Courses

19th and 20th Century Croatian Historiography

38055

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

Course objectives are to introduce students to a new stage of development of Croatian historiography in the 19th century and its gradual transformation into a scientific discipline. The material is exposed clearly and synthetically in the context of the time, but students need to learn about different approaches to the study of the past in some areas of the Croatian ethnic propagation, particularly with the major representatives of historiography in the 19th and then 20th century. In particular, attention should be drawn to new developments and modern outlier Croatian historiography in the last three decades.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » History (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain previous efforts of Croatian Historical Sciences,
2. Describe new approaches to the study of Croatian history
3. Explain how the Croatian historiography has developed through its research period,
4. Indicate the most important people of Croatian historiography,
5. Define the basic problems of Croatian historiography in the 19th and 20 century,
6. Analyze the most important characteristics of Croatian historiography in the said period,
7. Explain historical processes and historiographical approaches used in their study.

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

ECTS Credits	5.0
Semester	Summer
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

Activity of students will be monitored throughout the semester. Classes is required to attend. Written exam, with the possibility for oral.

Formulate and orally present knowledge about historical processes and data

List historical sources for the study of national history

Norm and classify historical literature and sources

History

General Competencies

After finishing the programme student will be able to:
 compile a list of literature for each historical period,
 identify major issues in interpretation of history,
 tell what is the interpretation of history,
 reconstruct historiographic tools in making conclusions of historical processes and events,
 appraise the value of historiographic interpretations.

Week by Week Schedule

1. Introductory lecture. Students duties and topics of their presentations.
2. What is historiography and what are its Croatian specialties;
3. Ivan Lucic Lucius-culmination of Croatian historiography in the 17th century;
4. From Ivan Lucic to 19th century stagnation of Croatian historiography;
5. Istria and Kvarner: Pier Antonio Biancini, Giuseppe Brodmann, Martin Botterini, Josip Voltić, Ivan Feretić, Girolamo Galzigna;
6. Dalmatia: početak novinstva Kraljski Dalmatin; Grgur Stratico, Marko Lauro Ruić, Andrija Ciccarelli/Cikarelić/Ćikarelović;
7. Dubrovnik: Đuro Gvozdenica Ferić, Franjo Marija Appendini;
8. Upper Croatia: Maksimilijan Vrhovac, Josip Mikoczy (Mikoczy); Matija Petar Katančić, Martin Đuro Kovačić;
9. Illyrian times Ljudevit Gaj, Ivan Švear, Romuald Josip Kvaternik, Ivan Katalinić/Giovanni Cattalinich (Dalmacija); Pietro Kandler (Istra), Ivan Franjo Jukić (Bosna);
10. The Age of Bach's absolutism Antun Mažuranić, Ante Starčević, Andrija Torkvat Brlić, Nikola/Niccolò Tommaseo (Dalmatia), Emanuel Sladović (Croatian coast), Petar Stanković/Pietro Stancovich (Istria)
11. From 1860 till the end of 19th century: Ante Starčević, Josip Neustädter, Ivan Kukuljević Sakcinski, Šime Ljubić, Eugen Kvaternik, Matija Mesić, Franjo Rački, Ivan Črnčić, Petar Matković, Radoslav Lopašić, Eusebije Fermendžin, Mijo Brašnić, Franjo Trnka, Ante Kuzmanić, Carlo De Franceschi, Jakov Volčić, Ivan/Giovanni Kobler;
12. 1900. - 1914.: Ivan Krstitelj Tkalčić, Imbro Ignjatijević Tkalac, Natko Nodilo, Armin Pavić, Tadija Smičiklas, Konstantin Ante Vojnović, Josip Alačević, Janko Koharić, Baltazar/Valtazar Bogišić;
13. 1914. - 1918.: Ivan Strohal, Nikola Tomašić, Nikodim Milaš, Konstantin Jireček, Ljudevit/Lajos Thalloczy;
14. Croatian historiography of the interwar period;
15. Croatian historiography during the Second World War;

20th Century History

38065

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

The aim of the course is to present the causes, course, and consequences of key political, social, cultural, and economic processes and events that shaped the 20th century. Special emphasis is placed on the methodological specificities of researching modern history, as well as on understanding how historical knowledge is constructed, interpreted, and used. Students are encouraged to critically reflect on historical narratives and to engage in independent analysis of sources and interpretations. Through an interdisciplinary approach and group-based student work, the course analyzes global phenomena that marked the 20th century, examining them from various perspectives—political, legal, social, economic, and cultural. Key topics include totalitarian regimes (Nazism, fascism, communism) and their impact on societies and international relations; the development of international law, particularly in the aftermath of the world wars and in the context of human rights; urbanization and the emergence of megacities as a result of demographic, technological, and economic transformations; decolonization processes in Africa, Asia, and Latin America and their political and cultural dynamics; the Cold War as a global division of the world and a clash of ideologies; and globalization, with a focus on the late 20th century, when the forms of communication, economy, identity, and power changed rapidly.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » History (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic problems of world history in the 20th century,
2. Show the most important data persons specified period of world history,
3. Define causal connections during the period,
4. Explain historical processes of world history during the period,
5. Compare historical processes the flow of historical events in modern world history,
6. Show the important from the unimportant in the interpretation of historical events processes specified period,

ECTS Credits	5.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

Activity of students will be monitored throughout the semester. Classes is required to attend. Written and oral exam, with the possibility for colloquiums.

7. Differentiate level of interpretation of the level of historical events in modern world history.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
 adherence to the principles of academic integrity and ethical norms of research and publishing
 adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

History

Identify historical facts and processes from European and national history
 Name and describe individual historical periods
 Identify important historical figures from different periods of European history
 Single out historical processes and explain their topic of interpretation
 Express (in your own words) basic historiographical facts about world history
 Design and formulate a hypothesis based on research work on historical events and facts
 Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner
 Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

History

Name and describe certain historical periods
 Single out important historical figures from different periods of European history
 Norm and classify historical literature and sources
 Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use various types of German dictionaries and reference books independently
2. Recognize and describe various ways of expressing time in German
3. Recognize and explain word formation patterns in German
4. Explain form and content organization, as well as the main characteristics of German media and academic texts
5. Describe main features of the vocabulary found in German media and academic texts (false pairs, synonyms, words with multiple meanings, terminology)
6. Describe the main characteristics of the culture and civilization of the German-speaking countries and regions
7. Identify and use expressions used for comparing, exemplifying and expressing reason and result in German
8. Identify and use expressions for providing arguments, expressing opinion, agreeing or disagreeing
9. Explain main ideas of media and academic texts in German and discuss in German issues related to their field of study

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Communication Studies

Organize individual and team work

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use dictionaries, grammar books, and other reference materials for the Italian language.
2. Identify Italian pronunciation, orthography, and spelling.
3. Recognize and interpret word formation processes in the Italian language.
4. Describe the brief history of the Italian language and its Latin roots.
5. Apply the ways of expressing temporal relations in the Italian language.
6. Recognize and use words and expressions for making comparisons, expressing one's own opinion, agreement, or disagreement.
7. Identify the main features of Italian culture and civilization.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

Philosophy and Culture

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Communication Studies

Organize individual and team work

Prepare and construct work assignments in the interdisciplinary field

Prepare and create different forms of presentations and seminar papers

Communication Studies

Organize individual and team work

Prepare and construct work assignments in the interdisciplinary field

Prepare and create different forms of presentations and seminar papers

Croatology

Justify and support the need and willingness for lifelong education

Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

Croatology

Justify and support the need and willingness for lifelong education

Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

History

Name and describe certain historical periods

History

Name and describe individual historical periods

Psychology

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

Sociology

Divide the types of scientific research

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Sociology

Divide the types of scientific research

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

o develop the ability to recognize, evaluate, affirm, apply, project, model, and harmonize the developmental aspects of Croatian civilizational values; to cultivate academic understanding of value systems and their civilizational scope, as well as educational and identity-oriented alignment with national developmental concepts, aimed at sustaining the cultural diversity of humanity's heritage.

To explain the concepts, models, and programs for achieving educational objectives in institutional and non-institutional settings, the value-oriented engagement of education, the normative frameworks of educational content, competence, and understanding.

To develop the skill of reflection and self-reflection within educational practice, including effective oral and written communication with students, parents, fellow teachers, and professional associates, and to anticipate, identify, assess, and resolve specific pedagogical problems. To conscientiously assess one's own abilities, skills, and attitudes, and to self-evaluate one's knowledge for the purpose of transforming one's worldview and achieving personal freedom and self-determination.

To recognize the need for civilizational (cultural, educational, enlightened, refined, courteous, and generally value-oriented) engagement within the national and broader social and spatial context, in the service of the overall development of the Croatian population.

- » Sociology (Studij) (tzp(17087) - (*required) general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the ability to independently browse available databases and other bibliographic sources. Compare available bibliographic resources and select relevant sources for academic writing.
2. Evaluate and critically select relevant literature.
3. Analyze and apply the logical structure of arguments.
4. Design arguments and presentations in written and oral form. Create a standalone report based on a previous analysis.
5. Create visual research equipment in MS Excel, Adobe Photoshop (Gimp) and Corel Draw (InkScape)
6. Write formally correct work in MS Word and LaTeX.
7. Apply scientific and ethical standards in the design of written work.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Apply basic techniques of correct logical reasoning and conceptual analysis

Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks

Judge the position, importance and relevance of one's own culture in creating personal and national identity

Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Apply methods of social research and statistics

Croatology

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

Apply basic computer skills

History

Use a computer, the Internet and other technical and digital aids for processing historical data

Collect professional bibliography through library catalogs and internet databases and present them with arguments

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Plan the search of literature, databases and other sources of information

Evaluate basic content from complementary social, humanistic and biomedical disciplines.

Sociology

Describe basic research methods in sociology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Divide the types of scientific research

Sociology

Describe basic research methods in sociology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Divide the types of scientific research

General Competencies

Apply standard academic writing tools in writing essays, written assignments and qualification theses (B.A. and M.A. thesis). • to search bibliographic databases and other sources when carrying out simple research assignments. Exhibit reading comprehension and analytic skills when reading academic text and media contents. Articulate and lay out attitudes and arguments, both in oral and written form.

Screening of student's work

0.25
ECTS Pohađanje nastave [EN]

0.25
ECTS Usmeni ispit [EN]

1.5 ECTS written exercises

2 ECTS

Forms of Teaching

- » Predavanja
 - » Lectures are held once a week for one hour
- » Auditorne vježbe
 - » Practice is held once a week for two hours

Week by Week Schedule

1. Specific characteristics of academic and scientific writing
2. Spelling, grammatical, stylistic, logical and technical standards in the production of written works. Functional styles in the Croatian language, characteristics of the scientific style, goals and types of academic texts, similarities and differences between the humanities and social sciences.
3. The structure of scientific texts in the social sciences and humanities. Specificity of styles of logic and cognitive science.
4. Search for available databases and other bibliographic sources, compare and select relevant sources. Bibliographic norms, types of sources, references and references to sources, purpose of sources, purpose of notes, compilation of bibliographic lists.
5. Collection and evaluation of literature. Sources and questionnaire for reading.
6. Elaboration of the topic, selection of the title, draft and structure of the paper, division of the chapter, purpose and method of writing the abstract of the paper.
7. Setting the problem and main hypothesis of the paper, purpose and method of writing the introduction and conclusion of the paper. Logical structure of text and argument, accepting and rejecting argumentation, linking statements and arguments, presenting and comparing positions.
8. Citation instructions and citation models.
9. Creating and formatting images and charts in MS Excel, Gimp / Photoshop, Corel Draw and InkScape
10. Working with tables, graphs, use of audio-visual material and graphic text formatting in MS Word and its clones.
11. Formatting text and bibliography in LaTeX.
12. Formatting tables, images and symbols in LaTeX. BibTeX.
13. Code of ethics and standards of the scientific and academic community, the problem of plagiarism and self-plagiarism.

14. Review of the entire seminar paper.
15. Example review in academic writing

2. Evaluate and critically select relevant literature.
3. Analyze and apply the logical structure of arguments.
4. Design arguments and presentations in written and oral form. Create a standalone report based on a previous analysis.
5. Create visual research equipment in MS Excel, Adobe Photoshop (Gimp) and Corel Draw (InkScape)
6. Write formally correct work in MS Word and LaTeX.
7. Apply scientific and ethical standards in the design of written work.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)
Write texts and prepare other materials for media and public relations in Croatian and English

ECTS Credits 2.0

Semester Winter

English Level L1

E-learning Level L3 (10%)

Study Hours
15
30

Grading

The final grade is based on attending classes, writing a seminar paper, passing a colloquium and a written exam, and working on practical assignments.

Prerequisites for

Mass Communication Research: A Historical Overview

Theories of Media and Mass Communication

Recognize the needs and willingness to engage in lifelong learning

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Present knowledge about journalism, public relations, communications and society using different communication methods

General Competencies

Apply standard academic writing tools in writing essays, written assignments and qualification theses (B.A. and M.A. thesis). • to search bibliographic databases and other sources when carrying out simple research assignments. Exhibit reading comprehension and analytic skills when reading academic text and media contents. Articulate and lay out attitudes and arguments, both in oral and written form.

Forms of Teaching

- » Predavanja
 - » Lectures are held once a week for one hour
- » Auditorne vježbe
 - » Practice is held once a week for two hours

Week by Week Schedule

1. Introductory lecture and course review
2. Spelling, grammatical, stylistic, logical and technical standards in the production of written works. Functional styles in the Croatian language, characteristics of the scientific style, goals and types of academic texts, similarities and differences between the humanities and social sciences.
3. The structure of scientific texts in the social sciences and humanities. Specificity of styles of logic and cognitive science.
4. Search for available databases and other bibliographic sources, compare and select relevant sources. Bibliographic norms, types of sources, references and references to sources, purpose of sources, purpose of notes, compilation of bibliographic lists.
5. Collection and evaluation of literature. Sources and questionnaire for reading.
6. Elaboration of the topic, selection of the title, draft and structure of the paper, division of the chapter, purpose and method of writing the abstract of the paper.
7. Setting the problem and main hypothesis of the paper, purpose and method of writing the introduction and conclusion of the paper. Logical structure of text and argument, accepting and rejecting argumentation, linking statements and arguments, presenting and comparing positions.
8. Citation instructions and citation models.
9. Creating and formatting images and charts in MS Excel, Gimp / Photoshop, Corel Draw and InkScape
10. Working with tables, graphs, use of audio-visual material and graphic text formatting in MS Word and its clones.
11. Formatting text and bibliography in LaTeX.
12. Formatting tables, images and symbols in LaTeX. BibTeX.

13. Code of ethics and standards of the scientific and academic community, the problem of plagiarism and self-plagiarism.
14. Review of the entire seminar paper.
15. Final discussion and notes, preparation for taking the exam.

Grading

Written test or exam:
100%;

Course Description

Course objectives:

1. explain the status of aesthetics (philosophy of art) as a research domain and a philosophical discipline,
2. explicate methodological conditions for defining art,
3. analyze the content of the main aesthetic concepts and aesthetic properties,
4. explicate the content of the main aesthetic theories,
5. analyze and evaluate strengths and weaknesses of particular aesthetic theories,
6. analyze and evaluate arguments for and against particular aesthetic theories.

Study Programmes

» Philosophy and Culture -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define aesthetics as a research domain and a philosophical discipline
2. Define the main aesthetic concepts and aesthetic properties
3. List and interpret major aesthetic theories
4. Identify strengths and weaknesses of particular aesthetic theories
5. Evaluate the arguments for and against particular theories
6. Argue for one's own view of the nature of art

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Critically review different theories

Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

General Competencies

Students will be able to: (1) independently understand, evaluate and interpret theories and arguments used in debates on the philosophy of art; (2) develop their general abilities for philosophical analysis; (3) apply methods of analysis in new situations.

Forms of Teaching

» Predavanja

» Lectures: presentations of main topics.

» Seminar

» Seminar: analysis of relevant artistic artifacts and theoretical arguments.

Week by Week Schedule

1. Introduction: What is aesthetics? What is art? Defining art: aesthetic properties and aesthetic functions (1+1).
2. Artistic representation (1+1).
3. Representational theories of art (1+1).
4. Artistic expression (1+1).
5. Expression theories of art (1+1).
6. Art form (1+1).
7. Formalist theories of art(1+1).
8. Test
9. Aesthetic experience - the reception of artwork (1+1).
10. Reception (aesthetic) theories of art (1+1).
11. Institutional and historical character of art (1+1).
12. Institutional theories of art (1+1).
13. Historical theories of art (1+1).
14. Test
15. Concluding discussion (1+1).

Ancient city on the Eastern Coast of the Adriatic 270102

Lecturer

izv. prof. dr. sc.
Vlatka Vukelić

ECTS Credits 5.0

Semester Winter

English Level L1

E-learning Level L1

Study Hours

15

15

15

Grading

Written exam,
presentation, essay.

Course Description

The goals of the course are linked to defining the archaeological, urbanistic, social, and architectural issues of the Eastern Adriatic area from the ancient period. A specific feature of the course is its multidisciplinary approach, where the content is approached broadly in a theoretical sense, which practically means familiarizing students with the social and societal conditions of the genesis and development of the ancient city. Students will thus be introduced to inseparable urban concepts, such as ancient art and relevant historical sources (literary, epigraphic, and numismatic) in the Roman provinces of Regio Decem and Dalmatia, from proto-antiquity to late antiquity. In the context of this content, the goal is to equip students to develop a critical perspective towards ancient history and heritage with the help of adequate and professionally appropriate use of specialized literature in processing individual units.

The city, as a shared living space and a specific social entity, changed, developed, was destroyed, and adopted new (modern) forms in its development from the late Bronze Age to late antiquity. The origins (origins) of the city on the eastern Adriatic coast appear, to a significant extent, on prehistoric hillforts that primarily served to defend the population during unstable times. Greek colonization introduced urbanistic principles of orthogonal construction as a model for urban development, while Roman cities arose in the immediate vicinity of Greek ones, mostly on the coast as ports along one- or two-day sailing sections. Roman urbanism is a period of high engineering achievements and the development of social emancipation, but the cities in the mentioned area differ in their appearance and forms, depending on geographical and social advantages or limitations. Urban content developed and increased during the period of developed antiquity, while late antiquity led to a form of urban degradation, where the city concentrated around religious content. In late antiquity, due to the danger of barbarian incursions, old "city" positions on hillforts were revitalized. Through this content, students will deepen their fundamental knowledge of the ancient history of Croatian historical areas, in terms of learning the genesis of the ancient city on the eastern Adriatic coast: from the indigenous village to the indigenous city, through the formation of the universal ancient city on the eastern Adriatic to the totality of content that we collectively name the ancient urban heritage.

A specific feature of this course is that practical sessions (vježbe) will familiarize students with the method and professional use of specific supplementary literature.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)
- » History (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

History

Demonstrate the use of professional terminology,

historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Identify historical facts and processes from European and national history

Single out historical processes and explain their topic of interpretation

Norm and classify historical literature and sources

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Express (in your own words) the fundamental historiographic facts about world history

Norm and classify historical literature and sources

Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values

General Competencies

- Name and describe specific historical periods.
- Isolate historical processes and explain the issue of their interpretation.
- Identify historical facts and processes from European and national history.
- Standardize and classify historical literature and sources.
- Formulate and verbally present knowledge about historical processes and data.
- Generate and lead historical and other types of discussions.
- Evaluate the social and ethical context of historical science with an argumentative stance and by supporting clear principles of the subject science.
- Critically evaluate one's own work and argumentatively defend a stance in teamwork.

Course Description

The course follows the specificity of philosophy in ancient Greece and development through its periods: A) a colonial period specific on so-called natural philosophers, from Millet to Pythagoreans and Hellenic philosophers until the end of this cosmological period of ancient philosophy; B) the Athenian period with a first Sophists and a philosophical turn to a man until the Socrates, Plato and Aristotle; C) the Hellenistic period specific on development of different philosophical schools, especially epicureanism, Stoicism and Scepticism; D) the roman period and its acceptance and interpretation of Greek philosophical systems in the Roman spirit. The lectures shall be focused on philosophy of the two greatest philosophers Plato and Aristotle.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the meaning of ancient philosophy and its development as a result of a Hellenic genius
2. Relate the Greek spiritual and social atmosphere with the origin of philosophy and its characteristics
3. Describe the basic philosophical problems and emphasises in specific periods of development of ancient philosophy
4. Select the most relevant philosophical representatives and explane their thought
5. Distinguish the importance ot two greatest ancient philosophers, Plato and Aristotle, on the basis of their contribution on development of ancient philosophy and philosophy in general
6. Relate together some elements of philosophical influence on ancient period of philosophy with its later development

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods

Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them

Critically review different theories

Differentiate most important periods of the history of philosophy and their respective philosophical schools. individual philosophers and their works

Analyze, develop and evaluate your own work and progress in learning, understanding and explaining different philosophical problems

Week by Week Schedule

1. The lecture focuses on the meaning of ancient philosophy in general, and presents the most significant philosophers of the pre-Socratic period, so-called Ionian, and their philosophical accents.
2. Presentation of significant pre-Socratic philosophers (representatives of the Elea School as well as philosophers of Pluralism or mediators).
3. In the first part of the seminar, some philosophical emphases of pre-Socratic philosophers, in particular Pythagoras, Parmenides and Heraclitus, are problematized on the basis of selected texts.
4. The lecture discusses the appearance of the first Sophists Protagoras and Gorgias and their movement towards anthropology, as well as the socio-historical circumstances of this shift in philosophical emphasis.
5. In the second seminar, on the basis of some fragments of preserved texts, the Sophists, specifically Protagoras and especially his homo mensura thesis, are discussed.
6. Presentation of Socrates and his philosophical and ethical interest in man, a specific dialectical method of irony and maieutics specific to him. Further, presentation of his followers.
7. The lecture discusses Plato's politics, philosophy of language and rhetoric, as well as his philosophy of nature, including presentation of a relevant writings.
8. The lecture discusses Plato's politics, philosophy of language and rhetoric, as well as his philosophy of nature, while presenting relevant writings in these fields.

