamics

Interpret certain social processes using knowledge of sociological theories

Understand the social mechanisms of interaction

General Competencies

Analysis and interpretation of social phenomena.

Specialized analytical and research skills.

Learning Outcomes - Intellectual (Cognitive) Skills

Identify EU public policies.

Analyze the aspects of the European Union's common challenges.

Learning Outcomes - Practical and Generic Skills

Apply practical knowledge of the EU through simulations and debates.

Participate in simulations and exercises within interactive workshops.

Connection of Learning Outcomes and Grading

Learning outcomes:

- Analyze Europe within the framework of the sociology of everyday life.
- Identify EU public policies.

Linking learning outcomes with assessment methods:

- Simulations, fieldwork, workshops, written assessments.

Evaluation and Measurement of Personality

102939

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Introduce students to different ways for measuring and assessing personality. Students will get insight into possibilities for measuring and assessing personality. They will be introduced to instruments for measuring and assessing personality, their characteristics and applications.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Evaluate the quality of instruments for personality measurement and assessment
2. Choose the instrument for personality measurement and assessment in line with desired purpose
3. Recognize the importance of decisions during instrument construction
4. Create and carry out all phases of instrument construction
5. Evaluate benefits and limitations of construction and translation of instruments
6. Explain and understand methodological and psychometric challenges of personality measurement and assessment

Study Programme Learning Outcomes

Psychology

Create basic and/or applied psychological research and construct and metrically evaluate psychological measuring instruments

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.
Select models of psychological assessment and counselling in working with individuals, groups and organizations.
Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

ECTS Credits	3.0
English Level	L1
E-learning Level	L1
Study Hours	30

Teaching Assistant
dr. sc. Ana Petak

Grading

Students will have to show in written exam understanding of the basis of personality measurement, knowledge about measurement instruments presented during the course, and will have to be able to compare them and choose which one is adequate for specific purpose of personality measurement and assessment. Grade: written exam 50%, written report 50%

Learning Outcomes - Intellectual (Cognitive) Skills

Explain and understand methodological and psychometric challenges of personality measurement and assessment.

Learning Outcomes - Practical and Generic Skills

Create and carry out all phases of instrument construction.

Connection of Learning Outcomes and Grading

Evaluate the quality of instruments for personality measurement and assessment.

Screening of student's work

1.5
ECTS Pismeni ispit [EN]

1.5
ECTS Seminarski rad [EN]

3 ECTS

Forms of Teaching

- » Predavanja
- » Metodичke vježbe

Week by Week Schedule

1. Methods of personality measurement and assessment
2. Purpose of personality measurement and assessment
3. Introduction to methods and instruments for personality measurement: projective techniques
4. Analysis of results of projective techniques
5. Introduction to methods and instruments for personality measurement: questionnaires 1
6. Analysis of results questionnaires 1
7. Introduction to methods and instruments for personality measurement: questionnaires 2
8. Analysis of results questionnaires 2
9. Defining the construct for instrument construction
10. Choice of measurement construct and assignments
11. Item formulation
12. Pilot version of the instrument
13. Data collection
14. Analysis of the instrument characteristics
15. Test

Factor Analysis

57113

Lecturer

Toni Babarović,
nasl. prof. dr.
sc.

Course Description

Understanding the theoretical basis of factor analysis; independent analysis and evaluation of research papers in which some of the factor analysis methods have been applied; creating the research designs where factor analysis can be used as an adequate method of processing the collected data; independent practical application of factor analysis in psychological research using the SPSS software package.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain statistical and mathematical logic of exploratory factor analysis.
2. Assess the statistical requirements for the implementation of factor analysis.
3. Create a suitable research design for applying the factor analysis.
4. Analyze the data suitable for analysis through exploratory models of factor analysis using the SPSS software package.
5. Explain the results obtained from exploratory factor analysis within the frame of the posed research problem.
6. Explain the statistical parameters obtained from the analysis.
7. Assess the quality of the data processing produced by exploratory factor analysis in research.
8. Assess the range and reach of conclusions based on the application of exploratory factor analysis in research.

Study Programme Learning Outcomes

Psychology

Create basic and/or applied psychological research and construct and metrically evaluate psychological measuring instruments

Critically evaluate professional and scientific literature from psychology and related disciplines and create new scientific knowledge

Critically judge multivariate statistical procedures with regard to their limitations and to the satisfaction of theoretical assumptions in concrete application situations

Outline the historical development and theoretical approaches in

Famous Croats Worldwide

226933

Lecturer

doc. dr. sc.
Monika Bališa

ECTS Credits	2.0
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Course Description

Introduction to notable Croats throughout history, mainly spanning the period until the end of the First World War, who globally distinguished themselves, their people and homeland. The course analyses distinguished Croats on an international level who are

not tackled in the following mandatory courses: Croatian Minority Communities, Prominent Croats in Emigration, Croatian Women in the Diaspora, and Croatian Political Emigration.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and become acquainted with the facts, biographies, ideals, work and importance of individual Croatian greats outside the Motherland from the Middle Ages to the present day.
2. Explain and accept their existence as a Croatian contribution to human civilization and Croatian identity in Croatia and the world
3. Identify, explain and learn about the formation of public perception about famous Croats
4. Explain the overall social context of the actions of famous Croats in the world
5. Explain, understand and predict future opinions and the importance of their actions and sacrifices
6. Analyze the life and work of some famous Croats in the world as part of the research work.
7. Explain the historical and political conditioning of emigration, activities and appreciation of Croatian notable figures

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Field trip 2

238023

Lecturer

izv. prof. dr. sc.
Wolffy Krašić

ECTS Credits 2.0

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistant
dr. sc. Tamara Bodor

Grading

Attendance and discussion in the field, colloquium, written exam and seminar work. In addition to the classic methods of monitoring through lectures in the field, colloquia, seminar papers, exams, interviews, tests and the like, independent research papers are especially valued and through mentoring they are raised to the level of possible student performance at scientific and professional meetings or publication in appropriate journals. This is a special motive for students in developing their independence and in confirming their cognitive power. In this way, students can already publish and create assumptions for future work and employment in research teams.

Course Description

The objectives of the course are:

1. Acquaint students directly in the field with organizations of the Croatian emigration, Croatian diplomatic and consular missions and other forms of organization
2. Develop students' awareness of the need to get to know Croatian Catholic missions, embassies, consular offices, Croatian emigrant societies and Croatian families directly.
3. Train students to distinguish between the meaning of indirect and direct research
4. To acquaint students with the meaning of emigration in spatial processes and relationships through direct field observations and a stay in a family expatriate environment, a working stay in Croatian representative offices and other similar institutions
5. Train students in the field of immediate discovery, recognition and definition of immigrant terms, categories and legality
6. Train students for independent scientific and research work in emigration areas and emigration institutions, societies, communities and the like
7. Train students to apply standard and special methods and techniques in field research on emigration
8. To explain to students the specifics of branch field methodologies and ways of recognizing spatial reflections of emigration
9. To acquaint students with the development of certain Croatian emigrant areas using concrete examples and stays in Croatian Catholic missions
10. Develop in students the application of field methods of emigration research, from surveying to interviewing
11. To explain the conditions of emigration and regional development to students living abroad

Learning Outcomes

On successful completion of the course, students will be able to:

1. Understanding spatial logic in fieldwork with the application of scientific technology
2. Mapping emigrant contents, processes, connections and relationships on the ground
3. Application of cartographic methods and projections in considering, clarifying and conveying spatial laws
4. Independent search and selection of literature and data sources
5. Drafting a proposal for a research assignment
6. Drafting a research study or an elaboration of professional scope

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Propose political and legal solutions based on scientific research of demographic and emigrant content

- EN ishod -Conduct relevant research on the Croatian resident and emigrant population

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Develop the ability to terminologically understand demographic and immigrant terms in students

Dual-major studies

ECTS

Week by Week Schedule

1. Introductory considerations
2. Geographical, demographic and migratory regional theoretical concept - considered applicability directly in emigration

3. Scientific approaches and field studies of emigration
4. Recognition of spatial factors of emigration by staying in the field
5. Space as the primary framework of emigrant events - immediate field aspect
6. Field scientific methods - applicability, operability and direct testing
7. Regional leveling and field observation of immigration legalities at missions, societies, representative offices and similar
8. Spatial mobility of emigration - field research on migration
9. Field consideration of the primary conditioning of emigration - a new way of life through personal acquaintances and experiences
10. Spatial emigrant potential-fundamental field research interest
11. Space, population, border emigration - immediate field measurement of identity values
12. Mapping, surveying and interviewing of the Croatian expatriate population by departure and stay in emigration
13. Field measurement of the order of magnitude of the meaning of time and intensity of emigration
14. Complementarity of field and other research
15. Direct and immediate testing of the results of the field study of Croatian emigration

Forensic Psychiatry

139805

Lecturer

Nadica Buzina,
nasl. izv. prof.
dr. sc.

Course Description

Forensic psychiatry is designed to familiarize students with the basic principles of expert evaluation and treatment of offenders.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize different theories, paradigms and methodological approaches in psychology
2. Recognize specific mental processes and behaviors
3. Recognize the influence of societal changes onto the behavior of a person
4. Recognize and evaluate consequences of forensic assessments
5. Recognize the value of a psychologist in forensic psychiatry
6. Evaluate specific aspects of personality and its forensic meaning
7. Evaluate the role of a psychologist in forensics
8. Recognize the value of a team evaluation

Forensic Psychology

53786

Lecturer

Ines Sučić,
nasl. prof. dr.
sc.

ECTS Credits	3.0
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

Class attendance and class participation will make up to 15% of the grade, preparing, writing and presenting report will make 15% of the grade, participation in research elaboration and conduction 30% of the grade, and the written exam will make a final 40% of the grade.

Course Description

To describe and give students the overview of key concepts, models and theories in forensic psychology. To explain and to compare different models and theoretical approaches in explanation of specific forensic phenomena, and to critically evaluate them. To relate theoretical frameworks to research findings and practical work. To foster application of gained knowledge in scientific and practical work.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Arrange concepts into models and theoretical frameworks in the field of forensic psychology
2. Evaluate contribution of psychology, law, policing, and psychiatry concepts to the forensic psychology field
3. Evaluate concepts, definitions, models and theories in the field of forensic psychology
4. Relate theories and models in forensic psychology and to relate them to the every-day experiences and psychological practices
5. Evaluate usefulness and applicability of different theoretical models in explanation of different types of antisocial behaviour
6. Prepare research in the field of forensic psychology

Study Programme Learning Outcomes

Psychology

General Competencies

Establish links between the theoretical models about the specific components of human cognition (attention, memory, language, problem solving, judgment and decision-making, cognitive development, consciousness) and the theoretical psychology and/or psychological practice.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Analyze scientific literature in psychology and related disciplines, and produce new scientific knowledge.

Screening of student's work

0.25 ECTS Istraživanje [EN]

0.25 ECTS Seminarski rad [EN]

0 ECTS Ostalo 1. (upisati) [EN]

3 ECTS

Week by Week Schedule

1. Introduction to concepts and scope of the field as well as students responsibilities during the course
2. Development of the discipline, and interrelatedness of forensic psychology to other disciplines (e.g. law, psychiatry)
3. Forensic psychology and policing. Roles and responsibilities of police psychologists.
4. Legal system and criminal procedure.
5. Theoretical approaches to psychological profiling of criminals, and geographical profiling of criminal cases.
6. Psychological profiles of certain groups of criminals (e.g. mass and serial killers, serial rapists).
7. Interrogation, investigative interviewing. Techniques and methods of interviewing suspects.
8. Techniques and methods of interviewing witnesses and victims. Cognitive interview. Conducting interviews with especially vulnerable populations (e.g. elderly, children).
9. Indicators and theoretical explanations of deception.
10. Techniques and methods for discovering deceptions and lying.
11. Psychological mechanisms of confessions. Types and determinants of false confessions.
12. Eyewitness credibility. Factors influencing perception and memory of eyewitnesses.
13. Methods and techniques for estimating statements credibility.
14. Psychological aspects of criminal procedures and verdicts.
15. Psychologist as court experts.

Grading

Grading and evaluating student work in class and at the final exam, Class attendance and discussion in research groups, tests, written exam and seminar essay.

Course Description

Develop students' understanding of the subject of geopolitical and geostrategic interest within the context of climate change.

Enable students to distinguish between and understand the significance of related scientific fields, branches, and disciplines.

Introduce students to the role of geopolitics and geostrategy in spatial processes, relationships, and development in relation to climate change.

Equip students with the skills to identify, recognize, and define geopolitical and geostrategic concepts, categories, and principles.

Familiarize students with global security challenges.

Train students to apply standard and specialized methods and techniques in geopolitical and geostrategic research.

Explain the connection between climate change and geopolitical trends.

Introduce students to the development of geopolitical spaces.

Develop students' ability to apply geopolitical and geostrategic projection methods in relation to climate change.

Enable students to understand, explain, and predict future geopolitical and geostrategic relationships.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and interpret contemporary geopolitical phenomena
2. Analyze climate change and emerging security challenges
3. Define geopolitical and geostrategic theoretical and methodological concepts and systems
4. Define the basic concepts of geopolitics
5. Summarize contemporary geopolitical issues in relation to climate change
6. Apply geopolitical knowledge in the analysis of security challenges in society

Study Programme Learning Outcomes

Dual-major studies

Apply different methodical principles and procedures in planning, conducting and evaluating teaching

Sociology

Analyze the social effects of certain globalization processes
 Evaluate social impact of social changes in society
 Describe the elements of social dynamics
 Describe demographic processes
 Recognize the generators of conflicts in contemporary society
 Recognize the elements of cultural/collective memory
 Evaluate appropriate ways of intervention of a certain social issue
 Discuss about current geopolitical issues

Sociology

Analyze the social effects of certain globalization processes
 Discuss about current geopolitical issues
 Describe demographic processes
 Recognize the elements of cultural/collective memory

General Competencies

Define, describe, and evaluate geopolitics, global security, and climate change, and classify and differentiate specialized terminology. Professionally and effectively apply acquired specialist theoretical and practical knowledge in media work.
 Apply contemporary geopolitical topics in relation to climate change.

Learning Outcomes - Intellectual (Cognitive) Skills

Analyze and interpret contemporary geopolitical phenomena.

Learning Outcomes - Practical and Generic Skills

Apply geopolitical knowledge in the analysis of security challenges in society

ECTS Credits	4.0
English Level	L3
E-learning Level	L3 (20%)
Study Hours	30

Course Description

The aim of this course is to introduce students to the concept of global antiquity and to equip them with the tools to study ancient societies beyond traditional Eurocentric frameworks. Through three key approaches - global, comparative, and entangled - students will explore intercultural connections, knowledge transfers, encounters, and shared historical experiences among ancient societies across the world. The course promotes interdisciplinary learning by bringing together scholars from archaeology, history, anthropology, linguistics, and art history. It is delivered online and focuses on integrating insights from four core disciplines: history, archaeology, literature, and art history.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and critically evaluate the concept of global antiquities, recognizing methodological and theoretical departures from traditional Eurocentric frameworks.
2. Apply global, comparative, and entangled approaches to the study of ancient societies, identifying patterns of intercultural interaction, influence, and shared historical experience.
3. Analyse diverse types of sources—including material culture, texts, visual art, and linguistic data—using interdisciplinary methods from archaeology, history, literature, and art history.
4. Compare ancient societies across different world regions, demonstrating understanding of their specific historical developments and interconnections through trade, migration, conflict, and cultural exchange.
5. Critically assess scholarly perspectives on antiquity from various disciplinary and cultural contexts, demonstrating awareness of positionality in knowledge production.
6. Collaborate effectively in an online learning environment, participating in discussions and research activities grounded in global perspectives and disciplinary diversity.
7. Communicate complex ideas clearly and persuasively, in both written and oral forms, using appropriate academic conventions for interdisciplinary and cross-cultural scholarship.

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Critically judge various descriptive and normative beliefs and attitudes

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Consider the justification of various theoretical and practical proposals, taking into account the specificities of various areas of life and work environments

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Consider the justification of various theoretical and practical proposals, taking into account the specificities of various areas of life and work environments

Determine and justify the basic ideas and principles on which modern democratic societies rest

Globalization and the Language of Science/ Globalisierung und die Sprache der Wissenschaft

214003

Lecturer

Zygfryd Eckardt
Gehrmann,
prof. emer. dr.
sc.

Course Description

Acquiring knowledge about the asymmetric development of language in science between English as the language of science and other national languages as the language of science. Gaining insight into the dialectical relationship between language, society and cognitive processes in science. Gaining insight into argumentative structures in relation to multilingual and monolingual Anglophone science. Gaining knowledge about the connection between economics and the language of science in relation to the measurement of scientific achievements through citations (impact), the role of journal databases and the ranking of researchers and universities according to quantitative indicators. Getting to know multilingual scientific concepts (historical, current).

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the functions of the language of science in relation to cognitive processes and public responsibility and the application of this knowledge in the description, analysis and interpretation of contemporary trends in the development of the language of science
2. Identify and understand the economic principles of guidance in relation to development trends in the field of the language of science
3. Identify and judge the actors in the field of the language of science and the goals of their activities
4. Explain the consequences and costs of multilingual science on the one hand or monolingual (English-speaking) science on the other, from the aspect of the future of European national languages as languages of science, the innovation potential of science and language school education in Europe

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Sociology

Study Hours 30

Grading

Active participation in classes, preparation of exercises and exposés.

Course Description

The goal of the course is to train students for independent scientific and research work, to train students to apply theoretical and practical knowledge acquired

during studies, to train students for the correct application of scientific methods and techniques in research, to develop the student's ability

systematization and critical content analysis.

The course is enrolled by a student who chooses a graduate thesis at the Department of Demography and Croatian Emigration. If he chooses to defend his graduation thesis on another two-subject combination of studies, then he enrolls in the course Demographic Studies.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical and practical knowledge acquired during studies
2. Choose and apply appropriate scientific methods
3. Select and use appropriate literature
4. Discuss opinion and attitudes
5. Analyze and interpret data
6. Assess the appropriateness of the conclusions from the presented data
7. Describe the results of the research

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Illustrate the need for scientific studies on demographic and immigration issues

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Dual-major studies

Course Description

Graduate thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;
6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

Study Programme Learning Outcomes

Croatology

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

Course Description

The aim of the course is to familiarize students with the basic knowledge about groups, group dynamics and structures, group phenomena, various forms of social impacts, and with the basic knowledge of social identity, as well as the relationship between social and personal identity.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic concepts and theories in the field of groups, group processes, social identity and social impact. Become familiar with key research in the field of groups, group processes, social identity and social impact. Evaluate different theoretical approaches in areas related to the study of groups and group processes - for example in the area of leadership in the field of emotions in groups, in the field of collective behavior ... Apply knowledge of group processes and impacts in practice
2. Explain the key research in the field of groups, group processes, social identity and social impact
3. Evaluate different theoretical approaches in areas related to the study of groups and group processes - for example in the area of leadership in the field of emotions in groups, in the field of collective behavior ...
4. Apply knowledge of group processes and impacts in practice
5. Develop competence to create interventions to improve the functioning of specific groups.
6. Develop an ability of critical evaluation of personally created interventions and interventions created by others, for work with specific groups

Study Programme Learning Outcomes

Psychology

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures and the specifics of their environmental and social context

Assess the compliance of psychological practice with prescribed ethical principles of psychological activity in various areas of

theoretical and applied psychology

Evaluate theoretical concepts and scientific knowledge in the creation of interventions and programs that will improve the living conditions and development of individuals, families, organizations and communities

Self-evaluate responsibility, autonomy and initiative in work

Evaluate the impact of the social context and social changes on human development and the behavior of individuals, groups and systems

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Create professional and scientific reports based on empirical data using scientific literature as well as select appropriate methods of data analysis and reporting on the results of research and professional work.

Course Description

The aim of the course is to acquire psychological knowledge that can be applied in maintaining and improving health. Students will be trained to apply psychological knowledge and skills contained in a comprehensive, biopsychosocial model in order to help people maintain their health and help them cope better with different health problems.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the comprehensive, biopsychosocial model of approach to health and disease.
2. Explain the effects of psychosocial factors on health, disease, and health behaviour.
3. Explain specific communication between professionals and clients/patients.
4. Demonstrate the associations of stress, coping style, and physical stress.
5. Outline the interrelationship of physical disfunction, disease, and psychological state.
6. Evaluate the presence of psychological mechanisms in the pain experience.
7. Explain the role of psychologists in the care of individuals living with chronic diseases.

Study Programme Learning Outcomes

Psychology

Argue the similarities, differences and usability of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences

Critically judge the outcomes and consequences of one's own professional work, as well as one's own professional competences, knowledge and skills in accordance with changes and standards of the profession and national and European regulations

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures and the specifics of their environmental and social context

Course Description

The aim of the course is to show in numerous examples, through a series of analytical insights and synthetic views, how Croatian culture is shaped by a series of very intense contacts with the nearest neighboring cultures, but also with those more important geographically very distant cultures. This relationship will be studied here synchronically as well as diachronically, showing the long-lasting cultural patterns that came to Croatian culture from the ancient and even earlier periods. The purpose of this study is to examine the key features of Croatian identity that are permeated with foreign elements and on which these foreign elements are assimilated and taken over or directed by other environments to become cultural layers in them.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze insights into the complexity of Croatian cultural identity
2. Analyze and identify related issues and interpret them from the standpoint of intertextuality and the comparative methodology that are going to be adopted
3. Define knowledge about the development of Croatian culture and about its interpreters and their misconceptions
4. Analyze complex questions about Croatian identity
5. Describe historical stages in the development of Croatian culture and the dominant foreign influences in their realization

Study Programme Learning Outcomes

Dual-major studies

Croatology

Define, analyze and argue the Croatian cultural narrative

Single out the characteristics of Croatian culture in the diaspora

Critically relate to mastered content and argue your conclusions in written and oral form

Describe and classify the legacy of other cultures within Croatia

Recognize and classify Croatian writers of European and world references

Recognize and argue the influence of religion and philosophy on

Croatian culture

Croatology

Forms of Teaching

- » Predavanja
- » Terenske vježbe

Week by Week Schedule

1. Continuities of Medieval Literature with Pre-Slavic Mythology, Illyrian Period and Antiquity. Analysis of epigraphy from Salona, island of Vis, Lumbarda on Korčula and Živogošće.
2. Analysis of medieval epigraphy and the oldest Croatian personalities: Čika, Vekenega, Petar Črni, queen Jelena.
3. Croatian Renaissance Literature in a European Context. Italians about Croats. Croatian in Italy: Zuan Polo.
4. Mechanical research by Faust Vrančić and their relatives.
5. The case of Juraj Križanić and his Russian mission in context of centuries relations between Croatia and Russia.
6. Giacomo Casanova and the Croats. Ivan Kreljanović and his Venetian Theatrical Success.
7. Examples of Maritime Literature. The linguistic intertwining of the Mediterranean and the contact of the Arab, Greek and Romanesque worlds with the Croatian. Relations with the Turkish language.
8. Spiritual Activity of Croats in Exile and Diaspora: Ivan Ilić, Antun Bonifačić, Ante Ciliga, Ivan Meštrović, Jozo Kljaković...
- 9.
10. Croatian Indias. Analysis of texts from the Middle Ages to Ivana Brlić Mažuranić and Malnar.
11. Literary Itineraries of Croatian Writers. Egyptomania since its' strengthening in the 18th century and then especially at the time of Napoleon's conquests. Echoes of Egyptomania in Recent Croatian Culture.
12. Rickard the Lionheart in the Adriatic. Croats in the Great Britain.
- 13.
14. Croatian cuisine: Petronius' fragment found in Trogir. The Question of Culinary in World Literary History. Veljko Barbieri: his literary and culinary work.
15. Balkan literary overlapping's: ožkanje's, bulgarštica's, etc.

Historical Cartography of Croatian countries

270161

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

The aim of the course is to acquaint students with the historical cartography of Croatian countries from the early modern period to modern times.

In addition, the subject includes the interpretation of basic topics and methods of studying historical geography and cartography and interpretation of

maps as a relevant historical source.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the development of cartography throughout history
2. Define the basic parts and elements of a geographical map
3. Interpret the map as a historical source
4. Define the basic concepts of historical cartography
5. Describe cartographic projections throughout history
6. Analyze, compare and evaluate different types of maps of Croatian lands
7. Recognize the importance of historical maps for the historiographical interpretation and historical context of Croatian lands

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Use methods of explanation and interpretation of historical processes

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Connect and evaluate different historical points of view, including the points of view of Croatian historians in the context

History of Christianity in Croatia

270166

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

Since Christianity is one of the essential elements of Croatian identity and that Europe, indeed, rose from Christian roots, the main objective of the course is to familiarize the students with the historical processes and events related to the Church (in the broadest sense of the word), and which shaped and strengthened the Croatian identity. The issue in question is not the identification of the religious with the national, but rather their mutual understanding and interpretation. Through the lectures, which are organized around selected questions and supplemented with individual work, the students will become capable of understanding the issues and problems of the Croatian religious history and, ultimately, of working in the interdisciplinary field of Croatology more fruitfully.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of the history of Christianity among the Croats.
2. Determine the key events and protagonists of the Croatian history.
3. Explain historical events in the causal process.
4. Connect the events from the Croatian religious history with the events at the European and historical scene.
5. Connect the events from the Croatian religious history with the events at the world's historical scene.
6. Present the hierarchy of historical events.
7. Discern their relevance of the historical events for the present moment.
8. Present Christianity as a component of the Croatian identity.

Study Hours 30

Grading

class activity 20%
colloquium 20% essay
30% oral exam 30%

Course Description

The main goal of this class is to introduce the history of Croatian cinema to students, with special emphasis on the different approaches to the study of film history and the position of the Croatian cinema within the global context, especially in terms of industry and ideology. Considering this goal we are going to establish an overview of the aesthetic and social history of the national cinema, with insight into the most significant directors' and authors' oeuvres, genres and stylistic movements. We are going to position Croatian film in its Central European and Mediterranean context, viewed in the lens of popular and national culture, as well as through the prism of leading art medium of the 20th century. Although we are going to focus predominantly on feature length fiction film, separate lectures will be dedicated to documentaries, Zagreb school of animation, as well as to leading experimental cinema authors. For students without prior film studies experiences, overview of basic terminology will be offered, as well as guidelines for critical approach to contemporary Croatian film production.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the history of art in the history of cinema
2. Analyze and understand the aesthetics and the issues of aesthetic changes (on the example of film)
3. Apply the knowledge of critical theory and the theory and history of literature (especially from narratology and the study of popular culture) in the area of film
4. Apply the interpretation and textual analysis (in the area of film analysis)
5. Recognize the fundamental film narrative styles (classical and modernist)
6. Recognize the fundamental stylistic determinants of a film, along with the ability to analyze and interpret the film at the fundamental level of stylistic interpretation

Study Programme Learning Outcomes

Communication Studies

Croatology

Synchronous and diachronically relate and analyze the influence of literary culture on Croatian stage and film arts

General Competencies

The students should be able to situate the history of film in the general context of art history, to further understand the aesthetics and the issues of aesthetic changes (on the example of film), to apply their knowledge of critical theory and the theory and history of literature (especially from narratology and the study of popular culture) in the area of film, as well as to apply the interpretation and textual analysis (in the area of film analysis).

Grading

The student's work will be continuously monitored through their participation in classes whose attendance is obligatory. The seminar will also be evaluated in the form of written work and oral presentation, as well as the final exam in the form of an essay.

Course Description

The history of private life has an important place in contemporary historiography, but due to the extensiveness of the material, it is not possible to include it in course that provide overviews of individual epochs. This elective course is designed as a complement to the knowledge gained about the history of the 19th century, which was also a time of numerous and important changes and transitions from late feudal society to modern civil society, the disappearance of numerous collective identities and the emergence of new ones, as well as the separation of public and private spheres of life. In this elective course, an attempt will be made to analyze how these epochal changes, which the students were already familiar with at the undergraduate level of studies, were reflected in the private lives of individuals and individual identities.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze selected sources and literature
2. Summarize the causes of changes in private life in the 19th century
3. Analyze the concept of identity
4. Describe the fundamental connections between political and socioeconomic changes on the one hand and changes in the field of private life on the other
5. Present basic concepts and conclusions

Study Programme Learning Outcomes

Dual-major studies

History

History

Formulate arguments for and against mutually opposing points of view

Critically judge various descriptive and normative beliefs and attitudes

Critically judge and evaluate personal historical understandings and attitudes

- Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems
- Present complex scientific and non-scientific content in written and oral form
- Apply established historical terminology and nomenclature

Human resources management

227542

Lecturer

Zoran Komar,
nasl. v. pred.
mr. sc.

Course Description

To acquaint students with the basic tasks and practices of human resources management, as well as with the contributions of different professions in human resources management activities.

To direct students towards the sensitivity for choosing the appropriate practice of human resources management with regard to organizational ones

peculiarities and socio-cultural differences.