9. On the basis of relevant texts, the third seminar highlights Plato's metaphysics and philosophy of nature.
10. Presentation of Aristotle's metaphysics with particular reference to his metaphysics.
11. Presentation of Aristotle's metaphysics with particular reference on his metaphysics, physics as well as his logic and epistemology.
12. The lecture focuses on Aristotle's philosophical emphases in ethics, politics, poetics and rhetoric.
13. On the basis of relevant texts, the fourth seminar discusses the particular emphasis of Aristotle's metaphysical and ethical thought.
14. The lecture deals with the last two periods of the development of ancient philosophy, the Hellenistic and Roman period. Including the socio-political circumstances, the lecture is dedicated to the most significant representatives and their philosophical emphases of epicureanism, stoicism, skepticism and neoplatonism.
15. In the last part of the seminar, the important philosophical accents of Greek and Roman Stoicism and epicureism are discussed (on the basis of individual parts of the original texts).

ANOVA Models

214080

Lecturer

Iva Černja
Rajter,
nasl. doc. dr.

Course^{SC} Description

Systematic introducing the basic logic and series of operative analysis of variance (ANOVA) models as inferential statistical method based on central limit theorem, and directed to empirical data analysis obtained in experimental and quasi-experimental research. Generating at students an adoption and appropriate interpretation of basic concepts, logic and prerequisite assumptions of different ANOVA models, as well as of analysis of covariance (ANCOVA) models, necessary in psychological disciplines and for systematic acquisition of the other psychology subjects topics (undergraduate and graduate). Introducing to students a various multiple comparisons test in ANOVA designs (a priori and post hoc) and related prerequisite assumptions, advantages and limitations. Developing at students the skill of (1) recognition of situations where some of targeted ANOVA or ANCOVA models are used, (2) selection of adequate multiple comparisons tests inside the targeted model, (3) conduction of ANOVA/ANCOVA calculus in SPSS, and (4) detection of eventually unfulfilled prerequisite assumptions and application of necessary corrections. Preparing the students for conduction of minor empirical research by quasi-/experimental design, for adequate ANOVA models applications in related data analysis, and for scientific/professional report writing, in accordance to international standards.

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L2

Study Hours
30

Grading

Class attendance - up to 14% of the course grade;
Activ participating during lessons and exercises - up to 3% of the course grade;
A short computer assessment of knowledge and skills of SPSS application during exercises - up to 4% of the course; 3 homeworks - up to 11% of the course grade; 3 written seminar works - up to 31% of the course grade; Written exam - up to 13% of the course grade; Oral exam- up to 24% of the course grade; Extra points - up to 2% of the course grade.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain statistical-mathematical logic of the calculus of (1) independent samples ANOVA (one-way and factorial), (2) repeated measures ANOVA, (3) mixed ANOVA model, (4) ANCOVA;
2. Name assumptions for specific ANOVA model application, assess their presence in a given problem situation and thereafter choose the adequate model
3. Arrange research design adequate for an ANOVA model application
4. Analyze empirical research findings with adequate ANOVA procedure by using SPSS program
5. Interpret the ANOVA results in terms of set up research problem

6. Categorize and describe specific tests of a priori and post hoc multiple comparisons in ANOVA designs
7. Distinguish ANOVA models of fixed and random factors
8. Explain and in specific data analysis case interpret a basic concepts of statistical power, effect size of independent variable on dependent one, main, interactional and simple effects and homogenous subsets
9. Evaluate limitations and conclusion range of specific ANOVA/ANCOVA model application
10. Write professional/scientific report on the bases of conducted research and adequate ANOVA model data analysis and take responsibility for the quality of scientific interpretation of the results obtained with data analysis.

Study Programme Learning Outcomes

Psychology

General Competencies

10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Forms of Teaching

- » Predavanja
 - » Two hours per week
- » Vježbe u praktikumu
 - » Two hours per week

Week by Week Schedule

1. Introduction to ANOVA models course syllabus. Definition of ANOVA and general situation of its application. Central limit theorem and basic logic of independent samples one-way ANOVA. Prerequisite assumptions of independent samples one-way ANOVA.
2. Variance decomposition of the sampling distribution when an alternative hypothesis (H_1) is valid. Sources of variance at independent samples one-way ANOVA. Prerequisite assumptions of one-way ANOVA. Sum of squares (total, between groups and within groups) and their interrelationship. Degrees of freedom and mean square of specific sources of variability. F ratio and operative calculus of one-way ANOVA.
3. Deflection from one-way ANOVA prerequisite assumptions and ways of its solution: Box approach, Welch approach, variable transformation (logarithmic, inverse, square root). Effect size of independent variable (IV) on dependent one (DV) at one-way ANOVA: η^2 and ω^2 . Statistical power of one-way ANOVA: basic concepts (central and non-central F-distribution) and calculus.

4. Multiple comparisons between groups of one-way ANOVA and Type I error (family-wise α and per-comparison α). Definition and basic logic of a priori tests. Kinds of a priori tests and their application: (1) multiple t-tests, (2) linear contrasts, (3) Bonferroni-Dunn test, (4) Holm-Larzererele-Mulike test.
5. Definition, prerequisite assumptions, advantages, limitations and calculus of post hoc tests at multiple comparisons: (1) Fischer LSD, (2) Studentized range statistic (q), (3) Newman-Keuls; (4) Tukey HSD, (5) Ryan-Einot-Gabriel-Welch-q test, (6) Scheffe, (7) Dunnet test.
6. Two-way independent samples ANOVA: definition, motivation, basic concepts (main, interactional and simple effects). Prerequisite assumptions of independent samples factorial ANOVA designs. Sources of variance at independent samples two-way ANOVA. Sum of squares and degrees of freedom calculus.
7. Calculus and interpretation of simple effects in independent samples two-way ANOVA. Multiple comparisons at independent samples two-way ANOVA. Statistical power and effect size of more IV on DV.
8. First seminar report analysis. Three-way independent samples ANOVA: examples and crucial features (main effects, two-way interactions, three-way interaction and simple effects). Prerequisite assumptions assessment and calculus in SPSS. Unequal sample sizes at factorial ANOVA: problems and possible solutions.
9. Repeated measures ANOVA model: crucial features and difference to independent samples ANOVA model. Basic logic of repeated measures ANOVA model and variance decomposition. Repeated measures ANOVA calculus (sums of squares, degrees of freedom, F-ratio). Prerequisite assumptions of repeated measures ANOVA model.
10. Post hoc tests at repeated measures ANOVA model: (1) Games-Howell and (2) modified Fisher LSD test. Two-way and three-way repeated measures ANOVA model: example and crucial features (main effects, two-way interactions, three-way interaction). Prerequisite assumptions assessment and calculus in SPSS.
11. Second seminar report analysis. Fixed and random factors ANOVA models: definition, examples, SPSS calculus and outcomes analysis. Mixed model of fixed and random factors: definition, examples, SPSS calculus and outcomes analysis.
12. Repeated measures ANOVA model with one between groups IV mixed model: example, crucial features, basic logic and variance decomposition. Mixed ANOVA model calculus (sums of squares, degrees of freedom, F-ratio). Mixed ANOVA model prerequisite assumptions.
13. Analysis of variance and analysis of covariance (ANCOVA) in general linear model (GLM) frame: basic concepts and interrelationship. One-way ANCOVA: (1) definition and motivation, (2) covariate interpretation, (3) example, (4) prerequisite assumptions, (5) calculus, (6) adjusted values (means).
14. Third seminar report analysis. Factorial ANCOVA: (1) basic concepts, (2) basic logic and calculus components, (3) example, (4) adjusted values (means).
15. Test.

A Philosophical and Theological Approach 214008 to Population

Lecturer

prof. dr. sc.
Ivo Džinić

ECTS Credits	3.0
Semester	Winter
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Achievements of Students will be valued based on attending lectures and actively participation in observations of the content of classes and the resulting discussions. Their independent work in seminar classes will be also evaluated, so the final grade includes the grade from the seminar. Seminar obligations must be resolved before taking the final exam.

Course Description

The course aims to get know the philosophical and biblical-theological heritage, more systematically, in terms of demographic discourse. Starting from the origins of philosophical reflexions on population (society), already in the Greek-ancient philosophers Plato and Aristotle, the analyze follows contributions of many other political and social philosophers within their thinking on the structure of the ideal state. Also it will be presented the thought of the most important protagonists of Christian philosophy and theological tradition on this subject.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the importance and challenge of demographic discourse from a philosophical and theological aspect
2. Recognize significant philosophical and theological authors and their views on the population (society)
3. Analyze contemporary demographic trends and efforts on a philosophical-theological background
4. Generate the real demographic challenges of today
5. Evaluate relevant discussions and concrete measures in overcoming demographic difficulties
6. Assess the real problems and consequences of negative demographic trends in Croatia

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

adherence to the principles of academic integrity and ethical norms of research and publishing

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Discuss ethical and bioethical issues in demographic and emigrant research -

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

1 ECTS Seminarski rad [EN]

1.5
ECTS Usmeni ispit [EN]

3 ECTS

Week by Week Schedule

1. Introductory lecture: basic concepts of the philosophical-theological approach to demography.
2. Philosophical approach to the population (society) in the ancient period.
Seminar: analysis of relevant texts.
3. Significant demographic emphases in the medieval Christian-theological context - Aurelius Augustine and Thomas Aquinas.
Seminar: analysis of relevant texts.
4. Contemporary discussions on population (society) and demography in a philosophical-theological context.
Seminar: analysis of relevant texts.
5. Demographic aspects of ethics and ethical aspects of demography. Human life in an age of biomedical and bioethical challenges.
Seminar: analysis of relevant texts.
6. Real motives of natural increase and religious (Christian) aspects of marriage.
Seminar: analysis of relevant (biblical) texts.
7. The phenomenon and practice of the census and demographic analytical methods.
Seminar: analysis of relevant (biblical) texts.
8. Philosophical, scientific and theological discussions on the beginning of human life.
Seminar: analysis of relevant texts.
9. Legal aspects of birth and issues of the right to life.
Seminar: analysis of relevant texts.
10. Philosophy and life. A Man in front of fundamental existential question of death and the theological aspect of the indicated discourse.
Seminar: analysis of relevant texts.

11. Philosophical and theological approaches to education. On the basic postulations of the philosophy of education.
Seminar: analysis of relevant texts.
12. Homeland and People as a responsible task of Man. Aspects of real patriotism.
Seminar: analysis of relevant texts.
13. The ideal of the rule of the people. On the basic elements of the philosophical and theological view of democracy as a socio-political system.
Seminar: analysis of relevant texts.
14. Contents and critical reflection of relevant discussions and concrete measures in overcoming demographic difficulties.
Seminar: analysis of relevant texts.
15. Concluding lecture: Croatian demographic reality in the context of philosophical-theological demographic discourse.

Applications of Social Research Methods 269476

Lecturers

izv. prof. dr. sc.
Dario Pavić

prof. dr. sc.
Irena Cajner
Mraović

Course Description

During the course students will learn how to design a research project based on draft research design; how to choose the best method for collecting of the data while being able to explain the advantages and weaknesses of different methods; how to build the instruments for gathering of the qualitative and quantitative data; apply the basic logic of sampling in both qualitative and quantitative approaches; understand the purpose and ways of generalizing the data findings in both qualitative and quantitative approaches.

Students will carry out their own simple research project on purposive sample while respecting the basic principals of research ethics, and will write a report on their research findings. Throughout the practical tasks students will learn the research methods in social sciences but also gain an insight into social research as primarily practice of social relations.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 4th semester, 2nd year*)
- » Sociology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical perspectives and previous research findings as the basis for the development of goals and purpose of research
2. Design a research project by using the best mode of observation to answer a specific research question
3. Design instruments for the collection of the data in qualitative and quantitative research
4. Apply the logic of probability and nonprobability sampling
5. Interpret validity and reliability in quantitative and qualitative research
6. Apply the highest ethical standards of social research
7. Arrange the gathering of qualitative and quantitative data
8. Analyze and interpret qualitative and quantitative data
9. Formulate an answer to the research question
10. Write a comprehensive report on the research findings

ECTS Credits 6.0

Teaching Assistant
dr. sc. Ana Marija Dunaj

Grading

Evaluated are: A research report (30%), final written exam (50%) and obligatory class attendance (20%). Submission of the research report is prerequisite for taking the exam.

Prerequisites
Methodology of Social Research

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Sociology

Create an effective research plan

Use sources of scientific information

Use statistics in social research

Describe basic research methods in sociology

Compare sociological theory and methodology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Identify the basic concepts of statistics

Sociology

Describe basic research methods in sociology

Compare sociological theory and methodology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Identify the basic concepts of statistics

General Competencies

Upon the successfully passed exam, students will be able to:

Organize the implementation of a simple research project.

Report on the society related data in the coherent written and oral form.

Explain causal relationships between the various social phenomena.

Conform to a teamwork with co-workers from various disciplines, of different attitudes or value orientations.

Plan own engagement in resolving of the various social issues.

Employ the adequate methodological approach in the research of social phenomena.

Use different social sciences methods in the analyses of the relevant data.

Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Write a comprehensive research report.

Course Description

The aim of this course is to enable the adoption and application of methodological competence of statistical methods and techniques of inferential statistics on the level of theory and practice. Course content includes the study of specific problems in the application of various methods for statistical analysis of data, and is expected applicability of certain methods of inferential statistics in response to specific research problems. The program potentially includes some of the existing methods that are primarily focused on the implementation and analysis of the obtained indicators of inferential statistics.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses(3rd year), 5th semester, 3rd year*)
- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses(3rd year), 6th semester, 3rd year*)
- » Sociology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Prepare for a thorough insight into the specifics, advantages and limitations of particular methods of inferential statistics to analyze the data.
2. Apply adopted methodological knowledge in sociological research.
3. Use statistical software SPSS.
4. Select appropriate methodological procedures.
5. Plan the research activities related to the use of methods and techniques of descriptive statistics.
6. Argue the interpretation of results obtained using different statistical methods.
7. Select appropriate methodological procedures.
8. Summarize the results of the statistical analysis.

Study Programme Learning Outcomes

30

Teaching Assistant
dr. sc. Marija Zelić

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises,/written exam and orally

Prerequisites

Statistics for Social Research

Compare sociological theory and methodology
 Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike
 Identify the basic concepts of statistics

Sociology

Create an effective research plan
 Use statistics in social research
 Describe basic research methods in sociology
 Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike
 Identify the basic concepts of statistics

General Competencies

Use the advanced statistical terms and information
 Design a simple research project.
 Organize the implementation of a simple research project.
 Use the computer software for the analyses of qualitative and quantitative data.
 Employ the adequate methodological approach in the research of social phenomena.
 Use different social sciences methods in the analyses of the relevant data.
 Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Course Description

The aim of this course is to familiarize students with the concepts of Croatian linguistic culture and encourage them to express themselves orally and in writing in accordance with the standards of the Croatian literary language.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Croatology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical knowledge through identifying errors in specific texts and in public communication, individually and in dialogue with others.
2. Define fundamental concepts of Croatian linguistic culture.
3. Analyze Croatian normative principles.
4. Analyze Croatian normative handbooks.
5. Describe normative divergences.
6. Apply the rules described in Croatian orthographies.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Croatology

Define and apply the norm and grammatical concept of the Croatian standard language

Identify different theoretical approaches to the study of Croatian culture

General Competencies

Raise the level of linguistic culture, practical literacy and understanding of basic normative principles in the areas of orthography, phonology, prosody, morphology, syntax and dictionary heritage.

Basics of Biological Psychology

286414

Lecturer

doc. dr. sc.
Vanja Kopilaš

Course Description

The general aim of this course is understanding of fundamental principles of nervous system organization, morphology of human central nervous system and functional organization of sensory and motor systems.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic parts of central nervous system at both micro- and macro-scopic levels;
2. Recognize basic parts of neuron and types of glia cells;
3. Describe basic principles of functional and anatomical organization of sensory and motor systems in humans;
4. Describe mechanisms of sensory neural analysis at all hierarchical levels, from receptor to primary sensory cortex;
5. Explain the role of cortical and sub-cortical structures in motor planning and spatial orientation
6. Apply the acquired knowledge in understanding of biological foundations of complex mental functions.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Determine the biological and neurobiological bases of psychological processes and behavior

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

ECTS Credits 3.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours
30
15

Grading

Activity during classes
10%, tests 70%, written
exam 20%.

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).

Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Forms of Teaching

- » Predavanja
 - » Once a week (90 min)
- » Vježbe u praktikumu
 - » Once a week, in two lab groups (45 mins each)

Week by Week Schedule

1. Definition of biological psychology
2. Incidence and consequences of psychomotorical, neurological and other disorders related to dysfunction of nervous system
3. Development of basic divisions of the CNS, planes and axis
4. Neuron as the basic structural and functional element of CNS, methods for studying the CNS
5. Signal mechanisms, synaptic mechanisms, receptors
6. Neurotransmitters: definition, classification, chemical structure, functional properties
7. Membrane resting potential, action potential
8. Brain morphology, peripheral nervous system
9. Transduction of sensory information into neural code, basic organization of sensory systems
10. Pain, touch, proprioception
11. Chemical senses: taste and smell
12. Vision, organization of visual system
13. Auditory system, vestibular system and cerebellum
14. General organization of motor systems, pyramid and extrapyramid systems
15. Test

Basics of social behavior

201191

Lecturer

izv. prof. dr. sc.
Zrinka Greblo
Jurakić

Course Description

The aim of the course is to familiarize students with theoretical explanations and determinants of human social behavior. Also, given that the social psychology is empirical science with well-developed set of methods for answering questions about social behavior, the emphasis of the course will be on describing a number of examples of socio-psychological research and consideration of their implementation.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the extent of the influence of situational factors on human social behavior.
2. Apply knowledge of the socio-psychological concepts to everyday life and students life experience.
3. Analyze behavioral issues using theories and concepts from the perspective of social psychology
4. Discuss about socio-psychological concepts in daily life
5. Define basic concepts regarding interpersonal attraction, prosocial and aggressive behavior, and group processes and influences

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Plan the search of literature, databases and other sources of information

ECTS Credits 4.0

BA work

38774

Course Description

Undergraduate thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their undergraduate studies and in which the students must demonstrate their ability to independently use literature in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent work and use of literature, as well as the application of appropriate methodology. Double major students write their thesis on only one of their major studies.

ECTS Credits	5.0

- » Sociology -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)
- » Sociology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect and critically study relevant literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of completion of the thesis within a well-defined frame;
5. Define problems, hypotheses and methods which will be used in order to reach predicted results;
6. Write a thesis in the extent of approximately 3500-4500 words (16 to 20 standard pages of text).

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks

Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition

Evaluate philosophical concepts, arguments and theories

Analyze, develop and evaluate your own work and progress in learning, understanding and explaining different philosophical problems

Determine the need for lifelong learning and professional development

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Apply methods of social research and statistics

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Apply methods of social research and statistics

Croatology

Croatology

Constructively participate in discussions on croatological topics

Justify and support the need and willingness for lifelong education

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Apply basic computer skills

History

History

Sociology

Define sociology as a science

Create an effective research plan

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use statistics in social research

Use theoretical concepts in the analysis of society

Use sources of scientific information

Describe basic research methods in sociology

Compare sociological theory and methodology

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Identify the basic concepts of statistics

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Sociology

Define sociology as a science

Use theoretical concepts in the analysis of society

Describe basic research methods in sociology
 Compare sociological theory and methodology
 Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike
 Divide the types of scientific research
 Identify the basic concepts of statistics
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Apply, classify and distinguish between professional and scientific terminology in the area of research;

Identify, evaluate and use a variety of appropriate scientific-research methods in the field of social sciences or humanities, which are applied in the area of research;

Independently complete a thesis in the area of research;

Think in an interdisciplinary manner and respect various scientific methodologies and perspectives on specific issues and problems in the researched field of social sciences or humanities.

Write an undergraduate thesis in the Croatian or one of the world's languages in accordance with the scientific and ethical postulates.

Course Description

The aim of this course is to provide students with thorough understanding of biological foundations of complex cognitive human functioning.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic parts of the central nervous system, morpho-functional division of the human cerebral cortex, its laminar organization and neuron morphology;
2. Explain the basic principles of cortico-cortical and cortico-subcortical connections crucial for processing of higher cognitive functions;
3. Explain the principles of neuronal activation in visual and auditory association cortex involved in higher level of information processing, and the role of cerebral cortex in planning, control and execution of voluntary movements and space orientation;
4. Explain the role of higher order association areas in language, working memory, reasoning, planning and other human specific higher cognitive functions, as well as the connections between higher association areas, limbic system and other subcortical structures involved in emotional behaviour, motivational drives, biorhythms and homeostasis;
5. Apply acquired theoretical and practical knowledge in understanding the underlying mechanisms of psychological development and related disorders
6. Apply acquired knowledge in practical use of neuroimaging techniques (fMRI, PET, EEG, MEG);
7. Use educational multimedia online neuroscience resources in written reports and oral presentations;
8. Create a multimedia presentation showing clinical examples of correlations between brain damage and functional outcomes;
9. Analyze scientific review articles from the field of neurobiology of higher cognitive functions;
10. Explain and present the role of biology in normal everyday behaviour and in the onset of psychological disorders.

Study Programme Learning Outcomes

Psychology

- Determine the biological and neurobiological bases of psychological processes and behavior
- Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development
- Evaluate basic content from complementary social, humanistic and biomedical disciplines.

General Competencies

Explain the biological and neurobiological foundations of psychological processes and behaviour.

Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.

Value the basic contents from the complementary social, humanistic and biomedical disciplines.

Forms of Teaching

- » Predavanja
 - » Lectures will be held for two hours once a week.
- » Vježbe u praktikumu
 - » Practical exercises will be held after each lecture.

Week by Week Schedule

1. The role of biological factors in behaviour: trends in brain research in the world, the role of genetic background in shaping of brain structure, the impact of other developmental factors on brain structure, the role of the neural network structure in behaviour, the role of psychologists in brain research; the relationship between growing complexity in brain structure and growing complexity in psychomotor and cognitive functions during phylogenesis; functional division of the cerebral cortex: primary, parietal and general associative areas; recognition on the scheme.
2. Functional anatomy and histology of the cerebral cortex: laminar organization, allocortex, paleocortex, archicortex, neocortex; recognition of layers on the scheme.
3. Cellular structure and organization of cortical connections: pyramidal neurons and interneurons, afferent systems of the cerebral cortex, laminar organization of afferent and efferent connections; features of cortical neurons; the pyramidal neurons (morphological, chemical and functional characteristics), GABAergic interneurons, basket cells, axo-axonal neurons, columnar "double bouquet" neurons: identification on the scheme.
4. Brain chemical anatomy and reticular formation: neurotransmitters (glutamate, GABA, acetylcholine, noradrenaline, serotonin, dopamine, peptides), brain stem reticular formation and the continuum toward diencephalon and telencephalon; activating brain systems, central limbic central continuum: identifying limbic continuum nuclei on the scheme.

5. Ascending reticular activating system (ARAS): MFB, centrencephalon, mediobasal telencephalon; functional organization of the limbic system; structures of the limbic system: Papez circuit, the amygdala, the central limbic continuum, mediobasal (septal) area, hypothalamus, hippocampus, fornix; identification on the scheme.
6. EEG and general cortical activity: EEG waves, methods of monitoring the functional activity of the brain, evoked potentials; neurobiology of consciousness and sleep: thalamic reticular nucleus, sleep spindles, levels of consciousness, sleep cycles, REM stages; demonstration of the EEG; multimedia EEG presentation.
7. Neurobiology of vision: the organization of the primary visual areas, ocular dominance columns, secondary visual areas, opposite opponent colours system, perception of depth and movement; visual illusions: computerized exercise displaying visual illusions and their interpretation.
8. Visual-motor processing: the area for the control of eye movements (area 8); the role of the cerebral cortex in motor activity: primary and supplementary motor areas; motor pathways: computerized demonstration of the differences in stimulating pyramidal and extrapyramidal system.
9. Neurobiology of biorhythms: supraoptic area of the hypothalamus, circadian, circannual rhythm; neurobiology of emotion: orbital prefrontal cortex, limbic system, the theory of emotions; functional anatomy of the limbic system: the effect of stimulation of different areas of the limbic system - a multimedia presentation.
10. Neurobiology of sexuality: the hypothalamus, sexual dimorphism, sex differentiation, sex differences in the brain; neurobiology of higher cognitive functions: the relationship between general and parasensory associative areas; functional anatomy of associative areas: the prefrontal cortex, angular and supramarginal gyrus; identification on the scheme and functional implications.
11. Neurobiology of attention: different types of attention, unilateral neglect syndrome, dorsal parietal cortex; neurobiology of working memory: dorsolateral prefrontal area, cortico-striatal projections; functional integration of cortico-limbic structures: prefronto-limbic projections, identification on the scheme.
12. Neuroanatomy of learning and memory: localization of short-term memory and long term memory storage; case study H. M.; cellular mechanisms of learning and memory: long-term potentiation (LTP), long-term depression (LDP), retrograde synaptic transmission, Kandel's learning model on *Aplysia*; anatomy of the hippocampal formation: entorhinal area, dentate gyrus, perforant pathway, mossy fibers, Schaffer collaterals, CA1 and CA3 area, alveus; identification on the scheme.
13. Neurobiology of speech and language: Broca's and Wernicke's area, Wernicke-Geschwind model; the evolution of language functions and the importance for the development of human specific higher cognitive functions; lateralization of brain function, "split brain" experiments; differences between the concept of dominance and lateralization of brain function; anatomical differences between left and right hemispheres: demonstration (in the native slices) of the differences between the left and right hemispheres in the size of the Broca's and Wernicke's area.

14. Neurobiology of social behaviour: metacognition ("theory of mind"), the Klüver-Bucy syndrome and differences in symptomatology between man and ape, the biological basis of altruism and moral behaviour; brain plasticity: medical and educational significance, social, philosophical and ethical aspects.
15. Interindividual variability in brain structure: native and histological slices demonstrations; changes in the morphology of the brain after lesions: native and histological slices demonstrations.

Brain, Cognition and Education

200154

Lecturer

doc. dr. sc.
Vanja Kopilaš

Course Description

The course objective is to acquaint students with contemporary cognitive, neuroscientific and psychological interpretations of the dynamic relationship of neural basis, cognitive processes, upbringing and education.

The course is designed for students with a high school background in human biology and psychology and formed from a teaching platform of researchers and teachers interested in an interdisciplinary, cognitive-neuroscientific approach to education. The student will gain basic insights into the cognitive processes that significantly determine school achievement and educational processes with a clear emphasis on their neural basis and function in upbringing and education. In doing so, they will have the opportunity to see picturesque representations of the three basic components of the subject - the neural basis, the cognitive process, the educational outcome - and to discuss the ambiguity of their connection. They will get to know the various measures of the three basic components mentioned above, and learn about the challenges facing educational professionals trying to apply the achievements of multiple scientific disciplines. In addition to a strong emphasis on interdisciplinary dialogue, the course also addresses the gap between research and practice.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the importance of cognitive neuroscience for educational programs and practice
2. Define cognitive processes important for education and to describe their neural basis
3. Identify different measures of educationally relevant cognitive processes and to list areas of application in education
4. Analyze and correctly interpret the interaction of the brain, cognitive system (mind), upbringing and education
5. Distinguish between higher and lower cognitive processes, and discuss their interrelationships, as well as relationships with school achievement

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours
30

Grading

I. modality Attendance → 11 to 15 credits (each unjustified absence -1 point) 2 midterm exams → up to 50 points (2x25) Extra points → up to 5 points II. modality Attendance → 11 to 15 credits (each unjustified absence -1 point) Written exam → up to 50 points Extra points → up to 5 points The final grade reflects the total sum of points for all student obligations and is determined - with possibly minor point corrections - as follows: Sufficient (2) = 33 to 40 points Good (3) = 41 to 49 points Very good (4) = 50 to 57 points Excellent (5) = 58 to (65 + 5) points

6. Relate the development of neural base and cognitive processes while growing up with learning capacities and illustrate the importance of matching these capacities with the requirements of educational programs

Business Communication

117216

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

The aim of the course is to enable students to acquire basic theoretical and practical knowledge of communication systems in business organizations and institutions, with special emphasis on raising awareness of the importance of oral and written culture, language, expression, verbal and non-verbal ways of transmitting messages in a specific formalized business environment.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 2nd semester, 1st year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 4th semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 6th semester, 3rd year*)

- » Communication Studies (Studij) (*elective courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Understand the specificity of written and oral business communication.
2. Raise awareness of the importance of non-verbal communication in a business setting.
4. Being able to understand the basic documents of business content.
5. Adopt and implement a practical way to write a CV, motivation letters.

Catholic religious orders in Croatian culture

173127

Course Description

The course aims to explore the basic political and social developmental processes of monasticism in Croatian culture, where the mentioned topic will try to be described in a broader European cultural context.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the phenomenon of monasticism in Christianity
2. Analyze the causes of emergence of monasticism in Christianity
3. Identify and explain the first traces of church culture in early medieval Croatia
4. Identify the first traces of monasticism in medieval Croatia
5. Explain and categorize the most important church orders in medieval Croatia
6. Explain the broader context of the emergence of some of the most important church orders

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Generate and conduct historical and other types of discussions

Identify historical facts and processes from European and national history

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Apply the methodology of various historiographical fields and other research methods from the humanities

Childhood Pedagogy

226199

Lecturer

izv. prof. dr. sc.
Katarina Dadić

Course Description

The aim of this course is to train students for a critical discussion of childhood in relation to the concepts of culture and globalization from a domestic, international and comparative perspective, bearing in mind the perspective of the child himself. The course is aimed at familiarizing students with contemporary phenomena that characterize childhood (globalization, consumer environment, local culture, technology, media, migration, etc.) and focuses on the concept of childhood, which is approached from different perspectives (history of childhood, sociology of childhood, among with a significant emphasis on the pedagogical discourse) with the aim of developing a critical attitude towards different theoretical and social perspectives, as well as constructions of childhood.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)

- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basic terms (childhood, pedagogy, culture) within the educational sciences
2. Describe and interpret the most important ideas, trends and periods in childhood development
3. Explain the place and role of childhood within educational sciences

ECTS Credits	3.0
Semester	Winter/Summer
English Level	L0
E-learning Level	L1
Study Hours	30

Grading

The work of students in this course is monitored and evaluated continuously with colloquial monitoring. During the semester, students take 2 colloquiums and write one essay. Students also take a written exam that checks and evaluates their complete knowledge based on the mandatory literature offered. The final grade consists of all graded elements (colloquium (0.5)+essay (0.5 +0.5 ECTS)+written exam (1 ECTS).

4. Analyze theoretical discourses in relation to childhood and establish similarities, but also differences between them
5. Present the results of recent theoretical research in the field of sociology of childhood, history of childhood and pedagogy of childhood
6. Illustrate the acquired theoretical knowledge with examples from children's lives, taking into account the child's perspective
7. Interpret the functioning of the interdisciplinary concept of childhood, as well as strategies for its quality development within the framework of various social events and cultures

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Course Description

The course considers the impact of the media on the ontology and anthropology of man in today's information society as a "spectacle society". This applies both to "classic" media (newspapers, radio and television) and to the Internet as a new medium. The media as message carriers and the extended hand of man create an image of historical reality and ethical values that, under the influence of media owners and the global influence of science and technology, change today's society and become the main driver of (re)shaping the world. In this sense, it is important to reflect on the current influence and power of modern media on the creation of social processes. Through the course, students will become familiar with different media theories, mediaology and media philosophy (Harold Innis, Marshall McLuhan, Walter Benjamin, Theodor Adorno and Max Horkheimer, Régis Debray, Günther Anders, Guy Debord, Jean Baudrillard, etc.)

Contacts between civilizations in late antiquity and the early Middle Ages

209791

Lecturer

doc. dr. sc.
Eva Katarina
Glazer

Course Description

The main goal is to acquaint students with the basic processes that characterized civilizational relations in the late antiquity and the early Middle Ages. Instead of looking at late antiquity and the early Middle Ages through the prism of decay and weakness, this course aims to show that these are in fact the turning points in the transformation of European history. This transformation ultimately spawned three great and important civilizations: medieval Europe, the Byzantine Empire and the Islamic Caliphate. Also, the aim of this course is to present basic insights into the transformation of the Roman Empire during the Late Antiquity and the Early Middle Ages (200-750), and to show that much of the title of the Roman Empire remained a vital part of European history in the Middle Ages. Furthermore, the aim is to acquaint students with the most important primary sources and contemporary literature relevant to the issue under consideration. In addition to mastering basic factographies and historical processes, students will be first and foremost encouraged by comparative thinking and an interdisciplinary approach.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)
- » History (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic processes in the social, cultural and ecclesiastical history of the early Middle Ages
2. Analyze fundamental historiographical questions about interreligious relations in the Middle Ages
3. Explain and to put you in the context the main events, which represent the turning points in the development of medieval civilization
4. Analyze the continuity of social processes in the period of the Late Antiquity and the early Middle Ages
5. Explain the importance of the rise of Christianity in the Roman Empire and the impact it had on the transformative period of late antiquity and the early Middle Ages

ECTS Credits 3.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistant
dr. sc. Marko Marina

Grading

Assessment will be based on class attendance, active participation in classes, fulfillment of obligations (brief reviews of individual texts) and the results of the written exam

6. Explain the basic features of the process of creation of three great civilizations: the Byzantine Empire, the Islamic Caliphate, and medieval Europe
7. Explain and highlight the most important representatives and protagonists of the transformation of the Roman Empire and the creation of barbarian kingdoms. Interpret the influence of church institutions on late antiquity and medieval society.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic theoretical approaches and concepts within the framework of contemporary international migration trends
2. Develop understanding of new approaches to international migration research
3. Define the causes/motives and consequences of contemporary international migrations in the area of reception and origin of migrants
4. Develop understanding of the spatial and temporal dynamics and specifics of international migration flows at the world and European level
5. State the flows, causes and consequences of large migrations to Europe
6. Explain the characteristics of external migration of the Republic of Croatia and the causes and consequences of contemporary migration movements of the population of the Republic of Croatia
7. Define the features of external migration of Bosnia and Herzegovina and the emigration of Croats from Bosnia and Herzegovina
8. Develop in students the skill of presentation and presentation in front of colleagues and the public, and the skill of participating in discussions

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Carry out analytical and scientific procedures of forecasting and modeling the future

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop a scientifically independent opinion on demographic and emigrant issues

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Interpret data on Croatian and global population and emigration

participation 20% Oral
exam 50%

Course Description

In the second half of the 20th century, the historical regions of Croatia were mainly characterized by the communist totalitarian system. Almost 50 years of political, social and cultural indoctrination were also marked by a series of actions of the repressive state apparatus, which was no stranger to committing very cruel mass crimes or later executing individuals. However, the most massive crimes were committed at the very end of the Second World War. We try here to limit ourselves to the crimes and multiple human rights violations committed until 1949, although we must also address some aspects of later periods, because they additionally explain the context of the crimes from this first period of their commission.

For this reason, this course aims to fill the historiographical gap that has been missing on this important topic and to provide students of undergraduate history with basic information to understand the current processes in Croatian society today.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the processes to which the Croatian regions were subjected in the period of transition and conversion to the communist model of administration
2. Analyze and clarify the most important dates and events related to the most atrocious communist crimes
3. Define controversial political events in the period from 1944 to 1949

4. Describe the main social and political events that influenced the wave of repression of 1968-1972
5. Analyze of the key elements in the relationship between the repressive system and Croatian political emigration - the first wave after World War II
6. Analyze of the credibility of the individual sources and documents

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Single out historical processes and explain their topic of interpretation

List historical sources for the study of national history

Norm and classify historical literature and sources

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Course Description

The aim of the course is to introduce students to the basics of archaeology and its basic methods, devoting particular attention to the interdisciplinary character of archaeological science. Further, to offer students insight into the diversity of Croatian archaeological heritage and the important role it plays for the Croatian culture.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Croatology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish the basic methods of archaeological investigation and gain familiarity with basic archaeological terminology and topics.
2. Recognize the basic forms of manipulating archaeological heritage.
3. Identify archaeological periods.
4. Distinguish basic values and potentials of archaeological sites and finds.
5. Distinguish the most important Croatian archaeological monuments, the places where they were discovered and where they are kept.
6. Analyze and approach literature with a critical mind, as well as to articulate views on the subject of Croatian archaeological heritage.
7. Prepare a reactive text on the subject of Croatian archaeological heritage, and to present it orally.

Study Programme Learning Outcomes

Dual-major studies

Croatology

Croatology

Describe, classify and explore Croatian archeological heritage

General Competencies

After completing the Croatian Archaeological Heritage course students will be able to recognise the position, role and significance of Croatian archaeological heritage in the wider framework of Croatia's cultural heritage, as well as in the European context.

Grading

To pass the written exam, students must have 61% correct answers for each part of the exam (listening, reading with vocabulary, grammar, and writing).

Course Description

The course aims are to enable students to recognize and select the language means needed to achieve communication competence at the A2 level according to CEFR in Croatian as a foreign language. Students will be able to describe everyday life (people, destinations, events, activities), comment on simpler topics and texts, and express their own opinion with appropriate vocabulary that allows them to cope with everyday situations.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe similarities and differences between cases and verb forms in the Croatian language.
2. Distinguish word classes and their morphological, syntactic and lexical features in the Croatian language.
3. Use shorter texts of appropriate topics and vocabulary.
4. Write simpler texts and letters on familiar topics.
5. Express their own opinion and plans and describe everyday events by using simple vocabulary.
6. Compare similarities and differences between the culture of Croatian as a foreign language and the culture of the mother tongue.
7. Identify and explain basic information about Croatia (flag, coat of arms, anthem, public holidays) and everyday life in Croatia (names, surnames, food, hobbies, housing, public transport).

Study Programme Learning Outcomes

Croatology

Justify and support the need and willingness for lifelong education

Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

General Competencies

To distinguish and use linguistic and communicative elements and patterns necessary for communication in the Croatian language in accordance with the Common European Framework of Reference for Languages (CEFR).

To recognize the value of knowing different foreign languages and cultures in order to develop intercultural competence.

To become aware of elements of one's own culture and compare/connect them with the characteristics of Croatian as another/foreign culture.

To compare one's first language with another language in order to distinguish and relate the linguistic features of different languages.

To differentiate and describe the terminology of the Croatian standard language.

To recognize and explain the specific features of the Croatian language in relation to other languages.

To express elements of Croatian linguistic culture in relation to other linguistic cultures.

To identify and interpret, both orally and in writing, the facts of Croatian phonology, morphology, and syntax.

To apply linguistic knowledge in everyday written and spoken communication.

To implement linguistic and orthographic rules of the Croatian language.

Grading

The written exam is a prerequisite for taking the oral one. To pass the written exam, students must have 61% correct answers for each part of the exam (listening, reading with vocabulary, grammar, and writing).

Course Description

The course aims are to enable students to recognize and select the language means needed to achieve communication competence at the B1 level according to CEFR in Croatian as a foreign language. The student will be able to describe topics from everyday life (family, school, travel, current events) orally and in writing, reflect on topics and texts from culture and other people's opinions, participate in conversations about familiar topics and in informal conversations with friends and acquaintances, exchange and verify information of personal importance.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and use similarities and differences between cases and verb forms in the Croatian language.
2. Distinguish the characteristics of adjective-pronominal declination in the Croatian language.
3. Describe the characteristics of comparison of adjectives in the Croatian language.
4. Describe and use verb tenses (present, past and future I., future II.), moods (imperative, conditional I.) and verb aspect.
5. Distinguish word classes and their morphological, syntactic and lexical features in the Croatian language.
6. Compare texts with appropriate topics and vocabulary.
7. Write texts, letters, memos on familiar topics and reports in the given form using appropriate vocabulary.
8. Recognize and explain basic information about Croatia (everyday culture, Croatian regions, Croatian emigrants and their communities in the world).

Study Programme Learning Outcomes

Croatology

Define and apply the norm and grammatical concept of the Croatian standard language

Explain the facts in the field of Croatian phonology, morphology and syntax and apply them in oral and written expression

Explain and analyze the components of Croatian culture and

their connection

Adhere to linguistic, spelling and stylistic norms of the Croatian language in the academic and non-academic discourse

General Competencies

Students can distinguish and use the language and communication elements and forms required for communication in Croatian according to CEFR.

Recognize the value of knowing different foreign languages and cultures in order to acquire intercultural competence.

Compare the first with foreign language in order to distinguish and connect the linguistic features of different languages.

To become aware of the elements of one's own culture and compare/connect them with the characteristics of Croatian as another culture.

Distinguish and describe the concept of the Croatian standard language.

Recognize and explain the characteristics of the Croatian language in relation to other languages.

Express the elements of Croatian language culture concerning other language cultures.

Recognize and interpret facts from Croatian phonetics, morphology, and syntax orally and in writing.

Apply language knowledge in everyday written and oral communication skills.

Implement linguistic and orthographic rules of the Croatian language.

15

Grading

The final grade will be result of student's class attendance, activity during seminars and discussions. The final exam is written and oral exam.

Course Description

The history of Croatia in the 16th and 17th Century was marked with desintegration process of its territory. The main course objective is to explain how this process created and changed Croatian cultural and political identity. The medieval Croatian territory was dismembered in above mentioned centuries between Habsburg Monarchy, Venice and Ottoman Empire and the course will describe how those political centers influenced (or/and not) social, political and cultural life within Croatian lands.

Study Programmes

» Croatology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe socio-political processes within Early Modern Croatia in the 16th and 17th century
2. Argue why was Croatian territory desingrated and what were the implicationsof that process for the future
3. Analyze how different social classes faced with socio-political changes of the period
4. Compare cultural identities of Croatian lands based on their political affiliation
5. Explain how political desintegration influenced creation of the multiple Croatian identities
6. Relate socio-cultural similarities and differences of Croatian lands to neighboring countries

Study Programme Learning Outcomes

Croatology

Classify, analyze and evaluate Croatian cultural, linguistic and political history

Explain and analyze the components of Croatian culture and their connection

General Competencies

Students will be able to analyze and describe social and cultural processes within early modern Croatia.

Croatian Cultural and Political History of the 20th Century

37456

Lecturer

doc. dr. sc.
Vlatko Smiljanić

Course Description

The course aims is to provide basic knowledge and the ability to critically consider the most important events, processes and people in the Croatian cultural and political history of the 20th century.