Increase understanding of the material, technological, organizational and personnel prerequisites for effective human resource management and the application of this knowledge in various activities.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe historical development, theoretical foundations, social and economic determinants of human resources management
2. Identify the fundamental tasks and practices of human resources management
3. Distinguish between traditional, transactional and transformational human resources activities
4. Analyze the material, technological, organizational and personnel prerequisites for effective human resource management
5. Compare different human resources management practices with regard to organizational specificities and socio-cultural differences
6. Evaluate the distinct features of the human resources management function in the integral model of business efficiency

Study Programme Learning Outcomes

Image, Reputation Management and Lobbying

57248

Lecturer

Ivana Jeleč
Bulić,
pred.

ECTS Credits	4.0

English Level L1

E-learning Level L1

Study Hours 30

Grading

45% practical work, 40% exam, 10% practical tasks, 5% classroom activity

Course Description

To provide students with an insight into the key elements of organization identity that affect image creation, the basics of lobbying and key characteristics of a lobbyist, as well as positioning of organizations on the market. To teach students how to apply the tools of public relations that are used during the process of creating identity and organizational culture, which affect the reputation of an organization. Familiarize them with the basic tools in the work of a lobbyist, which are used in the public relations practice. Familiarize them with the basic theories of identity and image, as well as the practical skills needed to work in public relations.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and know the basic concepts.
2. List, classify, explain and use the elements of identity and image.
3. Use social networks in the creation and development of the organization identity.
4. Use internal communication in the creation and development of the organization identity.
5. Identify, evaluate and apply different types of lobbying.
6. Use different ways to test the efficiency of image and identity elements and lobbying campaigns.

Study Programme Learning Outcomes

Communication Studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Show the application of theoretical knowledge of communication studies

Distinguish practical applications of practical knowledge and skills from journalism and public relations

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems
 Develop oral and written communication skills
 Develop competences in professional and interdisciplinary teamwork
 Professionally apply acquired specialist, theoretical and practical knowledge in the sphere of media, i.e. journalism, public relations and scientific research in communications

General Competencies

Define, describe and evaluate the image, management and lobbying, their development and the central problems. Apply, classify and distinguish professional terminology. Individually or in teams conduct scientific research in the field of communicology with the help of modern scientific-research methods and write essays in a clear and organized manner. Expertly and professionally apply the acquired specialist theoretical and practical knowledge in public relations.

Immigration Models

253188

Lecturer

izv. prof. dr. sc.
Tado Jurić

ECTS Credits	3.0
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Course Description

The subject will consider:

1. Recent migration flows in Europe and the region
2. Maintaining ties between emigration and the country of origin;
3. Nation-state response to emigration
4. The role of the diaspora and migrant remittances in the development / stabilization of socio-economic conditions in the country of origin;
5. Case studies of specific transnational communities
6. Diaspora in the context of globalization
7. Models of immigration and integration policy
8. Multiculturalism - challenges and criticisms
9. Transnational social spaces
10. Forced migration and refugees
11. Education - position on the labor market - social mobility in an immigrant society: case studies
12. Asylum

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the immigration policy of the Republic of Croatia from independence to the present day
2. Describe the current immigration models of the Republic of Croatia
3. Compare the immigration models of traditional EU immigration countries and the Republic of Croatia - examples of good practice
4. Recognize the most successful immigration models in Europe and the world

5. Prepare an immigration-integration model for returnees in the Republic of Croatia
6. Prepare an immigration-integration model for foreigners in the Republic of Croatia

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop the ability to terminologically understand demographic and immigrant terms in students

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Interpret data on Croatian and global population and emigration

Indian Philosophy

213958

Lecturer

izv. prof. dr. sc.
Ivan Andrijanić

Course Description

The course introduces students to Indian philosophy and its cultural context. This is important because it is one of the most distinctive, developed, and rich philosophical traditions of humanity. Familiarizing oneself with Indian philosophical systems and issues significantly broadens the horizons and critical thinking of students of philosophy and culture.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare Brahmanical, Buddhist and Jain texts with Western philosophical texts in a cultural context.
2. Identify the general value of Greek philosophy in the medium of Indian philosophy
3. Explain the epistemological, ontological and ethical implications of Indian philosophical systems in comparison with Western ones.
4. Explain the most important works of individual philosophical disciplines and critically analyze and evaluate the positions and arguments contained in them.
5. Demonstrate the importance of philosophical problems in Indian philosophical texts through socio-historical context.
6. Create scientific research in the field of philosophy and write philosophical papers in a clear and organized manner.

Study Programme Learning Outcomes

Dual-major studies

Philosophy

Analyze main problems of contemporary philosophical disciplines

Formulate different arguments, possible contradictions and construct counterexamples

Integrate different models of philosophical thinking specific to individual philosophical disciplines into a unique ability of philosophical and critical thinking

Explain the specifics of contemporary philosophical disciplines and their development

Encourage the development of professional and scientific

Integration Approach

238019

Lecturer

doc. dr. sc.
Jadranka
Polović

Course Description

1. introduce students to theoretical approaches and concepts of contemporary international migration and diaspora
2. train students to understand the motives, causes and consequences of migration mobilities from the Croatian ethnic area (XX and XXI centuries)
3. to acquaint students with models of immigration and integration policy in EU countries
4. train students to understand the overall social context as a challenge for the application of integration models
5. introduce students to the Croatian normative and institutional framework and models of networking and connection with the diaspora
6. train students for independent participation in projects of scientific, economic, cultural and other cooperation with the Croatian diaspora
7. train students to understand, clarify and predict future global migration and security issues, movements, conditioning and consequences
8. train students for independent research related to the application of the Croatian model of integration of selective migration
9. to explain to students the migration conditionality on the security of the Croatian and European geographical space and society
10. to develop students' awareness of the threats to basic systems in society and space caused by migration

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the importance of thinking and developing Croatian integration models of selective migration
2. Define migration laws
3. Explain the crises of integration models at the level of developed EU countries
4. Describe new models of connection with the Croatian diaspora

ECTS Credits	3.0

Week by Week Schedule

1. Introductory lecture: familiarization with the structure, content and objectives of the course; organization of classes, subject evaluation, obligations students; proposal of topics for the seminar paper, determination of presentation deadlines
2. Models of integration / diaspora (definition of basic terms, theoretical approaches)
3. Dimensions of integration (legal-political, socio-economic, cultural-religious, identification)
4. Integration models in the contemporary context (assimilation, melting pot, integration, interculturalism, cultural pluralism, multiculturalism)
5. Models of immigration and integration policy in EU countries - comparative analysis; multiculturalism as an integration model / crisis of multiculturalism in Europe
6. Parallel societies as a result of isolation / ghettoization (conflict lines, migrants in the programs of political parties)
7. Connections between emigration and their country of origin / Case study – Ireland, Italy, Israel
8. Croatia as an emigrant country: (emigration from Croatia during the 20th century: historical overview (1900–1948; 1948–1991; 1991–2001; analysis motivational factors of emigration, historical - political context)

9. The Croatian "western" diaspora as the development potential of the Republic of Croatia (active role in the creation and defense of the Republic of Croatia, promotion and lobbying, human capital, social networks, willingness to invest...)
10. Croatian institutional and normative framework (interaction with the Croatian diaspora and institutions in the host country, information and connection, protection of the rights and position of emigrants)
11. Networking as a model of Croatian politics: building institutional capacities for connecting the Croatian diaspora and the Republic of Croatia (experience 1990- present, government institutions - Ministry of Immigration, Ministry of Return and Immigration; Matica Croatia, Croatian registry of emigrants...)
12. Diaspora in the context of globalization (components of social mobility - the possibility of voting and political representation; preservation of state and cultural identity / strengthening educational, scientific and sports cooperation; economic partnership)
13. Refugee crisis 2015 - Croatia as a receiving country (impact of forced migration / Balkan route)
14. Mass emigration from Croatia (emigration of young, educated and professional people)
15. Open issues (national identity, demographic future of the country, the Republic of Croatia as a country of re-immigration or selective migration)

Introduction to Historical Science

57158

Lecturer

prof. dr. sc.
Darko Vitek

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours 30

Grading

Active students will be monitored throughout the semester. Classes is required to attend.

Course Description

The objectives of this course are to introduce students to the way in which it once formed and then played, and currently works as a scientific field of historical research. Students are introduced to the processes and procedures that characterize scientific activity and the discussion about read articles practically acquainted with the scientific dimension of history.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic notions of scientific research of the past,
2. Explain the basic forms of communication of scientific research,
3. Demonstrate basic skills of designing complex knowledge,
4. Describe the meaning of term multiple perspectives
5. Compare different scientific paradigms,
6. Apply learned lessons to the further continue of scientific direction of graduate study history.

Study Programme Learning Outcomes

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Formulate arguments for and against mutually opposing points of view

Identify and describe the disciplines of contemporary historical sciences, their development and basic problems

Use methods of explanation and interpretation of historical

Present complex scientific and non-scientific content in written and oral form

Apply traditional historical terminology and nomenclature

General Competencies

After finishing the programme student will be able to: compile a list of literature for each historical period, design his/her own conclusion on different historical events and processes, demonstrate the importance of interdisciplinary interpretations of historical events compare historical processes of different periods, appraise the value of historiographic interpretations, differentiate specificities of historical periods, distinguish difference between important and non-important facts within historiographic interpretation

Introduction to Scientific Research

61243

Lecturer

izv. prof. dr. sc.
Karolina Vrbanić
Zrinski

Associate Lecturer

izv. prof. dr. sc.
Domagoj
Brozović

Course Description

The aim of the course is to provide the students in one place with basic knowledge about scientific-research (theoretical and practical) work and teach them to independently apply this knowledge in completion of their graduate theses, or in their own research.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use the basic terminology of the methodology of scientific work
2. Develop the ability to write in scientific style
3. Analyze, search and use different bibliographic sources
4. Develop the ability for critical evaluation and argumentation
5. Sketch the draft of their research
6. Apply the learned lessons in their own research, especially in completion of their graduate theses within the study of Croatian culture
7. Apply the ethical codex of scientific and academic profession

Study Programme Learning Outcomes

Croatology

Critically relate to mastered content and argue your conclusions in written and oral form

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Describe, recognize and apply the fundamental stylistic features of the text

ECTS Credits	5.0

English Level L0

E-learning Level L1

Study Hours 30

Grading

Students are required to attend classes regularly, do homework, participate actively in the course and discuss specific topics.

General Competencies

The students will acquire basic factual knowledge related to scientific-research work in general and in particular the basic knowledge required to complete a high-quality graduate thesis in the field of social sciences and humanities. The students will learn the basic terminology of the methodology of scientific work, develop the ability to write in scientific style, be able to independently analyze, search and use different bibliographic sources, develop the ability for critical evaluation and argumentation, be able to present the draft of their research, primarily in the completion of their graduate thesis within the study of Croatian culture.

Introduction to Sociolinguistics

133474

Lecturer

Lucia Miškulin
Saletović,
v. pred. dr. sc.

Course Description

The course provides an introduction to sociolinguistics, i.e. to the study of why we speak the way we do, and the social factors that influence our linguistic decisions. Key issues of the complex interaction between language and society are explored, including register, genres, styles, code-switching, diglossia, bilingualism, language and power, language and identity, communication across cultures, language change, language policy and planning, all of which are unified by the common denominator called language variability and diversity. Considerable attention is devoted to the ways in which spoken and written language may be interpreted depending on the context and expectations of the participants.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe diverse factors of linguistic micro-choices (social stratification, gender and age), as well as of macro-choices (boundaries, background, functional restrictions)
2. Discuss a wide range of factors relevant to language issues in cross-cultural and intercultural communication
3. Illustrate various aspects of language change over time and explain possible reasons
4. Explain the interplay between both language and power, and language and identity
5. Examine language policies in a particular country or area (of students choice), including goals, measures, implementation, monitoring and actual or probable outcomes
6. Analyze the sociolinguistic situation in a particular country or area (of students choice) by applying the key sociolinguistic concepts

Study Programme Learning Outcomes

Communication Studies

General Competencies

Students will be able to: - describe and critically evaluate various types of interaction between the society and the language - evaluate the social context of the language use

Lecturer

prof. dr. sc.
Dubravka Zima

ECTS Credits 3.0

English Level L1

E-learning Level L1 (5%)

Study Hours

15

15

Grading

It is assessed the participation in class, activities during the class, the quality of the seminar paper.

Course Description

The course is planned in two ways: on the one hand, intrinsically, on the study of the literary work of Ivana Brlić-Mažuranić, in the context of early 20th century Croatian literature and in the context of the formation of canons and non children's and children's literature. On the other hand, the course focuses extrinsically on the study of the Ivana Brlić-Mažuranić phenomenon in her time and today. The course is literary-historical and cultural, and in this sense the aims of the course are seen in the questioning and recontextualization of the work of Ivana Brlić-Mažuranić in literary-historical and canonical sense.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and conduct academic research on archival or other historical material
2. Apply the presented theoretical apparatus in the analysis of literary text
3. Analyze and interpret the theoretical and historical issues addressed in the literary text

Study Programme Learning Outcomes

Dual-major studies

Croatology

Interpret and critically judge literary text

Recognize, explain and single out the characteristics of children's literature

Croatology

Latin language in the history of Croatian education 200540

Course Description

This course enables students to understand the role of Latin language in the creation of European civilisation, primarily through its role in educational and school system. The focus is set on Early modern age, and on the various stances towards language in different educational systems in different periods and lands. Documents such as Ratio studiorum and Ratio educationis are discussed, as well as the role of Catholic Church in the transference of knowledge. Special attention will be given to the situation in Croatian lands. This way the students - future teachers - will be able to appreciate and emphasise the importance of Latin in Croatian culture and identity.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Translate texts from all periods of Croatian Latinity and in every functional style
2. Analyse the text on a linguistical level and prepare it for educational purposes
3. Analyse the text on a literary-stylistic level and prepare it for educational purposes
4. Connect the text with classical and medieval tradition
5. Synthetise the knowledge of a latinistic work in the form of an essay
6. Contextualise a certain work according to the contemporary socio-political contexts and the author's biography
7. Teach about the latinistic works through a historical, literary or cultural aspect
8. Critically analyse the text important for the history of education

Latin Paleography and Epigraphy

86899

Lecturer

doc. dr. sc.
Lucija Krešić
Nacevski

Course Description

The aim of the course is to familiarize students with the basic features of cultural context of the Latin script, with special attention on Croatian ethnic and cultural area. During the year students will become familiar with the most important Latin script which were used in the Croatian region in the period from the Early Middle Ages to the advent of printing (Beneventan script, Carolingian minuscule, Gothic minuscule and Humanist minuscule). Also the students will become familiar with the Croatian epigraphic sources. By participating in lectures and study of archival materials and medieval manuscripts the students will acquire useful knowledge and be trained for their scholarly research.

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the most important Croatian medieval sources written in Latin language
2. Describe the importance of the Latin script as a tool for detecting and defining Croatian cultural identity
3. Explain origin and development of particular variants of the Latin script
4. Apply acquired knowledge about the stages of development and characteristics of particular variants of the Latin script for dating of manuscripts
5. Analyze and transcribe manuscripts written in Beneventan script, Carolingian minuscule, Gothic script and Humanist minuscule
6. Prepare a critical edition of a hitherto unpublished medieval manuscripts
7. Analyze and interpret the epigraphic monuments

Study Programme Learning Outcomes

Lecturer

izv. prof. dr. sc.
Ivan Burić

Course Description

The aim of the course is to familiarize the students with the legal standards that regulate the profession of public relations and present the standards and codes of ethical action and communication in public relations, and encourage them to critically assess ethical dilemmas.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the implementation of legal regulations that concern the constitutionally guaranteed right of access to information and prepare the devising of communications policy based on transparent information provision and communication in public relations with the public
2. Apply legal regulations that concern the obligation of publicizing and informing in corporate communication
3. Explain intellectual property rights
4. Distinguish between legal and ethical prohibitions in covert public relations in terms of covert advertising
5. Apply the ethical principles of public relations and business ethics
6. Point out ethical dilemmas in public relations
7. Apply the principles of the code of ethics of public relations (CPRA)
8. Explain the model of excellence in public relations practice

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Distinguish practical applications of practical knowledge and skills from journalism and public relations

Professionally apply acquired specialist, theoretical and practical knowledge in the sphere of media, i.e. journalism, public relations and scientific research in communications

General Competencies

Define, describe and evaluate the legal standards of public relations and the central problems;

Define, describe and evaluate the ethical standards of public relations and the central issues;

Apply, classify and distinguish professional terminology;

Expertly and professionally apply the acquired specialist theoretical and practical knowledge to working in public relations;

Successfully collaborate with different individuals and groups in discussions and finding answers to various theoretical and practical issues;

Week by Week Schedule

1. The right of access to information in Croatia and the European Union, guidelines for spokespersons in public authorities
2. The Capital Market Act, the Code of Corporate Governance, guidance for dealing with investors
3. Copyright and related rights, industrial property rights, guidelines for the protection and designing of PR-publications
4. Copyright and related rights, industrial property rights, guidelines for the protection and designing of PR-publications
5. Legal requirements concerning the content in provision of information and publications in public relations: obligation to provide accurate information, protection of secret, personal and business related, as well as state secret, personality rights, competition offense
6. Prohibition of covert PR activities in terms of covert advertising, legal and ethical guidelines
7. Prohibition of covert PR activities in terms of covert advertising - practical experience and examples from the media
8. Prohibition of election promotion of state bodies, guidelines for spokespersons and PR experts in political and public institutions
9. Personal ethics of PR professionals - loyalty to the employer / profession / society / themselves, ethical dilemmas
10. Ethics of public relations and crisis communication
11. Business ethics and the ethics of public relations
12. Codes of ethics: international, European and national
13. code of ethics of the Croatian Public Relations Association, interpretation, practice
14. The normative model of public relations and of excellence in public relations from an ethical point of view
15. Corporate Social Responsibility

Legal Bases and Pedagogical Documentation

201263

Lecturer

izv. prof. dr. sc.
Rona Bušljeta
Kardum

ECTS Credits	2.0
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

Active participation,
written exam (or two
colloquiums).

Course Description

The objectives of the course Legal Bases and Pedagogical Documentation are: to introduce legal regulations in the field of education in elementary and secondary schools, to explain the origins and purpose of these regulations, to critically assess legislation in the field of education in elementary and secondary schools, to introduce e-Matica and e-Dnevnik.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name the basic laws, regulations and other documents in the field of education in elementary and high school
2. Distinguish laws and regulations
3. Evaluate the origin and purpose of regulations in the field of education
4. Predict the way of applying regulations in the area of education and training
5. Evaluate existing documents in the field of education in primary and secondary schools
6. Use pedagogical documentation and records; use e-Matica and e-Dnevnik
7. Describe the school management system and the rights of students and parents
8. Explain the supervision of a school institution.

Study Programme Learning Outcomes

Dual-major studies

Philosophy

Croatian Latinity

Cooperate with different individuals and groups in discussions and finding answers to various theoretical and practical questions

Clearly and innovatively present complex academic and non-academic contents in written and oral form

Croatology

Critically relate to mastered content and argue your conclusions in written and oral form

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Croatology

History

Determine and justify the basic ideas and principles on which modern democratic societies rest

History

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Psychology

Critically evaluate professional and scientific literature from psychology and related disciplines and create new scientific knowledge

Support cooperation in interdisciplinary team work and create constructive professional relationships with experts of collaborating disciplines

Sociology

Sociology

General Competencies

Upon completion of the teacher education programme, the student will be able to:

Distinguish among legal regulations, decisions, and provisions of the Republic of Croatia relevant to the teaching profession.

Utilize the aforementioned documents as required in professional teaching practice.

Interpret, on the basis of these documents, the rights and obligations of employees within educational institutions.

Recommend appropriate criteria for the evaluation of the teaching process.

Screening of student's work

point presentation.

Week by Week Schedule

1. Introductory class; explaining to students their obligations during the course (participation in classes, homeworks, continuous assessment exams) and providing an overview of exam and other relevant literature.
2. Basic regulations in the field of education in primary and secondary schools, and their hierarchy in the sense of legal enforcement and the procedure of passing them.
3. Educational objectives and principles in primary and secondary schools
4. The national curriculum, teaching plans and programmes, and teaching forms.
5. Schoolwork organization: temporal and spatial aspects; the library; cooperation of schools; house rules; transportation; nutrition; safety and health protection of students.
6. Students with special educational needs.
7. Rights and duties of students: the protection of the rights of students, the council of students. The rights and duties of parents.
8. The first colloquium.
9. Monitoring and grading student accomplishments.
10. Pedagogical measures.
11. Starting and terminating work in a school institution. Professional training, development, advancement and issuing licences.
12. Supervising the work of a school institution.
13. Pedagogical documentation and records.
14. The second colloquium.
15. Managing a school institution.

Grading

Max number of points: compulsory attendance 80% = 10, both tests passed = 40, written exam = 20, oral examination = 20, activity in class = 10, a total of 100 points. Grades on tests and final exam: 51-63 = 2, 64-75 = 3, 76-87 = 4. 88-100 = 5.

Course Description

The main objective of this course is to give the students a thorough description of general and Croatian lexis in one place and to process the majority of issues related to the notion of lexical units. By confronting different theories, students will be encouraged to independently consider universals through semantic relations between lexical units: which is one, and which is two (relation between polysemy and homonymy); what is the same and what is different (relation between synonymy and paronymy); what is a possibility, and what is realization (relationship between paradigmatic and syntagmatic). In addition to gaining theoretical knowledge and be given a historical overview of the development of the Croatian lexis, the students will, through interactive classes, enrich their vocabulary, be able to observe lexical errors in public communication, properly use lexical units and thereby develop the ability of naming concepts in Croatian words. During the semester, the students will be able to apply the knowledge acquired through classes and constant reading of lexicological works and deal with smaller assignments, and check what they have learned through lexicographic examples.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply and master the lexicological and lexicographic terminology
2. Distinguish between linguistic units
3. Distinguish linguistic levels and understand the concept of a lexical unit
4. Identify and analyze interlexeme and intralexeme semantic relations
5. Analyze and observe universal relations and discuss abstract concepts
6. Apply theoretical knowledge on specific examples
7. Discover the world of science by cognition of language universals.

Study Programme Learning Outcomes

Croatology

Define, single out, explain and argue basic terms from lexicology and lexicography

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Describe and classify a word formation

General Competencies

Master the lexical level and integrate the conversance of all language levels.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours
15
15

Grading

Class attendance, 1 ECTS

Seminar paper, 1 ECTS

Oral exam, 1 ECTS

Course Description

Adoption of terms and procedures from stylistics and their application in independent stylistic analysis (interpretation) of literary and non-literary texts. Study of stylistic procedures and their stylistic values and functions with regard to different texts, styles, language functions and speech styles.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe, identify and define the characteristics of a particular style in literature
2. Synthesize knowledge and explain functional styles
3. Analyze and distinguish certain styles and compare them to other literary styles
4. Demonstrate and set a hypothesis of a nature of a literary style and formulate, assemble and write a synthesis of their own perspetion
5. Analyze, evaluate and grade student seminar papers

Study Programme Learning Outcomes

Dual-major studies

Croatology

Critically relate to mastered content and argue your conclusions in written and oral form

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Describe, recognize and apply the fundamental stylistic features of the text

Croatology

General Competencies

Stylistics is important in the context of literary studies and linguistics because it teaches students to recognize and explore the means of artistic expression. Students study linguistic expression and the functions of a literary text, and identify rules and principles. As part of the teaching process of language and literature in primary and secondary schools, stylistics teaches students to write and speak well. After completing the Stylistics course, students will be able to: recognize functional styles of literature, develop the ability to select appropriate texts for a specific need in the teaching process in primary and secondary schools, and understand that functional styles contribute to more beautiful and accurate expression, the development of cognitive abilities and aesthetic awareness.

Screening of student's work

Literature and Culture of Croats in the Diaspora

126030

Lecturer

Sanja Vulić
Vranković,
nasl. prof. dr.
sc.

Course Description

Introduction to the Croatian language groups outside Croatia. Students will learn about Croatian idioms in Austria, Slovakia, Hungary, Rumania, Italia, Serbia, Montenegro and a sociolect of the Janjevci Croats in Bulgaria. After acquiring theoretical and analytical framework, students will locate these idioms in the frameworks of Croatian dialectology. Based on the example of certain idioms which have been disappearing, the phenomenon of the language death is being introduced.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define certain Croatian language communities in the Diaspora.
2. Describe the location from which they emigrated and the time of emigration
3. Describe which Croatian variants, dialects and subdialects are spoken in the Diaspora
4. Analyze the phonology of certain language groups.
5. Analyze the morphological system of certain language groups.
6. Analyze the lexis of certain language groups
7. Interpret different language influences.

Study Programme Learning Outcomes

Croatology

Define linguistic policies in relation to Croatian language

Single out the characteristics of Croatian culture in the diaspora

Recognize, explain and single out the characteristics of Croatian dialectal literary -lingual heritage

Apply different theoretical approaches in linguistics

General Competencies

After the course is finished, students will be able to independently analyze dialect samples in the Diaspora, which contributes to their cognitive ability of better understanding of language situation in the Diaspora and the sociolinguistic aspect of language groups in the Diaspora.

ECTS Credits	5.0

Literature and Culture of the Croats in the Diaspora

57134

Lecturer

Sanja Vulić
Vranković,
nasl. prof. dr.
sc.

Course Description

Introduce the students to the literature and culture of Croats in the so called Old Diaspora – the European border countries in which the descendants of Croatian immigrants still live as national minorities: Austria, Hungary, Slovakia, Rumania, Serbia, Montenegro, Italia as well as immigrants in the USA, Canada, Chile, Australia, Argentina

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the reasons of Croatian emigration across the Europe from the 15th to the 17th century.
2. Recognize the cultural, literary and language factors according to which Croats in the Diaspora adapt to the culture and literature of their parent nation in the Republic of Croatia.
3. They will show the identification factors through culture, religion, literature and language of Croats in the Diaspora.
4. They will analyze the valuable positive attitude towards culture and literature of Croatian minorities in the domicile country.
5. They will show with their seminar paper and will gain the skill in finding primary and secondary literature on Croats in the Diaspora.

Study Programme Learning Outcomes

Croatology

Interpret and critically judge literary text

Single out the characteristics of Croatian culture in the diaspora

Recognize and classify Croatian writers of European and world references

Recognize, explain and single out the characteristics of Croatian dialectal literary -lingual heritage

ECTS Credits 5.0

English Level L1

E-learning Level L1

Study Hours
15
15

Grading

At the beginning of the semester the incoming students' competencies will be tested and they will receive the instructions about the possible lack of knowledge on the subject being thought. The examination of the subject and writing the seminar paper. At the end of the semester, the subject and the professor who teaches it will be evaluated. Professors will use the information for self-evaluation and possible reconstruction of teaching, work methods and student evaluation. The examination and writing the seminar paper.

General Competencies

Introduce the students to the history of Croatian diaspora in Europe or the overseas countries. Introduce them to the reasons of Croatian emigration in the 15th, 16th and the 17th century. Show the cultural and national identity of Croatian minorities in the European border countries: Austria, Slovakia, Hungary, Italia, Rumania, Serbia, Montenegro. Introduce them to the reasons of the emigration to the overseas countries. Introduce them to the main factors which influenced the conservation of the Croatian culture and the Croatian language of Croats in the Diaspora.

Week by Week Schedule

1. The socio political context in Europe and the Croatian countries in the 15th and the 17th century.
2. The reasons of Croatian emigration from the Croatian countries in the 15th, 16th and the 17th century.
3. Southern and northern emigration direction of Croats in Europe
4. The Molise Croats: origins, culture and language
5. The Croatian nobility as an important factor in the Croatian emigration to: the western Kingdom of Hungary and Moravia
6. The life of Croats in the new environment of the Habsburg region in the 16th and the 17th century.
7. The attitude of the domicile population towards Croatian immigrants in the western Kingdom of Hungary
8. Croatian literary and language monument of Croats in the western Kingdom of Hungary in the 16th century.
9. The first book printed in Latin alphabet and intended for Croats in the western Kingdom of Hungary.
10. The literature of Croats in the western Kingdom in the 17th and the 18th century.
11. The guardians of the Croatian language and caretakers of literature of Croats in the western Kingdom of Hungary from the 17th to the 19th century.
12. Destiny of Croats in the western Kingdom of Hungary after the First World War.
13. Croats in other European border countries after that war.
14. Croats and their culture in the overseas countries.
15. Publicist and literary activity of Croats in the so called emigrational epoch.

Local History

285824

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

The aim of the course is to emphasize to students the importance of regional (homeland) history. It seeks to develop their awareness of the values of national identity through an explanation of key historical periods from the region's past. The course introduces students to the basic concepts of regional history and distinguishes it from local history and the history of "small" topics (microhistory). It explains the principle of microhistory within the macro context (bottom-up history), motivates and equips students to independently research the history of their own region, highlighting the specific characteristics of the area under study.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the use of professional terminology, historiographical research tools, and methodological principles of historical science.
2. Identify historical facts and processes from national history.
3. Identify important historical figures from different periods of European history.
4. Identify historical processes and explain the challenges involved in their interpretation.
5. Summarize, in one's own words, the basic historiographical facts about national history.
6. Collect professional bibliography through library catalogues and online databases and present it with reasoned analysis.
7. Apply the methodology of various historiographical fields and other research methods from the humanities.
8. Recognize the interdisciplinary nature of history and its relevance to other fields of knowledge, as well as its role in promoting a range of moral, social, and cultural values.