Study Programmes

» Croatology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the acquisition of factual knowledge about key events, processes and people from the Croatian cultural and political history of the 20th century, which implies the ability to identify, define and describe key events, processes and people, how they emerged to be and their workings in the Croatian cultural and political history of the twentieth century (Example: the identification, positioning and describing programmatic records, internal structure and political activities of political parties which operated in the Croatian countries)
2. Analyze: the students should demonstrate the ability to understand and the ability to reflect on the meaning of factual knowledge, which implies the ability to explain, generalize, classify, paraphrase, summarize and group factual knowledge gained during the course (Example: identification and contextual positioning of political and social tendencies of the rural population in the Croatian countries)
3. Apply: the students should demonstrate the ability to separate the learned content into constituent parts and understand the organizational structure of the acquired course subject matter, which implies the abilities such as selection, planning and interpretation of course content (Example: correlating key (i.e., constant) internal problems of both Yugoslav states, i.e. the issues of nationality, in particular the Croatian)

ECTS Credits 5.0

15

Teaching Assistant
Bruno Šagi

Grading

Class attendance and participation in the discussion related to the topic of the seminar paper will be assessed throughout the semester and will be incorporated in the final grade (oral exam).

4. Analyze: the students should demonstrate the ability of personal assessment and critical approach in relation to the course subject matter, which implies the ability to separate information in different parts, which is to say point out how they relate to each other (Example: spotting and pointing out the occurrence of longer historical influences such as the harm from non-democratic systems of managing and ruling the Croatian countries)
5. Present: the students should demonstrate skills such as categorization, planning, hypothesizing, modifying, reviewing and formulating, which implies the ability to create new information based on the data collected (Example: shaping and establishing general, but also new insights, such as the need for a different type of international community's intervention in the conflicts which qualify as aggression and civil war)
6. Explain: the students should demonstrate skills such as comparison, assessment, evaluation and objective criticism (Example: after the adoption of the synthetic conclusion on the necessity of reaching a fair political and legal status of minority communities in the Republic of Croatia, by means of assessment (critical discussion) the current situation is established, followed by recommendations for improvement)

Study Programme Learning Outcomes

Croatology

- Classify, analyze and evaluate Croatian cultural, linguistic and political history
- Explain and analyze the components of Croatian culture and their connection

General Competencies

Knowledge and understanding of basic factual knowledge about the most important events, processes and people in the Croatian cultural and political history of the twentieth century, and their critical assessment and evaluation.

Croatian Cultural and Political History of the Middle Ages

37431

Lecturer

izv. prof. dr. sc.
Marko Jerković

ECTS Credits	5.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	30 15

Grading

Student activity shall be monitored throughout classes which will reflect on the final grade. Class attendance is obligatory. Final exam is in written form.

Course Description

Course objectives is to bring closer to the students the Croatian medieval history and point out to them how the events and processes are intertwined on the Croatian and European level, in the political, social and cultural sense. The history of Croats in the Middle Ages was marked, after their arrival, by the creation of their own state, which has experienced ups and downs depending on the internal and external political factors. Uniting with the Kingdom of Hungary in a personal union (upon the arrival of the Arpad dynasty on Croatian throne) and the increasingly powerful Venetian presence on the eastern coast marked the history of Croatia during the period of the High Middle Ages, at the end of which, as a result of the Ottoman conquest, Croatia will be reduced to remnants of the remains. The underlying aim of the course therefore is to introduce to the students how these processes affected the medieval political, social and cultural development of the Croatian lands.

Study Programmes

» Croatology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the socio-political processes that affected the Croatian territory during the Middle Ages.
2. Explain why the Arpad dynasty came to hold the Croatian throne.
3. Analyze how historical circumstances led to the reduction of the Croatia to "the remnants of the remains".
4. Compare the medieval social and cultural development of the Croatian lands in the European context.
5. Describe the basic dynasties that ruled during the Middle Ages in Croatia
6. Explain the differences between cultural and social circumstances during different parts of the Middle Ages in Croatia

Study Programme Learning Outcomes

Croatology

Classify, analyze and evaluate Croatian cultural, linguistic and political history

Explain and analyze the components of Croatian culture and their connection

General Competencies

The course contributes to the acquisition of knowledge on the Croatian medieval history.

Course Description

To increase the knowledge, skills and understanding of the key and functional relationship between the structure and movement of the population and the economic, social and geographical legitimacy and processes of the emigrant economic, financial, academic, demographic and any other wealth and the overall development of Croatia.

To develop the ability to recognize, identify, clarify, implement and defend the need for the analysis of population and diaspora in service of societal and political decision-making.

To contribute to the development of personal traits of a student, particularly by developing a value system. This value system is defined by Croatian identity values within the framework of total population of Croatia without which it would be impossible to further analyse and focus the issues of demography and diaspora within academic and general frameworks.

Course^{SC} Description

Introduces students to Croatian dialectology in general. Also insists on

Understanding the importance of Croatian dialects and dialects in the development of Croatian literacy and literature through the centuries.

Study Programmes

» Croatology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basics of Croatian dialectology.
2. Apply the acquired knowledge to the Croatian literary language.
3. Analyze individual local dialects.
4. Use knowledge to study Croatian languages.
5. Use knowledge with field class.

Study Programme Learning Outcomes

Croatology

Classify, analyze and evaluate Croatian cultural, linguistic and political history

Explain and analyze the components of Croatian culture and their connection

Croatian Diaspora and Entire Development

269747

Lecturer

doc. dr. sc.
Monika Bališa

Course Description

Course objectives: to develop students' scientific knowledge about the subject of teaching within the theoretical development concept; to enable students to differentiate and mean neighboring scientific fields, fields, branches and disciplines and multidisciplinary of the subject interest; to acquaint students about the meaning of emigration in spatial processes and the correlation of emigration and overall development; enable students in discovering, recognizing and defining emigrant and developmental concepts, categories and laws; to train students for independent scientific research work related to the relationship between emigration and development; train students to apply standard and special methods and techniques in research on the correlation of emigration and development; explain to students the specifics of branch methodologies and the spatial, social and developmental conditions of emigration and development; to acquaint students with the development of world and Croatian emigrant influence; develop students' application of developmental projection methods and spatial models; explain to students the migratory conditionality for the development of the Croatian geographical area and society; train students to understand, explain and predict future emigration and development issues, trends, conditionality and consequences; to develop students' knowledge about the endangerment of basic systems in Croatian society and the area conditioned by emigration; provide students with knowledge about the wealth and values of Croatian emigrants; to develop in students a sense of common identity as a precondition for the overall development of Croatia.

Study Programmes

» Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce relevant computational and graphical methods in the process of consideration and explanation
2. Combine spatial logic and total potential
3. Explain developmental emigration issues
4. Explain the spatial disparity conditioned by emigration

ECTS Credits	3.0
Semester	Winter
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Class attendance and discussion, colloquium, written exam and seminar paper. In addition to the classic ways of following through the lecture, colloquium, seminar papers, exams, interviews, tests, etc. are especially valued independent research papers and through mentoring is raised to the level of a student's possible appearance at scientific and professional conferences or publishing in appropriate journals. It is a special motive for students in developing independence and in confirming their cognitive forces. Thus, students can publish and create preconditions for future work and employment in research already during their studies teams.

5. Use knowledge of emigration and development laws
6. Use a scientific approach to emigration and development

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.

Develop a scientifically independent opinion on demographic and emigrant issues

Croatian Diaspora and Public Action

226937

Lecturer

doc. dr. sc.
Ozana Ramljak

Course Description

Course objectives: introduce students to the concept and basic theories of publics, public space and public opinion, as well as models of public action

with special emphasis on culture, politics and the media in the Croatian diaspora; to raise awareness of the public activities of the Croatian diaspora as a platform in a series of predetermined sociological, political and cultural assumptions, but also the broadest understanding of the nature of media; consciously and/or unconsciously articulates and builds on their own content and perception of themselves, Croatia, connecting and joining the new environment and the concept of Croatian development; develop students' critical thinking about issues of responsibility, ethics, influence and manipulation in the national and global environment in the context of the Croatian emigrant position in the public; to create the prerequisites for understanding, analysing, creating and acting within "media mediated reality" in the Croatian diaspora,

Croatia and in general; consider the role of the Church and other Croatian institutions in preserving the national identity of the Croatian diaspora; to introduce students to the institutions of the Croatian diaspora as well as their role and contribution.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*dem (17929) - elective courses, 4th semester, 2nd year*)
- » Demography and Croatian Diaspora -> Dual-major studies (Studij) (*dem (17929) - elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the theoretical and methodological concepts of the public, public spaces as well as the legitimacy of the public emigrant space
2. Explain and analyse models of public activity in the Croatian diaspora
3. Explain the possibilities of applying established concepts in public action and their influence with respect to the emigrant context
4. Explain cultural, political and media processes in the Croatian

Grading

Participation in regular and field classes, activity in lectures, quality of seminar work, the way in which, in the form of a paper, it is presented to colleagues and the teacher are evaluated.

Course Description

Consideration, recognition and acceptance of the importance of cultural activities and achievements of Croatian emigrants from different cultural and artistic points of view.

Introduction to the work, organization and results of cultural institutions in the Croatian diaspora of various types - cultural centers, Croatian reading rooms, tamburitza societies, prominent artists and cultural workers and the like.

Getting acquainted with the difficulties encountered by cultural workers in the diaspora: financial difficulties, providing space for cultural activities, disagreements or disinterest within the emigrant community, political persecution, etc. and ways to solve them.

Understanding the phenomenon of strong personalities who initiated and maintained the cultural and artistic life in certain emigrant communities and connected them with Croatia and Bosnia and Herzegovina.

Acquiring knowledge about prominent Croatian artists in the diaspora and their works and their influence on Croatian identity.

Understanding the role of Croatian emigrant culture and art in maintaining and raising the unity of domicile and emigrated Croatia

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain why Croatian emigrant art and culture are important for communities in the diaspora and how their content richness can influence the community and spiritual, social, economic and political inclusion of emigrants in the overall development of Croatia.
2. Reproduce the significance of various cultural and artistic emigrant activities for Croatia and its emigrants, and especially the role in preserving the Croatian emigrant identity.
3. Use the knowledge about the role and importance of Croatian emigrant cultural and artistic activity in new and different social and territorial frameworks.
4. Describe the need for Croatian emigrant cultural and artistic peculiarities of proving, developing, public action and traditional significance in the cultural, social and political sense.
5. Analyze the spatial diversity of artistic and cultural activities of Croatian emigrants.
6. Develop the ability to act publicly on the basis of emigrant achievements in the service of the Croatian community.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Discuss ethical and bioethical issues in demographic and emigrant research -

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Goran Radoš

ECTS Credits 2.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
15
15

Teaching Assistant
dr. sc. Tamara Bodor

Course Description

The aim of the course is to get acquainted with the history of the development of Croatian media in different environments in the diaspora, to get acquainted with the circumstances in which they arose, the ways in which they developed or extinguished, the difficulties they encountered, etc. Special attention will be paid to specific circumstances in certain emigrant communities, also in Croatian autochthonous communities in the diaspora, because they are very different from each other.

To a large extent, it will be considered to what extent new technologies and media have influenced the development of emigrant media as a whole, but also the shutdown of individual publications. The role of the Croatian language in the development of the Croatian media in the diaspora from the 19th century to the present day will also be discussed, as well as the extent to which it is suppressed by the language of the majority community with new generations.

Students will independently research, discover and discuss new electronic media and new forms of media activity. They will consider the role of the media in the social life of emigrant and minority communities (cultural events and various other meetings, sports activities, schooling and education system, entrepreneurship, religious life, cooperation with the homeland, etc.).

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)

- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain why newspapers are an important medium for communities in the diaspora and how newspapers and public media activities can influence the social, economic and political inclusion of emigrants in the development concept of Croatia.
2. Reproduce the meaning of different genres within the press and public activities in the diaspora and their role in preserving the Croatian emigrant identity.
3. Recognize the importance of Croatian radio and television programs in the diaspora.
4. Recognize and accept as a new wealth the diversity of the media, portals, etc. of the Croatian emigrants and minority communities.
5. Analyze the advantages and disadvantages of the classical way of reporting and new technologies and media.
6. Reproduce basic cognitive, critical and analytical competencies related to classifications, typification, analysis, prediction and evaluation of the content of individual media and other patterns of public action in the diaspora.
7. Compare the basic differences between the press and other forms of public action on individual continents, as an additional emigrant wealth.
8. Recognize the basic differences between the press and other forms of public action in minority communities compared to those of emigrants.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Illustrate the need for scientific studies on demographic and immigration issues

Propose political and legal solutions based on scientific research of demographic and emigrant content

Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.

Croatian Ethnology

188075

Lecturer

Marinko
Vuković,
nasl. izv. prof.
dr. sc.

Course Description

To introduce students to the beginnings of the development of anthropological and ethnological sciences in Croatia, and introduce them to the modern scientific and professional ethnological and anthropological developments in Croatia. Acknowledges the fact that the study of traditional culture (in an earlier stage of Croatian ethnology) and the intertwining of traditional with contemporary culture and patterns of everyday life (in the latest phase of Croatian ethnology and cultural anthropology), ethnological science analyzed and interpreted the Croatian ethnic and cultural identity in European context.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » Croatology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define Ethnology and Anthropology, as well as the general science of culture of the people.
2. Explain the definitions and concepts of ethnology and cultural anthropology.
3. Analyze the contents of cultural elements and phenomena in terms of ethnology and anthropology.
4. Analyze traditional Croatian cultural and contemporary Croatian culture.
5. List specify core competencies: critical classification, analysis and evaluation of Croatian identity ethnological and anthropological approach.
6. Analyze and interpret the Croatian ethnic and cultural identity in the European context.
7. Explain and interpret the history of Croatian emigrants, their identity and culture
8. Analyze and interpret the development of Croatian ethnological thought throughout history

Study Programme Learning Outcomes

Course Description

The aim of the course is to introduce to the students the variety of genres in the Croatian oral literature, its longevity and the extent to which it is intertwined with written literature from its beginnings to the present, the connection with customs (life and annual cycles) and the immersion in the everyday life. Theoretical, methodological, stylistic, mythological, cultural, anthropological, historical and genre aspects of oral literature will be analyzed in selected examples.

Study Programmes

» Croatology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the facts;
2. Analyze and independently solve tasks (text, audio and video record interpretation);
3. Recognize oral literary genres and their interpretation;
4. Apply research methods in other areas of humanities as well;
5. Analyze theoretical texts.

Study Programme Learning Outcomes

Croatology

Single out and interpret the characteristics of the Croatian Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms

Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

General Competencies

Analyze and synthesize facts and theoretical knowledge on the research area subject matter; the possibility of establishing links with other knowledge in Croatology (literary, linguistic, historical, ethnological, anthropological).

Course Description

The aim of this course is to provide students with basic knowledge of Croatian medieval history taking into account a variety of political, social, institutional, economic and cultural processes that determined the development of medieval Croatian society. Also, students will become familiar with the development of Croatian medieval historiography and the main problems of contemporary medievalistics.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » History (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define main problems of Croatian medieval history
2. Describe the development of Croatian historiography
3. Explain the course of historical development from 7th to 16th century
4. Differentiate between different types of sources for Croatian medieval history
5. Compare medieval social processes with those from the other periods of Croatian history
6. Analyze Croatian social processes with European processes

Study Programme Learning Outcomes

Dual-major studies

History

History

Generate and conduct historical and other types of discussions

Identify historical facts and processes from European and national history

Single out historical processes and explain their topic of interpretation

Create a game, quiz or questionnaire based on historical figures and events from different periods of the Croatian past

List historical sources for the study of national history

General Competencies

After successfully graduating student will be able to:

1. summarize basic information of the Croatian and the World history
2. identify the most important persons and institutions in the Croatian and the World history
3. describe historical processes
4. compare historical processes of different periods
5. distinguish between important and non-important facts within historiographic interpretation

Croatian History - Selected Topics 1929-1941 202951

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

Main objective of this course is to acquire knowledge and skills necessary for understanding the period 1929-1941 in Croatian history. Students will, upon completion of the course, be able to understand the basic problems related to the building processes of Yugoslav Unitarianism and dictatorial centralism as well as solving national, so-called "Croatian question" in Kingdom of Yugoslavia. While attending the course, students are encouraged to articulate their own attitudes and to improve critical thinking regarding given issues.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 5th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the main determinants in the development of Croatian territories 1929-1941.
2. Describe key political actors during this period.
3. Explain the causes and consequences of the economic changes that occur during this period.
4. Formulate major changes that were happening in the social and cultural fields
5. Distinguish external influences on the internal political situation in the Kingdom of Yugoslavia
6. Demonstrate their knowledge of this period in the form of seminars and presentations.
7. Use powerpoint as a tool for presenting knowledge of the period 1929-1941.
8. Conclude what shaped the socio-cultural image of Croatia during the Kingdom of Yugoslavia

Lecturer

Mario Grčević,
prof. dr. sc.

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
15
15

Grading

Teaching activity and knowledge of literature are assessed.

Course Description

The aim of the course is to introduce students to Croatian language history in the 19th century.

At the beginning of the first half of the 19th century, two Croatian literary languages were in use: Kajkavian and Štokavian. Due to the activities of the Illyrian movement, the Kajkavian literary language was abolished in favor of the literary language of the Štokavian stylization. The Zagreb School of Philology inherits and develops the literary and linguistic principles of the Illyrians, and representatives of the Zadar and Rijeka Schools of Philology come forward with their own normative proposals. In the standardization of the Croatian literary language at the end of the 19th century, Croatian Vukovar people - followers of the Serbian reformers Vuk Stefanović Karadžić and Đuro Daničić - imposed themselves as authoritative. Karadžić participated in Croatian linguistic and linguistic events - directly and indirectly - as early as the first half of the 19th century as the main employee of the Austro-Slavic linguistic project initiated and led by the censor for Slavic books Jernej Kopitar in Vienna.

Croatian Literature of Humanism and Renaissance

188076

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

Knowledge of ideologists and ideologies will be acquired as well as changes in styles and stylistic formations, especially given the relationship between the Middle Ages and the Renaissance and the renaissance of the crisis, recognizable in the traits known as the term mannerism. Burckhardt, Huizinge and Hocke will be studied with particular attention in this set. The conceptual and thematic features of Latin-language literature in Dubrovnik and Dalmatia and at Corvinus Palace in Budapest will be described in detail, and questions of Protestants within Croatian literature will be discussed. Students will be introduced with special attention to the women's script in the Renaissance, especially with Marija Gundulić, Cvijeta Zuzorić and Nada Speranza Vittoria Bona. Comparative aspects of Croatian Renaissance literature will be emphasized, especially in relation to relations with Italian contemporary literature, comparing Croatian examples with related ones in European literatures. Numerous texts from the fringes of literature, scientific and historiographic and philosophical writings, as well as those which, although not written with literary intent, can be interpreted as the spiritual and cultural aspirations of their time. Writers in the Croatian language with those who wrote in foreign languages such as Italian and Latin are brought to the same plan.

Study Programmes

Croatian Literature of the Middle Ages

45641

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

The Course on Croatian medieval literature deals with basic issues associated with the latest developments in the knowledge on this crucial epoch of European history. The process of learning is based on the individual analysis of both literary and non-literary sources, strictly liturgical and also of fiction prose writings and historic and legislative documents. The studying of the medieval epoch is connected with the status of intellectuals in that time and also on the concept of the ideas that they had of the world. The students will become acquainted with the methodological problems of contemporary medievalism and trained for critical application of different approaches to Croatian texts of the Middle Ages, as it will improve their understanding of the European context of Croatian culture at that time, especially in relation with other European cultures. Students will study some of the basic concepts of everyday life in medieval time, they will learn about the marriage and children, love and war, about the concept of hell, purgatory and heaven, of death and of traveling to distant lands. Course objectives include: mastering the fundamental questions that are connected with the literature of that time as well as they will acquire knowledge of the architecture and music, painting and science in that time. Students will be trained to independently interpret and analyze texts from Croatian Middle Ages. Using examples from the Croatian medieval literature they will be trained to reach sovereign command of the Croatian identity during this period. At each level of instruction, students will be educated to understand the time of the dissolution of the Roman Empire and to the discovery complexity, richness and diversity that was possessed by various classes of medieval men.

1. Gottschalk on the court of Trpimir and the beginnings of Croatian literacy. Insight into the activity of the Benedictines at the time of the first Croatian national rulers. Aquileia and its significance in the cultural history of the Croats.

2. Lucidar and medieval system of education compared with the humanist of XIV. and XV century. A university life in the Middle Ages. Dominican University of Zadar. Herman Dalmatian and his contribution to the intellectual exchange between Islam and the Western civilization.

3. Physiologist and the medieval literature about animals. Novel about the fox and its poetics. The medieval bestiary in Croatian visual culture. St. Francis and animals.