Study Programme Learning Outcomes

Dual-major studies

History

Discuss with different individuals and groups with the aim of finding answers to various theoretical and practical questions
Identify and describe the disciplines of contemporary historical sciences, their development and basic problems

Grading

Grade composition: Class attendance (including fieldwork): 20% Active participation in class: 20% Presentation on a selected topic: 30% Written seminar paper (research): 30%

Critically judge and evaluate personal historical understandings and attitudes

Critically judge various descriptive and normative beliefs and attitudes

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Present complex scientific and non-scientific content in written and oral form

Apply established historical terminology and nomenclature

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Use methods of explanation and interpretation of historical

Critically judge and evaluate personal historical understandings and attitudes

Critically judge various descriptive and normative beliefs and attitudes

Support the further development of the historical profession based on the principles of scientific rationality, international recognition, scientific excellence and integrity

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Recognize and name the common theoretical starting points of different historical disciplines

Present complex scientific and non-scientific content in written and oral form

Prepare and present written and oral presentations of complex academic and non-academic content

Conduct scientific research in the field of historical sciences and write historical papers in a clear and organized manner

General Competencies

Upon successful completion of the course, students will be able to:

1. Connect events and cases from their own region with general historical processes and theories.
2. Identify the specific features of local development in comparison with broader social trends of a given period.
3. Research and interpret local events, figures, and phenomena from the Middle Ages to contemporary history.
4. Contextualize elements of regional history within their temporal, social, cultural, political, and economic settings.
5. Compare regional history with analogous examples from Western, Central, and Southeastern Europe.
6. Analyze and evaluate individual historical phenomena (figures, events, ideas) on a micro level.
7. Independently research the history of their chosen region.
8. Design a presentation based on the critical use of diverse historical sources.

Lecturer

doc. dr. sc.
Vanessa Varga

ECTS Credits	5.0

English Level L2

E-learning Level L1 (20%)

Study Hours

15

15

Grading

50% colloquium, 20%
class activity, 30%
seminar work

Course Description

To introduce students to the development of a theoretical study of mass communication and journalism from modernism to the present, with movements, schools and theories that have been aroused and become the foundation of contemporary media theory as well as those to be used, according to experts, to establish mass communication and media activity in 21st century.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce, itemize and explain processed theory.
2. Apply, use and be acquainted with technical terminology
3. Explain and understand the interdisciplinary nature of the communications and explain processed theories in the context of other science under whose influence emerged.
4. Analyze critically and explain processed theory, their significance for journalism and mass communication.
5. Argue and rationally defend your own attitude about analyzed theme.
6. Demonstrate the ability to understand and process of academic and non-academic texts and reproduce their basic meaning and content.
7. Reproduce and present with arguments critical essay on a book that you read.

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Define and describe the disciplines of contemporary communication studies, the history of their development and central problems, and use professional terminology in different areas of communication studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Show the application of theoretical knowledge of communication studies

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

Interpret the most important works of certain theoreticians of communication studies, mass communication and journalism and public relations, and critically analyze and evaluate the positions and arguments contained in them

General Competencies

Define, describe and explain the basic theory of mass communication and journalism incurred in the period under review. Apply, classify and distinguish professional terminology. Identify and provide reasoned interpretation of interdisciplinary nature of the study of mass communication and journalism, connecting the individual segments of their characteristics with the corresponding segments of the history and characteristics of the social sciences and humanities as well as various aspects of social development. In written and oral arguments clearly show and analyse complex academic and non-academic contents.

Mass Communication: Cultural Aspects

63567

Lecturer

Ljubica Josić,
nasl. izv. prof.
dr. sc.

Course Description

The aim of the course is to familiarize students with the role of the media in the culture of the society, with cultural values of media content and industry of culture as a phenomenon of contemporary consumption. It also aims to facilitate the adoption of terminology and theoretical and analytical framework for analyzing media writing or research in cultural phenomena and media.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Compare different theoretical approaches and critical role of the media in culture
2. Differentiate terminology and methodological research practice of cultural aspects of mass communication.
3. Distinguish between different cultural media genres
4. Classify and explain various cultural trends and their impact on mass communication and media content
5. Identify 4 types of cultures in mass media.
6. Distinguish and monitor the cultural contents in different media.
7. Distinguish and interpret the relation between culture and politics in media presentation.
8. Define the terms associated to the popular culture, high culture, digital culture and traditional culture.

Study Programme Learning Outcomes

Communication Studies

General Competencies

Apply, classify and distinguish the professional terminology related to the content of the study course; identify and interpret arguments for interdisciplinary nature of communicology, linking individual segments of the peculiarities of communicology, mass communications with various aspects of social development; consider and assess the legitimacy of various theoretical and practical suggestions, taking into account the specificities of the various areas of life and work environment; coordinate discussions and provide explanatory comments on a number of issues, primarily communicational nature, but of cultural nature as well.

Mass Communication: Political Aspects

57211

Lecturer

doc. dr. sc.
Tomislav
Janović

Course Description

Mass communication has given character to human society since its beginning, and its forms have evolved in parallel with social and technological development and had impact on the character of political relations. The information society is characterized by a pronounced influence of the media on social life, and the emergence of new media is again changing the forms of communication and strongly influences the methods of politics.

The aim of the course is to enable students to gain insight into the latest developments in the political aspects of mass communication, and the role of communication in the political process. The course will contain an introduction to the structure of the political process, the history of political ideas and public phenomenon as a framework for communication and legitimacy based on political decisions. The course should enable students to acquire knowledge and adoption of appropriate methods of research.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, classify and distinguish between political communication and political aspects of mass communication;
2. Define, explain and be familiar with the relationship between politics and the media;
3. Explain and understand the development of mass communication, with an emphasis on the political aspects of mass communication;
4. Define, explain and recognize the role of media in a democracy;
5. Define, identify and use a variety of political approaches to media content;
6. Define and explain the use of political and democratic values in the work of the media.

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Define and describe the disciplines of contemporary communication studies, the history of their development and central problems, and use professional terminology in different

A prerequisite for the successful completion of the course is regular and active participation. During the semester, students should submit a paper on a given topic, write an essay on the same topic, participate in two colloquia and show initiative during the discussion.

areas of communication studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Show the application of theoretical knowledge of communication studies

Develop competences in professional and interdisciplinary teamwork

Professionally apply acquired specialist, theoretical and practical knowledge in the sphere of media, i.e. journalism, public relations and scientific research in communications

General Competencies

Define, describe and evaluate the political aspects of mass communication, the history of their development and the central problems;

Apply, classify and differentiate professional terminology;

Coordinate discussions and provide explanatory comments on a number of issues, primarily of communicational nature, but also of a political nature;

Conceptually clearly present information and different political views and critically assess the credibility of statements, assumptions and arguments mediated through a variety of media;

Identify and use arguments to interpret interdisciplinary nature of communications, linking parts of the history and characteristics of mass communication with the corresponding segments of the history and characteristics of the social sciences, particularly political science, and political aspects of social development.

Mass Communication Research Methodology

57208

Lecturer

izv. prof. dr. sc.
Ivan Burić

Course Description

At the beginning of graduate studies, the task of this course is to show the different possibilities and methods of scientific research of media to facilitate the students to decide what subject to choose for their research as well as subject of the MA thesis. As preparation for independent and responsible scientific research in the field of media research, the course will introduce students (both in theoretical and practical terms) to methodological approaches to mass communication research in the fields of mass communications.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe the basics of scientific research.
2. Define and describe specificity of quantitative research methods.
3. Define and describe specificity of qualitative research methods.
4. Apply scientific research methods in the study of mass communication
5. Write a research design.
6. Analyze and interpret data collected by scientific research methods in field of mass communication

Study Programme Learning Outcomes

Communication Studies

Use different scientific and research methods of social sciences and independently conduct scientific research in the field of communication studies and write scientific papers in a clear and organized manner

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

ECTS Credits	5.0

Study Hours 90

Grading

50% the written thesis,
50% the oral presentation
before a three-member
committee.

Course Description

Graduate thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Plan the course of scientific research within a well-defined frame;
4. Define research problems, hypotheses and methods which will be used in order to reach relevant results;

5. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

Study Programme Learning Outcomes

Dual-major studies

Operate with pedagogical documentation related to the performance and records of teaching as well as other documentation related to the complete work of the school.

Design of didactic content: planning, performing and evaluation of teaching

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Use methods of explanation and interpretation of historical processes

Critically judge various descriptive and normative beliefs and attitudes

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research; Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research; Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner; Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities. Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

Media and Bioethics

64815

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

The aim of this course is to offer the students an overview of the entire historical development and content of bioethical science, with an emphasis on the role of mediation of mass media in the conveying and shaping of public opinion regarding the most important bioethical issues.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize in an event or news typical content for bioethics
2. Demonstrate a critical attitude towards the event or news (distinguishing concepts, ideological lines and legal and ethical implications associated with that event or news);
3. Write or interpret the news according to one's own (bio) ethical viewpoint, applying the ethical minimum of good journalistic practice, in relation to the issues that relate to the personal and civil rights
4. Identify wrong ideological interpretations of events that concern bioethics
5. Argue the basic tenets of the most current bioethical topics
6. Gain the skills of preparation PR communications of bioethical themes
7. Learn to prepare analytical matrix for the analysis of media content of the bioethical themes

Study Programme Learning Outcomes

Communication Studies

General Competencies

Define, describe and evaluate bioethics, its specific characteristics. Apply, classify and distinguish professional terminology. Identify, distinguish, evaluate and critically assess media effects and their impact on media audience and the society as a whole. Rationally and in a well-argued manner defend one's own professional attitudes and insights. In written and oral form clearly present and analyze complex academic and non-academic content.

Media Management

57209

Lecturer

Tanja Grmuša,
nasl. izv. prof.
dr. sc.

Course Description

The main object of the course is to provide insight into basic knowledge of media management with a particular emphasis on its practical application in everyday activities in the organization and functioning of media organizations. The specific aim of the course is to introduce students with the particularities of management technologies and methods within media houses and the legislative framework in which such activities take place, to bring their media managers closer and to enable them to manage their media functions.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic management concepts in the media;
2. Analyze the characteristics of managing the media organizations (local, regional, national and global);
3. Compare normative acts of media legislation which regulate the organization and operation of media organizations in the Republic of Croatia
4. Analyze the role of a manager in the media organizations
5. Recognize and describe the specificities of media management in different types of media
6. Analyze the effectiveness of marketing strategies in the media

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Coordinate discussions and provide explanatory comments on a number of issues primarily of a communication nature, but also of a social, cultural or political nature

Use different scientific and research methods of social sciences and independently conduct scientific research in the field of communication studies and write scientific papers in a clear and organized manner

Describe the points of contact between contemporary communication studies and other social and humanities sciences

Recognize the needs and readiness for lifelong professional

Methodology of Literary Interpretation

286087

Lecturer

prof. dr. sc.
Davor Piskač

Course Description

The interpretation of a literary text is part of the teaching of literature in primary and secondary schools. In terms of teaching it presents extremely important tools for the analysis and interpretation of literary texts. It enables awareness of the relationships within a literary work and what impact these relationships have on the reader, the society and the development of literature and culture in general. After completing the course "Interpretation of literary texts" the students will be able to: observe the content and the differences in meaning in the field of literature and culture. This will contribute to the development of cognitive skills and aesthetic sensitivity in the students. As a result, the students will be able to better and more fully understand literature across a diachronic and synchronic overview.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe, identify and define the features of a particular literary genre.
2. Describe, the students should be able to express, recount and convey information about the meaning of the text's content.
3. Describe, the students should be able to connect knowledge and explain the interpreted texts.
4. Explain pose a hypothesis and formulate it, orally compose, explain and write a synthesis of the meaning of the interpreted text.
5. Evaluate and distinguish, evaluate the students' interpretations and explain the decision.
6. Explain interpretation of poetry
7. Explain interpretation of narrative text.
8. Explain interpretation of drama

Study Programme Learning Outcomes

Dual-major studies

Croatology

Interpret and critically judge literary text

Describe, recognize and apply the fundamental stylistic features of the text

Grading

STUDENT OBLIGATIONS

Class attendance is obligatory (minimum of 70%); Students are obliged to actively participate in classes; Students are obliged to write two essays; ECTS credits: Class attendance 1 credit, class activity 1 credit, first essay 1 credit, second essay 1 credit; Student participation in class and exam essays are graded – For ten points from activity the students shall receive a higher grade by one. Students are obliged to write two essays out of four possible choices: 1. Interpretation of a lyric poem: Pablo Neruda: "Noćas bih mogao napisati" 2. Interpretation of a novel: Alessandro Baricco: "Svila" 3. Interpretation of a drama: Miro Gavran: "Paralalni svjetovi" 4. Interpretation of a travelogue: Antun Gustav Matoš: "Ferije". Each essay should have between 1200 and 1500 words (3-4 pages). Each essay shall receive between 1 and 10 points. An essay may not receive more than the maximum number of points from the presented areas: 1. Knowledge of the theoretical literature 2 points 2. Good

General Competencies

Make the students capable of literary interpretation and the identification, detection and supporting the meaning of a literary text.

Forms of Teaching

- » Predavanja
 - » Heuristic class
- » Metodičke vježbe
 - » Solving problems oriented class

Week by Week Schedule

1. Course details worked out according to the schedule of teaching
2. Calendar:
3. Basic interpretation
4. Interpretation of lyric poetry
5. Interpretation of a lyric poem (reading: Slavko Mihalić: "Metamorfoza")
6. Prose interpretation
7. Interpretation of a novella (reading: Zoran Ferić: "Potrči doktora")
8. Interpretation of a novel (reading: Patrick Suskind: "Parfem")
9. Interpretation of drama
10. Interpretation of a tragedy (reading: Shakespeare: "Hamlet")
11. Interpretation of a comedy (reading: Moliere: "Škrtac")
12. Interpretation of a modern drama (reading: Patrick Marber: "Closer")
13. Interpretation of discursive genres (reading: Petar Šegedin: "Staromodni zapisi iz Bruges")
14. Interpretation of discursive genres (reading: Petar Šegedin: "Staromodni zapisi iz Bruges")
15. Final knowledge assessment and grading

E-learning Level L1

Study Hours 30

Grading

Students are monitored for their active participation in the course, critical thinking, and making enquiries about some topics. Students show the level of comprehension of theoretical bases by carrying out a teaching unit and critically analysing the teaching of their colleagues. The adoption of necessary knowledge and skills is evaluated also through compiling written lesson plans and a part of the operational teaching plan. The knowledge acquired during this course is additionally evaluated and improved during the Practical Training in Subject Specific Teaching Methodology courses and the Correlation Practicum in the Methodology of Teaching.

Course Description

The course objective is to acquaint students with teaching as a highly complex system of mediating knowledge and skills on three levels of teaching methodology: a) the level of teaching methodology that mediates the general theory of teaching, i.e. generally valid principles and procedures applied within various subjects and teaching situations as well as complex teacher-student-teaching environment communication relationships; b) subject specific methodology as a narrower specification of teaching procedures characteristic for a specific field or fields (e.g. humanities, social sciences), c) subject specific methodology fully concentrated on specific content and objectives of individual subjects/courses and adequate teaching procedures.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify individual propositions of the theory of teaching;
2. Describe relevant elements of planning the teaching process;
3. Classify teaching forms, methods and aids;
4. Demonstrate direct planning of lessons;
5. Analyze the National curriculum framework
6. Choose teaching methods, forms, and aids with the student, objectives and learning outcomes in mind;
7. Differentiate the ways of organizing practice and repetition;
8. Define positive classroom atmosphere, good class management, and productive ways of establishing classroom discipline;
9. Identify the ways of evaluating and marking students.

Study Programme Learning Outcomes

Dual-major studies

Croatology

Interpret and critically judge literary text

Critically relate to mastered content and argue your conclusions in written and oral form

Croatology

History

Sociology

General Competencies

Teaching methodology mediated on all three levels contributes to a complete education of future teachers in relation to the ability of organizing, carrying out and evaluating the teaching activity by enabling students to:

Describe theoretical postulates of subject specific teaching;

Distinguish between various didactic, pedagogical and psychological theories;

Compare different theories and postulates;

Indicate individual premises of the theory of teaching;

Identify the most important elements of planning the teaching process.

Forms of Teaching

» Predavanja

» theoretical part of the lecture will include exercises and examples for individual and group work of students

Week by Week Schedule

1. The course will be taught with the help of power point presentations; and discussions, individual work, critical thinking, analysing and reasoning will be encouraged.
2. Defining the three levels of teaching methodology (general teaching, field specific and subject specific) i.e. the associated objectives, tasks, and content. Determining the importance of Teaching Methodology in the educational process.
3. Critical review of the proposed National curriculum framework for pre-school education and general compulsory and secondary education. Defining the notions of national and school curriculum, analysing the values, objectives, and principles set forth in the national curriculum framework. Special emphasis is put on the teaching topics on the borderline between subjects and on new subjects foreseen by the National curriculum, as well as on analysing the outcomes/achievements in the fields of social sciences and humanities.
4. Overview of basic school documentation that students will as future teachers deal with in schools. Special attention is paid to the operational teaching plan (school curriculum) as the basic document concerning teaching methodology. Analysing written preparation for teaching one unit.
5. Defining teaching methods, teaching forms, and teaching tools. Discussing various teaching methods classification criteria and overviews of basic teaching forms (frontal teaching, individual work, group work, pair work), as well as contemporary teaching tools. Analysing advantages and disadvantages of the discussed teaching methods, forms, and tools.
6. An overview of the lesson structure and methodological rules of structuring and carrying out lessons. Stressing the importance of planning. Indicating the basic steps of planning and the ways to compile written lesson plans.
7. Defining the notion of class management: what it represents, why it is important, and what the styles of class organization and management are. Pointing to the necessity of establishing positive classroom atmosphere to serve as the motivation for better performance of students. Analysing student disobedience and the lack of interest in school or a subject. Pedagogical means of establishing class discipline.

8. Point out the importance of practicing and repetition in teaching, and indicate the styles and ways of practicing with special emphasis on homework. Warn about standard and non-standard ways of evaluating students' achievements, with a review of the Secondary-School Final Exam (cro. Državna matura) and of how students are prepared for it.
9. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
10. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
11. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
12. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
13. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
14. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
15. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.

Grading

The final grade is the sum of four components - theoretical knowledge of the content, curriculum analysis, preparation of teaching hour class and analysis of essay assessment criteria

Course Description

The aim of this course is to acquaint students with the methodology of teaching philosophy as crucial to achieving the necessary teacher competencies for teaching philosophy, logic and ethics. Also, the aim is to analyze and argumentatively consider the basic scientific issues of theory and practice of teaching methodology of philosophy, logic and ethics that include topic of curriculum and textbooks; different approaches, forms and methods of teaching; setting proper goals and outcomes; planning, preparation and implementation of teaching units; ways of teaching and motivating; and evaluations and grading.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe goals, outcomes and methods in teaching philosophy, logic and ethics;
2. Analyze and evaluate the curriculum for the subjects of philosophy, logic and ethics
3. Analyze and apply different ways and procedures of introduction to philosophy, logic and ethics
4. Apply different forms of relationships and communication in the teaching process
5. Demonstrate and design lesson preparation
6. Develop performance curricula in philosophy, logic and ethics
7. Compare and select relevant methods and resources with respect to learning objectives and outcomes

Study Programme Learning Outcomes

Dual-major studies

Operate with pedagogical documentation related to the performance and records of teaching as well as other documentation related to the complete work of the school.

Design of didactic content: planning, performing and evaluation of teaching

Apply the legal basis of the teacher's profession and the ability to interpret the related laws of the rights and obligations of employees of the educational institution

Methods of Teaching Psychology

53847

Course Description

The course objective is to acquaint students with teaching as a highly complex system of mediating knowledge and skills on three levels of teaching methodology: a) the level of teaching methodology that mediates the general theory of teaching, i.e. generally valid principles and procedures applied within various subjects and teaching situations as well as complex teacher-student-teaching environment communication relationships; b) subject specific methodology as a narrower specification of teaching procedures characteristic for a specific field or fields (e.g. humanities, social sciences), c) subject specific methodology fully concentrated on specific content and objectives of individual subjects/courses and adequate teaching procedures.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the content, goals and objectives of the teaching methodology
2. Classify teaching forms, methods and teaching media
3. Choose teaching methods, forms, and aids with the student, objectives and learning outcomes in mind
4. Analyze the curriculum of the subject, teaching plans and examination catalogs
5. Independently form and write an operational teaching plan
6. Write lesson plans
7. Explain the principles of practicing and repetition and ways of evaluating students' work
8. Define positive classroom atmosphere, good classroom management and ways of establishing discipline
9. Identify the ways of evaluating and marking students.

Study Programme Learning Outcomes

Psychology

General Competencies

Teaching methodology mediated on all three levels contributes to a complete education of future teachers in relation to the ability of organizing, carrying out and evaluating the teaching activity by enabling students to:

Describe theoretical postulates of subject specific teaching;

Distinguish between various didactic, pedagogical and psychological theories;

Compare different theories and postulates;

Indicate individual premises of the theory of teaching;

Identify the most important elements of planning the teaching process.

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours 30

Grading

Students are monitored for their active participation in the course, critical thinking, and making enquiries about some topics. Students show the level of comprehension of theoretical bases by carrying out a teaching unit and critically analysing the teaching of their colleagues. The adoption of necessary knowledge and skills is evaluated also through compiling written lesson plans and a part of the operational teaching plan. The knowledge acquired during this course is additionally evaluated and improved during the Practical Training in Subject Specific Teaching Methodology courses and the Correlation Practicum in the Methodology of Teaching.

Screening of student's work

1 ECTS Pohađanje nastave [EN]

1 ECTS Pismeni ispit [EN]

0.5
ECTS Seminarski rad [EN]

0.5
ECTS Praktični rad [EN]

3 ECTS

Forms of Teaching

- » Predavanja
 - » interactive lectures
- » Metodičke vježbe
 - » preparing and holding a teaching unit in groups

Week by Week Schedule

1. Introduction; The course will be taught with the help of power point presentations; and discussions, individual work, critical thinking, analysing and reasoning will be encouraged.
2. Defining the three levels of teaching methodology (general teaching, field specific and subject specific) i.e. the associated objectives, tasks, and content. Determining the importance of Teaching Methodology in the educational process. The purpose and objectives of teaching psychology.
3. Organization of the school. An analysis of the form and mode of the work of psychologists in primary and secondary schools. Rights and obligations of the trainee teacher. Overview of basic school documentation. Taking the professional exam.
4. Defining the notion of curriculum, analysing the curriculum of the subject, teaching plans and examination catalogs.
5. Planning and programming of classroom work (elements, purpose and function). Operational teaching plan.
6. An overview of the basic steps of planning (lesson structure and methodological rules of structuring and carrying out lessons), and the ways to compile written lesson plans.
7. Defining, overviewing and discussing basic teaching methods and teaching forms, analysing their advantages and disadvantages.
8. Defining, overviewing and discussing basic teaching tools, analysing their advantages and disadvantages
9. Managing the teaching process. Classroom organization and management styles.
10. Classroom atmosphere (establishing positive classroom atmosphere). Analysing student disobedience and the lack of interest in school or a subject: causes and prevention. Pedagogical means of establishing class discipline.
11. The importance of practicing and repetition, presentation of styles and methods of practicing and repetition. Evaluating student work and progress.
12. Monitoring and evaluating your own work (what makes a good teacher?)
13. Students will be required to teach one lessons, using the selected teaching method and teaching form.
14. Students will be required to teach one lessons, using the selected teaching method and teaching form.

15. Students will be required to teach one lessons, using the selected teaching method and teaching form.

Forms of Teaching

- » Predavanja
 - » lectures direct teaching

Week by Week Schedule

1. The course will be taught with the help of power point presentations; and discussions, individual work, critical thinking, analysing and reasoning will be encouraged.
2. Defining the three levels of teaching methodology (general teaching, field specific and subject specific) i.e. the associated objectives, tasks, and content. Determining the importance of Teaching Methodology in the educational process.
3. Critical review of the proposed National curriculum framework for pre-school education and general compulsory and secondary education. Defining the notions of national and school curriculum, analysing the values, objectives, and principles set forth in the national curriculum framework. Special emphasis is put on the teaching topics on the borderline between subjects and on new subjects foreseen by the National curriculum, as well as on analysing the outcomes/achievements in the fields of social sciences and humanities.

4. Overview of basic school documentation that students will as future teachers deal with in schools. Special attention is paid to the operational teaching plan (school curriculum) as the basic document concerning teaching methodology. Analysing written preparation for teaching one unit.
5. Defining teaching methods, teaching forms, and teaching tools. Discussing various teaching methods classification criteria and overviewing basic teaching forms (frontal teaching, individual work, group work, pair work), as well as contemporary teaching tools. Analysing advantages and disadvantages of the discussed teaching methods, forms, and tools.
6. An overview of the lesson structure and methodological rules of structuring and carrying out lessons. Stressing the importance of planning. Indicating the basic steps of planning and the ways to compile written lesson plans.
7. Defining the notion of class management: what it represents, why it is important, and what the styles of class organization and management are. Pointing to the necessity of establishing positive classroom atmosphere to serve as the motivation for better performance of students. Analysing student disobedience and the lack of interest in school or a subject. Pedagogical means of establishing class discipline.
8. Point out the importance of practicing and repetition in teaching, and indicate the styles and ways of practicing with special emphasis on homework. Warn about standard and non-standard ways of evaluating students' achievements, with a review of the Secondary-School Final Exam (cro. Državna matura) and of how students are prepared for it.
9. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
10. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
11. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
12. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
13. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
14. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.
15. Students will be required to teach one lessons, using the selected teaching method, teaching form and Power Point presentation.

Course Description

The purpose of this course is to enable students to gain a wider insight into the psychological aspects of warfare and the psycho-social consequences of participating in the war. It also describes and explains the various activities and roles of psychologists in the pre-war, war and post-war periods.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the psychological aspects of war and the postwar period
2. Identify core tasks and practices of military psychologists
3. Distinguish ethically (and legally) acceptable and unacceptable forms of behavior in the war
4. Analyze general and specific forms of psychological preparation and monitoring of psychological combat readiness
5. Distinguish the influence of various forms of psychological operations (PSYOP)
6. Assess the effectiveness of policies and practices of psycho-social care for war veterans
7. Distinguish the use of techniques of psychological relaxation and stress reduction in wartime and peace

Week by Week Schedule

1. Why war?
The phenomenon of war and the historical development of military psychology in the world and in Croatia.
2. What is the job of a military psychologist?
Basic tasks of military psychologists. Specific activities of military psychologists in various military branches - in the Army, Air Force, Navy and Special Forces.
3. War fears and how to prepare for it?
Anxiety, fear, panic in the war. General and specific psychological preparation of soldiers.
4. How to prepare soldiers for captivity?
Special psychological preparation of soldiers for behavior in captivity.
5. What are people willing to do to other people?
Operational psychology. Interrogation techniques and methods.
6. How to overcome stress?
Combat stress prevention. Debriefing and relaxation techniques.
7. Why do we kill each other?
Justified and unjustified aggressive and violent behavior in the war. War ethics and war crimes.
8. What unites us in war troubles?
Creation and development of military groups. Observing and measuring psychological combat readiness.
9. How do we lie?
Psychological Operations (PSYOP) and psychological warfare. Rumors in War.
10. Is it all wonderful after the war?
Psycho-social features of the post-war period. Frequent diseases and premature deaths of war veterans - causes, consequences and preventive actions.
11. Why do we suffer after the war?
Posttraumatic Stress Disorder (PTSD) in war veterans.
12. Why raise our hands to himself, even after the victory?
Suicides of war veterans.
13. How much suffering for our family members?
Secondary victimization, secondary traumatization and transgenerational trauma transfer
14. Have we all gone mad?
Psychology of terrorism.
15. Written and oral exam.

Course Description

Introduce students to the facts that determined the basic military-political relations of the constituent nations of Bosnia and Herzegovina during the 1990-1995 war period

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the motives of the different parties to the conflicts in Bosnia and Herzegovina
2. Compare different perceptions and views on the political structure of Bosnia and Herzegovina
3. Apply critical thinking to different perceptions of the organization of Bosnia and Herzegovina
4. Develop competencies for interpreting military activities of all parties to the conflict
5. Analyze the political practices that led to the war
6. Relate military events with political relations in BiH

Grading

Regular and active participation in class.
Individual presentation preparation based on one Croatian language teaching unit. Written exam or colloquium.

Course Description

The objective of the course is to acquaint students with the basic theoretical backgrounds and contemporary scientific knowledge in the field of psychology of learning and motivation with an emphasis on the role of motivation in learning and school success, and to enable students to apply the acquired knowledge in teaching Croatian language, in the context of increasing students' internal motivation and motivation for achievement.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Compare basic theoretical approaches in the study of motivation
2. Evaluate the findings of contemporary research into motivation
3. Explain developmental, individual, and external factors influencing motivation
4. Apply the acquired knowledge of the determinants of motivation to the organization of conditions in teaching Croatian
5. Apply dramatic motivational procedures and educational plays in Croatian language teaching
6. Apply acquired knowledge to your own motivation to work

45	1

Teaching Assistant
dr. sc. Marija Zelić

Course Description

The aim of the course is to acquire knowledge and skills to use the major multivariate statistical analysis of the results at the level of understanding, planning and implementation of research analysis. Students will be acquainted with all fundamental multivariate statistical knowledge and techniques which are being used in sociological practice with emphasis on the specifics, advantages and limitations of particular methods of multivariate data analysis, develop motivation to work in sociological research, as well as knowledge of basic statistical methods and techniques and the motivation for their use in social research. The basic idea of the multivariate statistical analysis is to simultaneously observe several interrelated variables, wherein each variable initially, as important.

Students have been developing abstract way of thinking and adopting statistical terminology. Understanding of statistical analysis procedures, which are subject to lecturing, are being verified in written forms, through tests and numeric exercises. Students are expected to demonstrate clear and logically consistent interpretation of calculated results

Learning Outcomes

On successful completion of the course, students will be able to:

1. Estimate the statistical requirements for the implementation of selected multivariate techniques.
2. Design a plan of research using some of multivariate techniques.
3. Analyze data suitable for analysis of some of these multivariate analysis techniques using SPSS software package
4. Explain the results obtained by some of these multivariate techniques within the set of research problems
5. Evaluate conclusions by applying some of these multivariate techniques in research
6. Explain statistical and mathematical logic MANOVA, regression, correlation, discriminant, canonical and cluster analysis.

Study Programme Learning Outcomes

Sociology

Implement an appropriate method to research social phenomena

Create a project proposal

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises, and orally

- Organize data to create strategies
- Apply qualitative and quantitative data processing programs
- Differentiate sampling methods for social research
- Apply social research methods in labor market analyses
- Evaluate appropriate ways of intervention of a certain social issue
- Develop and select different problem-solving strategies

General Competencies

- Apply the advanced statistical terms and information.
- Design a research project.
- Organize the implementation of a research project.
- Use the computer software for the analyses of qualitative and quantitative data.
- Organize the teamwork with co-workers from various disciplines, of different attitudes or value orientations.
- Develop the research question on the subject/process/phenomena of social interest.
- Choose the adequate methodological approach or the combination of approaches in investigation of the social phenomena.
- Combine the different social research methods in the analyses of the relevant data.
- Evaluate published sociological research with suggestions of possible improvements.
- Write a comprehensive research report.

Week by Week Schedule

1. Introductory lesson and overview of the overall subject- matter.
2. One Way-Analysis of Variance (ANOVA)
3. A-priori and post-hoc Comparisons
4. Multivariate Analysis of Variance (MANOVA)
5. The Multiple Regression Model. Model Specification, Model development.
6. Least Squares Coefficient Estimators. The Explanatory Power of Linear Regression Equation.
7. Coefficient of Determination.
8. Stepwise Regression Model
9. Logistic Regression
10. Factor Analysis-FA
11. Principal Components Analysis
12. Mutual Factors Analysis
13. Factor axis rotation and interpretation
14. Cluster Analysis
15. Discriminant Analysis-DA

New Media and Digital Marketing

130706

Lecturer

doc. dr. sc.
Tomislav
Janović

Course Description

The goal of the programme is to explain to the students the basic laws of growth and development of digital media and marketing, and how they are interwoven with sociologic and business phenomena that they face every day. Through lectures and exercises, the students will learn basic concepts related to digital marketing, business strategy and marketing in digital media and learn basic business terminology.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, identify and explain on specific examples the basic information technology rules and the consequences arising from them.
2. Define, explain and apply the business 'long tail' concept.
3. List, identify and explain all the elements of the diffusion of innovations curve.
4. Define and devise a specific media communication plan for a product or a service on digital media platforms.
5. Identify the specificities of individual social networks and the marketing tools that are used on them.
6. Explain the business operations of Google and the benefits of their business model for business operations on the Internet.
7. Identify and theoretically explain the substitution and scalar media technology.

Study Programme Learning Outcomes

Communication Studies

General Competencies

Define, describe and evaluate new media and digital marketing, their relationship and the central problems. Apply, classify and distinguish professional terminology. Individually or in teams conduct scientific research in the field of communicology with the help of modern scientific-research methods and write scientific papers in a clear and organized manner. Expertly and professionally apply the acquired specialist theoretical and practical knowledge in practical work.

The grade is formed in a way that 80% of the value is carried by the written exam, and the remaining 20% is participation in classes, in discussions held in contact classes as well as in online forums on Merlin

Course Description

The main objective of this course is to familiarize the students with the basics of the methodology of the public opinion and media market research, as well as the basic goals of using this type of research in business practice. In this way, we want to educate the students in how to properly devise, use and evaluate public opinion and media market polls. Accordingly, the course strives to ensure that the students are upon completion of their studies capable to use the market, media and public opinion research in concrete business practice, as important business tools in the context of reflexive business practices.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use research methods and techniques that are applied in business organization operations.
2. Reproduce the most important methodological characteristics of individual methods of the public opinion and media market research.
3. Identify the most important benefits of certain methods of the public opinion and media market research.
4. Distinguish the most important specifics of particular methods of the public opinion and media market research.
5. Demonstrate the ability to communicate with research agencies in order to define research questions, define the optimal research design, as well as define the optimal research methods needed to solve specific business problems
6. Apply public opinion and media market polls in professional activities.

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Formulate and critically evaluate arguments for and against opposing points of view

Use different scientific and research methods of social sciences and independently conduct scientific research in the field of communication studies and write scientific papers in a clear and organized manner

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

Develop competences in professional and interdisciplinary teamwork

General Competencies

Define, describe and evaluate public opinion research and the central issues of the discipline.

Apply, classify and distinguish the professional terminology in various fields of communicology.

Identify, evaluate and use scientific-research methods used in the study of public opinion.

Individually or in teams conduct scientific research.

15

Teaching Assistant
dr. sc. Petar Ušković
Croata

Course Description

The history of world literature, and to that extent also Croatian literature, is impregnated with dominant motifs or topos that we associate with pagan (Greek and Roman) literature, which also experienced its stylizations in Christian literature. After antiquity, these motifs experienced their literary and linguistic manifestations again in the works of famous European and Croatian Renaissance writers, so they can be linearly viewed and analyzed in order to show that such and similar motifs belong to the circle of typified allegorical narrative-descriptive patterns. The aim of the course will be to present several such motives in the work on the text and introduce interested students to this approach.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and appreciate the justification of different theoretical approaches to literature
2. Describe, identify and define common motifs in pagan and Christian literature
3. Analyze and critically form an attitude about adaptations of pagan and literary motifs
4. Define interpolations of pagan motifs in Croatian literature
5. Define the importance of motifs for the meaning of the text
6. Recognize the concept of linear motifs in text construction

Study Programme Learning Outcomes

Dual-major studies

Design of didactic content: planning, performing and evaluation of teaching

Apply different methodical principles and procedures in planning, conducting and evaluating teaching

Croatology

Define, analyze and argue the Croatian cultural narrative

Interpret and critically judge literary text

Critically relate to mastered content and argue your conclusions in written and oral form

Describe and classify the legacy of other cultures within Croatia
Recognize and argue the influence of religion and philosophy on
Croatian culture

Parenting pedagogy

213981

Lecturer

izv. prof. dr. sc.
Katarina Dadić

Course Description

This course aims to acquaint students with the socio-historical context of parenting (parenting in different social contexts and how the concept of parenting has changed) with special emphasis on the challenges of modern parenting (technology, globalization, media, etc.). The intention is to critically approach different socio-historical theoretical frameworks of the perception of parenthood. Furthermore, in this course students will be introduced to partnership with parents in education, more precisely, how to have a quality counseling conversation with parents and will have the opportunity to critically evaluate different approaches to parenting education programs. By emphasizing the importance of parenting education in modern society due to many challenges, students gain insight into their role in the parenting education process. They will develop an understanding of the role of parenting and recognize their role in providing support to parents within the educational institution (parent meetings and parent information).

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concepts of parenting, upbringing, pedagogy, and parenting pedagogy.
2. State socio-historical changes in parenting.
3. Explain the role of teachers in parent education.
4. Explain the role of the media in parenting.
5. Describe the characteristics of a parent-school partnership.
6. Relate the importance of teacher-parent collaboration with parent education.
7. Analyze parent education programs.

Grading

Throughout the semester, students will be continuously evaluated based on the following obligations: 1. Writing a critical review of the topic (show the ability to critically read given texts and academic literacy); 2. Colloquia (according to lectures and provided literature); 3. Seminar paper (independently study, prepare and present); 4. Essay (according to selected scientific papers); 5. Written exam (according to lectures and provided literature). The final grade is the result of all the above elements.

Sociology

Evaluate social impact of social changes in society
Interpret certain social processes using knowledge of sociological theories

Grading

Students will be monitored in all three stages of the course delivery. In the first stage, when the basic concepts of pedagogy are taught, the student's motivation is monitored based on active engagement in class, as well as regular attendance (20% of the final grade). In the second stage, the student's individual and group work in research on a specific pedagogical problem, multimedia presentation and reporting on it in front of colleagues, and participating in the same assignment of other students are monitored (30 % of the final grade). The third stage refers to the evaluation of the student's systematic knowledge of pedagogy by means of a written exam (15 questions) based on obligatory literature and professor's lectures (50% of the final grade).

Course Description

The course objective is to prepare a future teacher for performing the educator's job as a master of arts by providing pedagogic knowledge and skills qualification.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Correctly interpreting the basic concepts of pedagogy, explain pedagogic epistemology and interpreting the interaction of education and pedagogy.
2. • Correctly interpret key pedagogic concepts (educate, educator, education, enculturation, acculturation, socialization, the science of education, educational authorities, educational role models etc.);
3. • Validly interpret the scientific foundations of pedagogy;
4. • Differentiate between views of man and the according pedagogic procedures based upon or arising from them;
5. • Explain learning and teaching as parts of education;
6. • Classify different development theories in the framework of reflecting on and organizing education;
7. • Compare educational needs according to different theoretical backgrounds (natural sciences on education, social sciences and humanities on education, social problems in behaviour);
8. • Summarize the content of certain educational policies

Forms of Teaching

» Predavanja

» Professor's lectures, with up-to-date novelties published in the field of pedagogy in relation to student, education, the discipline of pedagogy etc.

» Seminar

» Individual preparation for the presentation of a book from the field of pedagogic practice and participation in seven similar preparations and presentations of other students.

Week by Week Schedule

1. •The educatee as the centre of not only education, but entire pedagogy. Various perspectives on man, from chemical materialism and different historical versions on the nature of man to the view shaped by different cultures and civilizations (European, Asian, African).
2. •The possibility of and the need for education (education as an activity that creates both man and society, looked at from the point of view of different scientific disciplines and professions that all have contributed to the interdisciplinary approach in pedagogy as a science and the practice based upon it).
3. •With maximum respect for education as a possibility and a need, limits of education are discussed as well, whereby both pedagogical optimism and pessimism are elaborated as an introduction to the informed opting for pedagogic interactionism, i.e. pedagogic realism.
4. •Pedagogy as a distinct science (educational science or sciences, basic concepts of pedagogy, the difference between pedagogy and educational science(s), the objectives of pedagogy, the fields of educational sciences, pedagogy and related sciences (sociology, psychology, anthropology, neurosciences, biology), epistemological division: humanistic-scientific pedagogy, empirical educational science, critical educational science.

5. •New challenges facing pedagogy (concern about its scientism, education and its references, interaction of education and pedagogy, interaction of pedagogy and culture).
6. •Communication in education (relevant characteristics of education, education as the change of behaviour, intentional and functional learning, education as interpersonal activity, education as social interaction, education as social communication, education as purposeful help in learning).
7. •Learning and teaching as parts of education
8. •Theories of behaviour change in education (psychoanalysis, behaviourism, insight, defence mechanisms, urge, and libido).
9. •Authority in education (authority as the triple relationship of the instructor, the subject, and the field; the difference between authority and authoritarianism, the relationship between paedocentrism and types of authority, educational models, who is an ideal educator).
10. Highly talented and disabled persons in education
11. Problematic behaviour of educatees in education and schooling,
12. Still insufficiently explored man
13. Alternative education
14. Different degrees of education and schooling
15. Learning as a pedagogic problem, education – the concept of human growing up, educational policy.

Personality Psychology

57111

Lecturer

Josip Burušić,
nasl. prof. dr.
sc.

Course Description

The aim of the course is to familiarize students with the most important areas and topics of personality psychology, and enable them to establish their future professional work with individuals and groups on scientific knowledge in the psychology of personality so that they are able to integrate knowledge from different parts of psychology that relate to the area of the personality of the individual.

A further objective of the subject is reflected in the development of student competencies analysing, explaining and understanding human behaviour through the most important concepts and findings of personality psychology.

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and describe different approaches to the study of particular phenomena within the personality.
2. Define different approaches to the study of particular phenomena within the personality.
3. List and describe contemporary research insights on specific phenomena that under consideration within the psychology of personality.
4. Analyze individual phenomena and establish their interrelatedness
5. Analyze human experience and behavior in terms of the most important concepts of personality psychology.
6. Explain and understand human experience and behavior in terms of the most important concepts of personality psychology.
7. Argue and publicly present their views on particular phenomena in personality psychology.
8. Assess critically certain insights of psychology of personality
9. Apply modern insights in their professional work
10. Develop an awareness of necessity for continued efforts to improve their knowledge in the field of personality psychology.

Lecturers

doc. dr. sc.
Erik Brezovec

doc. dr. sc. izv. prof.
Erik Brezovec Steven Watson

Course Description

Introduce the most important concepts and the development of the phenomenological sociology to the graduate (master degree) students of sociology. The goal of the course is to see the possibilities of connecting the philosophical phenomenology with the sociology. The phenomenological sociology have its own foundations in the philosophy of Edmund Husserl, life-world concept of Alfred Schutz, social construction of reality of Peter L. Berger and Thomas Luckmann, ethnomethodology of Harold Garfinkel.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Relate the basic terms in the phenomenology and ethnomethodology
2. Analyze diachronic development of the phenomenological thought toward society
3. Use the phenomenology for the analysis of the scientific research
4. Criticize and connect the phenomenological theoretical approaches
5. Compare a different approaches in the process of solving the theoretical problems
6. Analyze contemporary social processes through the theoretical approach of phenomenological sociology

Study Programme Learning Outcomes

Philosophical methodology

201535

Lecturer

doc. dr. sc.
Matija Mato
Škerbić

Course Description

Philosophy as a specific discipline complements the scientific analysis of reality with the synthesis of knowledge. The philosophical methodology makes it possible to draw well-founded conclusions and recognize the most general patterns characteristic of reality.

Thus, the basic intentions of this course are threefold.

On the one hand, to acquaint male and female students with general philosophical methods and their peculiarities, to train them to conduct independent scientific research through the application of research methods and procedures, as well as understanding and critical evaluation of existing research.

On the other hand, to acquaint students with the general principles and methods of scientific work in the form of preparing a thesis: with ways of shaping the purpose of research, research questions, hypotheses and variables.

Finally, students will be able to create a research plan independently, with respect for the dignity of the person, adherence to ethical norms, good academic customs and principles of scientific and research integrity such as responsible data management, respect for copyright, the obligation of originality of scholarly works and engaged mentoring.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the key features of philosophical and non-philosophical methodology.
2. Distinguish different philosophical methods and successfully apply them in independent philosophical work
3. Evaluate the similarities and differences of the philosophical method from the methods of special sciences
4. Explain the significance, role and peculiarities of philosophy compared to the related fields of art, religion, culture and special sciences and disciplines
5. Compare and evaluate philosophical and scientific methodology in the educational process.
6. Apply knowledge of philosophical methodology in the teaching process

ECTS Credits	4.0

Philosophy of Game and Sports

187914

Lecturer

doc. dr. sc.
Matija Mato
Škerbić

Course Description

Course objectives:

- to get acquainted with the philosophy of sport and play, two related cultural phenomena of human society
- to analyze the central challenges in philosophically thematizing and conceptualizing sports and games from ancient times to modern times
- to discuss some of the basic problems of sports and games such as homo ludens, ethos of sport, rules of the game and their implementation, competition, doping, paternalism, fair play, Olympism.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify key issues and contributions of the philosophy of sport and play
2. Identify and consider moral problems in sport and as general moral problems
3. Recognize the importance of moral and sport education in the building of human character, the acquisition and exercise of virtues and orientation in morally dubious situations
4. Identify and list key authors and works of the philosophy of sports and play
5. Define and describe the basic concepts: sport, play, playing, ethos of sport, fair play, Olympism
6. Analyze and independently read the original texts of the philosophy of sport
7. Compare and evaluate opposing perspectives on particular sports issues

Study Programme Learning Outcomes

Dual-major studies

Philosophy

Analyze main problems of contemporary philosophical disciplines

Formulate different arguments, possible contradictions and construct counterexamples

ECTS Credits 3.0

English Level L3

E-learning Level L1 (15%)

Study Hours

Course Description

The aim of this course is to introduce to myth as an indispensable phenomenon of human culture and one of the oldest forms of religious expression. The complexity of this phenomenon is evidenced by the fact that different sciences, as well as philosophy itself, often speak of completely different things when talking about it. Therefore, learning about different ways of understanding myth as a particular cultural phenomenon and interpreting it is an important subject of this course. Students want to become acquainted with the ways and methods of dealing with religion in a strictly philosophical way, as well as pointing out what the goal of philosophy of religion is, that is, an attempt to give a philosophical answer to the phenomenon of religion itself, to its function and the meaning attached to it in human life, as well as questions about the possibility of proof of God's existence.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic labels of myth as a particular cultural phenomenon
2. Distinguish between different methods and approaches in the interpretation of myth
3. Explain the significance of the myth and its impact to this day
4. Distinguish between forms of cognitive approach to religion (philosophical and theological approaches)
5. Apply methods of strictly philosophical dealing with the phenomenon of religion
6. Distinguish and explain the different ways and types of possible evidence of God's (non) existence

Fieldwork will be conducted in a form expert lectures and visits to Croatian National Bank and/or some other financial institution.

Course Description

The aim of this course is to develop a deeper understanding of the fundamentals, functions, market position and instrument of financial markets and institutions. Particular accent of this course is on the role households in financial system, as well as, impact of demographic changes, financial exclusion and specific characteristic of retail products and services of financial institutions and markets. Students are learning theory, key skills and knowledge in business conduct of financial institutions and financial markets. Students are accepting expert knowledge for understanding and creating financial products and services of banks and institutional investors, especially for households sector. Financial sector is analysed in the context of contemporary market, technological and demographic changes to which it is exposed to. The course is also dealing with the topics such as financial crisis, consumer protection in financial services and challenges of ageing society for financial sector.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain functioning of financial sector in order to evaluate conditions in financial sector and to make financial decisions
2. Explain surroundings and events in financial sector and make savings and investment decisions.
3. Explain functioning of financial markets from the perspective of service provider as well as consumer.
4. Explain system, procedures and instruments of payment system
5. Evaluate and analyse Croatian financial and banking sector.
6. Explain changes in contemporary financial sector and challenges of aging society to business conduct of financial institutions and markets
7. Explain impact of financial sector on financial exclusion, financial crisis and the importance of adequate consumer protection.

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Interpret data on Croatian and global population and emigration

Grading

Regular attendance at classes, passed colloquium, discussion in class and independent preparation of a research assignment.

Course Description

To develop students' knowledge of the subject of consideration within the framework of the theoretical understanding of population and migration as

national security issues

Train students to differentiate and understand the meaning of adjacent scientific areas, fields, branches and disciplines, as well as multidisciplinary

subject interest

To acquaint students with the meaning of migration in spatial processes, relationships and security issues

Train students in discovering, recognizing and defining migration and security terms, categories and legality

To train students for independent scientific research related to the relationship between migration and national security

Train students to apply standard and special methods and techniques in migration and national security research

To explain to students the specifics of branch methodologies and spatial, social and security reflections of population and migration

To acquaint students with the development of the global and Croatian migration space and security in them

To develop students' application of migration and security projection methods and spatial models

To explain to the students the conditionality of migration on the security of the Croatian and global geographical space and society

Train students to understand, clarify and predict future migration and security issues, movements,

conditioning and consequences

To develop students' awareness of the threat to fundamental national systems in society and space caused by migration

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop students' knowledge of the subject of consideration within the framework of the theoretical understanding of population and migration as a national security issue
2. Distinguish the meaning of adjacent scientific areas, fields, branches and disciplines and the multidisciplinary of the subject interest
3. Develop students' awareness of the threat to fundamental national systems in society and space caused by migration
4. Explain the specifics of branch methodologies and spatial, social and security reflections of population and migration
5. Explain migration's conditioning on the security of the Croatian and global geographical space and society

6. Develop the ability to apply migration and security projection methods and spatial models

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Illustrate the need for scientific studies on demographic and immigration issues

Use statistical, quantitative, graphic and geographic software packages

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Propose political and legal solutions based on scientific research of demographic and emigrant content

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Practical Counselling and Helping Skills 173685

Lecturer

doc. dr. sc.
Jelena Maričić

ECTS Credits 3.0

English Level L1

E-learning Level L1

Study Hours 30

Grading

The student is required to regularly attend classes, actively participate in role-play exercises as both counsellor and client, submit a written counselling email in response to a simulated "client" inquiry (with a minimum score threshold defined for each grade), and complete a short written examination (with minimum score requirements established for each grade).

Course Description

Enable students to adequately provide psychological help to clients of different ages with different types of problems.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply competencies for working with people of different ages
2. Apply competencies for dealing with difficult issues and taboo themes
3. Apply competencies for working with people with different types of problems
4. Identify personal problems that could interfere with quality counseling work
5. Apply adequate strategies for self-care in the counselor role, with the aim of burnout prevention
6. Identify personal boundaries in ability to provide profesional help to clients

Study Programme Learning Outcomes

Psychology

General Competencies

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Assess the compliancy of psychological practice with the prescribed ethical principles of psychological practice in different fields of theoretical and applied psychology.

philol. croat.

Grading

Students are valued for:
regular attendance of
classes participation in
discussions and analysis
of the lessons held
preparation of teaching
units held at least two
teaching units design and
organization of the
workshop creation of
several forms of written
knowledge tests and
questionnaires

Course Description

The main objective of the course is to prepare students for working in secondary schools. The students are expected to practically apply the knowledge obtained in the fields of Pedagogy, Didactics, and Teaching Methodology of Croatian language by actually teaching classes. The objective is that the students master basic teaching methods and forms, using thereby contemporary media, and be able to encourage (their future) students as much as possible to be cooperative by designing and implementing various creative workshops

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write the operational teaching plan for a school year, sticking thereby to established didactic and methodological rules as well as to legal regulations.
2. Write a professional development plan.
3. Design written lesson plans
4. Plan in writing at least two lessons selected from an approved textbook
5. Design and teach at least two lessons selected from an approved textbook.
6. Design and hold a creative workshop on a selected topic.
7. Design a questionnaire for self-evaluation and evaluation of teachers.
8. Plan several forms of written exams

Study Programme Learning Outcomes

Dual-major studies

Croatology

Interpret and critically judge literary text

Critically relate to mastered content and argue your conclusions in written and oral form

Describe, recognize and apply the fundamental stylistic features of the text

Croatology

History

Sociology

General Competencies

The programme level outcomes of implementing relevant knowledge obtained in theoretical courses through practical training are:

interpret content in the sense of transposing data from one form to another

apply knowledge, experience, and skills in new situations,

analyse information (specific elements, relations between elements),

evaluate with the help of quantitative and qualitative criteria ,

synthesize in the form of a personal report,

provide arguments for one's attitudes,

suggest new interpretations and even theories.

Week by Week Schedule

1. Because this is practical training, lectures boil down to a minimum and refer only to shorter theoretical explanations. The biggest emphasis is put on shorter instructions regarding the writing of seminar papers and on the comments and/or suggestions concerning taught lessons, workshops, and written tasks.

Practical application of theoretical bases learned in the Subject Specific Teaching Methodology course to the design of the operational teaching plan. Drawing up the plan according to the calendar for the coming school year, based on the National Curriculum Framework, Teaching plans for croatian language, and individual Exam catalogues for croatian language for elementary and secondary schools.

Pointing out the importance of permanent professional development of teachers through designing a Professional Development Plan and referring the students to the web sites of the Education and Teacher Training Agency, Ministry of science, education, and sports, and domestic and foreign pedagogical literature.

In accordance with the requirements of contemporary didactics and teaching methodology, where the importance of individual work is pointed out, the students will be required to design and organize a creative workshop on a selected topic. The learning outcomes determined by the National Curriculum Framework have to thereby be accomplished (the fields of social sciences and humanities).

The students' attention will be drawn to the importance of class teaching lessons as the form of work aimed at getting to know the students, their needs and problems, coming together with one's students, and a more complete educational work. The students are expected to draw up and present The Class-Teaching Plan.

The cooperation between families and school will be pointed out through one of its forms – the parent meeting. The stress will thereby be put on the need to put parents in the role of active participants, and not passive listeners. The students are required to design and plan one parent meeting.

Taking into consideration the importance of practicing in teaching and the State Graduation Exam, this course will demand of the students to compile several forms of written exams. The students will thereby be directed to consult the National curriculum framework, Teaching plans and textbooks for croatian language, and Exam questions catalogues.

The students will in this course be taught how to draw up a simple questionnaire for getting feedback on their teaching or testing the expectations, opinions, or attitudes of the students and/or parents.

2. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
3. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

4. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
5. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
6. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
7. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
8. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
9. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
10. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
11. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
12. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
13. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
14. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
15. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

Practical Exercises in the Methodology of Teaching [Latin Language and Literature] 144744

Lecturer

prof. dr. sc.
Šime Demo

ECTS Credits	5.0
English Level	L1
E-learning Level	L2 (10%)
Study Hours	15 30

Grading

Students are regularly evaluated for attending lectures and participating in debates (1 ECTS), Creation of the Operational Curriculum and Professional Development Plan (1ECTS), Preparation of two lessons, and teaching two units of 45 minutes (2 ECTS), designing and organizing one workshop, and producing multiple forms of written tests and a questionnaire survey (1 ECTS).

Course Description

The primary goal of the course is to practically prepare students for work in primary and secondary schools. It is expected that students will apply the knowledge gained from Pedagogy, Didactics, and Methodology (of teaching Latin language and literature) by independently conducting teaching sessions. The aim is for students to master basic teaching methods and forms, utilizing modern media, and to increasingly apply independent student work as a teaching form through the design of creative workshops.

Practical application of the theoretical foundations from the Methodology of Subject Teaching involves the development of the Annual Implemented Curriculum. This includes creating a program based on the calendar for the upcoming school year, in accordance with the Curriculum and Program for Latin Language in Secondary Schools, the National Curriculum, and the Latin Language Exam Catalog. Emphasis is placed on the importance of teachers' professional development through the creation of a Professional Development Plan, referencing the websites of the Agency for Education, the Ministry of Science, Education, and Sports, and pedagogical literature by both domestic and foreign authors. Given the importance of consolidating material in teaching and the introduction of the State Matura exam, the course requires the creation of various forms of written assessments based on the Curriculum and Program, Latin language textbooks, and the Latin Language Exam Catalog.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write the operational teaching plan for a school year, sticking thereby to established didactic and methodological rules as well as to legal regulations.
2. Write a professional development plan.
3. Design written lesson plans
4. Plan in writing at least two lessons selected from an approved textbook
5. Design and teach at least two lessons selected from an approved textbook.
6. Design and hold a creative workshop on a selected topic.