3. Distinguish and compare theories about the origin of the Glagolitic/Cyrillic alphabet;
4. Analyze and interpret the importance of the most important protagonists of Croatian medieval cultural life as Gottshalk, Toma arhiđakon, Augustin Kažotić
5. Distinguish the most important knowledges about European medieval literature and culture in the books of Johan Huizinga, Jacques le Goff and Vatroslav Jagić, Radoslav Katičić.
6. Recognize the transitive elements that connect medieval time with the tradition of previous culture of old Greek and Romans and then recognize the elements that in medieval announced the time of *studia humanitatis*.
7. Recognize the importance of Croatian medieval literature and culture with the help of the most prolific methodologies from various disciplines such as history of art, science, philosophy and natural sciences
8. Identify and describe literary genres or system that was used in medieval to classify literary texts and their recipients.
9. Recognize the importance of philological discovery for the literary history of Croatia
10. Analyze the macro and micro structure of the Baška Tablet

Study Programme Learning Outcomes

Croatology

Single out and interpret the characteristics of the Croatian Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

General Competencies

After the first semester of study/learning (Croatian literature of the Middle Ages, 2 classes per week, 12 lessons units/Croatology, undergraduate), the students will be able to do the following:

- clearly perceive the development of the beginnings of Slavic literacy by means of acquired theoretical philological and historical knowledge
- acquire the skill of writing in three scripts (triliteracy) - Latin, Glagolitic, Cyrillic;
- competently interpret the historical development of the Croatian language and literature, and then observe it in the wider context of medieval Europe along with well-argued knowledge (activity of Cyril and Methodius, the development of the Glagolitic and Cyrillic script, canonical writings, Old Slavonic language evolution, the formation of redaction, transmission of literary genres;
- describe, analyze and define the beginnings of Slavic and Croatian literacy in medieval European context;
- observe in parallel the development of literacy on the Croatian territory over time (from the 7th century to the year 1396) and space (Istria, Dalmatia) in regard to the European (Byzantium, Italy, France) with well-presented historical and literary factors, applying the recent scientific achievements (supplementary literature);
- summarize the European medieval Literacy (Benedictine heritage - common values) and identify and interpret Croatian specificities such as: Angular Glagolitic script, triliteracy and trilingualism and the activity of Glagolitians in the context of medieval Slavic and Western European written cultural heritage.

Week by Week Schedule

1. 1. Gottschalk on the court of Trpimir and the beginnings of Croatian literacy. Insight into the activity of the Benedictines at the time of the first Croatian national rulers. Aquileia and its significance in the cultural history of the Croats.
2. 2. Lucidar and medieval system of education compared with the humanist of XIV. and XV century. A university life in the Middle Ages. Dominican University of Zadar. Herman Dalmatian and his contribution to the intellectual exchange between Islam and the Western civilization.
3. 3. Physiologist and the medieval literature about animals. Novel about the fox and its poetics. The medieval bestiary in Croatian visual culture. St. Francis and animals.
4. 4. Marco Polo and his travels in Asia described in the book Il Millione. Pilgrimage as a form of medieval life. Communications in the Middle Ages. Culinary habits in the Middle Ages.
5. 5. Toma Archdeacon and his Chronicle. The question of literary genres and their nonexistence in the Middle Ages. Analysis of the legal text from the Codex of Korčula with an insight into the relationship of reality and fiction in the literary culture of the time. The Croatian legal writings and statute of the towns.
6. 6. Prezbiter of Duklja and his Chronicle. Genesis of the addition called Croatian chronicle and its narrative about the king Zvonimir. The legend of the origin of Dubrovnik and its resonance in William Shakespeare's Tempest. City chronicles and narratives about patron saints of Croatian cities.
7. 7. Analysis of poetry from the Paris collections of Croatian medieval lyrics. Jacopone da Todi writer of lauds and verses against rich and immoral church. Criticism of reality in contemporary poetry. The fragment from Krleža's Ballads of Petrica Kerempuh and some medieval texts. The concept of Hell in the Middle Ages.

8. 8. European literature and philosophy of the Middle Ages and its main protagonists. Abelard and Heloise. Roman de la rose. The concept of love in the European Middle Ages. Bogomilism. Crusades as a literary theme and literary laboratory of troubadours.
9. 9. Places and subjects of the cultural production in the Middle Ages and the instruments of its expansion. Difference between manuscripts and printed books. Umberto Eco's novel The Name of the Rose as a source for the study of medieval spirituality. From Orpheus to the Good Shepherd and to the Christ. The idea of traveling to the world of death and to the Hell.
10. 10. Representation of reality and everyday life in the Middle Ages. The experience of space and time and their real and unreal borders. The concept of India. General view to the medieval literature, its forms and themes and the main spiritual and philosophical influences that shaped it. Allegorizes and its examples in the works of medieval authors.
11. 11. Dramaturgy of medieval theater. The question of "evolution" of the theatrical forms. Zagreb Missale antiquissimum. The critique of evolutionism and ritualist views to medieval theater. From Planctus to the Passion. Alternative theater of medieval. Carnevalisation.
12. 12. The high mediaeval period or the autumn of medieval. Cyclical presentation of Jesus Christ and its Croatian version. The Passion of St. Margaret as the highest level in the development of Croatian medieval drama in the wake of humanism. Question of Marulić's dramatic authorship.
13. 13. Croatian medieval prose and its diachronic overview. The principles of medieval storytelling. The process of canonization as an ideal sample of inventing the narrative literature on saints. Prose from Dubrovnik legends. A novel about Troy. A novel on Alexander the Great.
14. 14. The graveyard medieval lyric, Relationship to death in the Middle Ages. The treatment of children in the Middle Ages. Apocalypse as a literary genre. Death in the fine arts. Confraternity as accompaniment to the graveyard and their poetry.
15. 15. What is of contemporary interest in the book Johan Huizinga's book Autumn of the Middle Ages. The overview at the contribution to medieval culture, spirituality and literature by the group of French analysts. Contribution of Radoslav Katičić to the knowledge of the Croatian medieval literature and education.

Croatian Literature of the Middle Ages

188078

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

The Course on Croatian medieval literature deals with basic issues associated with the latest developments in the knowledge on this crucial epoch of European history. The process of learning is based on the individual analysis of both literary and non-literary sources, strictly liturgical and also of fiction prose writings and historic and legislative documents. The studying of the medieval epoch is connected with the status of intellectuals in that time and also on the concept of the ideas that they had of the world. The students will become acquainted with the methodological problems of contemporary medievalism and trained for critical application of different approaches to Croatian texts of the Middle Ages, as it will improve their understanding of the European context of Croatian culture at that time, especially in relation with other European cultures. Students will study some of the basic concepts of everyday life in medieval time, they will learn about the marriage and children, love and war, about the concept of hell, purgatory and heaven, of death and of traveling to distant lands. Course objectives include: mastering the fundamental questions that are connected with the literature of that time as well as they will acquire knowledge of the architecture and music, painting and science in that time. Students will be trained to independently interpret and analyze texts from Croatian Middle Ages. Using examples from the Croatian medieval literature they will be trained to reach sovereign command of the Croatian identity during this period. At each level of instruction, students will be educated to understand the time of the dissolution of the Roman Empire and to the discovery complexity, richness and diversity that was possessed by various classes of medieval men.

1. Gottschalk on the court of Trpimir and the beginnings of Croatian literacy. Insight into the activity of the Benedictines at the time of the first Croatian national rulers. Aquileia and its significance in the cultural history of the Croats.

2. Lucidar and medieval system of education compared with the humanist of XIV. and XV century. A university life in the Middle Ages. Dominican University of Zadar. Herman Dalmatian and his contribution to the intellectual exchange between Islam and the Western civilization.

3. Physiologist and the medieval literature about animals. Novel about the fox and its poetics. The medieval bestiary in Croatian visual culture. St. Francis and animals.

ECTS Credits	3.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	15
	15

Grading

Students are required to participate in all forms of teaching. They are monitored during the teaching process. Each of program assignments including the elaboration of seminar participates in the final rating. Students commitment will be tested by passing regular examination period on written and oral exam.

4. Marco Polo and his travels in Asia described in the book *Il Millione*. Pilgrimage as a form of medieval life. Communications in the Middle Ages. Culinary habits in the Middle Ages.

5. Toma Archdeacon and his Chronicle. The question of literary genres and their nonexistence in the Middle Ages. Analysis of the legal text from the Codex of Korčula with an insight into the relationship of reality and fiction in the literary culture of the time. The Croatian legal writings and statute of the towns.

6. Prezbiter of Duklja and his Chronicle. Genesis of the addition called Croatian chronicle and its narrative about the king Zvonimir. The legend of the origin of Dubrovnik and its resonance in William Shakespeare's *Tempest*. City chronicles and narratives about patron saints of Croatian cities.

7. Analysis of poetry from the Paris collections of Croatian medieval lyrics. Jacopone da Todi writer of lauds and verses against rich and immoral church. Criticism of reality in contemporary poetry. The fragment from Krleža's *Ballads of Petrica Kerempuh* and some medieval texts. The concept of Hell in the Middle Ages.

8. European literature and philosophy of the Middle Ages and its main protagonists. Abelard and Heloise. *Roman de la rose*. The concept of love in the European Middle Ages. Bogomilism. Crusades as a literary theme and literary laboratory of troubadours.

9. Places and subjects of the cultural production in the Middle Ages and the instruments of its expansion. Difference between manuscripts and printed books. Umberto Eco's novel *The Name of the Rose* as a source for the study of medieval spirituality. From Orpheus to the Good Shepherd and to the Christ. The idea of traveling to the world of death and to the Hell.

10. Representation of reality and everyday life in the Middle Ages. The experience of space and time and their real and unreal borders. The concept of India. General view to the medieval literature, its forms and themes and the main spiritual and philosophical influences that shaped it. Allegorizes and its examples in the works of medieval authors.

11. Dramaturgy of medieval theater. The question of "evolution" of the theatrical forms. *Zagreb Missale antiquissimum*. The critique of evolutionism and ritualist views to medieval theater. From *Planctus* to the Passion. Alternative theater of medieval. Carnevalisation.

12. The high mediaeval period or the autumn of medieval. Cyclical presentation of Jesus Christ and its Croatian version. The Passion of St. Margaret as the highest level in the development of Croatian medieval drama in the wake of humanism. Question of Marulić's dramatic authorship.

13. Croatian medieval prose and its diachronic overview. The principles of medieval storytelling. The process of canonization as an ideal sample of inventing the narrative literature on saints. Prose from Dubrovnik legends. A novel about Troy. A novel on Alexander the Great.

14. The graveyard medieval lyric, Relationship to death in the Middle Ages. The treatment of children in the Middle Ages. Apocalypse as a literary genre. Death in the fine arts. Confraternity as accompaniment to the graveyard and their poetry.

15. What is of contemporary interest in the book Johan Huizinga's book *Autumn of the Middle Ages*. The overview at the contribution to medieval culture, spirituality and literature by the group of French analysts. Contribution of Radoslav Katičić to the knowledge of the Croatian medieval literature and education.

Study Programmes

» Croatology -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and write in Cyrillic and Glagolitic script with the use of ligatures/explain the Croatian cultural specificity: trilliteracy and trilingualism;
2. Analyze the situation of the Croatian cultural space in the early Middle Ages in regard to the Western European and Slavic literacy;
3. Distinguish and compare theories about the origin of the Glagolitic/Cyrillic alphabet;
4. Analyze and interpret the importance of the most important protagonists of Croatian medieval cultural life as Gottshalk, Toma arhidakon, Augustin Kažotić
5. Distinguish the most important knowledges about European medieval literature and culture in the books of Johan Huizinga, Jacques le Goff and Vatroslav Jagić, Radoslav Katičić.
6. Recognize the transitive elements that connect medieval time with the tradition of previous culture of old Greek and Romans and then recognize the elements that in medieval announced the time of *studia humanitatis*.
7. Recognize the importance of Croatian medieval literature and culture with the help of the most prolific methodologies from various disciplines such as history of art, science, philosophy and natural sciences
8. Identify and describe literary genres or system that was used in medieval to classify literary texts and their recipients.
9. Recognize the importance of philological discovery for the literary history of Croatia
10. Analyze the macro and micro structure of the Baška Tablet

Course Description

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concepts of migration and identity and compare their essential characteristics.
2. Apply knowledge of historical migration of older Croatian emigrants.
3. Define the consequences of the minority position of Croats in the surrounding countries in the past and present.
4. Recognize the position of older Croatian emigrants in neighboring countries: Austria (Burgenland / Burgenland), Slovakia / Moravia, Hungary (South and West), Serbia / Vojvodina (Backa, Banat, Srijem), Romania (Banat), Kosovo (Janjevo), Montenegro / Boka Kotorska, Italy (Venice / Molise).
5. Identify the consequences of the minority position of Croats in the surrounding countries in the past and present.
6. Recognize historical, sociological and demogeographical theoretical frameworks related to the issue of research on older Croatian emigration

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Propose political and legal solutions based on scientific research of demographic and emigrant content

Conduct relevant research on the Croatian resident and emigrant population

Develop a critical attitude towards statistical data and literature

relevant to research on the population and Croatian emigration
 Develop the ability to demonstrate the need of the population
 and emigration in the service of social and political decision-
 making

Week by Week Schedule

1. Basic information about the course, content and method of work in lectures and seminars, fieldwork.
2. Spatial mobility: defining the demographic terms of migration and circulation and their typification as well as a comparison with historical migration and historical maps.
3. Multiplicity and complexity of identity: ethnic identity, national identity, cultural identity, social identity, hybrid identity
4. Terminological breakdown of socio-historical concepts: standardization, transformation, modernization, disintegration, integration, ethnic community, national community and their understanding from the aspect of research into older Croatian emigration
5. When and why did the first migrations of the Croatian population outside the homeland begin in XIII. century.
6. The Ottoman threat in Europe and the great chain migrations of the Croatian population in the 15th century and the 16th century.
7. Spatial distribution of Croatian migrants in the surrounding European countries since the 15th century by the end of 17th century.
8. The Great Vienna War and the liberation of Europe from the Ottoman rule - the role of the Habsburg, Venetian and Ottoman authorities in the second great wave of migration of Croatian populations outside the native Croatian territory since the end of the 17th century and at the beginning of 18th century.
9. The role of the Church in initiating, leading the second migration wave of the Croatian population towards liberated Christian lands from the Ottoman territories from the 16th to the 18th century.
10. The role of the Catholic Church in the preservation of the ethnic and national identity of Croatian emigrant communities from 15th century. to the 20th century.
11. Disintegration processes within Croatian emigrant communities in the 18th century and 19th century.
12. The Croatian National Revival and Croatian indigenous minority communities in surrounding countries-Croats in surrounding countries between accepting modernization processes of assimilation and disintegration of ethnic communities or integrating with the motherland and forming their own Croatian nation and accepting a minority position.

13. Famous Croatian public workers in preserving Croatian communities and Croatian cultural and national identity in European countries
14. The position of indigenous Croatian communities in neighboring European countries today, comparison with integration / disintegration socio-historical processes
15. Institutional activities and present-day social and cultural visibility of indigenous Croatian minority communities in their home countries and their connection with the cultural, social and political institutions of the Republic of Croatia.

Croatian Modern age in the eyes of Contemporaries

270105

Course Description

The subject is structured through 15 teaching units that point to some important events and processes of the Croatian Modern Age. By analyzing individual sources, students will become familiar with broader social and political processes, and through independent research on topics from published sources listed in the list of supplementary literature, they will develop research skills and further expand their knowledge of modern Croatian history.

Study Programmes

Grading

The grade will be defined through course work

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the most important historical events from Croatian modern history,
2. Write an essay on Croatian modern history
3. Recognize important figures from Croatian modern history
4. Define basic terms from Croatian modern history
5. Analyze individual sources from Croatian modern history
6. Conclude which causes and consequences determined Croatian modern history

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Generate and conduct historical and other types of discussions

Identify historical facts and processes from European and national history

Single out historical processes and explain their topic of interpretation

List historical sources for the study of national history

Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of

historical science

Formulate and orally present knowledge about historical processes and data

Single out important historical figures from different periods of European history

List the historical sources for studying national history

Norm and classify historical literature and sources

Form and write research results on historical processes and data

Prerequisites for
Croatian Dialectology

Course Description

Learning basic knowledge about the linguistic morphology of the Croatian language

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)
- » Croatology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and delineate morphological categories in the Croatian language
2. Explain the relation of morphology to other parts of grammar
3. Distinguish and know how to locate verb and noun types
4. Analyze and observe morphological deviations from the norm
5. Demonstrate knowledge of declension and conjugation rules of the Croatian standard language.
6. Apply acquired knowledge by noticing and avoiding errors in written and oral communication.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Croatology

Define and apply the norm and grammatical concept of the Croatian standard language

Explain the facts in the field of Croatian phonology, morphology and syntax and apply them in oral and written expression

Komušanac

Course Description

Course objectives: acquaint students with basic demographic indicators and processes, situations, and trends in population development in Croatia; provide students with contemporary demographic profile of Croatia and its background, assist students in attaining knowledge on particularities of development of population of Croatia outside the framework of the theory of demographic transition; introduce students to destructive effects of wars on development and structure of population of Croatia; provide students with the understanding of crucial role of population in contemporary spatial relations and processes in Croatia; introduce students with procedures for demographic forecasting and modelling; introduce students to strategies and models for revitalisation of population; explain to students the role of geographic analyses of population in various modes of planning (such as regional, spatial, or social

planning).

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain demogeographic and methodological concept and system
2. Explain logic and functional organisation of population on Earth's surface
3. Explain importance of population as a basis for all planning within geographical space
4. Explain and understand strategic significance of population
5. Explain the correlation between natural basis and social upgrading within geographical space
6. Explain general and regional concepts of organisation of space
7. Explain functional and sustainable organisation of space
8. Explain strategic significance of demogeographic scientific approach

Study Programme Learning Outcomes

Dual-major studies

ECTS Credits	2.0
Semester	Winter
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Regular attendance in class, completion of preliminary exam, participation in class discussions, submission of independent research paper.

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Develop a scientifically independent opinion on demographic and emigrant issues

15

Grading

The grade is formed through regular exams and seminars

Course Description

The aim of the course is to familiarize students with the basic data and historical processes that took place in Croatia by the end of the 18th century, to familiarize them with the basic problem of studying Croatian social and cultural history and prepare them for independent discourse on persons, events and processes of Croatian cultural and social history by the end of the 18th century.

Study Programmes

» Croatology -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic problems of Croatian social and cultural history by the end of the 18th century
2. Explain the causal links in that period
3. Show the historical processes that take place by the end of the 18th century
4. Differentiate the specifics of cultural and social history
5. Compare the historical social and cultural processes in Croatia with European historical processes
6. Recognize the important political, social and cultural events of Croatian history by the end of the 18th century

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Classify, analyze and evaluate Croatian cultural, linguistic and political history

Explain and analyze the components of Croatian culture and their connection

Croatian Traditional Culture and Globalization

226945

Lecturer

Marta Račić,
nasl. doc. dr.
sc.

Course Description

To acquaint students with Croatian traditional culture (material and immaterial) and to make them aware of its importance in the processes of identification and globalization. Through lectures and seminars, students will be introduced to all forms of traditional culture, from construction, home decoration, textile handicrafts to folk customs and folklore musical expressions.

To consider Croatian traditional culture in its interconnection with individualization, urbanization, (post)industrialization, atomization of society and postmodernity, as well as the adaptation and way of preserving Croatian traditional culture to the contemporary social context.

To train students to observe cause-and-effect relationships between geographically, climatically and historically conditioned determinants of traditional culture.

To make students aware that traditional culture conveys the wealth of local practices and thus participates in shaping national identity in a global context.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses 1., 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and distinguish between material and non-material forms of traditional culture.
2. List Croatia's intangible cultural heritage on UNESCO's lists.
3. Explain the relevance of Croatian traditional culture in the realization of certain types of social solidarity in the Croatian social context.
4. Explain tradition as a dynamic property
5. Differentiate elements of traditional culture according to four ethnographic areas.

ECTS Credits 3.0

- » Croatology (Studij) (*elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define briefly the terminology related with Croatian traditional music
2. Explain in basic terms the historical framework of Croatian traditional music
3. Name the most outstanding researchers of Croatian traditional music
4. Explain the customary-ritual context of selected examples of Croatian traditional music
5. Recognize the main features of Croatian traditional music by Croatian zones and areas
6. Analyze the interpretive genres of Croatian traditional music and identify their prominent representatives
7. Recognize Croatian traditional music as an intangible cultural asset under national and world protection
8. Apply the legal framework of intellectual property in the context of processing and (re)interpretation of Croatian traditional music

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
 adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Identify different theoretical approaches to the study of Croatian culture
 Classify, analyze and evaluate Croatian cultural, linguistic and political history
 Constructively participate in discussions on croatological topics
 Explain and analyze the components of Croatian culture and their connection
 Describe, classify and explore Croatian art, music, theater and film arts
 Justify and support the need and willingness for lifelong education
 Mark, explain and interpret the role of exact sciences in the history of Croatian culture
 Identify, connect, single out and argue the fundamental components of Croatian geography, enology, ethnology, gastronomy
 Adhere to linguistic, spelling and stylistic norms of the Croatian language in the academic and non-academic discourse
 Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication
 Apply basic computer skills

Croats in South America

214018

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

To acquaint students with the basic directions of Croatian emigration to South America, emphasizing the socio-historical context.

To provide an understanding of the complex process of identity creation depending on various parameters such as the size of the emigrant community, immigrant

and emigration policies of the country of emigration / immigration, time of emigration.

Introduce students to the basic assimilation and integration processes in the emigrant community.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

15

Teaching Assistant
dr. sc. Maria Florencia
Luchetti

Grading

Attendance at at least 12 classes. Active participation at class. Writing and presenting a seminar paper Taking colloquia and exams.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the historical, economic, political, social and cultural aspects of South America
2. Recognize immigration policy and the importance of immigration in South American countries
3. Explain the reasons for Croatian emigration to South America
4. Describe the composition and structure of Croatian emigrants in South America
5. Distinguish migration periods and characteristics of emigrant communities
6. Recognize the contribution of Croatian emigrants to the of South American countries

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Illustrate the need for scientific studies on demographic and immigration issues

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Communication Studies

Week by Week Schedule

1. Introductory lecture, presentation of subjects, student obligations, bibliography, etc.
2. Historical, economic, social, cultural and political aspects of South America. Immigration policy and the importance of migration in South America. Contribution of Croatian emigrants to the modernization of the countries of South America.
3. The first emigration of Croats to South America - general characteristics, number, areas and manner of travel of emigrants, causes of emigration.