7. Design a questionnaire for self-evaluation and evaluation of teachers.
8. Plan several forms of written exams

Study Programme Learning Outcomes

Croatian Latinity

defend personal scientific insights and positions in concrete cases rationally and by providing valid arguments
define and describe the disciplines of contemporary literature. linguistics and ancillary sciences of history. history of their development and central problems

Generic competencies

conceptually clearly present diverse information and positions. and critically evaluate the credibility of claims. assumptions and arguments presented through various media
constructively encourage further development of Croatian Latinity as an occupation based on the principles of scientific rationality. international recognisability. scientific excellence and integrity
apply different methods to explain. comment and interpret all literary scientific works written in Latin or Croatian language
resolve conflicts peacefully and rationally. at the same time respecting the opposing sides and their specific points of view
use the professional terminology accepted in fields and professions of contemporary linguistics and science of literature

Dual-major studies

Operate with pedagogical documentation related to the performance and records of teaching as well as other documentation related to the complete work of the school.
Design of didactic content: planning, performing and evaluation of teaching
Apply different methodical principles and procedures in planning, conducting and evaluating teaching

Croatian Latinity

Constructively encourage and promote the development of knowledge of Croatian Latinity based on the principles of scientific rationality, international recognition, and scientific excellence
Critically consider various descriptive and normative beliefs and attitudes about human nature and position in the world
Recognize and interpret the interdisciplinary nature of historical research, connecting its individual segments with corresponding segments of other humanities and social sciences
Promote and defend the fundamental ideas and principles on which modern democratic societies rest
Think interdisciplinary and respect different scientific methodologies and views on specific issues and problems
- EN ishod -Use standard professional and scientific terminology in contemporary linguistics and literary science
Clearly and innovatively present complex academic and non-academic contents in written and oral form

General Competencies

The programme level outcomes of implementing relevant knowledge obtained in theoretical courses through practical training are:
interpret content in the sense of transposing data from one form to another

apply knowledge, experience, and skills in new situations,
analyse information (specific elements, relations between elements),
evaluate with the help of quantitative and qualitative criteria ,
synthesize in the form of a personal report,
provide arguments for one's attitudes,
suggest new interpretations and even theories.

Practical Exercises in the Methodology of Teaching [Sociology] 144741

Lecturer

izv. prof. dr. sc.
Katarina Dadić

ECTS Credits	5.0
English Level	L1
E-learning Level	L1
Study Hours	15 30

Grading

Regular attendance and participation in discussions and analyses of taught lessons carry 1 ECTS credit unit. The drawing up of the operational teaching plan, written lesson plans for two teaching units and a workshop, the professional development plan, the class teaching plan, a parental meeting plan, several exam forms, and a questionnaire for evaluation carry 4 ECTS credit units. Lesson plans prepared and handed in in advance; teaching two 45-minute lessons, and designing and organizing a workshop carry 3 ECTS credit units.

Course Description

The main objective of the course is to prepare students for working in secondary schools. The students are expected to practically apply the knowledge obtained in the fields of Pedagogy, Didactics, and Teaching Methodology of sociology by actually teaching classes. The objective is that the students master basic teaching methods and forms, using thereby contemporary media, and be able to encourage (their future) students as much as possible to be cooperative by designing and implementing various creative workshops

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write the operational teaching plan for a school year, sticking thereby to established didactic and methodological rules as well as to legal regulations.
2. Write a professional development plan.
3. Design written lesson plans
4. Plan in writing at least two lessons selected from an approved textbook
5. Design and teach at least two lessons selected from an approved textbook.
6. Design and hold a creative workshop on a selected topic.
7. Design a questionnaire for self-evaluation and evaluation of teachers.
8. Plan several forms of written exams

Study Programme Learning Outcomes

Dual-major studies

Croatology

History

Sociology

- Recognize the elements of cultural/collective memory
- Modify the explanations and basic terminology of sociological tradition to target population
- Apply knowledge of sociological theories in managing conflict

situations

Compare different theoretical traditions in sociology

Sociology

Recognize the elements of cultural/collective memory

Apply knowledge of sociological theories in managing conflict situations

Compare different theoretical traditions in sociology

General Competencies

The programme level outcomes of implementing relevant knowledge obtained in theoretical courses through practical training are:
interpret content in the sense of transposing data from one form to another

apply knowledge, experience, and skills in new situations,
analyse information (specific elements, relations between elements),
evaluate with the help of quantitative and qualitative criteria ,
synthesize in the form of a personal report,
provide arguments for one's attitudes,
suggest new interpretations and even theories.

ECTS Seminarski rad [EN]

¹
ECTS Projekt [EN]

²
ECTS Praktični rad [EN]

⁵
ECTS

Forms of Teaching

- » Seminar
 - » seminar paper and tasks
- » Metodičke vježbe
 - » teaching practice

Week by Week Schedule

1. Because this is practical training, lectures boil down to a minimum and refer only to shorter theoretical explanations. The biggest emphasis is put on shorter instructions regarding the writing of seminar papers and on the comments and/or suggestions concerning taught lessons, workshops, and written tasks.

Practical application of theoretical bases learned in the Subject Specific Teaching Methodology course to the design of the operational teaching plan. Drawing up the plan according to the calendar for the coming school year, based on the National Curriculum Framework, Teaching plans for sociology, and individual Exam catalogues for sociology for secondary schools. Pointing out the importance of permanent professional development of teachers through designing a Professional Development Plan and referring the students to the web sites of the Education and Teacher Training Agency, Ministry of science, education, and sports, and domestic and foreign pedagogical literature.

In accordance with the requirements of contemporary didactics and teaching methodology, where the importance of individual work is pointed out, the students will be required to design and organize a creative workshop on a selected topic. The learning outcomes determined by the National Curriculum Framework have to thereby be accomplished (the fields of social sciences and humanities).

The students' attention will be drawn to the importance of class teaching lessons as the form of work aimed at getting to know the students, their needs and problems, coming together with one's students, and a more complete educational work. The students are expected to draw up and present The Class-Teaching Plan.

The cooperation between families and school will be pointed out through one of its forms – the parent meeting. The stress will thereby be put on the need to put parents in the role of active participants, and not passive listeners. The students are required to design and plan one parent meeting.

Taking into consideration the importance of practicing in teaching and the State Graduation Exam, this course will demand of the students to compile several forms of written exams. The students will thereby be directed to consult the National curriculum framework, Teaching plans and textbooks for sociology, and Exam questions catalogues.

The students will in this course be taught how to draw up a simple questionnaire for getting feedback on their teaching or testing the expectations, opinions, or attitudes of the students and/or parents.

2. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
3. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

4. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
5. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
6. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
7. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
8. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
9. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
10. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
11. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
12. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
13. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
14. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.
15. Practical application of knowledge to the process of planning and teaching lessons with the aid of contemporary media, avoiding the exclusive use of the frontal teaching form and insisting on the formulation and realization of educational teaching objectives.

Practice - research methods of mass communication

144890

Lecturer

Iva Černja
Rajter,
nasl. doc. dr.
SC,

Course Description

The aim of the course is to apply the acquired basic theoretical knowledge of research methods of mass communication through the implementation of independent research. Practicum educates and prepares students for the proper use of scientific methods to study mass communication.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and define quantitative research methods
2. Demonstrate ability to independently design topic and subject of a research and write its plan
3. Create an analytical matrix and questionnaire and conduct content analysis and survey
4. Describe the research results and write research reports
5. Demonstrate ability to independently conduct an empirical quantitative research
6. Describe and process the results of quantitative research and data analysis and processing
7. Demonstrate ability practical application of theoretical and methodological knowledge

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Present different information and points of view and critically assess the credibility of claims, assumptions and arguments mediated through various media

Show the application of theoretical knowledge of communication

ECTS Credits	3.0

English Level L2

E-learning Level L1

Study Hours

15

30

Grading

40% written exam, 40% research (research report), 20% attendance

studies

Distinguish practical applications of practical knowledge and skills from journalism and public relations

Develop oral and written communication skills

Professionally apply acquired specialist, theoretical and practical knowledge in the sphere of media, i.e. journalism, public relations and scientific research in communications

General Competencies

- Define, describe and distinguish research methods;
- Apply, classify and differentiate professional terminology;
- Identify, evaluate and use quantitative and qualitative scientific research methods of social science that are applied in communication studies;
- Independently conduct scientific research in the field of communications;
- Apply the acquired theoretical and practical knowledge in the field of scientific research in communication studies professionally

Forms of Teaching

» Seminar

» Seminar classes prepares students for understanding methods of scientific research of mass communication.

» Vježbe u praktikumu

» Practicum educates and prepares students for the proper use of methods for scientific research of mass communication.

Week by Week Schedule

1. A short theoretical introduction - repetition: methodology and methods, ways of knowing, the characteristics of the scientific method, the development of a research project, the study of mass media, quantitative and qualitative research methods;
2. Content analysis: definition, features of method, objectives and purpose of the application using the methods, advantages and disadvantages of the method, methodological aspects of content analysis, content analysis procedure (examples and exercises)
3. Defining the subjects and objects of research, setting research questions and hypotheses, determining population and sample selection, the selection and definition of the unit of analysis (examples and exercises)
4. Defining the basic content units and structure of analytic matrix (examples and exercises)
5. Devising a code system. Testing (test analysis), (examples and exercise)

6. Data analysis and processing
7. Writing a survey report (example and exercise)
8. Survey: definition of the term, origins and development of the methods, types of surveys
9. Interviewing techniques: field surveys (oral, written), survey by telephone (telephone interviewing without the participation of the interviewer), online surveys, mail surveys, the importance of the role of the interviewer;
10. Questionnaire: the value of surveys, steps and rules in drafting questionnaires, foundations in the context of correlational studies, the content in the correct formulation of survey questions;
11. Questionnaire: types of questions according to their basic form (open or closed questions, numerical scale), design issues, uniformity issues, multiple issues, separation of attitudes and arguments, the order of questions, the length of questions and questionnaires, validation survey research, identifying potential errors questionnaires ;
12. Sample: the concepts of population and sample, representative sample, characteristics of sample, the sample plan (method of selection of the sample);
13. Probabilistic samples (conditions for the selection and methods of selection criteria), non-probabilistic samples (criteria, characteristics, selection methods, type);
14. Sample size: standard error of the sample, determine the sample size and relationship to size of the population, dispersion of the sample. Realization of sample: the unavailability of the respondents selected by the plan, acceptance and refusal to participate in the survey, failure to respond to questions, interviewer errors in the implementation of the sample;
15. Writing an research report

Prejudice and Discrimination Prevention 255071

Lecturer

prof. dr. sc.
Renato Matic

ECTS Credits 4.0

English Level L1

E-learning Level L1

Study Hours
15
30

Grading

Presence at lectures and seminars within the framework of fieldwork are recorded. Together with active participation in discussions and writing essays, it comprises 25% of the final grade. Individual oral presentations of assigned seminar topics and a report/paper based on independent research comprise 35% of the final grade. Written and oral quiz carry up to 40% (excellent).

Course Description

The objective of the course is to prepare students for recognizing and understanding social activities and circumstances that result in prejudice and discrimination, as well as for autonomously recognizing the process of institutionalizing both prejudice and the social framework within which discrimination with time becomes an acceptable and desirable social activity. Learning skills include recognizing, preventing and combating prejudice, discrimination and hate crime.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the phenomenon of prejudice, and phenomenon of discrimination in a wide range of theoretical perspectives in sociology,
2. Present arguments regarding the significance of critical (self)awareness and interdisciplinarity,
3. Analyze the forms of social activity and social structures that produce prejudice and discrimination,
4. Recognize and reveal common and generally accepted institutional practice that encourages discrimination in social reality
5. Recognize the process of the institutionalization of discrimination and the social, framework within which discrimination with time becomes an acceptable and desirable social activity.
6. Assess and evaluate different preventive anti-discrimination programs and recommend improvements

Study Programme Learning Outcomes

Sociology

Recognize the generators of conflicts in contemporary society
Apply knowledge of sociological theories in managing conflict situations

General Competencies

- explain the initial assumptions of various political, religious and cultural orientations
- to work in a team with colleagues from different disciplines, different attitudes and orientations
- engage in solving social problems
- explain the key structural factors that shape the social world,
- explain the personal and local social issues in a broader social context, particularly in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization,
- explain the origin of social problems and conflicts while keeping in mind the way in which the social order is maintained and questioned,
- promote sociology and social research methods as relevant to solving current social problems and issues

Forms of Teaching

- » Predavanja
 - » 30 hours
- » Seminar
 - » 15 hours

Week by Week Schedule

1. Introduction to syllabus
2. Introductory discussion of the basic concepts 1: stereotypes
3. Introductory discussion of the basic concepts 2: prejudice, stigmatization,
4. Introductory discussion of the basic concepts 3: discrimination, hate crime, genocide
5. Social phenomena, and circumstances which enable prejudice, stigmatization, discrimination, hate crime, genocide
6. Introduction into actual examples of discrimination and hate crime
7. Ideology as the driver of prejudice, discrimination, hate crime and genocide
8. Phenomenon of Holocaust and Nazi state as a complete negation of humanity and human rights
9. Recognition of prejudice, discrimination and hate crime
10. Workshop 1: playing roles of people who are victims of discrimination and hate crime
11. Workshop 2: playing roles of people who are victims of discrimination and hate crime
12. Discussion 1: social possibilities to combat and overcome prejudice and discrimination
13. Discussion 2: social possibilities to combat and overcome prejudice and discrimination
14. Seminar presentations
15. Seminar presentations

Preparation of prevention programs

214005

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

Course Description

Enable students to define and differentiate theoretical approaches to prevention in the local community.

Introduce students to the process of developing prevention programs, look at the role of the local community, and other factors that affect the negative development outcomes.

To show students the prevention programs that are applied in Croatia and the world and to explain the importance of cooperation between the educational, health and penological systems and the social welfare system.

Include quantitative and qualitative methodology used in measuring the effectiveness, evaluation, and evaluation of the justification of prevention programs.

Work on the design of the original prevention program, from the analysis of relevant literature, through the development of a logical matrix to the planning and evaluation of the implementation of the prevention program and critically analyze its sustainability.

Apply the acquired knowledge in the design of the original project proposal in the field of prevention through seminar papers in small groups.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Evaluate different theories, paradigms, and methodological approaches in psychology when planning assessment and interventions with individuals, groups, and organizations.
2. Critically evaluate professional and scientific literature in psychology and related disciplines and create new scientific knowledge about prevention science.
3. Select appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures and the specifics of their environmental and social context.
4. Assess theoretical concepts and scientific knowledge in creating interventions and programs that will improve the living conditions and development of individuals, families, organizations, and communities.

ECTS Credits 3.0

English Level L1

E-learning Level L1 (10%)

Study Hours 30

Teaching Assistant
Katarina Jelić, mag. psych.

Grading

Conditions for taking the course include: signature of the teacher as proof of regular attendance (up to 3 absences); developed, presented and positively evaluated project task and oral individual discussion about the project, with emphasis on critical evaluation and connection with theoretical and methodological knowledge. The grade of the written project proposal with the presentation in the group is a maximum of 70% of the total grade from the course, and the remaining 30% of the grade is the outcome of an oral discussion of the project task, which will evaluate different levels of knowledge acquisition and cognitive processes.

5. Analyze and, in the context of European and / or world research on the subject, interpret and evaluate the findings of identical psychological research conducted in Croatia.

Production process in the Media

230991

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

Enabling the students to work at the newspaper office - from searching for information, its processing and editing to sending the finished pages to print, or editing and broadcasting.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Be familiar with the production process of newspapers and television stations
2. Realize the importance and purpose of the newspaper office editorial team
3. Define the forms of journalist cooperation with the newsroom staff - editors, proofreaders, graphic designers, camera operators, video cutting editors etc.
4. Apply the acquired skills in editing of texts and TV features.
5. Be familiar with and use the skills of editing texts and features
6. Independently perform journalistic and editorial assignments

Study Programme Learning Outcomes

English Level L0

E-learning Level L1

Study Hours

Grading

50% the written thesis,
50% the oral presentation
before a three-member
committee.

Course Description

Diploma thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, investigate and critically read scientific literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;

6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).
7. Define basic rules of presenting thesis

Study Programme Learning Outcomes

Psychology

Create basic and/or applied psychological research and construct and metrically evaluate psychological measuring instruments

Critically judge multivariate statistical procedures with regard to their limitations and to the satisfaction of theoretical assumptions in concrete application situations

Evaluate different theories, paradigms and methodological approaches in psychology when planning assessment and interventions with individuals, groups and organizations

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

E-learning Level L1

Study Hours 30

Grading

50% the written thesis,
50% the oral presentation
before a three-member
committee.

Course Description

Diploma thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their studies and in which the students must demonstrate their ability to analyze the posed problem or subject from the theoretical, practical and research perspective in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent research, use of literature and the application of scientific and professional methodology.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Choose a thesis topic;
2. Collect, investigate and critically read scientific literature;
3. Write the thesis syllabus;
4. Plan the course of scientific research within a well-defined frame;
5. Define research problems, hypotheses and methods which will be used in order to reach relevant results;
6. Write a thesis in the extent of approximately 9000-10000 words (50 to 60 standard pages of text).

Study Programme Learning Outcomes

Psychology

Create basic and/or applied psychological research and construct and metrically evaluate psychological measuring instruments

Critically judge multivariate statistical procedures with regard to their limitations and to the satisfaction of theoretical assumptions in concrete application situations

Evaluate different theories, paradigms and methodological approaches in psychology when planning assessment and interventions with individuals, groups and organizations

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently conduct scientific research in the area of research with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write a thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates, and defend it before a three-member committee.

Week by Week Schedule

1. Discussion of the topic, its approval and the acceptance of tasks.
2. Writing the thesis.
3. Writing the thesis.
4. Writing the thesis.
5. Writing the thesis.
6. Writing the thesis.
7. Writing the thesis.
8. Writing the thesis.
9. Writing the thesis.
10. Writing the thesis.
11. Writing the thesis.
12. Writing the thesis.
13. Writing the thesis.
14. Writing the thesis.
15. Writing the thesis.

Psychological Counselling

173598

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Through this course the students will learn the basics of psychological counseling which includes: definition of counseling, recognizing the difference between counseling and psychotherapy, the historical development of psychological counseling, adopting and applying the skills of active listening, the skills of showing understanding, clarifying difficulties and relaxation, the evaluation of thoughts and behavior, the assessment of feelings and physical reactions and they will learn of the opportunities for counseling work in Croatia.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the theory of psychological counseling.
2. Compare and critically evaluate the advantages and disadvantages of different theories of counseling and psychotherapy.
3. Describe and analyze the historical facts and early development of psychological counseling.
4. Evaluate the basic principles and methods of psychological counseling.
5. Compare counseling and psychotherapy.
6. Describe, analyze and recognize when to apply which techniques and skills of psychological counseling.

Study Programme Learning Outcomes

Psychology

Argue the similarities, differences and usability of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences

Choose models of psychological assessment and counseling in work with individuals, groups and organizations

Support cooperation in interdisciplinary team work and create constructive professional relationships with experts of collaborating disciplines

Evaluate theoretical concepts and scientific knowledge in the creation of interventions and programs that will improve the living conditions and development of individuals, families, organizations and communities

Self-evaluate responsibility, autonomy and initiative in work

ECTS Credits	4.0

English Level L1

Psychological Testing Skills and Clinical Interview

188782

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

ECTS Credits	3.0
English Level	L0
E-learning Level	L1
Study Hours	30

Teaching Assistant
Iva Žegura, nasl. pred.

Grading

Regular attendance (5 credits), classroom activities (5 credits), individual assignments (40 credits), written examination (50 credits). The final grade is calculated by key: 52-63 points - sufficient (2) 64-75 pts - good (3) 76-87 pts - very good (4) 88-100 pts - excellent (5)

Course Description

The main objective of the course is to acquaint and train students to plan and conduct a clinical interview tailored to a particular clinical state and how to use the information obtained through anamnesis and heteroanamnesis, how to set clinical hypotheses and how to plan further clinical assessment procedures based on the data collected. Throughout the course, students will be introduced to the basic tasks of psychological testing and developing the skills of applying psychological tests. Throughout the course, students will be introduced to various psychological instruments and gain knowledge of their use, methods of interpretation, and writing test results. Throughout the course, students will learn how to integrate data obtained through clinical interview and psychological testing.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and plan the type and structure of the clinical interview
2. Analyze relevant anamnestic and heteroanamnestic data and client behavior
3. Describe the different psychological instruments and describe the benefits and limitations of different psychological instruments
4. Select and apply appropriate psychological instruments
5. Prepare data collected using psychological instruments to write psychological findings
6. Plan a follow-up clinical assessment procedure based on clinical interview data, anamnestic and heteroanamnestic data and observations of client behavior and psychological testing data
7. Plan interview and selection of adequate psychological instruments in accordance with the specificities of different populations of respondents and the specificities of different disorders

Study Programme Learning Outcomes

Psychology

Choose models of psychological assessment and counseling in work with individuals, groups and organizations

Outline the historical development and theoretical approaches in

the different branches of theoretical and applied psychology.
 Choose appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures and the specifics of their environmental and social context
 Assess one's own oral and written professional communication skills and create complex communications and interdisciplinary cooperation in different professional environments
 Assess the compliance of psychological practice with prescribed ethical principles of psychological activity in various areas of theoretical and applied psychology

Screening of student's work

0.5 ECTS	Pohađanje nastave [EN]
1 ECTS	Pismeni ispit [EN]
0.5 ECTS	Seminarski rad [EN]
1 ECTS	Praktični rad [EN]
3 ECTS	

Week by Week Schedule

1. The role of interviews and observations in clinical assessment.
2. Anamnestic and heteroanamnestic data and medical records
3. Types of interviews and determining the structure of interviews
4. Interview specificities for different disorders and age group (children, adolescents, elderly)
5. The specifics of a psychotherapy interview.
6. Interview peculiarities regarding different client populations - mental underdevelopment, clients with neurological impairment
7. Characteristics of Psychological Tests: Reliability, Validity, and Standardization
8. Cognitive assessment tests
9. Memory tests and visuo-constructive tests
10. Objective and projective personality tests
11. Specific tests for depression, anxiety and quality of life
12. Interpretation of testing results
13. Qualitative analysis of data obtained, determination of the relevance of the data and planning of further clinical evaluation
14. Written report based on clinical interviewing and psychological assessment
15. Ethics and law in Croatia

Psychology of Advertising

206651

Course Description

The course will help students to develop general and specific competencies regarding basic advertising knowledge and skills, stressing out digital marketing. Students will also acquire skills on how to plan and evaluate the campaigns using different platforms and tools. The aim of the course will be understanding the target audience's needs, as well as characteristics of products/services, in order to achieve planned results through optimal marketing activities. Students will participate in the creation of ads for different platforms, as well as in the creation of campaigns.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic psychological principles underlying advertising, consumer protection policies and personal data
2. Explain basic psychological principles underlying the traditional marketing (print, radio, TV)
3. Describe the skills of basic advertising and analytics on Facebook
4. Describe the skills of basic advertising and analytics on Google
5. Define advertising principles regarding newsletters, Twitter, YouTube, podcasts and Instagram
6. Apply the basic skills of campaign creating using different platforms
7. Apply communication and social skills in relationship with clients

Study Programme Learning Outcomes

Grading
49% seminar paper; 51%
written exam

Course Description

The aim of this course is to introduce students to the psychological effects and findings of media and mass communication research, with their significance for the development of communication science and emerging social phenomena.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, describe and explain the relationship between psychology and the media and the central problems of this relationship.
2. Apply, classify and distinguish professional terminology.
3. Identify, differentiate, evaluate and critically evaluate media effects on the media audience and society in general.
4. Prepare and conduct scientific research in the field of communication studies (alone or in team) using contemporary scientific methods and write scientific papers in a clear and organized manner.
5. Apply the oral and written communication and presentation skills in Croatian (with a summary of the main conclusions in english).
6. Explain and understand interdisciplinary nature of psychological research

Study Programme Learning Outcomes

Communication Studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Describe the points of contact between contemporary communication studies and other social and humanities sciences

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems
 Develop competences in professional and interdisciplinary teamwork

General Competencies

Define, describe and explain the relationship between psychology and the media and its central concerns.

Apply, classify and differentiate the technical terminology.

Identify, distinguish, evaluate and critically evaluate media effects and their impact on media audience and society as a whole.

Conduct scientific research, individually or in teams, in the field of communication sciences with the help of modern scientific research methods and writing papers in a clear and organized manner.

Apply oral and written communication and presentation skills in English.

Learning Outcomes - Practical and Generic Skills

The course material will enable students to understand different media formats and technologies, encourage the ability to critically understand and analyze media messages, and encourage the development of media literacy, which will make it easier for students to recognize half-information, disinformation, and possible manipulation in the media space. Likewise, knowledge-based media use can help them to more easily resist the negative impact of media texts, to more easily understand the impact of media texts on emotions, thoughts, behaviors, and relationships, and to understand how the media affects the perception of certain phenomena in society, the formation of youth identities, and to understand the impact of digital dementia on the cognitive functions of media users, and especially the impact of media use on the elderly.

Course Description

The course provides a detailed introduction to the study of the impact that individuals, groups and structure have on behavior in organizations.

It is designed to make students acquainted with the basic understanding of psychology applied in an organizational context and to develop the basic skills required for the application the knowledge acquired. Competences acquired in the course will enable students to understand and motivate individuals and groups in an organization and the ability of effective organizational action. Specific areas covered by the course include the adoption of competence necessary for understanding of individual differences relevant to organizational behavior, job satisfaction, motivation and emotion, perception and decision-making, social influence and group processes, conflict and negotiation, power and authority, leadership, organizational culture, socialization, innovation and changes.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the importance and role of individual differences and perceptions of organizational behaviour.
2. Predict factors that interfere with efficient organizational activity.
3. Assess the social impacts and group processes in an organization.
4. Select interventions to motivate individuals and groups in the organization.
5. Apply methods of effective communication and conflict resolution in the team.
6. Plan interventions aimed at increasing job satisfaction and improving organizational culture.
7. Select interventions for successful adaptation to changes and stress management in the workplace.
8. Demonstrate the proposed activities and the results to both professional and non-professional audience.

Study Programme Learning Outcomes

Psychology

Choose models of psychological assessment and counseling in

work with individuals, groups and organizations

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

Assess one's own oral and written professional communication skills and create complex communications and interdisciplinary cooperation in different professional environments

Assess the compliance of psychological practice with prescribed ethical principles of psychological activity in various areas of theoretical and applied psychology

Evaluate theoretical concepts and scientific knowledge in the creation of interventions and programs that will improve the living conditions and development of individuals, families, organizations and communities

Evaluate different theories, paradigms and methodological approaches in psychology when planning assessment and interventions with individuals, groups and organizations

Evaluate the impact of the social context and social changes on human development and the behavior of individuals, groups and systems

General Competencies

Evaluate different theories, paradigms, and methodological approaches in psychology when planning assessment and interventions with individuals, groups, and organizations.

Evaluate the impact of social context and social change on human development and behavior of individuals, groups, and systems.

Assess theoretical concepts and scientific knowledge in designing interventions and programs aimed at improving living conditions and development of individuals, families, organizations, and communities.

Evaluate the alignment of psychological practice with prescribed ethical principles of psychological work across different areas of theoretical and applied psychology.

Assess one's own oral and written professional communication skills and develop complex communication and interdisciplinary collaboration in various professional settings.

Critically evaluate theoretical knowledge from core areas of psychology and its relation to different branches of applied psychology.

Select models of psychological assessment and counseling in working with individuals, groups, and organizations.

Learning Outcomes - Intellectual (Cognitive) Skills

Explain the importance and role of individual differences and perceptions of organizational behaviour.

Predict factors that interfere with efficient organizational activity.

Assess the social impacts and group processes in an organization.

Select interventions to motivate individuals and groups in the organization.

Learning Outcomes - Practical and Generic Skills

Apply methods of effective communication and conflict resolution in the team.

Plan interventions aimed at increasing job satisfaction and improving organizational culture.

Select interventions for successful adaptation to changes and stress management in the workplace.

Connection of Learning Outcomes and Grading

All learning outcomes will be evaluated through midterm exams/the final exam. Outcomes related to practical skills will additionally be evaluated through the seminar.

Psychosocial adaptation of Croatian war veterans in war and devastation 188789

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

Course Description

The course is designed to help students to get acquainted through experiential learning with the specificity of the Homeland War and its impact on the veterans' population, their families and the wider community. Experiential learning implies the practical elaboration of specific topics, and also discussions and critical review at the group level. Students will have an opportunity to explore the individual and social perspective and to learn about the possibilities, difficulties and challenges faced by veterans themselves, their families and experts in working with this population. We aim to contribute to a clearer picture of the sacrifice that Croatian war veterans and members of their families have submitted and which many of them still submit today, as well as to contribute by presenting social processes that could improve their present and future.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and explain the consequences of traumatic experiences, with particular emphasis on war experiences
2. Describe the specificity of the veterans' population in Croatia, the war and postwar experiences that they had, and consequences for their daily life
3. Recognize the difference between scientific facts and myths about posttraumatic stress disorder
4. Argue the effectiveness of various forms of intervention in recovery from traumatic experiences and describe practice in Croatia
5. Describe the experience of spouses and children of Croatian veterans and factors that affecting family relationships
6. Analyze critically the relationship of media and wider society towards the veterans' population
7. Analyze critically and compare the results of Croatian and foreign research in the area of psychosocial adaptation of war veterans, and explain the intercultural similarities and differences
8. Identify the factors that contribute to posttraumatic growth of veterans and to higher quality of their lives in peacetime

Study Programme Learning Outcomes

ECTS Credits 3.0
English Level L1
E-learning Level L1
Study Hours 30

Grading

Students will be evaluated on the basis of a seminar work that is based on intervention proposal intended for one of the specific populations that is included in the course content (e.g., wives of war veterans, war veterans with 100% disability, war veterans which became entrepreneur). In the seminar, students should use at least three Croatian and three foreign references, focus on the content of the three lectures, and on basis of that and their own creativity, develop a proposal for an intervention that would improve the quality of life of one (sub)population. For students which are not psychologists, assignments will be redesigned in accordance to their main course (e.g., media presentation of war veterans, historical truth about Homeland war).