4. Mass emigration of Croats to South America - general characteristics, age, sexual marital, social structure.
5. Croats in Argentina - economic and political migration; peculiarities of Croats in Buenos Aires, Córdoba, Santa Fe, Bahía Blanca and on the "pampas", in the north (Chaco, Formosa, Misiones, Entre Ríos, Tucumán) and in Patagonia (Río Negro, Chubut, Santa Cruz, Tierra del Fuego).
6. Croats in Chile - Emigration from the Dalmatian islands. Croatian colonies in the north, center and south of Chile (Iquique, Tacna, Arica, Tarapacá, Calama, Tocopilla, Pisagua, Antofagasta, Valparaíso Santiago, Punta Arenas, Porvenir).
7. Croats in Peru (Callao, Lima, Cerro de Pasco, Arequipa) and Bolivia (La Paz, Oruro, Potosí, Uyuni, Cochabamba).
8. Croats in Venezuela (Caracas, Zulia, Mérida, Carabobo) and Ecuador (Quito, Manabí, Bahía de Caráquez, Manta y Guayaquil).
9. Croats in Brazil (Sao Paulo, Rio de Janeiro), Paraguay (Asunción, Departamento Central) and Uruguay (Montevideo, Maldonado)
10. Public opinion, organization and public action, social, cultural, political, sports and economic associations, journalism.
11. Croatian Communities in South America: Past, Present and Future Perspective. Homeland policies towards emigrants.
12. The role of Croatian emigrants in South America in the creation of the Yugoslav state.
13. The role of Croatian emigrants in South America in the Homeland War and the recognition of the Croatian state.
14. Integration of Croatian emigrants and their descendants in South America and preservation of Croatian identity.
15. Course evaluation

Cultural Anthropology

37768

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

The students will: master the basic concepts of theoretical and analytical approaches to cultural anthropology,

independently critically reflect on and demonstrate an understanding of culture and society

develop an understanding of Croatian culture and society

Understanding the basic ideas and concepts of cultural and social anthropology

Through research, understand the complexity of social processes: cultural diversity and social change

Apply acquired knowledge in research work

Demonstrate an understanding of conceptual definitions in the field of cultural and social anthropology Identify basic processes and apply specified theoretical approaches

Demonstrate critical thinking and implementation of the acquired knowledge with a special emphasis on Croatian society

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses(3rd year), 5th semester, 3rd year*)
- » Sociology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic theoretical terms in cultural anthropology
2. Criticize dimensions of the culture and society
3. Compare the different theoretical approaches
4. Describe the complexity of social processes: cultural differences and social changes

ECTS Credits 5.0

Semester Winter/Summer

English Level L1

E-learning Level L1 (10%)

Study Hours
30
30

Teaching Assistant
dr. sc. Marija Zelić

5. Explain the importance of the theories in the conceptualization of the anthropological research

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Define sociology as a science
- Discuss social issues in Croatian society
- Use sources of scientific information
- Explain the elements of social inequality
- Recognize the social specificities of Croatian society
- Compare different social phenomena in different cultures

Sociology

- Define sociology as a science
- Discuss social issues in Croatian society
- Recognize the social specificities of Croatian society
- Compare different social phenomena in different cultures

General Competencies

- Use the general knowledge of society and of social processes
- Explain the initial assumptions of the different political, religious and cultural orientations.
- Explain causal relationships between the various social phenomena.
- Explain the social change using classical and contemporary sociological approaches.
- Explain the difference between micro and macro level of the sociological analysis.
- Illustrate the relevance of the concepts of culture, socialization, stratification, social structure and social institutions in interpreting of the social phenomena.

Screening of student's work

- 1 ECTS Pohađanje nastave [EN]
- 0.5 ECTS Esej [EN]
- 2 ECTS Kolokviji [EN]
- 0.5 ECTS Referat [EN]
- 1 ECTS Seminarski rad [EN]
- 0 ECTS Praktični rad [EN]
- 5 ECTS

Forms of Teaching

» Predavanja

- » Introduction to key theories/theoreticians, presentation of classic ethnographies and themes/area of research, debating cultural anthropological controversies in the history of discipline

» Seminar

- » Design of students' research projects, application of research methods (participant observation and interviews), analysis of the research material; discussions

- integration of knowledge from lecture and particular projects; presentation of research projects

Week by Week Schedule

1. Introductory Lecture
2. Theoretical Approaches and Research Methods in Cultural and Social Anthropology I
3. Theoretical Approaches and Research Methods in Cultural and Social Anthropology II
4. Relationship between the disciplines: Anthropology and Sociology
5. Relationship between Culture and Society
6. Relationship between Culture and Society
7. Geography of Culture
8. Family and kinship
9. Groups and social networks
10. Development of social institutions
11. Religion, Science, Myth
12. Language, National Consciousness, Identity II
13. Language, National Consciousness, Identity II
14. Power and authority
15. Modernism and Postmodernism

Cultural Identity of Croatian Diaspora

214011

Lecturer

izv. prof. dr. sc.
Wolffy Krašić

ECTS Credits 2.0

Semester Winter

English Level L1

E-learning Level L1

Study Hours

15

15

Teaching Assistant
dr. sc. Ivan Tepeš

Course Description

The aim of the course is to acquaint students with the common features of the identity of Croatian communities in the world. Present the role and importance of language, culture, religion, customs and community in order to preserve the identity of the community. To make students aware that identity is a lasting process of transformation.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concept of identity and explain its essential features.
2. Identify Croatian emigrant communities in the world and list their cultural characteristics.
3. Distinguish and analyze the terms: diaspora, emigration, transcontinental emigration, minority community, migration.
4. Recognize and interpret the causes of the emigration of Croats throughout history.
5. Explain the causes of the emigration of Croats with economic, historical and social events.
6. Define the culture of Croatian emigrant communities and understand their significance and role in shaping national identity.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Interpret data on Croatian and global population and emigration

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

1 ECTS Pismeni ispit [EN]

0.5
ECTS Seminarski rad [EN]

2 ECTS

Week by Week Schedule

1. Introduction - basic information about the course, content and method of work.
2. Identity, ethnic identity, cultural identity, multiple identity, hybrid identity.
3. Language as a factor of ethnic identity in migration processes (mother tongue, mother tongue, grandfather, great-grandfather or other language).
4. Terminological terms: the concept of emigration, diaspora, minority communities.
5. The first Croatian diaspora in the XV. and the sixteenth century in the atmosphere of the expansion of the Ottoman Empire
6. The role of the Catholic Church in preserving ethnic identity.
7. Historical and developmental overview of Croatian emigrant communities on a global level.
8. Croatian emigrant identity in the European Union.
9. Contribution of new emigrants to existing emigrant communities (on the examples of Ireland, Germany, Austria).
10. Identity expression through literature and culture.
11. The search for identity - an advantage or a burden. A critical review.
12. Cultural identity of Croatian emigrants in a globalized world.
13. Cultural stereotypes and prejudices about Croatian emigrant identity.
14. Case studies of selected emigrant communities - analysis and interpretation of the identity of Croatian emigrants.
15. Recapitulation.

Culture of Memory and Places of Remembrance

227641

Lecturer

izv. prof. dr. sc.
Vlatka Vukelić

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistant
dr. sc. Nikolina Šimetin
Šegvić

Course Description

Memory Culture and Memory Sites is a methodological-theoretical subject in which students:

- learn about the phenomena of memory, remembrance and remembering; prohibitions of commemoration and social forgetting in shaping historical consciousness, tradition, identity, in the politics of history and its influence on the writing of history;
- to learn what constitutes places of memory and how they are created,
- to understand why *historia - memoria is futuri*;
- to connect the theory and practice of historians on the above topics using examples from Croatian, European and world history. In this way, the construction of Croatian national, social and cultural identity is analyzed and a connection is made between imagined representations and real historical circumstances. The acquired conceptual value is encoded in a general system that applies the comparative method.

Grading

1. Attend at least 12 classes
2. Actively follow the class and read the assigned weekly assignments
3. Participate in class discussions
4. Participate in group work under the guidance of the instructor: think of a topic, research it, analyze it, and present it in the form of a poster
5. Oral examination in the form of a final discussion

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)
- » History (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain, differentiate, and correctly apply the basic terms and concepts that arise from the study of memory culture and place, and explain the importance of this conceptual approach to shaping society.
2. Describe some important moments in the history of memory/collective memory, both on a global and national level
3. Combine and express orally and in writing political, social, economic and other elements through which the culture of memory is essential to the development of society
4. Analyze and articulate the most important changes in the development of memory culture and memory sites, their causes and consequences
5. Analyze the previous handling of certain processes on the basis of various books and documents
6. Apply acquired knowledge into a broader context and understanding of Croatian history, society, nation and identity and to connect it with already acquired knowledge from national history and general history

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing
Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society
Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)
Think critically about topics related to journalism, public relations, communications and society as a whole
Organize individual and team work
Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations
Prepare and create different forms of presentations and seminar papers

Croatology

Identify different theoretical approaches to the study of Croatian culture
Classify, analyze and evaluate Croatian cultural, linguistic and political history

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Identify historical facts and processes from European and national history

Single out historical processes and explain their topic of interpretation

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Critically judge one's own work and defend one's position with arguments in team work

Norm and classify historical literature and sources

Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them with arguments

Psychology

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Plan the search of literature, databases and other sources of information

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Evaluate basic content from complementary social, humanistic and biomedical disciplines.

Sociology

Discuss social issues in Croatian society

Create an effective research plan

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Recognize the social specificities of Croatian society

Compare different social phenomena in different cultures

Screening of student's work

Cyborg Ethics and Robot Ethics

227470

Lecturer

izv. prof. dr. sc.
Ivana Greguric

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours

15

15

Course Description

Systematically rethinking the impact of modern techniques on man and society, creating a new cybernetic, scientific-technical paradigm that lays a radically new foundation for the production of all kinds of life and the relationship between man and science and technology.

By presenting the achievements of convergent technologies and artificial intelligence (AI), the students want to be introduced to the most important aspects of human cyborgization, the application of artificial intelligence and the ways in which they lead to the creation of a new type of "man" and cause changes in the human natural structure and society. There arise fundamental questions such as: what is man today (descriptive aspect) and what should a human being be (normative aspect)?

Introduce students to discussions about important philosophical-anthropological and ontological definitions of man and society. A special emphasis will be placed on future visions of the creation of the posthuman and the reflection of the creation of a new scientific-technical reality of artificial intelligence, where the questions of the ethical position of these intelligences in their relationship to man, or man's relationship to them, are raised.

To open the basic dilemmas of technological progress through a philosophical and bioethical critical evaluation aimed at creating new post-human ethics: cyborgethics as an important philosophical and bioethical-medical-technical consideration of the essence of human improvement, and robot ethics as an essential consideration of the creation of man's new mechanical doubles - robots as a replacement for the natural man. In this way, the students want to be encouraged to apply ethical principles in order to fight for the personal and social determination of the limits of technological achievements and their application in modern society.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the origin, meaning and application of certain theories
2. Define the basic concepts of cyborg ethics and robot ethics
3. Apply ethical understanding and implementation of professional ethics
4. Compare certain aspects of cyborgization, the application of artificial intelligence
5. Explain the basic dilemmas of technological progress
6. Analyze the phenomena of cyborgization, robotization, transhumanism and artificial intelligence

Study Programme Learning Outcomes

Dual-major studies

Sociology

Identify the main actors of certain social processes

Use theoretical concepts in the analysis of society

Compare different social phenomena in different cultures

Screening of student's work

ECTS ¹ Pohađanje nastave [EN]

ECTS ¹ Kolokviji [EN]

ECTS ¹ Seminarski rad [EN]

ECTS ³

Week by Week Schedule

1. Introduction to paradigmatic changes in technology - a synthesis view of the connection between philosophy, technology and medicine and the definition of basic terms from technology for understanding the digital-robotic age.
2. Evaluation of convergent technologies in the creation of new characteristics of man in the modern age - the term NBIC, cyborg (Kline & Clynes, Haraway), the term cybernetics (Wiener), the development of cyborgization, artificial intelligence, etc.
3. Settings of transhumanist anthropology – theoretical framework and techniques for improving human beings, nanotechnology, cognitive science, genetics (Harris, Savulescu, Moravec, Kurzweil, Fukuyama)
4. Cyborgization and the post-human state - procedures and goals of cyborgization, evolutionist-eugenic aspiration to improve man
5. The body as a cybernetic system – Platonic-Cartesian dualism, the soul in the era of convergent technologies, possibilities and dilemmas (organs for exchanging information, organs for exchanging matter and energy, etc.)
6. Cyborgization of real social relations in the era of scientific humanism - society as a cybernetic organism

7. Ethical issues of body enhancement in sports and art - prostheses as aids in sports - morally not/justified (Pistorius case); the body with embedded technical accessories - the body as software and interface, computer interactive performances, post-human and (re)production of man in the computer; cyborgization in music - the time of technoculture and simulated reality
8. Ethical controversy of transhumanists and bioconservatives - representation and opposition to the use of biotechniques for human improvement
9. Cyborgoetic dilemmas and principles of improvement of human beings (Habermas, Kant, Plessner)
10. Resolution on the limits of the improvement of human beings and historical reality - setting the ethical and legal responsibility of cyborgizing the overall reality
11. Robots in the historical reality of scientific humanism - towards the mechanical immortality of conscious human copies, a kind of friendly robots
12. Ethical dilemmas of applying artificial intelligence and the possibility of developing superintelligence - the potential and dangers of artificial intelligence in research and the real environment
13. Robot ethics - creation of a robot ethics framework, i.e. regulation of the application of artificial intelligence in modern society, laws of robotics (I. Asimov)
14. Facing the challenges posed by AI in modern society. AI autonomy issues - defining issues of autonomy, privacy, trust and accountability (e.g. who or what will be held responsible when and if an autonomous system malfunctions or harms humans?)
15. General principles for ethical and value formation, development and implementation of autonomous and intelligent systems

Demographic Aspects of the Greater Serbian aggression in Croatia 1990-1998

239760

Course Description

The aim of the course is to present the theoretical and methodological concept of considering the demographic causes and consequences of the Serbian aggression on the Republic of Croatia, as well as the historical laws that conditioned that aggression.

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop knowledge about events in the period 1990-1998. from the demographic aspect within the theoretical understanding of the population
2. Explain the difference between aggression, civil war, occupation, military coup and the like, and especially the demographic consequences of aggression in the Republic of Croatia
3. Define the meaning of wartime demographic destruction in spatial processes, relations and security issues
4. Develop the ability of independent scientific research related to learning the truth about the aggression against the Republic of Croatia
5. Explain the specificity of branch methodologies for considering aggression against the Republic of Croatia
6. Develop the application of demographic projection methods related to direct and indirect war losses
7. Explain the war conditioning on later demographic processes and trends

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Conduct relevant research on the Croatian resident and emigrant population

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Develop a scientifically independent opinion on demographic and emigrant issues

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Interpret data on Croatian and global population and emigration

Demographic databases

284728

Lecturer

prof. dr. sc.
Roko Mišetić

Course Description

The course focuses on two main topics. In the first half of the semester, the goal is to introduce students to database models, ways of creating, maintaining and searching them using structured query language (SQL). The second half of the course content includes introducing students to primary and secondary data sources in demography in Croatia and the world. The main goal is to train students to use, search and analyze them. The course is particularly important for creating awareness of the quantity of available data, but also for developing critical thinking about their quality and reliability.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and find appropriate sources of population to solve different types of problems
2. Explain the quality and convenience of data from different databases for different purposes
3. Recognize the regulations on the protection of the privacy of users and respondents
4. Compare and bring the data into the form required for further analysis (data cleaning)
5. Develop the skills needed to create new databases
6. Use databases by setting up structured queries using the SQL programming language

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Use statistical, quantitative, graphic and geographic software packages

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

ECTS Credits 3.0

Semester Summer

English Level L1

E-learning Level L2 (10%)

Study Hours
30
15

Teaching Assistant
Ivan Nađ, mag. educ.
math.

Grading

Continuous attendance, active participation in all forms of teaching, and passing exams. Preliminary exams replace the written exam, if passed successfully.

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration
Interpret data on Croatian and global population and emigration

General Competencies

Use statistical, quantitative, graphical and geographical software packages.

Implement analytical and scientific procedures for predicting and modeling the future.

Develop cognitive and operational skills for conducting research relevant to development concepts and homeland security.

Develop a critical attitude towards statistical data and literature relevant to population and Croatian emigration research. Develop professional and scientific skills that will contribute to the effectiveness of activities related to the demographic and emigration value system.

Interpret data on the Croatian and World population and emigration.

Learning Outcomes - Intellectual (Cognitive) Skills

Explain the basic concepts of relational and other database models.

Critically analyze the structure of a database and identify the advantages and disadvantages of different design models.

Understand and apply the principles of normalization to ensure consistency and efficiency.

Evaluate different approaches to data storage and retrieval in the context of performance and security.

Develop the ability to connect theoretical concepts with practical applications in demography.

Critically analyze the sources and quality of demographic data (census, vital statistics, administrative sources, international databases).

Distinguish and compare different methodological approaches to collecting and processing demographic data.

Apply logical and analytical thinking when connecting data from different sources and interpreting demographic trends.

Recognize ethical and methodological challenges when processing personal and sensitive data in demography.

Learning Outcomes - Practical and Generic Skills

Independently design and implement a relational database.

Create efficient SQL queries for entering, updating, retrieving and analyzing data.

Apply normalization and optimization procedures in practice.

Manage security aspects of databases (user access, rights, data protection).

Solve practical problems related to data storage and processing in real scenarios.

Develop the ability to critically approach information and data and present them clearly and structured.

Develop independent learning skills.

Connection of Learning Outcomes and Grading

Explain the basic concepts of relational and other database models.

Assessment: homework, discussion in exercises.

Critically analyze the structure of a database and identify the advantages and disadvantages of different design models.

Assessment: discussion in exercises, written exams.

Understand and apply the principles of normalization to ensure consistency and efficiency. Assessment: homework, ongoing monitoring, discussion in exercises, written exams.

Evaluate different approaches to data storage and retrieval in the context of performance and security. Assessment: homework, ongoing monitoring, discussion in exercises, written exams.

Develop the ability to connect theoretical concepts with practical applications in demography. Assessment: homework, ongoing monitoring, discussion in exercises, written exams.

Critically analyze the sources and quality of demographic data (census, vital statistics, administrative sources, international databases). Knowledge assessment: discussion during exercises, written exams.

Distinguish and compare different methodological approaches to collecting and processing demographic data. Knowledge assessment: discussion during exercises.

Apply logical and analytical thinking when connecting data from different sources and interpreting demographic trends. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Recognize ethical and methodological challenges when processing personal and sensitive data in demography. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Independently design and implement a relational database. Knowledge assessment: homework, continuous monitoring, written exams.

Create efficient SQL queries for data entry, updating, retrieval and analysis. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Apply normalization and optimization procedures in practice. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Manage database security aspects (user access, rights, data protection). Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Solve practical problems related to data storage and processing in real scenarios. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Develop the ability to critically approach information and data and their clear and structured presentation. Knowledge assessment: discussion during exercises.

Develop independent learning skills. Knowledge assessment: homework, continuous monitoring.

Screening of student's work

¹

Demographic Projections and Simulations

269704

Course Description

To equip students with knowledge and understanding of population movement projections and the importance of social and economic carriers

activities in the creation of macroeconomic policies.

To develop skills, abilities and competences for the successful execution of projections and simulations on the basis of which it is possible to direct and plan

necessary economic, social, educational, health and other capacities

Study Programmes

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the dynamics of age-structured and interactive populations
2. Describe the indicators of aging and how to evaluate them
3. Prepare data for population projection
4. Predict population development using the cohort-component approach
5. Define scenarios in terms of aggregate indicators
6. Explain the basics of microsimulation models

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Use statistical, quantitative, graphic and geographic software packages

Carry out analytical and scientific procedures of forecasting and modeling the future

Interpret data on Croatian and global population and emigration

Week by Week Schedule

1. Matrix record
2. Modeling and simulation of nonlinear populations
3. Programming in R statistical software
4. Dynamics of interactive populations
5. Generation of fertility and mortality scenarios using the Brass method
6. Projection of households
7. Projections of selected countries
8. UN projections
9. Croatian population projections

Demographic Statistics

269721

Lecturer

doc. dr. sc.
Luka Šikić

Course Description

Acquire basic statistical knowledge of methods and models that can be used in demographic analyzes. Understand the possibilities of applying statistical methods.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze demographic's data using appropriate statistical methods
2. Combine different statistical methods for demographic analysis purposes
3. Describe the dynamics of demographics.
4. Describe data sources
5. Analyze the data collected
6. Explain the concepts and measures used in demographic statistics

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Use statistical, quantitative, graphic and geographic software packages

Propose political and legal solutions based on scientific research of demographic and emigrant content

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Interpret data on Croatian and global population and emigration

ECTS Credits 3.0

Semester Winter

English Level L1

E-learning Level L2 (10%)

Study Hours 30

Teaching Assistant
Ivan Nađ, mag. educ.
math.

Grading

Continuous attendance, active participation in all forms of teaching, and passing exams. Preliminary exams replace the written exam, if passed successfully.

General Competencies

Demonstrate the ability to scientifically conceptualize a topic and write and present scientific papers.

Use statistical, quantitative, graphical and geographical software packages.

Propose political and legal solutions based on scientific research on demographic and emigration issues.

Implement analytical and scientific procedures for predicting and modeling the future.

Develop cognitive and operational skills for conducting research relevant to development concepts and homeland security.

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration.

Interpret data on the Croatian and World population and emigration.

Learning Outcomes - Intellectual (Cognitive) Skills

Independently solve simple and complex statistical problems.

Apply deductive and inductive reasoning.

Analyze statistical models and assess their applicability in solving demographic problems.

Interpret quantitative data and translate them into demographic indicators while understanding their limitations.

Develop the ability to critically read professional literature in the field of demographic statistics.

Learning Outcomes - Practical and Generic Skills

Apply statistical models to specific demographic data.

Apply statistical models to calculate demographic indicators.

Improve statistical literacy and the ability to accurately express and argue conclusions.

Develop critical thinking.

Make simple population projections.

Connection of Learning Outcomes and Grading

Solve simple and complex statistical problems independently. Knowledge assessment: homework, continuous monitoring, written exams.

Apply deductive and inductive reasoning. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Analyze statistical models and evaluate their applicability in solving demographic problems. Knowledge assessment: discussion during exercises.

Interpret quantitative data and translate them into demographic indicators while understanding their limitations. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Develop the ability to critically read professional literature in the field of demographic statistics. Knowledge assessment: homework.

Apply statistical models to specific demographic data. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Apply statistical models to calculate demographic indicators. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Improve statistical literacy and the ability to precisely express and argue conclusions. Knowledge assessment: homework, discussion during exercises.

Develop critical thinking. Knowledge assessment: discussion during exercises.

Create simple population projections. Knowledge assessment: homework, continuous monitoring, written exams.

Descriptive Statistics

186022

Lecturer

Toni Babarović,
nasl. prof. dr.
sc.

Course Description

Introducing students to different kinds of data, gathered in professional and scientific examination/measurement, and enabling students for their recognition. Presenting different kinds of empirical data description via tables, graphs, measures of central tendency and variability, and preparing the students for successful selection of the appropriate descriptors for specific kind of data. Systematic informing of students on procedures for determination the position of individuals result in a group, and procedures for evaluating the relations between two or more sets of data, but also to train the skills of appropriate application of these procedures. Training students in critically choosing proper descriptive statistics procedures based on their advantages and limitations, as well as in independently conducting of the procedures and proper interpreting of the results attained. Demonstrating crucial concepts of probability theory for statistical procedures in social disciplines (especially random variables) and integrating them into students understanding of social processes, as a basis for explaining test statistics and related theoretical distributions in inferential statistics.

Study Programmes

» Psychology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Choose the most appropriate procedures for description and presentation of some data set, related to one or more variables
2. Illustrate examination results via the most appropriate graphs and tables
3. Calculate all measures of central tendency, variability and position of an individual result in a group
4. Apply basic concepts of probability calculus in social processes comprehension
5. Explain characteristics of discrete and continuous random variables and related theoretical distributions
6. Evaluate the importance of normal distribution and apply their characteristics in solving problems/exercises in psychological phenomena that assume normal distribution of related variable
7. Demonstrate and describe interrelation two and more observed variables by calculating appropriate correlation indicators

Week by Week Schedule

1. Introduction to Descriptive statistics course silabus; Definition, importance and division of statistics; Basic concepts of statistics: entity, sample, population and attribute/variable
2. Definitions and examples of measurement in psychology; Measurement scales: definitions, examples, characteristics and appropriate statistical procedures; Variables: definitions, divisions and examples

3. Data distributions: definition and reasons of application. Tabular data description: basic features, sorts, and grouping of results. Graphical data description: definition, purpose, sorts of, elements and rules of construction
4. Measures of central tendency (Mean, Median, Mod, Geometric and Harmonic mean): definition, purpose, assumptions, typical situations, modes of calculation. Basic distribution forms determinant of central tendency measure
5. Measures of variability (Range, inter-quartile range, M.A.D., variance, standard deviation, Coefficient of variability): definition, assumptions, typical situations, modes of calculation, advantages and limitations
6. Basic concepts of probability (probability experiment, elementary event, event); Definition of probability and relation psychological variable and statistics; Properties and basic laws of probability; Basic concepts of combinatorics: basic lemma of combinatorics, combinations and permutations without replication
7. Discrete random variable: definition, distribution, probability function, distribution function, expectation and variance; Important discrete distributions: Binom, Multinom, and Hypergeometric
8. Continuous random variable: definition, distribution, probability function, distribution function, expectation and variance; Normal distribution the most theoretical distribution in psychology: generic presumptions, probability function, distribution function and important features; Zdistribution: genesis, purpose and properties
9. General linear transformations of data in relation to standardizing; Percentiles and deciles: definitions, specific situations, modes of calculation, advantages and limitations; Other important theoretical distributions of continuous variable: uniform, t-, χ^2 -, F-distribution)
10. Statistical relations between two variables: purpose, basic logic and graphical presentation (scatter diagram); Pearson correlation: assumptions, derivation, modes of calculation, basic features, and interpretation determinants; Coefficient of determination and alienation
11. Correlation and causal relations; Correlation and linear regression; Regression line and prognosis: definition, derivation and interpretation; Prognosis error (definition and operative calculation) and adjacent concepts (homoscedascity and normality of conditional distributions, confidence interval).
12. Multiple regression: definition, basic logic, purpose and limitations; Two forms of multiple regression equation: layout, coefficient interpretation, two predictor case; Multiple correlation coefficient and prognosis error; Partial correlation: definition, purpose, coefficient derivation
13. Pointbiserial and biserial coefficient: definitions, specific situations, modes of calculation and specific problems; Spearman (r_s) and Kendall (τ) rank correlations: definition, specific situations, modes of calculation, advantages and limitations.
14. Freeman Theta and Kendal W : definition, specific situations, modes of calculation, advantages and limitations, interpretation
15. Test

Differential Psychology

28722

Lecturer

Boris Mlačić,
nasl. prof. dr.
sc.

Course Description

Explain individual differences to students as well as meaning of those differences to society in general and psychology in particular. Explain measurement of individual differences. Look at individual differences in abilities, personality and creativity. Analyze genetic and environmental contributions to those differences. Describe development of theories and models of intelligence. Describe development of theories and models of personality. Argue for importance of intelligence and personality in everyday life.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and distinguish between different theoretical approaches in personality;
2. Explain and distinguish between different theoretical approaches in intelligence;
4. Interpret results of research in differential psychology;
5. Analyze scientific studies of individual differences.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge theoretical approaches to the study of individual differences

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Review the historical development and theoretical approaches in

5 ECTS

Forms of Teaching

- » Predavanja
 - » Lectures are held every week.
- » Seminar
 - » Seminars are held in cycles after a few lectures.

Week by Week Schedule

1. Introductory lecture.
2. History of differential psychology, dimensions and measurement of individual differences.
3. Intelligence: definitions, testing history and models of intelligence.
4. Intelligence: models of intelligence and measurement.
5. Intelligence and life outcomes (schooling and work).
6. Special and exceptional intellectual abilities.
7. Evaluation of psychology of intelligence.
8. Personality - concept and measurement of personality traits, dimensional models of personality (Eysenck's model).
9. Personality - dimensional models of personality (Big-Five and Five-factor model of personality).
10. Biological basis of personality, personality neuroscience.
11. Personality and life outcomes (schooling, work, romantic relationships, health).
12. Theories of "hot" intelligence (social, practical and emotional intelligence).
13. Creativity - intelligence, other ability or personality trait, creativity and arts and science.

14. Individual differences in motivation and emotions.
15. Evaluation of personality psychology, theories of intelligence and creativity.

Course Description

The increasing presence and popularity of technologies such as broadband, mobile internet, social networks and IPTV fundamentally change the way we work, that we have fun and the way we consume media. The convergence of media is no longer future, but rather a framework in which modern media and mass communication operate. What occurs is intertwining, merging and combining of various media with the help of telecommunications functionally into one. Ultimately, the convergence of media results in a change of the organization of media, content and manner of its distribution, habits and the role of consumers, who from consumers of media content become "prosumers" and, also, in new approaches to media management, advertising, marketing and public relations. The main objective of this course is to familiarize the students with this new framework, which has changed the mass media and journalism in general, but also communicology, which previously studied media as separate media platforms, and now must study them as a combination of multiple platforms and accordingly adjust research methodology. The students will also be introduced to the rules and regulations imposed by the new media and consumers themselves, and the knowledge of how to create a rounded digital identity in the 21st century (of a journalist, as well as of a media product). Accordingly, the students will during the course acquire knowledge and skills that are necessary for their work in a converged media environment and so they could exploit the opportunities offered to them on individual platforms, and ultimately allow them to create their own media product during the course, adapt it to various technological devices and place it on the market.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts of media convergence and converged journalism;
2. Identify, understand and describe the place and role of media convergence in the contemporary journalism and society;
3. List, explain, recount and apply the basic theory of the convergence of media and of journalism which arose from it;

4. Identify, explain and critically analyze the contemporary situation, development and challenges, positive and negative, in this area;
5. Use converged media;
6. Produce announcements for converged media applying the acquired journalistic skills necessary to work in a converged media environment;
7. Distinguish, define and explain the specific characteristics of converged media, recognize the specificities of their operation;
8. Demonstrate effective completion of tasks independently and in a team;

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Prepare materials for media and public relations in Croatian and English

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Identify and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

General Competencies

Apply the knowledge about the basic concepts from communicology and journalism which are related to media convergence; Identify and describe the role and place of the convergence of media and journalism in the contemporary society; Reproduce, apply and explain the basic theories of media convergence and converged journalism; Explain and critically analyze the acquired theoretical and practical knowledge; Identify, explain and analyze the situation, innovations, challenges and problems of media convergence and converged journalism; Define, explain, distinguish and critically analyze the specific characteristics of converged media and their operation; Apply the acquired journalistic skills of converged journalism in reporting for the media.

Forms of Teaching

- » Predavanja
 - » The professor is reading theoretical material and giving practical examples
- » Seminar
 - » Each group acts as one editorial office, students fill out the assigned assignments, create converged media content

Week by Week Schedule

1. Introduction to basic concepts
2. Objectives of media convergence
3. Comparison of the characteristics of traditional and converged media
4. Specific characteristics of journalism in a converged media environment
5. Specific characteristics of journalism in a converged media environment
6. Converged redaction of structures, news selection, production
7. Converged redaction of structures, news selection, production
8. Media content of converged media, special characteristics, differences in relation to the content of traditional media
9. Media content of converged media, special characteristics, differences in relation to the content of traditional media
10. Infotainment product of converged media
11. Management of converged media - ways of business operation, specific characteristics of advertising and marketing approaches
12. Management of converged media - ways of business operation, specific characteristics of advertising and marketing approaches
13. Business communication via converged media, adaptation of public relations to new platforms and channels
14. Business communication via converged media, adaptation of public relations to new platforms and channels
15. Converged audiences from consumers to producers of media content

Dynamics and determinants of emigration

194389

Lecturer

Marina Perić
Kaselj,
nasl. izv. prof.
dr. sc.

Course Description

Introduce students to qualitative and quantitative research methods (used in research of Croatia diaspora). Ability to apply and use specific research procedures / methods through specific research work.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use knowledge of the methodology of research on Croatian emigration
2. Use different approaches of qualitative and quantitative methodology
3. Apply research techniques: research design, data processing and analysis, and production of a research report
4. Use specific research procedures / methods through specific research work
5. Use the basics of scientific research in the social sciences

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability to terminologically understand demographic and immigrant terms

Conduct relevant research on the Croatian resident and emigrant population

Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Interpret data on Croatian and global population and emigration

ECTS Credits 2.0

English Level L0

E-learning Level L1

Study Hours

15

15

Teaching Assistant
doc. dr. sc. Monika Bališa

Grading

Students must pass two exams, hold an oral presentation / seminar, written work / research report, and attend at least 12 classes

Week by Week Schedule

1. Introductory lecture
2. Paradigms in social science research
3. Empirical and normative theory in the social sciences
4. Fundamentals of scientific research in the social sciences
5. Phases and research processes
6. Research draft
7. Colloquium
8. Basics of qualitative methodology
9. Research questions and qualitative methods in data collection
10. Data analysis methods in qualitative research
11. Basic qualitative methodologies - Multivariate data processing methods
12. Field work
13. Data processing and scientific report writing
14. Colloquium
15. Repeating the coursework and preparing for the exam.

Early-Modern Croatian Literature

37436

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

Subject of instruction is divided into fifteen sections. They are formed on the basis of chronology but at the same time they include the thematic and genre systems. Subject covers the following canonical authors of the Croatian Renaissance: Benedikt Kotruljević, Ivan Česmički, Marko Marulić, poets of Ranjina Collection, Mavro Vetranović, Nikola Nalješković, Hanibal Lucić, Vinko Pribojević, Petar Hektorović, Peter Zoranić, Marin Držić, Mikša Pelegrinović, Sabo Bobaljević, Antun Sasin, Brne Krnarutić, Dominko Zlatarić, Matija Vlačić, Faust Vrančić. Their texts as well as texts less typical but not less important written by literary personalities of the second grade are going to help students in building diachronic view of dominant genres in literature of early modern time. In doing so, we stress the genre of Renaissance drama in comparison with medieval poetics of the space, then also we are going to study profoundly the occurrence of tragedies in the second half of the sixteenth century, than the development of poetry of early renaissance in relation to tendencies of mannerism in early modern poetry. Also will be studied poetic and non poetic nonfiction and fiction texts from that era, as well as didactic questions. Students will acquire the knowledge of ideological concepts and ideologies as well as the changes in style and stylistic formation especially with regard to the relationship between the Renaissance and Medieval and then with the crisis of Renaissance known in stylistic terms as mannerism. In this part of subject with special attention will be studied the books of Burckhardt, Huizinga and Hocke. In details will be described literature in Latin that was established in renaissance Dubrovnik and Dalmatia and also at the Korvin court in Buda With students will be discussed the issues of Protestants within the Croatian literature and its relations with humanistic tradition. With special attention students will be familiarized with the phenomenon of women in the Renaissance, especially with the texts of Marija Gundulić Gozze and Nada Vittoria Speranza Bona. For students will be prepared material on the comparative aspects of Croatian Renaissance literature, especially the relationships with Italian literature of that time, but also the Croatian texts from renaissance will be compared with similar examples in other European literature. During the work we are going to study the numerous texts from the edge of literary space, especially scientific, history writing and philosophical works, as well as those who, though not written with the literary intention show the spiritual level and preoccupations of that time. During work with students will be discussed work of the leading writers who wrote not only in the Croatian language but in other languages such as Italian and Latin.

Grading

From the students it is required to participate actively in all forms of teaching. Monitoring and evaluative activities will be applied during the teaching process. Each program assignment (including the written seminar papers) will be included in the formation of the final grade. Students will be tested for their commitment by passing all requirements and at the end during regular examination time they will undergo the written and oral exam.

1. The role of Italians in Croatian humanism: Giovanni of Ravenna, Ciriacco from Ancona, Philippo de Diversis, Tideo Acciarini, Ludovico Beccadelli. The book *Asian War* by Coriolanus Cippico. Croatian role at the Korvin Court in Buda. Nikola Modruški as an important witness of his time. Poets in Latin Ilija Crijević, Jakov Bunić, Karlo Pucić, Damijan Beneša.

Seminar: Benedikt Kotruljević: The book on Trade and Perfect Merchant.

2. Ludovik Crijević, historian of papal Rome during the reign of the Borgias. Vinko Pribojević, and his speech on greatness of the Slavs. Literature of other Slavic nations in the Renaissance.

Seminar : Vinko Pribojević: On Greatness of the Slavs

3. The first school of Croatian poetry: Petrarchism in Nikša Ranjina Collection. Personalities of Džore Držić and Sigismund Menčetić. Hanibal Lucić his poetry and drama *The Slave Girl*. Mavro Vetranović: *History of Diana*. *Hunter and villa*. *Orfeo*.

Seminar : Lucić : *The Slave Girl*. Vetranović *Slaves*

4. Library of Marko Marulić and the question of his education. Analysis of Marulić's *Judith*. Prayer against the Turks. Marulić's Latin works. Davidias as humanistic example of ancient and medieval poetic knowledge.

Seminar : Marko Marulić: *Suzana*. Marko Marulić: *Carnival and Lent*. *Anka satire*.

5. New theories of drama and their metamorphosis during the sixteenth century. The development and interpretation of dramatic literature in the renaissance Europe. Comedy *Grižula* and its relations to Shakespeare's *Midsummer Night's Dream*.

6. Petar Hektorović: *Fishing and Fishermen conversation*. Petar Zoranić: *Mountains*. *Pilgrims in Dalmatia* and other foreign passengers during the sixteenth century. Bartul Gjurgjević and his Turkish episodes.

Seminar : Mavro Vetranović: *The Abraham Sacrifice*; *How Brothers Sold Joseph*.

7. Life of Marin Držić. The interpretation of the document when he was chosen to the status of canonic. The problem of truth. Siena episode in his life. Travelling with count Rogendorf. The scandal of alleged plagiarism. Statement on the death of Pero Primović.

Seminar: Držić's Conspiratorial letters to Cosimo I de 'Medici.

8. Analysis of Burckhardt book *Culture of the Renaissance in Italy*. Critics and interpreters of this book. Pastoral tradition in the fifteenth and sixteenth century, its sources and ideological signs. Tasso's *Aminta* and his Croatian anticipator. The influences of Tasso's work in Croatian literature. Seminar: Marin Držić: *Tirena*; *The Miser*.ž

9. Prolog of *Negromant* from the *Great Indies* and his interpreters. Question of literary twins in comedy *Pjerin*. Possibility of new historic interpretation of Držić's dramas and nonfiction texts.

Seminar : Marin Držić: *Uncle Maroje*; Conspiratorial letters to Cosimo I de 'Medici.

10. Women contribution in the Croatian literature during the sixteenth century. Circle of Cvijeta Zuzorić. The authors of the Bay of Kotor in the sixteenth century and their participation in the history of Croatian literature. Poets Bobaljević and Ranjina. Antun Sasin. Mannerism.

Seminar: Marija Gundulić Gozze: Preface to husband's book. Other Women Writings.

11. Renaissance tragedies: Držić Hecuba ; Bunić : Jokasta ; Gučetić : Dalida ; Lukarević : Atamante ; Zlatarić : Elektra ; Brne Krnarutić : Myth of Sigeth and Zrinski in the Croatian literature.

Seminar : Sabo Gučetić: Dalida

12. Comedy in Croatian literature after Držić. Commedia dell'arte and its poetics. Martin Benetović. Generic system in Croatian Renaissance literature.

Seminar : Martin Benetović : The Woman from Hvar

13. Three Renaissance writers from the central Croatia: The iconography of Turks in the works of Bartol Gjurgjević. Life and works of adventurer and religious convert Andrija Dudić. Renaissance Systematization of knowledge in the Encyclopedia of Pavle Skalić. Seminar: Croatian lexicography from Skalić to our time.

14. The relation of Protestantism to humanism. Erasmus of Rotterdam and its relations with the Croats. Baldo Lupetina case. Matija Vlačić, his life and works. The contribution of Matija Vlačić to the theory of literary texts and hermeneutics. Urach mission, its participants and achieved results.

Seminar: Matija Vlačić and his Key of Old Testament in the light of modern theory of literature.

15. Faust Vrančić at the court of Rudolph II. Mannerism in Croatian literature. Vrančić's uncle Antun as a travel writer. The impact of the early Jesuits in Croatian literature.

Seminar: Itinerary as autobiography: Antun Vrančić, Journey from Buda to Hadrianopolis.

Study Programmes

» Croatology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze of the texts from the literature of Croatian Renaissance.
2. Identify of literary genres of Renaissance and analyzing the texts.
3. Develop of the ability of thematic analysis of literary works.
4. Develop of the ability to literature works as the sources for the history of ideas.
5. Identify of literary genres in the Croatian Renaissance literature.
6. Develop of the ability to read and to interpret literary works as sources for the history of ideas, of mentality and of Croatian national identity.
7. Apply of the methodology and concepts suitable for the study of literary works of Croatian Renaissance.

8. Develop of the ability of critical thinking in writing term papers based on primary and secondary literature.

Study Programme Learning Outcomes

Croatology

Single out and interpret the characteristics of the Croatian Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms
Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

General Competencies

Participants will be instructed about the importance of Renaissance for the formation of Croatian and other national identities. Also students will be thought about the various cultural components of that identity in the context of Western Europe and its nations. Students will understand the cultural and historical context of the Croatian Renaissance literature. They will be able to explain the values and meanings of the canonic texts of Croatian Renaissance literature written in the language of that time. They will be able to recognize the characteristics of Croatian and Western identity in literary works of Croatian Renaissance. They will be able to use scientific and secondary sources during the interpretation of the literary works of Croatian Renaissance literature.

Week by Week Schedule

1. The role of Italians in Croatian humanism: Giovanni of Ravenna, Ciriaco from Ancona, Filippo de Diversis, Tideo Acciarini, Ludovico Beccadelli. The book *Asian War* by Coriolanus Cippico. Croatian role at the Korvin Court in Buda. Nikola Modruški as an important witness of his time. Poets in Latin Ilija Crijević, Jakov Bunić, Karlo Pucić, Damijan Beneša.
Seminar: Benedikt Kotruljević: The book on Trade and Perfect Merchant.
2. Ludovik Crijević, historian of papal Rome during the reign of the Borgias. Vinko Pribojević, and his speech on greatness of the Slavs. Literature of other Slavic nations in the Renaissance.
Seminar : Vinko Pribojević: On Greatness of the Slavs
3. The first school of Croatian poetry: Petrarchism in Nikša Ranjina Collection. Personalities of Džore Držić and Sigismund Menčetić. Hanibal Luciћ his poetry and drama *The Slave Girl*. Mavro Vetranović: History of Diana. Hunter and villa. Orfeo.
Seminar : Lucic :The Slave Girl. Vetranović Slaves
4. Library of Marko Marulić and the question of his education. Analysis of Marulić's *Judith*. Prayer against the Turks. Marulić's Latin works. Davidias as humanistic example of ancient and medieval poetic knowledge.
Seminar : Marko Marulić: Suzana. Marko Marulić: Carnival and Lent. Anka satire.
5. New theories of drama and their metamorphosis during the sixteenth century. The development and interpretation of dramatic literature in the renaissance Europe. Comedy *Grižula* and its relations to Shakespeare's *Midsummer Night's Dream*.