Oral exam – 60%

Course Description

The course is developed to introduce students with basic principles of psychotherapy process and various approaches to psychotherapy practice.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Assess the characteristics of psychotherapy process
2. Assess different aspects of professional responsibilities of psychotherapist.
3. Distinguish specificities of particular psychotherapy approaches and methods.
4. Distinguish psychotherapy from clinical psychology and psychiatry.
5. Argue importance of psychotherapy methods in protection of mental health.
6. Judge ethical questions in psychotherapy profession.

Study Programme Learning Outcomes

Psychology

Choose models of psychological assessment and counseling in work with individuals, groups and organizations

Evaluate different theories, paradigms and methodological approaches in psychology when planning assessment and interventions with individuals, groups and organizations

Value the importance of lifelong professional development

General Competencies

Evaluate different theories, paradigms and methodological approaches in psychology in the planning of assessments and interventions with individuals, groups and organizations.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Appraise the outcomes and consequences of personal practice, as well as the professional competences, knowledge and skills in accordance with the changes and the standards of the profession, as well as national and European regulations.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Public Promotion of Science

57236

Lecturer

prof. dr. sc.
Mirko Lukaš

Course Description

The aim of the course is to enable the students to adopting the theoretical and analytical framework for the understanding of science as a specific human activity aimed at developing credible convictions (insights) about the physical and social phenomena. In this context, the course has the additional aim of teaching students to devise and plan activities for public promotion of science.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the links and differences between lay (i.e. non-scientific) and science-based convictions
2. Specify and describe the fundamental determinants of the methodology of scientific research (as opposed to the lay experience of the world)
3. List and describe the elements of scientific research systems and their interrelationships
4. Explain the role of science as a human activity in the wider social and cultural context
5. Plan practical activities in public promotion of science

Study Programme Learning Outcomes

Communication Studies

General Competencies

Define, describe and evaluate methods of promotion of science and their central problems. Define and explain the role of science as a human activity in the wider social and cultural context. Apply, classify and distinguish professional terminology. Expertly and professionally apply the acquired specialist theoretical and practical knowledge in public relations. Identify, distinguish, evaluate and critically assess media content and its impact on the attitudes, behavior and decisions of individuals, audience and the society as a whole.

Week by Week Schedule

1. Man's experience of the world. What is knowledge? The problem of demarcation in classical epistemology

Public Relations Practicum

64753

Lecturer

Ivana Jeleč
Bulić,
pred.

Course Description

Public Relations Practicum was conceived as a course which through interactive work, individual and in groups, connects previously mastered theoretical and practical knowledge with the requirement of performing professional tasks in the future working environment. The Practicum covers various writing skills, strategic planning, organisation, practical approach to the issues of PR and simulations of real situations from the (future) working environment. The course expects active participation because it includes an introduction in which the students will be given advice on the subject and a practical part in which the students will be required to carry out exercises and simulations.

The course includes a final assignment / project on the topic chosen by individual students, and based on the provided instructions. The assignment can be of any form and content which fall under the practical application of public relations.

The final assignment serves as the basis of the final grade and periodical tasks are also taken into consideration for this purpose.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Evaluate the actual situation in which the organization-client is situated
2. Identify and categorize the organization's public and then choose the key public
3. Apply research methods in analysis of the organization and key public
4. Create goals and objectives of a strategic communication plan
5. Create strategy and design appropriate tactics for the communication plan
6. Plan a timeline for tactics and make a communication plan budget
7. Create a written communication plan and then present and defend it
8. Apply the ethical principles of profession in creating a strategic communication plan

Study Programme Learning Outcomes

ECTS Credits	5.0
English Level	L2
E-learning Level	L1
Study Hours	30

Grading

The final mark is based on student work during the semester, the quality of the written strategic communication plan, the persuasiveness of the final presentation and the argued defense of the project on the oral exam.

Communication Studies

- Demonstrate responsibility, ethics, autonomy and initiative in professional work
- Formulate and critically evaluate arguments for and against opposing points of view
- Show the application of theoretical knowledge of communication studies
- Distinguish practical applications of practical knowledge and skills from journalism and public relations
- Develop oral and written communication skills
- Develop competences in professional and interdisciplinary teamwork

General Competencies

Apply, classify and distinguish professional terminology used in the public relations practice; Expertly and professionally apply the acquired specialist and practical knowledge to working in public relations; Demonstrate accountability, professional ethics, autonomy and initiative in work; Apply skills of verbal and written communication and presentation skills in the Croatian language ;

Forms of Teaching

» Vježbe u praktikumu

- » In each class, each of the six teams presents and explains to colleagues the exercise performed according to the given instructions. After discussion and received suggestions how to improve the exercise, students receive instructions for a new assignment. Each exercise is a part of a strategic communication plan that each team create on the assigned theme. Every week, students prepare and present new exercise.

Week by Week Schedule

1. Introductory discussion of course content, divide into six teams, divide topics for a strategic communication plan for each team and define how to create and present exercise.
2. I. RESEARCH: 1) Analysis of the situation.
Determining a problem (or opportunity):
a) a finding (value judgment) that something is wrong or that it will soon be wrong
b) Problem description:
WHAT is the cause/ WHERE is this problem/WHEN is this problem/WHO is involved or affected/HOW is involved or affected/WHY is the concern of the organization and its public?

3. 1. RESEARCH 2) Analysis of the organization: A) INTERNAL ENVIRONMENTAL ANALYSIS
 Answer the following key questions:
 What is the quality of services / products the organization offers?
 What is the particularity of the organization in relation to the others in the same sector?
 What is the mission/purpose of the organization?
 How does the problem/opportunity fit into an organization's mission?
 What are the communication and financial resources available?
 What kind of obstacles in the internal environment are encountered PR professionals?
4. 1. RESEARCH 2) Organization Analysis: B) ANALYSIS OF PUBLIC PERCEPTION
 Answer the following key questions:
 What is organization's visibility: how many people know the organization, what do they know about how accurate this information is?
 What is organization's reputation: how do people value what they see/hear about the organization? How do you intend to influence on the reputation?
5. 1. RESEARCH 2) Organization Analysis: C) ANALYSIS OF EXTERNAL ENVIRONMENT
 Answer the following key questions:
 Who supports the organization? What is known about supporters?
 Who is the main competitor to the organization? What is known about the competition?
 Are there (significant) opponents of the organization? What is known about the opponents?
 Is there anything in the environment that could limit the success of a communication plan?
6. 1. RESEARCH 3) Public analysis: a) identify publics by key categories; b) determine key publics for a strategic communication plan.
7. 1. RESEARCH 3) Analysis of publics: c) analysis of key public with regard to:
 1) project; 2) organization; 3) communication behavior; 4) psychological and character performances; 5) demographic characteristics.
8. 2. PLANNING 1) Define goals with regards to reputation, to relationship and/or to management task.
 Define objectives with regard to awareness, acceptance and action.
9. 2. PLANNING: 2) create a strategy for achieving the goals and objectives of a strategic communication plan.
10. 2. PLANNING/STRATEGY: 3) Develop strategic message for a communication plan:
 I. Suggest the source of information: who are suitable people to present the message?
 II. Determine the appeal of messages: which appeals will the message use?
 III. Develop verbal and nonverbal communication: design arguments/evidence and their order; create message content; create nonverbal communication.
 IV. Design a slogan.

11. 3. ACTION/TACTICS: 1) Select communication tactics in accordance with the designed strategy and set goals and objectives of the strategic communication plan.
Choose:
a) tactics of interpersonal communication,
b) tactics for owned media,
c) tactics for earned media,
d) advertising and promotional tactics.

For each selected tactic, determine:
Periodicity: how many times to repeat a certain tactic?
Tasks: determine the tasks needed to realize for each tactic.
Time: determine the time needed for realizing the selected tactics; match the time limit set by goals.
Responsibilities: determine persons needed to accomplish the selected tactics.
12. 3. ACTION/TACTICS: 2) Implementation: A) Provide a schedule for each campaign tactics
In the TABLE format, show the timeline of tactics. Match the time limit set by goals.
13. 3. ACTION/TACTICS: 3) Implementation: B) CAMPAIGN BUDGET:
Make a budget according to tactics.
Make budget according to: staff, materials, costs of media, equipment and space, administration.
Make the total budget: what is the total cost of the project?
14. 4. EVALUATION: 1) Evaluation of strategic plan:
Design the measurement of output message goals: message production, message distribution, message costs;
Design the measurement of objectives regarding the knowledge: exposure of a message, content analysis of the message, distinctiveness of the message;
Design the measurement of objectives regarding the acceptance: feedback from the key publics, comparison of the results obtained with the goals and objectives;
Design the measurement of objectives regarding the action: audience participation, direct observation of results.
15. Instructions for final written strategic communication plan, instructions for final presentation and defense of the strategic communication plan.

Qualitative Methodology

214136

Lecturer

doc. dr. sc.
Marica
Marinović
Golubić

Course Description

The aim of the course is to acquaint students with the peculiarities of qualitative methodology, the reasons and conditions for its application in sociology, and, through exercises, to train them to conduct their own qualitative research.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop a qualitative research design and conduct your own research
2. Create qualitative research instruments (observation form, guide for individual interviews and focus groups)
3. Distinguish between different types of sampling specific to qualitative research.
4. Apply qualitative scientific methods in practice: observation, individual interview and focus group
5. Explain the results of qualitative research
6. Write a research report
7. Use a reflective research approach
8. Apply ethical standards in scientific research

Study Programme Learning Outcomes

Sociology

Implement an appropriate method to research social phenomena

Create a project proposal

Explain the role of sociology in society

Organize data to create strategies

Apply qualitative and quantitative data processing programs

Differentiate sampling methods for social research

Apply social research methods in labor market analyses

Evaluate appropriate ways of intervention of a certain social issue

Understand the social mechanisms of interaction

Develop and select different problem-solving strategies

Compare different theoretical traditions in sociology

Course Description

The aim of the course is to introduce students to the basic qualitative methods used in scientific research of media and communications through theoretical lectures and deepen the acquired theoretical knowledge about the methods of the seminar.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe the types of qualitative research methods
2. Argue for or against the choice and use of research methods
3. Apply research methods
4. Analyze and interpret data
5. Demonstrate research results

Study Programme Learning Outcomes

Communication Studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Use different scientific and research methods of social sciences and independently conduct scientific research in the field of communication studies and write scientific papers in a clear and organized manner

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Develop competences in professional and interdisciplinary teamwork

General Competencies

The course allows students to acquire basic theoretical knowledge of qualitative research methods and after graduation acquirement can be expressed and applied in their scientific work (research) in the field of communications.

Course description

e-learning level 1

english level 1

Competency

Upon successfully passed exam students will be able to

Apply the advanced statistical terms and information.

Design a research project.

Organize the implementation of a research project.

Use the computer software for the analyses of quantitative data.

Outline causal relationships between the social phenomena.

Develop the research question on the subject process phenomena of social interest.

Choose the adequate methodological approach or the combination of approaches in investigation of the social phenomena.

Evaluate published sociological research with suggestions of possible improvements.

Write a comprehensive research report in the appropriate disciplinary style and discourse.

Learning Outcomes

1. Explain the logic and phases of quantitative social research

attendance, written
assignment.

2. define preliminary design of survey and other quantitative research
3. plan and design procedures for the implementation of qualitative research
4. practice fieldwork and analyses of data and interpret results, write report
5. analyze metrical characteristics of the conducted research and critically evaluate its advantages and shortcomings

Week plan

1. Lecture Characteristics of quantitative research methods; survey
Excercise Selection of survey topic
2. Lecture Introduction to survey method
Excercise Development of research design
3. Lecture Questionnaire
Excercise Planning and conducting of orientation research
4. Lecture Questionnaire
Excercise Operationalization
5. Lecture Sample
Excercise Creating questionnaire
6. Lecture Sample
Excercise Pilot research, finishing questionnaire
7. Lecture Survey techniques
Excercise Planning the sample
8. Lecture Survey techniques
Excercise Operationalization of the sample
9. Lecture Survey techniques
Excercise Preparing conduction of the fieldwork
10. Lecture Data analyses planning, data presentation, report construction
Excercise Data analyses, data presentation
11. Lecture Measurment characteristics of survey, errors and biases
Excercise Making report on survey results
12. Lecture Content analysis

Exercise Selection of content analysis topic; making of research design, preliminary analyses

13. Lecture Analytical matrix

Exercise Designing analytical matrix

14. Lecture Sample in content analysis

Exercise Sampling, analyzing

15. Lecture Analysis of redundancy, making report

Exercise Data analyses, reporting on results

Grading

Oral and written exam, obligatory class attendance, written assignment.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the logic and phases of quantitative social research
2. Define preliminary design of survey and other quantitative research
3. Plan and design procedures for the implementation of qualitative research
4. Practice fieldwork and analyses of data and interpret results, write report
5. Analyze metrical characteristics of the conducted research and critically evaluate its advantages and shortcomings
6. Plan and design the presentation of the analyzed data

Study Programme Learning Outcomes

Sociology

Implement an appropriate method to research social phenomena

Create a project proposal

Explain the role of sociology in society

Organize data to create strategies

Apply qualitative and quantitative data processing programs

Differentiate sampling methods for social research

Apply social research methods in labor market analyses

Evaluate appropriate ways of intervention of a certain social issue

Understand the social mechanisms of interaction

Develop and select different problem-solving strategies

Compare different theoretical traditions in sociology

General Competencies

Upon successfully passed exam students will be able to:

Apply the advanced statistical terms and information.

Design a research project.

Organize the implementation of a research project.

Use the computer software for the analyses of quantitative data.

Outline causal relationships between the social phenomena.

Develop the research question on the subject/process/phenomena of social interest.

Choose the adequate methodological approach or the combination of approaches in investigation of the social phenomena.

Evaluate published sociological research with suggestions of possible improvements.

Write a comprehensive research report in the appropriate disciplinary style and discourse.

Grading

60% written exam, 20% term paper, 20% class attendance

Course Description

There are two basic aims of course. First aim of the course is to introduce students to the basic quantitative methods used in scientific research of media and communications through theoretical lectures and deepen the acquired theoretical knowledge about the methods of the seminar.

Second aim of the course is to prepare students for conducting research by quantitative methods (questionnaire, content analysis) and familiarize them with basic procedures of data processing in SPSS.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe all types of quantitative research methods
2. Argue for or against the choice and use of research methods
3. Apply research methods
4. Analyze and interpret data
5. Demonstrate research results

Study Programme Learning Outcomes

Communication Studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Use different scientific and research methods of social sciences and independently conduct scientific research in the field of communication studies and write scientific papers in a clear and organized manner

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Develop competences in professional and interdisciplinary

teamwork

General Competencies

The course allows students to acquire basic theoretical knowledge of qualitative research methods and after graduation acquirement can be expressed and applied in their scientific work (research) in the field of communications.

Screening of student's work

5
ECTS

Week by Week Schedule

1. Course introduction and basic research questions appropriate in context of quantitative research methods
2. The basic principles of quantitative research methods in the social sciences.
3. What is the measure? What is the measuring instrument in the social sciences? Direct vs. indirect measurement. The characteristics of social phenomena and problems in their measurement. The concept of variable and function variables in the study. Scales and scaling.
4. Theory testing and quantitative methods of research. How to test the theories? Operationalization and building of a system of empirical indicators. Examples of operationalization.
5. Creation of Likert scale
6. Measurement errors and their characteristics:
Random and systematic error, the validity of the measurement and the type of validity, reliability, reliability tests
7. Data Base Preparation:
Creation of data matrix, data input in SPSS, defining of variables and Add preparing data for statistical processing.
8. Basic of descriptive statistic:
Mean, median, mode, variance, standard deviation,
9. Data processing in SPSS I:
Tables of frequencies, measure of central tendency
10. Data processing in SPSS II:
Crosstabs, tests of statistical differences (t-test, analysis of variance)
11. Data processing in SPSS III:
Correlation, examples of regression and factor analysis
12. Experiment: definition, advantages and disadvantages of lab experiment, the basic techniques of the experiment;
13. Perform experiments, draft and structure of the experiment
14. Longitudinal research-quantitative perspective: development, types of longitudinal research
15. Presentation of results, replication of the studies;

Regional Demography

253112

Lecturer

Sanja Klempić
Bogadi,
nasl. prof. dr.
sc.

Course Description

Introduce students to the types of regions, the principles and methods of regionalization, and the role of population in their formation.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the concept of a region and distinguish between types of regions
2. Explain criteria and methods of regionalization
3. Explain the role of population in spatial relations and processes relevant to different types of regions
4. Explain functioning of city regions
5. Explain the physiognomic regionalization of space
6. Explain nodal-functional regionalization of space

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Use statistical, quantitative, graphic and geographic software packages

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop the ability to terminologically understand demographic and immigrant terms in students

Develop a scientifically independent opinion on demographic and emigrant issues

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Grading

Students are expected to come to class, actively participate in class discussions, read assigned literature, present at seminars, and write homework assignments on a given topic.

Course Description

The course aims to explain the methodology of research and policy creation of the spatial aspect of economic and social development in interaction with demographic development. Within the scope of the course, students will become familiar with effective models and criteria, which are used for forming political-territorial entities as carriers of development in space.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the relationship between population movements and economic, social and geographic processes
2. Analyze data and literature relevant to a specific research question
3. Compare different methods used in demographic research related to regional development
4. Define specific factors of regional growth and development
5. Explain the dynamics of demographic processes and structures that are key to the harmonious and balanced development of the region
6. Describe the assumptions and factors of overall development

Study Programme Learning Outcomes

Demography and Croatian Diaspora

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop a sense of security and correctness in the research process in order to prove the conditionality of the population, emigration and economy

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Regression Analysis

53873

Lecturer

Toni Babarović,
nasl. prof. dr.
SC.

Course Description

Understanding of the theoretical basis of the regression analysis; analysing and evaluating research papers in which the method was applied; creating research designs where regression analysis should be used as an adequate method of analysing the collected data; independent practical application of regression analysis in psychological research using the SPSS software package

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and use the statistical and mathematical logic of regression models.
2. Evaluate and assess the statistical requirements for the implementation of regression models
3. Create a research design suitable for processing by regression analysis and logistic regression
4. Analyze data using regression models using the software package SPSS
5. Interpret the results obtained by regression analysis or logistic regression within the set of research problems
6. Explain statistical parameters obtained by regression models
7. Describe the role and logic of the general linear models in ANOVA designs
8. Evaluate the quality of regression models and results in applied research
9. Assess the range and limits of the statistical conclusions derived from regression analysis results

Study Programme Learning Outcomes

Psychology

Create basic and/or applied psychological research and construct and metrically evaluate psychological measuring instruments

Critically judge multivariate statistical procedures with regard to their limitations and to the satisfaction of theoretical assumptions in concrete application situations

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures and the specifics of their

environmental and social context

General Competencies

Application of theoretical knowledge of the regression analysis in various fields of applied psychology and research in psychology
Obtained skills of data analysis using regression analysis in SPSS software package.

Analysis and evaluation of scientific papers in the various fields of psychology in which regression analysis was applied as a method of analysing and data processing.

Designing and conducting own research from the platform of the regression analysis as adequate data processing method.

Learning outcomes on the level of the programme:

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Evaluate multivariate statistical procedures with regard to their limits and to satisfying the theoretical assumptions in concrete situations of application.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Research Group - Interpretation of Early Modern Sources

62006

Course Description

The aim of the course is to familiarize students with the basic information and historical processes that took place on Croatian territory in the Modern ages, introduce them to the basic problems of the study of modern Croatian history, and prepare them for independent work on the interpretation of Early Modern sources.

ECTS Credits	6.0
English Level	L1
E-learning Level	L1
Study Hours	30

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic problems of interpretation of sources
2. Identify the most important types and collections of sources
3. Explain the cause-and-effect relationships in the interpretation of sources
4. Assess historical processes during the period based on sources
5. Differentiate level of interpretation of the level of historical events in (early) modern history
6. Compare various historical sources for the (Early) Modern Period

Grading

Activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is oral.

Study Programme Learning Outcomes

History

Discuss with different individuals and groups in order to find answers to various theoretical and practical questions

Formulate arguments for and against mutually opposing points of view

Integrate critical models of thinking belonging to historical sciences into the unique ability of historical thinking

Use methods of explanation and interpretation of historical

Critically judge various descriptive and normative beliefs and attitudes

Present complex scientific and non-scientific content in written and oral form

Apply traditional historical terminology and nomenclature

General Competencies

After finishing the programme student will be able to:

1. tell what is the interpretation of history
2. write an essay on different historical period
3. design his/her own conclusion on different historical events and processes
4. reconstruct historiographic tools in making conclusions of historical processes and events
5. interpret a historical sources
6. appraise the value of historiographic interpretations

Research Group - Interpretation of Medieval Sources

79379

Lecturer

doc. dr. sc.
Eva Katarina
Glazer

ECTS Credits	6.0
English Level	L1
E-learning Level	L1
Study Hours	30

Teaching Assistant
dr. sc. Marko Marina

Grading
Attending course 10%;
Analysis of the sources
40%; Oral exam 50%.

Course Description

The aim of the course is to familiarize students with types of sources, tools and methods of researching medieval history and working on sources to develop skills and competencies necessary for independent research. Attention will primarily be on different types of written sources (public and private documents, notary, city and chapter registers and protocols, legal normative documents, narrative sources), but the importance of the material culture (objects of everyday use, architecture, art works) will also be pointed out. Analysis of certain documents will be carried out in order to deepen the practical application of knowledge in traditional auxiliary historical sciences and to develop practical skills required in working with sources. Special attention will be paid to the content analysis of selected sources in order to indicate a wide range of possible research topics.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define main problems in approaching medieval sources
2. Describe main stages in development of public and private notary and chapter protocols
3. Explain the function of narrative sources in the middle ages
4. Identify published source collections relevant to the study of medieval Croatia
5. Name the most important archives and archival collections in Croatia and abroad relevant to research of Croatian medieval history
6. Use topographical manuals in resolving toponyms in sources
7. Analyze main parts of a document

Study Programme Learning Outcomes

History

General Competencies

After successfully graduating student will be able to:
 identify the most important person and institutions in the Croatian and the World history,
 compile a list of literature for each historical period,
 tell what is the interpretation of history,
 distinguish difference between important and non-important facts within historiographic interpretation,
 interpret a historical sources,
 appraise the value of historiographic interpretations.

Research Group - Researching and Writing about the 20th Century

96375

Lecturer

doc. dr. sc.
Vladimir
Šumanović

Course Description

Aim of course lies in the training of students for the practical work of research and writing. The course is organized as a specific workshop, through which participants gain new and expand existing knowledge which could help them in drafting their own works. Getting familiar with the archives, published sources, literature in general and expanding knowledge about the possibilities of research in Croatia shall endeavor to help the students to better conceptualize their written work, applying valid methods in research and ultimately better write their own final project.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define different types of resources needed for writing historiographical works.
2. Order different locations where they could find some sources for the particular subject.
3. Reproduce existing historiographical achievements to shed light on particular topics.
4. Explain the importance and pass independently through unpublished sources
5. Write their own work based on unpublished sources and literature.
6. Apply this knowledge to explore other topics.
7. Argue the attitudes
8. Examine the validity of some scientific hypotheses

Study Programme Learning Outcomes

History

ECTS Credits	6.0
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

Student activity will be monitored throughout the semester. Attendance is mandatory. Commitments need to be resolved in time. They are not only a prerequisite for signature, but will be taken into account when determining the final grade. The final exam will be in the form of an oral examination. Research for a joint project - 5% of the total grade. Presentation of the topic of research and presentation of a book - 10% of the grade. Independent research (written work) - 50% of the total grade. Final oral exam - 35% of the total grade.

General Competencies

After successfully graduating student will be able to:
 Identify the most important person and institutions in the Croatian and the World history,
 Compile a list of literature for each historical period,
 Tell what is the interpretation of history,
 Distinguish difference between important and non-important facts within historiographic interpretation,
 Interpret a historical sources,
 Appraise the value of historiographic interpretations.

Forms of Teaching

» Seminar

» Classes will be held in terms of schedule, two hours of lectures every week.

Week by Week Schedule

1. An introductory lecture. Introducing the students to the objectives and contents of items and their obligations.
2. Problems conception of scientific and other professional papers. What elements they should contain? Structure of a paper. Selection of appropriate research topics.
3. Classification and distribution of resources. Primary, secondary and tertiary sources. Why and how to share and use them. Primary sources and archives. Explanation regarding the joint work on materials in the Croatian State Archives.
4. Writing a bibliographical and scientific notes. Other forms of work: historiographic Reviews. Croatian historiography today: Professional journals dealing with the publication of the works of historians in the Republic of Croatia and their classification.
5. Visiting Croatian State Archives in Zagreb. Meeting with tasks of this institution and with material that students will process within the agreed project.
6. Work in progress workshop. Brief presentation of independent research topics (objectives, hypotheses, used sources/literature, what is new in the paper?). The deadline to submit reviews.
7. Field work in one of Zagreb's museums or memorial houses (according to the interests of the group and the possibilities available at that time).

8. Newspapers as a source. Advantages and disadvantages of different sources. Press in Croatian 19th Century - a brief overview.
9. Croatian newspapers in the 20th Century: Overview of the most important newspapers for certain periods and the possibility of their use for scientific purposes.
10. Archives and museums as custodians of historical sources. Using MS Word, Excel, PowerPoint, Adobe Reader, Photoshop and other software for the design and processing of data.
11. Sources Online. How do we use them? Display of the most important sites in Croatia and neighboring countries that offer digitized material.
12. Independent presentations of student Group I.
13. Independent presentations of student Group II.
14. Independent presentations of student Group III.
15. Repetition. Reflexion about the usefulness of the course and suggestions for his improvement. Talk about final oral exam. Deadline for submission of archival work (processed data from CSA).

Research group - Sources of Egyptian, Greek and Roman History

96373

Lecturer

prof. dr. sc.
Mladen
Tomorad

Course Description

Introduction to the working methods of the historical sources, ancient history, Problems of processing, analysis and interpretation of these types of sources. During the introductory lectures students will be familiarized with the most important sources of the history of Egypt, Greece and Rome. In practical work to teach students how to interpret the available historical sources and how to use them in various forms of historical research and writings. Introduce students to the Museum's holdings of institutions in Croatia and databases of museum institutions in the world. Introduce students to the world's largest databases of written historical sources.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name the most important historical sources of Egyptian, Greek and Roman history,
2. Describe the critical-analytical classify these sources,
3. Identify historical sources toward the content and theme,
4. Analyze these sources,
5. Explain the causal connections between the content of these sources,
6. Define basic research methods ancient history: analyze the sources and literature, play and qualify the facts and the facts correctly arguments to use when writing papers,
7. Explain an online database of digital resources, museum databases, portals and research projects.

Grading
50% scientific research
draft, 50% syllabus.

Course Description

The aim of the course is to help students in the preparation, design and development of the final syllabus of their future graduate thesis and the draft of research that will be conducted within its frame, including searching and researching the literature relevant for the topic and the proposed scientific research.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect, research and critically read scientific literature;
2. Demonstrate the ability to create a draft for a scientific project;
3. Plan the course of scientific research and prevent larger errors and omissions;
4. Define, enumerate and explain the research problems, hypotheses, variables and methods that will be used to reach relevant and measurable results;
5. Demonstrate the ability to create a syllabus for a graduate thesis;

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Use different scientific and research methods of social sciences and independently conduct scientific research in the field of communication studies and write scientific papers in a clear and organized manner

Show the application of theoretical knowledge of communication studies

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

General Competencies

Apply, classify and distinguish the professional terminology in the research area of communicology;

Identify, evaluate and use a variety of scientific-research methods from the field of social science which are applied in communicology.

Independently conduct scientific research in the field of communicology with the help of modern scientific-research methods and write scientific papers in a clear and organized manner;

Think in an interdisciplinary manner and respect the various scientific methodologies and perspectives on specific issues and problems.

Week by Week Schedule

1. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
2. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.
3. The mentor conceives the content of a Research Project for each student, depending on the proposed graduate thesis topic and the proposed scientific research and knowledge of the student about the topic and the methodology that will be used in research, as well as the student's progress in devising the research draft and the graduate thesis syllabus.

Risk Management and Crisis Communication

57217

Lecturer

doc. dr. sc.
Goran Radoš

Course Description

The aim of the course is to provide the students with insight into the scientific knowledge about the importance of risk management and communication during the crisis, and on the examples of global and local practices to explore the basic rules in communication during crisis situations.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, distinguish and critically explain crisis communication;
2. Define and explain the characteristics and ways of managing crisis situations;
3. Demonstrate the ability to research the current situation and based on the results devise a plan for managing the issues of public importance;
4. Prepare a crisis situation management plan;
5. Prepare a plan for communication with the media and the public in case of crisis situation;
6. Use the skills of crisis communication in a time of crisis.

Study Programme Learning Outcomes

Communication Studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Show the application of theoretical knowledge of communication studies

Distinguish practical applications of practical knowledge and skills from journalism and public relations

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

Develop competences in professional and interdisciplinary teamwork

Teaching Assistant
doc. dr. sc. Ivan Perkov

Grading

Class attendance; active participation in discussions. Making a scientific essay on a topic related to the content of the course and its oral defence.

Course Description

To acquaint students with the history and development of the concept of risk society and the sociological subdiscipline of sociology of risk. After completing the course, students will be able to observe and critically analyse and interpret the risks of modern societies.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic terminology of sociology of risk
2. Explain the local and the global context of the contemporary risks
3. Describe the types of risk in the contemporary world
4. Use the theoretical presumptions of sociology of risk in the analysis of the contemporary global phenomena
5. Criticize the risk management policy in the contemporary context
6. Compare the approaches to the risk in regard to the cultural differences
7. Propose a strategy of risk management of specific risk phenomena
8. Evaluate the specific risk management policies

Study Programme Learning Outcomes

Dual-major studies

Design of didactic content: planning, performing and evaluation of teaching

Sociology

Analyze the social effects of certain globalization processes

Evaluate social impact of social changes in society

Recognize the generators of conflicts in contemporary society

Apply knowledge of sociological theories in managing conflict situations

Evaluate appropriate ways of intervention of a certain social issue

Interpret certain social processes using knowledge of sociological theories

Develop and select different problem-solving strategies

Sociology

- Analyze the social effects of certain globalization processes
- Evaluate social impact of social changes in society
- Apply knowledge of sociological theories in managing conflict situations
- Compare different theoretical traditions in sociology

Ivana Greguric

ECTS Credits 5.0

English Level L1

E-learning Level L1 (10%)

Study Hours
15
15

Grading
50% exam, 50% essay

Course Description

Course objectives are to familiarize students with the negative aspects of the mass media as a generator of risk in contemporary society. In the context of sociological studies of society of risk and communication research of potential risk factors of the media, the course will offer students various aspects of theoretical and empirical research into media content.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Combine mass media and the term "risk society"
2. Analyze and classify risks of communications and provide examples
3. Explain theoretical concepts of the mass communication risks using real life examples
4. Assess dangers arising from risk communications for individuals, culture and democracy of the society
5. Identify and analyse mass media content from the point of view of their risk for the public

Study Programme Learning Outcomes

Communication Studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Describe the points of contact between contemporary communication studies and other social and humanities sciences

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

Develop competences in professional and interdisciplinary teamwork

Develop social skills

General Competencies

Define, describe and evaluate the risks of mass communication, the history of their development and the central issues;
 Apply, classify and distinguish the professional terminology;
 Identify and provide a reasoned interpretation of interdisciplinary nature of communications, linking specific aspects of risk of mass communication with the characteristics of humanities and social sciences and various aspects of social development;
 Identify, distinguish, evaluate and critically assess the risks of mass communication, media and their influence on the attitudes, behaviour and decisions of individuals, the public and society as a whole;
 Professionally and skilfully apply the acquired theoretical and practical knowledge in the field of media and journalism, relationships public and scientific research in communication studies.

Self-Deception

201516

Course Description

In the introductory part of the course some standard examples of self-deception, both among animals and humans, will be considered in order to point out the paradoxical character of the phenomenon and to show why the attempts at finding a universally applicable definition thereof have failed. A special emphasis will be given to the puzzling question whether self-deception is necessarily an intentional activity. In the following, the same set of examples will be used to elucidate the logical structure of self-deception and to look into its causal mechanisms on various levels (evolutionary, psychological, neuro-physiological). In the third part of the course, some forms of collective self-deception will be discussed, together with its moral and social implications. In the concluding part of the course, the possibility of counteracting self-deception will be considered.

ECTS Credits 3.0

English Level L0

E-learning Level L1

Study Hours 15

15

-

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and classify cases of self-deception
2. Explicate the common logical structure of cases of self-deception
3. Form hypotheses concerning the causal mechanisms of self-deception
4. Appraise the moral and social implications of self-deception
5. Apply recent scientific findings to their understanding of mental and social phenomena
6. Improve their general skills of analytic thinking and writing

Study Programme Learning Outcomes

Dual-major studies

Philosophy

Analyze main problems of contemporary philosophical disciplines

Formulate different arguments, possible contradictions and construct counterexamples

Integrate different models of philosophical thinking specific to individual philosophical disciplines into a unique ability of philosophical and critical thinking

Create written and oral presentations of complex academic and non-academic content

Explain the specifics of contemporary philosophical disciplines and their development

Social Changes in the Republic of Croatia 202475 in 20th Century

Lecturer

doc. dr. sc.
Mijo Beljo

ECTS Credits	4.0
English Level	L0
E-learning Level	L1
Study Hours	30

Course Description

The objectives of the course are: to introduce first year students to social change in Croatia during the complex 20th century, which significantly characterized and determined the developmental trajectory of Croatian society in the modern, postmodern epoch; other literary productions on Croatian 20th century

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and gain essential knowledge about social change in Croatia during the 20th century
2. Describe and explain and acquire the skill of scientific interpretation of modern and contemporary Croatian history, which is based on interdisciplinarity and knowledge of related social and human sciences. In this way, students are trained to make objective conclusions about sensitive issues, which go beyond daily political and publicistic frameworks.
3. Describe, explain and gain basic knowledge of global trends and global changes - both in society and historiography. Accordingly, students will acquire knowledge of major historiographic "schools" and relevant theoretical and methodological approaches in the humanities and social sciences during the second half of the 20th century.
4. Analyze the Croatian past
5. Use the knowledge of the Croatian history in the interpretation of the contemporary social phenomenon
6. Relate the historical etiology of the Croatian social processes with the contemporary reality.

Study Programme Learning Outcomes

Dual-major studies

History

Formulate arguments for and against mutually opposing points of view

Design discussions and provide comments that enable the explanation of a number of issues of a social, cultural or political nature

Connect and evaluate different historical points of view, including the points of view of Croatian historians in the context of the history of science

Recognize the interdisciplinary nature of historical research, connecting its individual segments with corresponding segments of other humanities and social sciences

Present complex scientific and non-scientific content in written and oral form

Conduct scientific research in the field of historical sciences and write historical papers in a clear and organized manner

Determine and justify the basic ideas and principles on which modern democratic societies rest

Social Cognition and Perception

57109

Lecturer

doc. dr. sc.
Jelena Maričić

Course Description

Exploring, understanding and critical evaluation of contemporary theoretical and research approaches in the field of social cognition and perception of individuals and groups.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Assess critically theoretical approaches and knowledge in the field of social cognition and perception of individuals and groups
2. Synthesize knowledge from various fields of psychology in explaining the process of social cognition and perception
3. Evaluate critically current research in the field of social cognition and perception
4. Develop creative thinking on contemporary forms of intergroup cognition and perception.
5. Apply knowledge from the field of social cognition and perception in observing specific situations.
6. Evaluate critically planned and implemented interventions in the field of prejudice reduction and other aspects of social cognition and perception.

Study Programme Learning Outcomes

Psychology

General Competencies

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Analyze scientific literature in psychology and related disciplines, and produce new scientific knowledge.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Social Development and Rise of Eastern Mediterranean Civilisations

86939

Lecturer

doc. dr. sc.
Eva Katarina
Glazer

Course Description

Course objective is to introduce students with the earliest achievements of the people that settled the area of the eastern Mediterranean from the early Paleolithic to the end of the Iron Age.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define historical processes that have marked the Levant area from prehistory, through paleolithic, mesolithic, neolithic, Bronze and Iron Age.
2. Explain causal relationships in the covered period.
3. Name the most important sources that describe the emergence of the civilisations in the eastern Mediterranean.
4. Describe course of events in the covered period with the emphasis on the events from 2nd and 1st millenium B. C.
5. Name the most important cities that have marked the rise of civilisation in the eastern Mediterranean in the covered period.
6. Combine historical processes from different periods.
7. Compare historical processes considering different social and political environment.

Study Programme Learning Outcomes

Dual-major studies

History

History

General Competencies

After finishing the programme student will be able to: define historical processes typical for certain historical period; describe historical processes; explain cause and effect relations of historical events and processes; construct a historical context; compare historical processes of different periods; interpret historical sources; appraise the value of historiographic interpretations.

Vanesa Varga

ECTS Credits	5.0

English Level L0

E-learning Level L1

Study Hours 30

Grading

50% seminar paper, 50% exam/preliminary exams.

Course Description

The objective of the course is to provide students with basic knowledge from the field of social media, that is, to acquire and understand scientific and technical terminology and the historical development of the Internet and social media. The goal is also to familiarize students with the contemporary changes in the modes of communication and to employ critical thinking of such changes and circumstances. The role of online communication in all the spheres of society.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish and understand the fundamental scientific and technical terminology in the field of online communication and social media.
2. Compare critically the advantages, disadvantages and the roles of the social media.
3. Explain the role of social media in a variety of social spheres: economy, politics, religion, education and so on.
4. Compare and classify different types of social media.
5. Use social media in a socially responsible and beneficial way.
6. Explain the one's own choice of the use of social media
7. Write a seminar paper related to some of the current issues in social media.
8. Compare the positive and negative effects of social media.

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Define and describe the disciplines of contemporary communication studies, the history of their development and central problems, and use professional terminology in different areas of communication studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Coordinate discussions and provide explanatory comments on a number of issues primarily of a communication nature, but also of a social, cultural or political nature

Present different information and points of view and critically assess the credibility of claims, assumptions and arguments mediated through various media

Develop oral and written communication skills

Develop competences in professional and interdisciplinary teamwork

General Competencies

Define, describe and evaluate social media, the history of their development and central issues.

Apply, classify and differentiate technical terminology.

Identify, evaluate and use a variety of scientific methods in social science, applied in communication sciences.

Professionally apply acquired theoretical and practical knowledge on the sphere of social media.

Lecturer

izv. prof. dr. sc.
Andreja Sršen

Course Description

Course Objectives:

Introduce students to EU funds and sustainable development of local regions in the Republic of Croatia.

Enable students to understand the social structure of Croatian society and the developmental inequalities among Croatian regions.

Equip students with knowledge of specific issues facing Croatian regions within the framework of sustainable development and strategic regional development planning.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the processes of regional development in Croatian society
2. Analyze regional development inequalities in the Republic of Croatia.
3. Analyze the social structure of Croatian society
4. List the basic classifications of spatial units in the Republic of Croatia.
5. Describe the center-periphery relationship in the Republic of Croatia
6. Explain the basic concepts of EU funds in the context of preparing project proposals.
7. Develop awareness of the importance of Croatian independence
8. Use all relevant sources for deconstruction of imposed historical values

Sociology of Education

211173

Lecturer

izv. prof. dr. sc.
Katarina Dadić

ECTS Credits	3.0
English Level	L0
E-learning Level	L1
Study Hours	30

Grading

1. Seminar paper
2. Colloquium (2 colloquiums during the semester)
3. Exam (written)

Course Description

To get to know the Sociology of Education, which studies the relationship between society, education, and education, but also to present different theoretical and methodological orientations with the aim of better understanding the function and operation of the education system within the framework of educational sciences. Also, introduce students to the meaning of education and explain their position within modern society (globalization process, development of technological innovations and media, migration, different types of education approaches, the connection between the development of the economy, education, etc. and their mutual conditioning with the aim of a better understanding of the social function of upbringing and education). Through an insight into the presented theoretical-methodological orientations of the sociology of education, students acquire a fundamental understanding of key social processes and phenomena in the field of education, both in the world and in our country. Analyzing all the planned topics (theoretical-methodological approaches, school as a social phenomenon, upbringing, education and the reproduction of social inequalities, alternative education, educational achievements and class affiliation, etc.), students will be able to recognize potential problems in the process of upbringing and education and the social consequences of the work of educational experts, which directly contributes to their teaching competence, which is the special goal of this course.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic concepts from the field of Sociology of education
2. Explain the basic starting points about different aspects of the Sociology of Education
3. Explain the place and role of Sociology of education within the framework of educational sciences
4. Analyze the content of interdisciplinarity related to Sociology of Education
5. Explain the results of recent scientific research in the field of Sociology of Education
6. Analyze the different theoretical approaches used in the presented research
7. Illustrate the acquired theoretical knowledge with examples from the practice of upbringing and education

8. Interpret the functioning of the interdisciplinary concept of planning, but also strategies for the development of quality teaching accompanied by new social challenges

Study Programme Learning Outcomes

Dual-major studies

Apply different methodical principles and procedures in planning, conducting and evaluating teaching

Sociology

Discuss about current geopolitical issues

Describe the elements of social dynamics

Recognize the elements of cultural/collective memory

Recognize the generators of conflicts in contemporary society

Modify the explanations and basic terminology of sociological tradition to target population

Apply knowledge of sociological theories in managing conflict situations

Interpret certain social processes using knowledge of sociological theories

Grading

Attendance at at least 75% of teaching units, active monitoring of classes, writing and presenting a seminar paper, taking an oral exam.

Course Description

To acquaint students with the concept of human resources, systems and structures of employees within companies and business organization. Familiarize students with the difference between Human Resources, Talent Acquisition and Cultural Fit. As part of interpersonal relations, business ethics, vertical and horizontal relations, as well as employee trust in the Human Resources Department and authority management will be covered. Emphasis will be placed on the impact of decision-making on the collective and negotiation strategies. Guest lecturers from the private sector specializing in human resources management will be included in the classes.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic concepts of business structures
2. Recognize organizational units for a better understanding of human resources
3. Identify the sociological aspects and structures of the company
4. Explain the relationship between legal frameworks from the perspective of human resources
5. Explain the impact of decision-making and business ethics on employees
6. Define the cultural affiliation of the business collective
7. Define Talent Acquisition
8. Explain the negotiation strategy

Study Programme Learning Outcomes

Dual-major studies

Sociology

Implement an appropriate method to research social phenomena

Apply knowledge of sociological theories in managing conflict situations

Evaluate appropriate ways of intervention of a certain social issue

Sociology

Implement an appropriate method to research social phenomena
 Apply knowledge of sociological theories in managing conflict situations
 Understand the social mechanisms of interaction

Week by Week Schedule

1. 1. Introductory lecture, definition of course requirements, introduction
2. 2. Basic concepts of entrepreneurship and company structure in the context of human resources
3. 3. Authority management
4. 4. The sociological framework of entrepreneurship, the influence of differences among staff on the dynamics of interpersonal relationships
5. 5. Responsible and ethical decision-making
6. 6. Trust of employees in the Human Resources Department and the Administration
7. 7. Business ethics and marketing
8. 8. Headhunting and the labor market from the perspective of human resources

Sociology of Migration and Ethnicity

214085

Lecturer

doc. dr. sc.
Marica
Marinović
Golubić

Course Description

Students will learn basic concepts, theoretical concepts regarding migrations and ethnicity with a social emphasis on these processes in Croatia.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify key concepts
2. Define migrational and postmigrational processes
3. Use key concepts in research
4. Identify differences between different concepts
5. Describe key processes
6. Identify key results of scientific studies

Study Programme Learning Outcomes

Dual-major studies

Sociology

Analyze the social effects of certain globalization processes
Evaluate social impact of social changes in society
Describe demographic processes

Sociology of Social Changes

211170

Lecturer

doc. dr. sc.
Erik Brezovec

ECTS Credits	3.0
English Level	L2
E-learning Level	L1
Study Hours	30

Grading

Regular attendance at classes and participation in discussions on the lecture topic are valued; the final written exam is graded.

Course Description

Introduce students to sociological theories of social change, starting from the basic sociological concepts and contemporary theories of social change to the definition of sociology as science of social change

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic concepts and major theories of social change
2. Compare different approaches of social change and theoretically synthesize in the form of model
3. Use the fond of acquired knowledge for the purpose of theoretical conceptualization of potential research problem
4. Analyze data from secondary sources and conclude which social processes are relevant
5. Distinguish theories of social change from the ideology of progress
6. Apply theoretical conceptualization in the operationalization of empirical research

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Analyze the social effects of certain globalization processes
- Evaluate social impact of social changes in society
- Discuss about current geopolitical issues
- Describe the elements of social dynamics
- Describe demographic processes
- Recognize the generators of conflicts in contemporary society
- Recognize the elements of cultural/collective memory
- Apply knowledge of sociological theories in managing conflict situations
- Interpret certain social processes using knowledge of sociological theories
- Understand the social mechanisms of interaction
- Compare different theoretical traditions in sociology

Sociology

Analyze the social effects of certain globalization processes
 Evaluate social impact of social changes in society
 Implement an appropriate method to research social phenomena
 Explain the role of sociology in society
 Describe the elements of social dynamics
 Recognize the generators of conflicts in contemporary society
 Recognize the elements of cultural/collective memory
 Apply knowledge of sociological theories in managing conflict situations
 Evaluate appropriate ways of intervention of a certain social issue
 Interpret certain social processes using knowledge of sociological theories
 Discuss about current geopolitical issues
 Understand the social mechanisms of interaction
 Compare different theoretical traditions in sociology

General Competencies

Upon successfully passed exam, students will be able to:
 Combine the general knowledge of society and of social processes.
 Plan own engagement in resolving of the various social issues.
 Illustrate the key structural factors that are shaping the society.
 Analyse the social change using classical and contemporary sociological approaches.
 Compare the macro and micro level of the sociological analysis.
 Combine the different theoretical approaches in the investigation of the social phenomena.
 Analyse personal and local social questions in the broader social context, especially in the context of social class, ethnicity, gender, religion, capitalism, individualisation, nationalism, and globalization.
 Analyse the origin of the social problems and conflicts while bearing in mind the ways in which the social order is maintained, and is challenged.

Sociology of Social Control and Police

159978

Lecturer

prof. dr. sc.
Irena Cajner
Mraović

Course Description

The aim of the Course is to develop comprehensive factual and theoretical knowledge within a number of areas in which comparative studies of social control and policing can be undertaken: social control concepts and philosophies, the role of the police in the community, the relationship between society and law enforcement agencies, the societal context of policing. During the Course, students will develop the critical understanding of different models of policing and their impact on social control in different eras of policing and in different communities, including efforts at police reform. They will apply this knowledge in practical work to fully understand community cohesion and collective efficacy as the resource and operating tools of community social control.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain different concepts of social control.
2. Compare formal and informal social control
3. Explain relations between social cohesion, collective efficacy and social control
4. Analyze the role of police in supporting informal social control
5. Explain the main concepts in the field of sociology of policing.
6. Explain the role of the police in the society.
7. Identify professional dilemmas and ethical challenges of modern policing strategies.
8. Explain the impact of policing on social control.

Sociology of the Croatian Diaspora

205183

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

The aim is to acquaint students with the social processes that contribute to the migration of the Croatian population, through an overview of the sociological approach to the phenomenon of migration, with focus on a multidisciplinary approach to the study of problems, and by comparing existing scientific, research and theoretical material with special reference to the research on the Croatian diaspora. We focus our attention on explaining contemporary social processes: integration, adaptation, assimilation, remigration, as well as issues of defining identity, re/constitution of the identity of Croatian diasporic communities in the world, showing the specifics of their development with regard to the causes of emigration, their position, relationships and connections with their society of origin, admissions, expatriate, generational similarities/differences, group cohesion, dynamics and interactions in cultural, economic or political organisations, the return of expatriates or arrival of descendants to an "imagined" homeland. The aim is to demonstrate how the development of new communication tools/the Internet also changes the attitudes of the Croatian diaspora towards their society of origin, leading to the emergence and development of Croatian virtual diasporic communities and a diaspora cyber culture, as well as increasingly intense transnational practices.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop an understanding of basic terms relating to migration and migration concepts
2. Demonstrate acquired knowledge of migration and post-migration processes through theoretical approaches and a key study
3. Demonstrate theoretical and conceptual knowledge of migration and migration processes to the Croatian diaspora
4. Criticize, define and distinguish between the character and type of Croatian Diaspora communities.
5. Analyze (conceptual-theoretical) the Croatian diaspora-Croatian migrants/emigrants/minority, Croatian emigrant/minority/ethnic/indigenous communities, Croatian migrant virtual communities
6. Identify the Croatian Diaspora by age, gender, causes/time of emigration, space of emigration/immigration.

7. Analyze the identity of the Croatian Diaspora with respect to the socio-historical context and identity diversity / hybridity (local, regional, ethnic, national).
8. Explain the social processes of the Croatian diaspora as a consequence of migration (integration, adaptation, assimilation).

Study Programme Learning Outcomes

Dual-major studies

Speaking and Presentation Skills in English

66554

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

Acquiring techniques and strategies for listening comprehension for academic purposes, improving students' speaking and presentation skills through reading and analyzing texts, as well as discussing topics related to their fields of study, further development of language competence on phonological and semantic level, autonomous integration of acquired speaking and presentation skills in short presentations related to students' fields of study or interests.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and apply the basic principles of successful presentations in the English language
2. Use key words and expressions in the English language necessary to prepare a proper introduction and conclusion to a presentation
3. Use key words and expressions in the English language necessary to structure the presentation and to describe graphs, charts, tables etc
4. Use strategies to pose and to answer questions in the English language
5. Apply the basic techniques and strategies for successful listening in an academic setting
6. Show presentation skills by presenting a specific topic from their fields of expertise in the English language
7. Support their opinions on a topic from their fields of expertise in the English language

Study Programme Learning Outcomes

Communication Studies

General Competencies

Apply and classify professional terms in various branches of communication sciences in the English language, critically evaluate, present arguments and defend positions on topics from students fields of study in the English language, apply speaking and presentation skills in the English language.

ECTS Credits	5.0
English Level	L0
E-learning Level	L1

Strategic Thinking in Public Relations

278581

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

Provide students with an insight into the key strategic issues concerning the management of organizations and projects in the domain of public relations and building of organizational relationships. Enable the students to solve strategic problems which they will face in their work in PR. Familiarize them with the basic management theories, practices and skills in the domain of strategic thinking.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish and use the techniques and tools of strategic thinking and management,
2. Analyze the organizational situation, its context, participants and diagnose organizational problems,
3. Apply into practice the tools and techniques of organizational analysis, decision-making process and creative approach to solutions,
4. Demonstrate the ability to self-consciously, professionally, independently and effectively participate in the development of organizational business plans
5. Demonstrate the ability to effectively and confidently present issues and solutions,
6. Apply ethical principles of organizational behavior and social responsibility
7. Identify, distinguish and correctly apply the principles of project and process management.

Study Programme Learning Outcomes

Communication Studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Show the application of theoretical knowledge of communication studies

Distinguish practical applications of practical knowledge and skills from journalism and public relations

ECTS Credits 5.0

English Level L2

E-learning Level L1

Study Hours

15
15

Grading

The final grade shall be based on the student's work during the semester, the results of the written exam and seminar paper.

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

Develop competences in professional and interdisciplinary teamwork

Professionally apply acquired specialist, theoretical and practical knowledge in the sphere of media, i.e. journalism, public relations and scientific research in communications

General Competencies

Define, describe and evaluate strategic thinking and central issues. Apply, classify and distinguish professional terminology. Expertly and professionally apply the acquired specialist and practical knowledge in the field of media and journalism, public relations and scientific research in communicology. Demonstrate accountability, professional ethics, autonomy and initiative in work.

Forms of Teaching

» Predavanja

» lectures are performed using ppt presentations and video materials. They include discussions

» Seminar

» Seminar includes interactive work, exercising implementation of various methods and techniques on practical examples.

Week by Week Schedule

1. Introductory class: course review, student expectations, basic concepts, several examples, micro drill/interactive game
2. Thinking: types of thinking, water logic - rock logic, creative thinking, reflexive thinking, strategic thinking
3. Strategy (2 class blocks): definition, historical review, the development of strategic thinking, theorists / practitioners, types of strategies, strategic applications: politics, diplomacy, military strategy, business strategy, practical examples
4. Strategy (2 class blocks): definition, historical review, the development of strategic thinking, theorists / practitioners, types of strategies, strategic applications: politics, diplomacy, military strategy, business strategy, practical examples
5. Organization basics: organization formation, organization structure, types of organizations, theoretical view: managing and system theories, homework: observing the surroundings
6. Analysis of strategic planning: the basics of analytics, why analytics are important, types of analysis according to objectives, external analysis: market, environment, organization; homework assigned in some of the analytical techniques (group work)
7. Setting goals and evaluation: goals, the difference between goals, tactics and strategy, practice in setting goals, the connection between goals, expectations, results, evaluation of achieved goals, analyzing the effectiveness
8. Tactics of strategic planning: Connection between strategies and tactics, definitions, examples, action plan, tactic management, tactic evaluation
9. The notion of leadership (strategic leadership): strategy and team (organization) health, what is leadership?, types of leadership, theoretical approaches and practical realization, an exercise

10. Team management: types of teams, team structuring, team control, team evaluation
11. Organization and guidance: elements of corporate identity, vision, mission, purpose, business strategy, a practical exercise
12. Internal relations and corporate culture: building organizational relations, internal relations strategies, corporate culture, lateral and vertical management
13. Networking strategies: Organization and environment, business and interest-based joining, alliances, lobbying strategies
14. Organizational environment in the multimedia world: interest-influence groups, activism, the Internet and Web 3.0, social networks, guerrilla methods
15. Ethical principles in the implementation of strategies: the definition of ethics, the application of ethics in business, ethical dilemmas, ethics in the implementation of strategy, corporate social responsibility

Stress and Psychotrauma

144889

Lecturer

Igor Marinić,
nasl. doc. dr.
SC.

ECTS Credits	3.0

English Level L1

E-learning Level L1

Study Hours 30

Grading

Seminar in the written form, oral presentation of the seminar, activity during classes.

Course Description

Introduction to the concept of stress, the impact of stress on mental and physical health, as well as new opportunities in diagnosing, preventing and treating the effects of stress, especially civilian psychological trauma.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the concept of civil trauma stress from different theoretical perspectives.
2. Distinguish between the concepts of stress, stressors and stress reactions.
3. Summarize the role of the central nervous system and endocrine system in the stress response and genetic factors associated with reactivity to the stressor (trauma).
4. Compare therapeutic approaches to people who have experienced civilian trauma.
5. Analyze the impact of stress on mental and physical health.
6. Explain the principles of prevention, treatment and rehabilitation of civil stress disorders.
7. Explain the application of psychophysiological methods and relaxation techniques in the treatment of civil stress-induced disorders.
8. Describe approaches to coping with stress due to somatic disease.
9. Explain the principles of prevention, treatment, and rehabilitation of stress-related disorders.

Study Programme Learning Outcomes

Psychology

General Competencies

Students will be familiar with the concept of stress, ways of its prepoznavnaja, its role in traumatic disorders, and with biomarkers, morphological changes and their functional role in the treatment and rehabilitation of stress disorders.

Course Description

The course is developed to acquaint students with psychological practices and job demands within a specific organization, to integrate theoretical knowledge and practical skills acquired throughout their studies, and to develop skills necessary for specific psychological practice through immediate work experience.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and integrate acquired theoretical knowledge and skills with psychological practice
2. Explain and evaluate professional role of a psychologist within an organization
3. Evaluate their own professional competences
4. Appraise the importance of life-long learning
5. Assess the importance of communication skills for successful psychological practice

Study Programme Learning Outcomes

Psychology

Argue the similarities, differences and usability of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences

Critically judge the outcomes and consequences of one's own professional work, as well as one's own professional competences, knowledge and skills in accordance with changes and standards of the profession and national and European regulations

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

Assess the compliance of psychological practice with prescribed ethical principles of psychological activity in various areas of theoretical and applied psychology

Self-evaluate responsibility, autonomy and initiative in work

Evaluate the impact of the social context and social changes on human development and the behavior of individuals, groups and systems

Value the importance of lifelong professional development

Student's Internship

269863

Lecturer

prof. dr. sc.
Irena Cajner
Mraović

Course Description

Analysis of social impact is an effort to advance the value and assessment of social consequences that are likely to follow from the implementation of certain policies or programs, and specific actions by public or local politics, or individual public or private organizations. The importance of carrying out the analysis of social impacts is a direct consequence of recognizing the complexity of human communities and the realization that negative, unintended consequences may obscure the initial desired positive effect of the implementation of policies / programs / changes. The aim of this course is to enable students to recognize the different levels of potential social impacts as a result of the implementation of policies / programs / changes, learn to prepare an analysis of social impact, identify important indicators of social impacts according to the different dimensions of its importance for the individual, family and community, and to enable them to independently create project of social impact assessment.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply knowledge related to social impact.
2. Recognize patterns of social development.
3. Use corpus of knowledge related to findings and methodology of social impact.
4. Analyze and critically evaluate studies of social impact.
5. Define role of public in social impact assessment.
6. Design social impact assessment project.
7. Identify social impacts of public policies and projects.

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Evaluate social impact of social changes in society
- Implement an appropriate method to research social phenomena
- Create a project proposal
- Apply qualitative and quantitative data processing programs
- Differentiate sampling methods for social research

ECTS Credits 3.0

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistants

dr. sc. Ana Marija Dunaj

doc. dr. sc. Marica
Marinović Golubić

izv. prof. dr. sc. Dario
Pavić

doc. dr. sc. Ivan Perkovic

Grading

At the very beginning of the course students will choose a topic that will be crucial for the preparation of the project of social impact analysis. Individual project submitted in the form of detailed project design is a prerequisite for success on the course. Overall grade will be based the success in project preparation, active participation in class, and success in the final written exam.

Apply social research methods in labor market analyses

Develop and select different problem-solving strategies

Sociology

Analyze the social effects of certain globalization processes

Evaluate social impact of social changes in society

Implement an appropriate method to research social phenomena

Create a project proposal

Describe the elements of social dynamics

Apply qualitative and quantitative data processing programs

Understand the social mechanisms of interaction

Screening of student's work

Teaching Grammar in Teaching Croatian Language 234436

Lecturer

prof. dr. sc.
Davor Piskač

ECTS Credits	2.0
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

It is evaluated: - planning and implementation of grammar lessons, - knowledge of Croatian grammar, - evaluation of grammar lessons.

Course Description

Introducing students to methods of using and adapting Croatian school grammar in primary and secondary school lessons (phonology, morphology, and syntax), as well as creating assignments and evaluating students in order to help students:

Learn how to prepare, conduct, and evaluate a lesson based on Croatian school grammar.

Make the necessary adjustments and simplifications to adapt the material to the level of easier grammar comprehension for elementary and high school students.

Problematically distribute grammar elements according to the order of learning.

This would prepare students for teaching the Croatian language subject in primary and secondary schools with the aim of methodically deepening their existing knowledge of the Croatian language acquired during their Croatian Studies program. Additionally, students would be prepared for independent work with the school grammar of the Croatian language and guided in the methodology of selecting texts for grammar learning and practice.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and apply the norm of the Croatian standard language and recognize deviations.
2. Apply pedagogical-psychological-didactic-methodical competences.
3. Define knowledge about Croatian culture, identity, language and literature in primary and secondary education
4. Apply professional pedagogical competences and different methodological systems for independent teaching.

5. Define and group the basic terms: guide, performance program, individualization, annual plan and program, written preparation for the performance of the lesson; recognize, describe and use the basic rules for working with students and independently compose a written preparation for the performance of the lesson.
6. Argue conclusions in written and oral form.

Study Programme Learning Outcomes

Dual-major studies

Operate with pedagogical documentation related to the performance and records of teaching as well as other documentation related to the complete work of the school.

Design of didactic content: planning, performing and evaluation of teaching

Apply different methodical principles and procedures in planning, conducting and evaluating teaching

Croatology

Define, analyze and argue the Croatian cultural narrative

Define, single out, explain and argue basic terms from lexicology and lexicography

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Describe and classify a word formation

Describe, recognize and apply the fundamental stylistic features of the text

Croatology

Critically relate to mastered content and argue your conclusions in written and oral form

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Screening of student's work

The Croatian Humanist Epic

86902

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

The goal of this course is to introduce students to the Croatian humanist epic during the 15th and the 16th centuries. It will also enable them to view this poetry in the context of the epics of antiquity, and the European humanist epic production of the time. Obligations of the students include: regular attendance, preparation and discussion of selected texts and passing the exam after the semester has finished.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Indicate the most important Croatian epic authors writing in Latin in the 15th and the 16th centuries.
2. Analyse the representative selections of the relevant epic poems.
3. Indicate the most important European representatives of the humanist epic poetry who influenced the works of Croatian authors
4. Recognise the formal foundations of the Croatian Latin epic in the epic tradition of Classical antiquity (especially Virgil)
5. Recognise the points of contacts between the Cro. humanist epic with early Christian and Medieval epic poetry.
6. Describe the main features of the Croatian humanist epics.

Study Programme Learning Outcomes

Croatian Latinity

Generic competencies

constructively encourage further development of Croatian
 Latinity as an occupation based on the principles of scientific
 rationality. international recognisability. scientific excellence and
 integrity

apply different methods to explain, comment and interpret all literary scientific works written in Latin or Croatian language
follow and adequately reproduce written and oral presentations of complex academic and non-academic topics
identify and interpret common theoretical starting points of different linguistic and other disciplines as well as literary science

ECTS Credits 4.0

English Level L2

E-learning Level L1

Study Hours 30

Grading

Student will be evaluated according to the accomplishment on his final exam (in writing and oral), as well as according to the regular attendance and participation during classes.

interpret, assess, comment, translate and prepare for publication works and/or documents reflecting Croatian cultural heritage, especially those written in Latin, in accordance with contemporary philological mores and requirements
think in an interdisciplinary manner and respect diverse scientific methodologies and views on specific issues
use the professional terminology accepted in fields and professions of contemporary linguistics and science of literature

Specific competencies

in interpreting and processing of texts integrate critical models of thinking characteristic for various literary and linguistic disciplines into a comprehensive ability of philological thinking
in written and oral form present complex academic and non-academic topics in a clear and innovative manner

Dual-major studies

Croatian Latinity

Integrate critical models inherent in literature and linguistic disciplines into the unique ability of philological thinking in the interpretation and processing of a text

Constructively encourage and promote the development of knowledge of Croatian Latinity based on the principles of scientific rationality, international recognition, and scientific excellence

Use various methods for explaining, commenting and interpreting all literary and scientific works written in Latin and Croatian

Recognize and interpret the common theoretical starting points of different linguistic disciplines, the science of literature as well as other disciplines

Interpret, evaluate, comment, translate and prepare works and/or writings from the Croatian cultural heritage for print, especially Latin ones, in accordance with contemporary philological customs and requirements

Think interdisciplinary and respect different scientific methodologies and views on specific issues and problems

- EN ishod -Use standard professional and scientific terminology in contemporary linguistics and literary science

Clearly and innovatively present complex academic and non-academic contents in written and oral form

General Competencies

Students will be able to compare the epic works of Croatian authors with the Classical ones, as well as contemporary European authors. They will be able to describe the characteristics of these works. They will be able to analyse the development of the Croatian latinistic literature, especially focusing on epics. They will be able to compose the scientific works regarding both Croatian and Classical epics, to recognise the references to Classical literature in the texts. They will be able to analyse the representative selections of literary works, and to indicate the most important European representatives of the humanist epic poetry who influenced the works of Croatian authors.

Course Description

The aim of the course Holocaust is to provide students with a sociologically grounded analytical framework for understanding the causes, dynamics, and consequences of the Holocaust, as well as its broader social and political context. The course will explore how social structures, ideologies, institutions, and individuals contributed to the implementation of genocide, and how the Holocaust is reflected in contemporary social processes. Through an interdisciplinary approach, students will develop critical analytical skills that will enable them to connect the Holocaust with broader phenomena such as mass violence, collective memory, and human rights.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the main actors of specific social processes.
2. Use theoretical concepts in the analysis of society.
3. Use sources of scientific information.
4. Explain the current social situation.
5. Explain the elements of social inequality.

Study Programme Learning Outcomes

Dual-major studies

Sociology

Explain the role of sociology in society

Recognize the generators of conflicts in contemporary society

Recognize the elements of cultural/collective memory

Interpret certain social processes using knowledge of sociological theories

Discuss about current geopolitical issues

Sociology

Discuss about current geopolitical issues

Recognize the elements of cultural/collective memory

Recognize the generators of conflicts in contemporary society

Modify the explanations and basic terminology of sociological tradition to target population

Interpret certain social processes using knowledge of

sociological theories

General Competencies

- Critically analyze sociological theories of power and systemic violence.
- Understand the historical context and dynamics of the Holocaust.
- Evaluate the role of the state and society in perpetrating crimes against humanity and genocide.
- Examine the relationship between antisemitism, racism, and nationalism in the context of the Holocaust.
- Compare the Holocaust with other examples of genocide in the 20th and 21st centuries.

The Media: A Critical Approach

96364

Lecturer

doc. dr. sc.
Tomislav
Janović

Course Description

COURSE OBJECTIVES:

- to introduce the most important manifestations and mechanisms of social behavior;
- elucidate the role of communication in forming collective beliefs (public opinion) and collective decision making;

through obligatory reading assignments and discussions in class prompt students to autonomously explore the role of mass communication in contemporary society.

COURSE CONTENT:

In the first part of the course the most important manifestations and mechanisms of social behavior are exposed. In the second part, the processes that influence the formation and change of collective beliefs (public opinion) are elucidated: propaganda, manufacturing of consent, stereotypization, self-presentation, preference falsification, pluralistic ignorance, spiral of silence, false consensus, third-person effect etc., together with the features of human nature that underlie these processes.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use technical terms and concepts from social sciences which are relevant to the understanding of human communication.
2. Identify the main characteristics of human social behavior that have allowed the development of interpersonal and mass communication.
3. Describe the role of communication in the collective decision-making and social changes, with particular regard to the process of formation of the so-called public opinion.
4. Apply the most important mechanisms of the formation of collective beliefs and the formation of public opinion.
5. Explain the role of the media in the political communication and social change.
6. Explain the emergence, change and research methods of public opinion

tests) 40% oral exam 20%

7. Describe two main visions of human nature and their impact on social processes

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Define and describe the disciplines of contemporary communication studies, the history of their development and central problems, and use professional terminology in different areas of communication studies

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Formulate and critically evaluate arguments for and against opposing points of view

Identify and reproduce written and oral presentations and argue complex academic and non-academic content

Recognize the needs and readiness for lifelong professional development

Recognize and interpret with arguments the interdisciplinary nature of communication studies, connecting certain segments of the history of communications with corresponding segments of the history of social sciences and humanities

Show the application of theoretical knowledge of communication studies

Think interdisciplinary and respect different scientific methodologies and views on special questions and problems

General Competencies

To understand and extract the main points of graduate level philosophical or scientific texts to analyze and critically evaluate theories and arguments in oral and written form; to identify weaknesses of particular arguments and theoretical positions to apply theories, concepts and technical terms of philosophy and methodology of science to other philosophical fields and/or other disciplines of the humanities and the social sciences to recognize the common conceptual ground of all disciplines dealing with social phenomena and to appreciate the importance of foundational and methodological issues for these disciplines

Week by Week Schedule

1. Basic information about the course, learning methods, student's obligations, credits, and grading. Short overview of the main topics.
Persons, behavior, action: explanation and justification, causes and reasons, individual and collective behavior, methodological individualism.
2. Motives of actions (beliefs, desires/preferences, interests, emotions); selfishness and altruism; rationality and irrationality; rational choice theory.
3. Collective action problem; group agents; norms and institutions.
4. Collective beliefs and collective decision making: conformism, pluralistic ignorance, rumors and informational cascade.
5. Public opinion in contemporary media society: methods of research, causal factors and ways of shaping, group differences and ideological polarization, influence on politics; aggregative view of public opinion and its shortcomings: "loud minority" and "silent majority", pluralistic ignorance, false consensus, looking glass perception, spiral of silence, third-person effect.
6. Complexity of public opinion: opinions, attitudes, facts; private and public, personal and collective beliefs (Goffman); consistency of beliefs (Billig); shaping and expressing public opinion: cognitive (Lippmann) and social perspective (Blumer and Bourdieu).
7. Public opinion, propaganda and manufacturing of consent: masses and public; stereotypes, symbols, "pictures in the head" and "pseudo-environment" (Lippmann); actual role of public relations and journalism in the manufacturing of consent.
8. Psychology of persuasion: "weapons of influence" (Cialdini); "thinking fast" and "thinking slow" (Kahneman)
9. Media presentation of reality and forming of public opinion: agenda setting, media hypes, rise and fall of issues (van Ginneken)
10. Social media and polarization of public opinion: informational overload, mechanisms of filtering, group identity, deliberation enclave and public sphere (Sunstein).
11. Social media and information cascades: social networks example.
12. Human nature and basic political (ideological) beliefs: "utopian" and "tragic" vision of human nature, political left and political right from the perspective of evolutionary psychology; moral intuitions and moral inference in political communication (Pinker; Haidt)
13. Human nature and basic political (ideological) beliefs: "righteous mind" and social divisions from the perspective of moral psychology; prospects for "constructive disagreement".
14. Conclusions and course recapitulation.

English Level	L1
E-learning Level	L1
Study Hours	30

Grading

The activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is written and oral.

Course Description

The aim of the course is to familiarize students with the basic data and theoretical viewpoints on historical science. Acquaint them with recent theoretical frameworks and their application to concrete historical research. Enable students to explore and interpret works of historiography.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic problems of the theory of history,
2. Identify the most important information and people from the theory of history,
3. Explain the causal theoretical point of view and historical periods,
4. Analyze various theoretical and historical themes
5. Describe the basic theoretical directions.
6. Apply what was learned in historical research.

Study Programme Learning Outcomes

History

Demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences

Formulate arguments for and against mutually opposing points of view

Identify and describe the disciplines of contemporary historical sciences, their development and basic problems

Demonstrate interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems

Recognize and name the common theoretical starting points of different historical disciplines

Prepare and present written and oral presentations of complex academic and non-academic content

General Competencies

After finishing the programme student will be able to:

1. identify the most important person and institutions in the Croatian and the World history,
2. write an essay on different historical period,
3. defend his/her own opinion in discussions on different historical events and processes,
4. design his/her own conclusion on different historical events and processes,
5. reconstruct historiographic tools in making conclusions of historical processes and events,
6. Appraise the value of historiographic interpretations.

Theory of Psychological Testing

57115

Lecturer

izv. prof. dr. sc.
Maša Tonković
Grabovac

Course Description

Provide knowledge in the field of psychometrics, which will enable students to understand the methodological characteristics of psychological tests.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain fundamental concepts and psychometric properties of psychological tests.
2. Analyze and critically evaluate psychometric characteristics and validation studies of psychological instruments.
3. Recognize limitations in decision-making based on test results that stem from psychometric properties of tests.
4. Apply procedures of construction and validation of a psychological instrument.
5. Explain and interpret individual test scores.
6. Argue for the appropriateness of psychological instruments in different contexts of application.
7. Design a plan for validating a psychological test.

Study Programme Learning Outcomes

Psychology

Create basic and/or applied psychological research and construct and metrically evaluate psychological measuring instruments

Critically judge multivariate statistical procedures with regard to their limitations and to the satisfaction of theoretical assumptions in concrete application situations

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures and the specifics of their environmental and social context

ECTS Credits 4.0

English Level L1

E-learning Level L1 (5%)

Study Hours
30
15

Teaching Assistants

dr. sc. Eta Krpanec

dr. sc. Dora Popović

Grading

Student work is continuously assessed, with points awarded for active participation in lectures, experimental work during practical classes, and mid-term exams. In addition, students are required to pass an oral exam, which covers the entire course content and also carries a portion of the points. Based on this continuous assessment, a final grade is assigned.

General Competencies

Upon completion of the course, students will be able to:

Design fundamental and/or applied psychological research and construct and metrically evaluate psychological instruments.

Evaluate multivariate statistical procedures with regard to their limits and to satisfying the theoretical assumptions in concrete situations of application.

Select appropriate research methods and strategies for interventions in accordance with the characteristics of members of different social groups and cultures, as well as the specific features of their environmental and social context.

Learning Outcomes - Intellectual (Cognitive) Skills

Explain fundamental concepts and psychometric properties of psychological tests.

Analyze and critically evaluate psychometric characteristics and validation studies of psychological instruments.

Recognize limitations in decision-making based on test results that stem from psychometric properties of tests.

Learning Outcomes - Practical and Generic Skills

Apply procedures of construction and validation of a psychological instrument.

Explain and interpret individual test scores.

Design a plan for validating a psychological test.

Argue for the appropriateness of psychological instruments in different contexts of application.

Connection of Learning Outcomes and Grading

The midterm exams will assess the following learning outcomes:

- Explain fundamental concepts and psychometric properties of psychological tests.
- Analyze and critically evaluate psychometric characteristics and validation studies of psychological instruments.
- Recognize limitations in decision-making based on test results that stem from psychometric properties of tests.
- Design a plan for validating a psychological test.
- Argue for the appropriateness of psychological instruments in different contexts of application.

The oral examination will assess all learning outcomes.

Therapeutic Pedagogy 1

201466

Lecturer

izv. prof. dr. sc.
Katarina Dadić

Course Description

Produce an awareness of the connection between medicine and pedagogy and contribute to the joint pursuit of medicine and pedagogy to improve the life quality of children and parents. Provide relevant information on health and illnesses that reduce prejudice. Present the possibilities of therapeutic pedagogy with the long-term aim to extend personal boundaries in communication with children with special needs.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic concepts in the field of therapeutic pedagogy.
2. Explain the basic starting points of therapeutic pedagogy.
3. Explain the place and role of therapeutic pedagogy within the educational sciences.
4. Analyze the interdisciplinary content related to clinical pedagogy.
5. Show the results of recent theoretical research in the interdisciplinary field of pedagogy and medicine.
6. Analyze the different theoretical approaches in the research presented.
7. Demonstrate the connection between theory and practice based on a case study.
8. Demonstrate the ability to plan cognitive and practical goals related to the practice.

Teaching Assistant
dr. sc. Martina Horvat

Grading

Students are required to regularly attend, actively participate in classes, and complete assignments on time, following the instructions given to them. They are obligated to prepare for seminary teaching by reading the intended texts independently. In developing written seminars, they should demonstrate elementary academic literacy and integrity, in addition to the requirements prescribed for each assignment. Students are welcome to give proposals to continuously contribute toward improving the quality of teaching. Active student participation during the implementation of the planned exercises is advisable.

Commitments: 1. Seminar paper prepares the student independently according to predetermined topics. Students will present a selected topic and be evaluated. 2. Colloquiums - according to lectures and seminar papers presented. 3. Written examination - according to the lectures and intended examination

Evaluate appropriate ways of intervention of a certain social issue

Therapeutic Pedagogy 2

201485

Lecturer

prof. dr. sc.
Davor Piskač

Course Description

Produce an awareness of the connection between medicine and pedagogy and contribute to the joint pursuit of medicine and pedagogy to improve the life quality of children and parents. Provide relevant information on health and illnesses that reduce prejudice. Present the possibilities of therapeutic pedagogy with the long-term aim to extend personal boundaries in communication with children with special needs.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze existing definitions and concepts of health, illness, and construct new concepts (such as psychological euthanasia, special needs teacher, etc.)
2. Explain the basic starting points of therapeutic pedagogy.
3. Explain the place and role of therapeutic pedagogy within the educational sciences.
4. Analyze the interdisciplinary content related to clinical pedagogy.
5. Show the results of recent theoretical research in the interdisciplinary field of pedagogy and medicine.
6. Analyze the different theoretical approaches in the research presented.
7. Relate the acquired theoretical knowledge with good practice examples.
8. Demonstrate the ability to plan cognitive and practical goals related to the practice.

The Speech Culture

188010

Lecturer

izv. prof. dr. sc.
Karolina Vrbanić
Zrinski

Course Description

Adoption of concepts from speech culture and application of speech rules. Mastering the skills of public appearance and mastering the shame and fear of public speaking and preparing students for work in professions where speech culture, speaking skills and knowledge of the features of verbal and non-verbal communication are constituent part.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the components of speech composition and audience profiling
2. Show speech etiquette and components of speech listening
3. Define and explain non-verbal signs
4. Recognize and name rhetorical figures and styles
5. Show a speech in accordance to rhetorical rules
6. Recognize good argumentation

Study Programme Learning Outcomes

Dual-major studies

Croatology

Critically relate to mastered content and argue your conclusions in written and oral form

Explain and apply the facts of Croatian linguistic norms in written and oral expression

Croatology

General Competencies

During their studies, students of Croatology learn the basics of linguistic culture. In the course The Speech Culture, students will be introduced to rhetorical rules, rules of speech etiquette and speech formation. Seminar papers will be presented according to rhetorical rules, from adhering to a predetermined length of presentation and speech composition to etiquette speech.

Course Description

Course objectives: to introduce students with theoretical approaches to statehood, transition and diaspora; to empower students to understand post-Cold War processes in the Eastern, Central and Southeast Europe; to introduce students to the creation of the Republic of Croatia and the Croatian Homeland War; to empower students to understand the overall social context, presenting itself as a challenge to transitional processes; to introduce students to the role of international actors during the process of international recognition, ending the war and the transition strategy selection, as well as the conditions for NATO and EU membership; to empower students to participate independently in the projects of scientific, economic, cultural and various other modes of cooperation with the Croatian diaspora; to empower students to understand, clarify and to predict the future, global migratory trends, as well as the connected security

issues for the region.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and recognize the migratory cycles and integration models, which serve the Croatia's development
2. Define and explain the selective migration flows within the context of a non-identify population
3. Identify the areas of possible integration and functional economic linkage between Croatia and emigration, within the context of security and development
4. Identify, explain and develop models of connecting the state of Croatia and emigrant communities, through various forms of integration
5. Identify the potential of the emigrant community (Croatian diaspora) and to link with them in various different integration patterns in order to fulfil a particular Croatia's need

TV Journalism

57245

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

Bring TV journalism closer to the students through practical exercises in which they will apply and improve journalistic skills which are used in television, while gathering and analyzing information and shooting, editing and publishing video clips in a variety of television genres.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define TV journalism and explain its characteristics.
2. Develop the skills of distinguishing and applying the main means of television expression in TV journalism.
3. Develop visual and verbal communication skills needed in TV journalism.
4. List, differentiate and use the most important forms of television journalistic expression.
5. Demonstrate the skills of independent collection, verification and journalistic shaping of information appropriate for the TV medium
6. Demonstrate the skill to independently record and edit short TV clips.
7. Demonstrate the ability to independently publish YouTube video clips.
8. Develop the skills of journalistic storytelling with a moving image, without using the narrator's voice.

Study Programme Learning Outcomes

Communication Studies

Argumentatively and rationally defend one's professional views and understandings

Demonstrate responsibility, ethics, autonomy and initiative in professional work

Present different information and points of view and critically assess the credibility of claims, assumptions and arguments mediated through various media

Distinguish practical applications of practical knowledge and skills from journalism and public relations

Develop oral and written communication skills

Develop social skills

ECTS Credits 4.0

English Level L2

E-learning Level L1 (10%)

Study Hours 30

Teaching Assistant
dr. sc. Vesna Karuza
Podgorelec

Grading
Project, written exam,
class activity.

Professionally apply acquired specialist, theoretical and practical knowledge in the sphere of media, i.e. journalism, public relations and scientific research in communications

General Competencies

Apply, classify and distinguish professional terminology. Expertly and professionally apply the acquired specialist theoretical and practical knowledge to work in journalism. Identify, classify, use and critically evaluate various media and newspaper genres, their role in media content and impact on the audience. Demonstrate accountability, professional ethics, autonomy and initiative in their work.

Teaching Assistant
dr. sc. Lidija Bogović

Grading

It is assessed the participation in class, activities during the class, the quality of the seminar paper.

Course Description

The goal of the course is to enable the adoption of a theoretical-analytical framework, in order to clearly understand the difference between word formation and other linguistic disciplines and parts of grammar.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Compare the motivated and the non-motivational words.
2. Define the form of the word formation.
4. Analyze the morphological description of the formation bases.
5. Define determination of word order in the word formation.

Working with Groups

173686

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Course content will enable students to develop general and specific competences related to mastering basic knowledge and group work skills, as well as planning, evaluating and evaluating the outcomes of group treatment. Also, the subject's goal will be to understand, evaluate and know the processes and dynamics of group work and develop sensitivity and personal capacities to guide group processes. Students will participate in the work of different specific groups and develop group leadership skills and their own communication skills. In this way, students will strengthen their specific professional skills for working with groups.

Learning Outcomes

On successful completion of the course, students will be able to:

1. List models of psychological assessment and counseling in working with individuals, groups and organizations.
2. Choose appropriate research methods and strategies for intervention according to the characteristics of members of different social groups and cultures and the specifics of their environmental and social context
3. Argue similarities, differences and usability of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences
4. Explain theoretical concepts and scientific knowledge in creating interventions and programs that will improve the living conditions and development of individuals, families, organizations and communities
5. Apply skills of oral and written professional communication and interdisciplinary collaboration in different professional environments

Study Programme Learning Outcomes

Psychology

ECTS Credits	3.0

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistant
Ana Raguž Šutalo, mag.
psych.

Grading

The conditions for taking the course include the signature of the teacher as proof of regular attendance (max. 3 absences) and independent work and practical work provided in smaller groups. Scoring and monitoring student work: attendance 30% and written report within the independent work of students 70%. For a positive final assessment, it is necessary to have a minimum of 70% of the obligations due to the teaching load (attendance and based on independent work report).

General Competencies

Select models of psychological assessment and counselling in working with individuals, groups and organizations.

Choose appropriate research methods and strategies for interventions in accordance with the characteristics of the members of different social groups and cultures as well as the specifics of their environmental and social context.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Evaluate theoretical concepts and scientific insights in intervention and program designing with the aim of improving the living conditions and development of individuals, families, organizations and communities.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Working with Students with Special Educational Needs

201210

Lecturers

Adinda Dulčić, Katarina Pavičić
nasl. izv. prof. Dokoza,
dr. sc. nasl. izv. prof.
dr. sc.

Course Description

The aim of the course is to familiarize the students with the most important aspects of working with children with special educational needs. The students will get to know the formal, normative framework which regulates the position of students with special educational needs in the Croatian educational system, developmental characteristics of disabilities according to the Diagnostic and Statistical Manual of Mental Disorders (terminology, definitions, etiology, phenomenology) and the organization of school and kindergarten work with special reference to the work of professional services.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic concepts of the subject teaching methodology,
2. Apply and adopt terminology that refers to children with special educational needs,
3. Identify hearing and speech-language disorders
4. Explain contemporary insights and achievements in working with pupils with special educational needs in accordance with the European and global achievements,
5. Define educational goals to the capabilities of hearing impaired children and children with speech-language disorders,
6. Point out the necessity of sensitizing the educational and wider community to the processes of inclusion.

Study Programme Learning Outcomes

Psychology

Argue the similarities, differences and usability of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences

Critically evaluate professional and scientific literature from psychology and related disciplines and create new scientific knowledge

Support cooperation in interdisciplinary team work and create constructive professional relationships with experts of collaborating disciplines

ECTS Credits	3.0

English Level L1

E-learning Level	L1

Study Hours 30

Grading

Final exam

Assess one's own oral and written professional communication skills and create complex communications and interdisciplinary cooperation in different professional environments

Self-evaluate responsibility, autonomy and initiative in work

Evaluate the impact of the social context and social changes on human development and the behavior of individuals, groups and systems

Value the importance of lifelong professional development

General Competencies

Students will be able to:

Evaluate the impact of social context and social changes on the human development and behaviour of individuals, groups and systems.

Explain the similarities, differences and usefulness of psychological interventions and interventions within complementary disciplines in the field of social and biomedical sciences.

Assess personal skills of verbal and written professional communication and create complex communication and interdisciplinary cooperation in various professional environments.

Support collaboration in interdisciplinary team work and establish constructive professional relationships with experts from associated disciplines.

Develop accountability, autonomy and initiative in one's work.

World Population

253109

Lecturer

Sanja Klempić
Bogadi,
nasl. prof. dr.
sc.

Course Description

Courses objectives:

- introduce students to fundamental demographic indicators, processes and the state of the world's population
- define and explain development trends of world population as well as contemporary characteristics of world population
- explain to students the contemporary demographic determinants and the impact of migration on the demographic profile of the world
- develop students' ability to identify significant spatial (regional) variations in demographic development
- explain to students the significance of demographic planning within concepts and strategies of spatial governance
- introduce students to examples of population policy implementation and models of demographic revitalization
- develop students' understanding of the correlation between demographic processes and global systems, as well as overall spatial development
- develop students' awareness of the importance of population in contemporary global spatial relations and processes
- develop students' ability to forecast the future development and characteristics of the world population

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the key demographic processes and analyze the main demographic indicators of the world population
2. Define the trends in global population development
3. Explain migration processes and their impact on the contemporary demographic profile of the global population
4. Analyze demographic processes and explain the spatial variations in demographic development
5. Explain the importance and impact of population in space

ECTS Credits 2.0

Lecturer

doc. dr. sc.
Vladimir
Šumanović

ECTS Credits	3.0

English Level L1

E-learning Level L1 (10%)

Study Hours 30

Grading

Assessment will be based on active participation in teaching, writing a seminar paper and examinations

Course Description

Although the security services of socialist Yugoslavia have an extremely high impact on the daily life of the population in the former Yugoslavia and not only at the level of the primary form of repression (liquidation, arrests and exile abroad), but also in the educational and journalistic activities (through the creation of a basic corps to the public of knowledge of reading the more important social topics), their character has remained almost completely unexplored. For this reason, this course aims to fill this void in history.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the complex character of Yugoslav security services
2. Explain to students the real character of Yugoslav security services in contrast to the popular opinion
3. Explain and promote the importance of the discussion between students and between students and professor.
4. Analyze the knowledge of students via test.
5. Explain the differences between the security services of communist countries
6. Explain the consequences of the work of the Yugoslav socialist security services