6. Petar Hektorović: Fishing and Fishermen conversation. Petar Zoranić: Mountains. Pilgrims in Dalmatia and other foreign passengers during the sixteenth century. Bartul Gjurgjević and his Turkish episodes.
Seminar : Mavro Vetranović: The Abraham Sacrifice; How Brothers Sold Joseph.
7. Life of Marin Držić. The interpretation of the document when he was chosen to the status of canonic. The problem of truth. Siena episode in his life. Travelling with count Rogendorf. The scandal of alleged plagiarism. Statement on the death of Pero Primović.
Seminar: Držić's Conspiratorial letters to Cosimo I de 'Medici.

Early Modern European and World History

38054

Lecturer

prof. dr. sc.
Darko Vitek

ECTS Credits	5.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	30

Grading

During classes, each student's activity will be monitored and will be reflected in the overall grade. Attendance is mandatory. The exam is written and oral.

Course Description

The main objectives of the course are to describe Early Modern period in simple and clear way, to explain interconnections of events and processes on a global level such as: absolutism, religion questions, scientific revolutions, witch-hunt, global trade, explorations etc.). All those topics will be used to compare cultural and political encounters on global level.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)
- » History (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe processes that shaped Early Modern period in Europe and World
2. Explain chronology stereotypes of the period
3. Identify the most important person and events 1500-1800
4. Explain cause and effect relations of the most important events of the period
5. List processes that 'prepared' Europe and the World for modern times
6. Evaluate specificities of the European regions and how they influenced the acceptance of Early Modern socio-political novelties
7. Appraise different historiographic interpretation of Early Modern period
8. Relate Early Modern social processes with contemporary ones
9. Compare processes and events in different European monarchies (France, Spain, Habsburg Monarchy etc)

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical

norms of research and publishing

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Identify historical facts and processes from European and national history

Name and describe individual historical periods

Identify important historical figures from different periods of European history

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Single out important historical figures from different periods of European history

Express (in your own words) the fundamental historiographic facts about world history

Critically judge one's own work and defend one's position with arguments in team work

General Competencies

After finishing the programme student will be able to:
describe historical processes,
identify the most important persons and institutions in the Croatian and the World history,
compare historical processes of different periods,
summarize basic information of the Croatian and the World history,
explain cause and effect relations of historical events and processes.

English Level L2

E-learning Level L1

Study Hours
30
15

Teaching Assistant
dr. sc. Ana Petak

Grading

Group Seminar (max 30 points) Written exam (max 70 points)

Course Description

Course objective is to familiarize students with systematic review of scientific terms and concepts in the field of emotion, and with the development, enrichment and applying scientific concept of emotion. Special emphasis is placed on the application of theoretical knowledge of psychology of emotions in everyday life and professional practice.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic principles of formation of emotional responses.
2. Explain the laws of emotional connection with the occurrence of other mental processes
3. Generalize factual knowledge about emotional phenomena to specific cases and developments in practice
4. Explain the relationships between emotions and other psychological processes.
5. Evaluate the achievements of research projects and scientific articles
6. Apply the knowledge gained from the course to create materials aimed at healthy emotional coping.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Plan the search of literature, databases and other sources of

information

General Competencies

2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.

English for Journalists

38002

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

To acquire techniques and strategies for reading comprehension related to journalism.

To improve students' language competence through the study of topic-related literature.

To develop new strategies of learner autonomy.

Study Programmes

- » Communication Studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply acquired skills and strategies for reading comprehension
2. Use authentic materials to further develop their communicative competence
3. Demonstrate the ability to rephrase the acquired topic-related vocabulary.
4. Express autonomously their views and attitudes related to the media, politics and business
5. Apply and integrate the acquired grammatical structures and language skills in writing short structured texts
6. Differentiate between the main styles and registers in quality press and tabloids
7. Compare and contrast different political regimes

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

ECTS Credits 4.0

Semester Winter

English Level L3

E-learning Level L1

Study Hours 60

Grading

Regular attendance and active participation in classes (20%); oral presentation of a topic of choice (10%); work on the course portfolio (30%); final exam (40%).

Prerequisites for
Modern English and the Media

Categorize and reexamine journalistic ethics
 Think critically about topics related to journalism, public relations, communications and society as a whole
 Organize individual and team work
 Write texts and prepare other materials for media and public relations in Croatian and English
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers
 Prepare and construct work assignments in the interdisciplinary field

General Competencies

Apply and make effective use of the acquired basic concepts related to journalism in the English language. Express themselves clearly and concisely in spoken and written word in the English language with emphasis on English for journalists and public relations. Explain and critically analyse the acquired theoretical and practical information. Make effective use of acquired skills in reporting for the media in the English language.

Zvonimir Čuljak

ECTS Credits	3.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	30
	30

Grading

On the basis of two tests results or written exam.

Course Description

Course objectives:

1. Present and explain the main epistemological concepts, theories, and arguments and enable students to understand and correlate them.
2. Enable students to analyze the main epistemological concepts and arguments.
3. Enable students for critical assessment of the major epistemological theories and arguments.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the main epistemological concepts (knowledge, epistemic justification, evidence, epistemic reasons, perception, introspection, rational intuition, testimony, a priori / a posteriori)
2. Explain the major epistemological theories (realism, anti-realism, empiricism, rationalism, foundationalism, coherentism, contextualism, infinitism, tripartite analysis of knowledge, causal theory of knowledge, reliabilism, defeasibility analysis, conditional theory of knowledge, internalism, externalism, naturalism)
3. Paraphrase the main epistemological arguments (e.g. argument from illusion, time gap arguments, argument from error, Russells hypothesis, Agrippas trilemma, brain-in-a-vat argument, Gettier counterexamples)
4. Explain the correlation between reasoning and inferential justification
5. Explain the difference between inferential and non-inferential justification
6. Distinguish between psychological and epistemological explanations of cognitive sources and processes

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

- Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods
- Analyze the basic assumptions for scientific understanding of the world
- Critically review different theories
- Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines
- Determine the position and importance of humanities in the general structure of science

General Competencies

Students will be able to: 1. understand and explain the main epistemological concepts with respect to the main logical, metaphysical and semantic problems; 2. understand and explain the major epistemological theories with respect to the related theories in metaphysics, ethics, philosophy of science and philosophy of mind, 3. apply epistemological arguments to the related problems in ethics and philosophy of science.

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

The aim of the course is to introduce the students into the ethical principles, dilemmas and approaches to psychology as a profession, and to other professions. Students will acquire knowledge on basic theoretical approaches, ethical principles, the process of ethical decision making, meta-codes and codes of ethics. Students will learn about ethical aspects of psychological research, with special emphasis on research with children. This course should enable the students to acquire basic knowledge on ethical principles, as well as ensure ethical approach to their profession, and their future practice.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concepts of ethics, morals and values, as well as theoretical schools in ethics.
2. Differentiate the basic ethical principles.
3. Analyze the approaches of professional ethics and general principles of psychological ethics.
4. Compare the Code of Ethics of the Croatian Psychological Chamber and the Meta-code of Ethics of the European Federation of Psychological Associations.
5. Demonstrate, individually and in group, the analysis of ethical dilemmas in professional work with people.
6. Apply the ethical principles to different fields of professional practice (clinical, educational, organizational, etc.)

Study Programme Learning Outcomes

Psychology

Create appropriate forms of communication and cooperation in different professional environments

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Determine the need for lifelong learning and professional development

ECTS Credits 2.0

Semester Winter

English Level L1

E-learning Level L2

Study Hours 30

Teaching Assistant
dr. sc. Iva Takšić, v. pred.

Grading

Students' achievement is continually evaluated through certain activities. A student can achieve a maximum of 50 points according to following arrangement: Regular attendance = 10 points; Activity during class = 10 points; Written group presentation content = 15 points; Oral Presentation = 15 points. Points are turned into final grade as follows: 26-31 points = pass (2); 32-37 points = good (3); 38-43 points = very good (4); 44-50 points = excellent (5).

General Competencies

8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.
14. Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.
18. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Forms of Teaching

- » Predavanja
 - » Two hours of lectures per week

Week by Week Schedule

1. Introduction to psychological ethics.
2. History review: Moral principles and ethics.
3. Theoretical approaches and general ethical principles. Interdependence of the four principles.
4. Professional ethics, ethics in the helping professions - fundamental principles of the psychological ethics: respect for a person's rights and dignity, competency, responsibility, integrity.
5. Demonstration of ethical standards and comparison of codes of ethics: Croatian Psychological Chamber, American Psychological Association, European Federation of Psychological Associations.
6. Standards of ethical behaviour, ethical issues, ethical decision making, risk vs. gain relationship.
7. Research principles and ethical issues. Ethics in research on animals: Pavlov's dogs, Skinner's pigeons.
8. Ethics in psychological research: Deception in Milgram's obedience study.
9. Ethics in psychological research: role playing and simulation - stress and harm in Zimbardo's Stanford prison experiment.
10. Ethics in psychological research with children: from Pavlov, and Watson, and on. Ethical code and ethical issues.
11. Ethics in psychological research on the Internet.
12. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
13. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
14. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
15. Conclusion: What have we learned?

Ethics in Journalism

28470

Lecturer

prof. dr. sc.
Mirko Lukaš

Course Description

The main objective of this course is to provide insight into the basic knowledge about journalism and media ethics, with special emphasis on its practical application in daily journalism and media work. The specific objective of this course is to prepare the students to understand journalism ethics as a practical philosophical discipline that deals with the specific morals and deontology of the profession, which must take into account the ethical codes and legal regulations which govern the journalistic and media profession, and which the students will have to adhere to themselves in journalistic practice.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare historical and contemporary ethical directions and principles of journalism and media professional ethics;
2. Explain and apply the basic universal principles, and concepts like morality, ethics, professional ethics and deontology of journalism and the media;
3. Explain the importance of knowing and respecting ethical and legal standards in as a public service profession;
4. Describe and explain the various ethical codes of journalism in the world;
5. Analyze and interpret the ethical and legal requirements which the print media, radio, television, new media, promotional activities and public relations in Croatia and abroad must adhere to;
6. Use the acquired knowledge about different ethical approaches to mass media;
7. Evaluate the quality of contemporary media from the ethical and moral standpoint;
8. Critically analyze media content from the moral standpoint;
9. Explain the reasons why it is necessary for every future communicologist to know journalism and media ethics.

Prepare and create different forms of presentations and seminar papers

General Competencies

The students will become familiar with the basic moral, ethical and legal principles, with a variety of traditional and contemporary ethical directions, especially with deontology of journalism and professional media ethics. The course will enable them to critically analyze and clearly distinguish truthful, objective and fair reporting on the events of public interest from the journalistic and media activity that is false, sensationalistic, scandal prone, morally unacceptable and legally punishable.

The students will be able support with arguments the reasons why some journalistic work is ethically acceptable, and why some is not, and in this sense they will be able to critically analyze all types of media: print, radio, television and new media. They will acquire this competence by working on a common blog, where, together with all the participants of the course they will acquire and develop skills of critical consideration, presentation and analysis of the journalism and media ethics.

Week by Week Schedule

1. Anthropological-philosophical foundation of communication: interpersonal communication and social communication; subject, its veracity and morality/ethics in communication;
2. Philosophical ethics: definition of ethics; from Aristotle to the present day; Kant: morality from reason; paradigm: Sartre-Heidegger-Marcel/Levinas; contemporary ethical directions;
3. Deontology of journalism: term and definition;

4. Social communication ethics: foundation of the communication ethics; goals and standards of social communication ethics, journalism and media ethics;
5. Doctrinal content of journalism ethics: truth, objectivity, information source, professional secret, right of privacy, correction, professional integrity, copyright and plagiarism, the prohibition of war propaganda, promotion of democracy and peace;
6. Media ethics: ethics of the press; radio ethics; television ethics;
7. Ethics in advertising/promotion; ethics in the cinema/on film; ethics of public relations/spokesmanship, the new media (Internet - Facebook) - a new morality?;
8. Self-regulation and regulation of journalists: journalistic codes: differences between regulatory and self-regulatory acts; Code of Honour of Croatian Journalists (2009);
9. International journalistic codes: Declaration of Principles on the Conduct of Journalists; Munich Declaration, UNESCO International Principles of Professional Ethics in Journalism; Danish code of professional conduct; Journalistic Code of the Voice of America;
10. International journalistic codes: Declaration of Principles on the Conduct of Journalists; Munich Declaration, UNESCO International Principles of Professional Ethics in Journalism; Danish code of professional conduct; Journalistic Code of the Voice of America;
11. Introduction to law: international documents on human rights;
12. Right to privacy: protection of dignity, reputation and honor;
13. Protection of children in the media;
14. The right of access to information, the right of reply and correction;
15. The responsibility of the recipient - the view from the other side: the Decalogue of the Italian advisory council of media users.

Everyday Life in Ancient Rome

33169

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

Purpose of this course is to become acquainted with Roman everyday life and customs, such as living space, magistracies, religion, calendar, business, diet, army, entertainment, taking into account also the repressed social groups: women and slaves. Seminar includes reading the selection of text and preparing for a discussion. Students are required to: attend classes, prepare the texts, and pass the exam after the semester is over.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » History (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » History (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

English Level L2

E-learning Level L1

Study Hours
15
15

Grading

Parts of the final evaluation are:
participation in class, preparation and presentation of specified tasks, achievement on written and oral exam. It is necessary to present a paper before the exam.

- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Translate and comment the texts of Roman literature, understanding the context in which they were written
2. Compare the life of Romans and other people
3. Produce scientific papers on Roman civilisation and their way of life
4. Recognise and describe the remains of Roman culture in Croatia.
5. Explain basic concepts of ancient Roman culture, especially in areas of politics, army, religion and everyday life.
6. Specify the basic changes that Roman society went through during its historical development
7. Recognise the elements inherited from Rome in the Western civilisation.
8. Enumerate those Roman influences that marked the Western civilisation and our way of life.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Think critically about topics related to journalism, public relations, communications and society as a whole
Organize individual and team work
Recognize the needs and willingness to engage in lifelong learning
Prepare and create different forms of presentations and seminar papers
Prepare and construct work assignments in the interdisciplinary field

History

Identify historical facts and processes from European and national history
Single out historical processes and explain their topic of interpretation
Express (in your own words) basic historiographical facts about world history
recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values
Apply the methodology of various historiographical fields and other research methods from the humanities

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Determine the need for lifelong learning and professional development

Sociology

Forms of Teaching

- » Predavanja
 - » 1 hour per week
- » Seminar
 - » 1 hour per week

Week by Week Schedule

1. Introductory remarks on the Roman state: its history, literary sources, Roman citizen, his rights and duties etc., accompanied by the examples from ancient Roman texts.
2. Roman housing: domus, insula, villa and interior decorations; problems of Roman cities. Most famous buildings, especially on the Forum Romanum, and remains of Roman estates in Croatia are mentioned, accompanied by the examples from ancient Roman texts.
3. Roman nutrition: main dietary products, social customs, distribution of meals, organisation of feasts, etc., accompanied by the examples from ancient Roman texts.
4. Roman upbringing: childhood and education; clothing and coming of age of Roman men; accompanied by the examples from ancient Roman texts.
5. Responsibilities of a Roman adult: politics in the Roman state (magistrates, social classes, elections...), accompanied by the examples from ancient Roman texts.
6. Roman workday: most common professions, basis of Roman economy, system of currencies and measures, accompanied by the examples from ancient Roman texts.
7. Roman army: organisation in various periods of the Roman state, equipment, duties, conditions of a military life etc., accompanied by the examples from ancient Roman texts.

8. Roman entertainment: amphitheatres, theaters, circuses, baths; adult games etc., accompanied by the examples from ancient Roman texts.
9. Position of women in Rome, their rights and obligations, clothing, jobs and ways of spending free time, accompanied by the examples from ancient Roman texts.
10. Position of slaves in Rome: ways of becoming a slave, his duties, conditions of life, uprisings and manumissions; accompanied by the examples from ancient Roman texts.
11. Roman deities: 12 main gods with their attributes and functions; various minor deities, accompanied by the examples from ancient Roman texts.
12. Roman religion: foreign influences, main customs (sacrifices, burials), types of priests, temples etc., accompanied by the examples from ancient Roman texts.
13. Ancient Roman calendar: counting the hours, days, weeks, months and years, along with the Julian reform; accompanied by the examples from ancient Roman texts.
14. Fundamentals of ancient Roman law: sources; courts and litigations etc., accompanied by the examples from ancient Roman texts.
15. Students' choice: Q&A

Exact Sciences in Croatian Culture

188082

Lecturer

prof. dr. sc.
Zvonimir Čuljak

ECTS Credits	3.0
Semester	Winter
English Level	L1
E-learning Level	L1 (5%)
Study Hours	15
	15

Grading

Based on two tests and, optionally, a seminar presentation, or written exam

Course Description

The course is intended to:

1. explain the correlation of science and culture in general
2. present the development of exact sciences in Croatian culture with respect to the development of exact sciences in European culture,
3. explain the main determinants of that development and the main characteristics of particular periods in the history of exact sciences in Croatian culture
4. present the major discoveries and innovations as well as other contributions of Croatian scientists in the history of science and culture
4. enable students to understand and explain the role of exact sciences in the history of Croatian culture
5. enable students to analyze and evaluate the contributions of Croatian scientists in the context of Croatian and European cultures.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Croatology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Relate exact sciences and the culture in general
2. Compare the development of exact sciences in Croatian culture with the development of exact sciences in European culture
3. Explain the main determinants of the development of exact sciences in Croatian culture
4. List the main characteristics of the particular periods in the history of exact sciences within Croatian culture
5. List the major discoveries and innovations as well as other contributions of Croatian scientists
6. Analyze and evaluate the contributions of Croatian scientists in the context of Croatian and European cultures

Study Programme Learning Outcomes

Dual-major studies

Croatology

Identify different theoretical approaches to the study of Croatian culture

Mark, explain and interpret the role of exact sciences in the history of Croatian culture

Croatology

Identify different theoretical approaches to the study of Croatian culture

Constructively participate in discussions on croatological topics

Explain and analyze the components of Croatian culture and their connection

Mark, explain and interpret the role of exact sciences in the history of Croatian culture

Screening of student's work

3
ECTS Kolokviji [EN]

ECTS Referat [EN]

3
ECTS

Week by Week Schedule

1. Introduction: exact sciences and culture; the main determinants of the history of exact sciences in Croatian culture
2. European science in the Late Antiquity and in the Middle Ages
3. Exact sciences in the Croatian Middle Ages (I): a) the earliest scientific knowledge among Croats; b) scientific work of Herman the Dalmatian (ca 1100-1143)
4. Exact sciences in the Croatian Middle Ages (II): contributions of other medieval Croatian scientists
5. Exact sciences, discoveries, and technical innovations in the Croatian Renaissance
6. Modern European science: the Scientific Revolution of the 16th and the 17th centuries
7. Exact sciences in the Croatian Modern Age
8. Test
9. Ruđer Bošković's (1711-1787) scientific work: physics, mathematics, astronomy, optics, geosciences
10. Exact sciences in the Croatian Enlightenment and Post-Enlightenment period
11. Exact sciences in Croatia during the 19th century
12. Exact sciences in Croatia, discoveries and technical innovations of Croatian scientists at the end of the 19th and in the first half of the 20th century (I): contributions of prominent scientists
13. Exact sciences in Croatia, discoveries and technical innovations of Croatian scientists at the end of the 19th and in the first half of the 20th century (II): Croatian Nobel Prize winners
14. Test

15. Concluding discussion

Experimental Methods

200133

Lecturer

Goran Milas,
nasl. prof. dr.
sc.

Course Description

The main objectives of the course are to introduce students to the basics of the experimental methodology and the different modalities of its use. Through lectures, students will get to know the basics of the experimental methodology, the reasons for its use, and basic designs through which it is applied. Students will also be acquainted with the way of conceiving experimental research and writing a report or research paper based on it.

Study Programmes

» Psychology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the experimental designs and different modalities of their use - Analyze the different segments of experimental research approaches - Evaluate the experimental studies - Apply experimental designs in their own research - Create the research that will make advantage of the experimental design
2. Analyze the different segments of experimental research approaches
3. Evaluate the experimental studies
4. Apply experimental designs in their own research
5. Create the research that will make advantage of the experimental design

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

ECTS Credits 6.0

Semester Summer

- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and become acquainted with the facts, biographies, ideals, work and importance of individual Croatian greats outside the Motherland from the Middle Ages to the present day.
2. Explain and accept their existence as a Croatian contribution to human civilization and Croatian identity in Croatia and the world
3. Identify, explain and learn about the formation of public perception about famous Croats

4. Explain the overall social context of the actions of famous Croats in the world
5. Explain, understand and predict future opinions and the importance of their actions and sacrifices
6. Analyze the life and work of some famous Croats in the world as part of the research work.
7. Explain the historical and political conditioning of emigration, activities and appreciation of Croatian notable figures

Study Programme Learning Outcomes

prof. dr. sc.
Dubravka Zima

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours

15

15

Grading

Required reading - 30%

Participatin in class - 20%

Research - group work

20% Written work - 30%

Course Description

The course Female authorship in recent Croatian literature will cover about 170 years of female authorship in recent Croatian literature - from the 1830s, when Dragojla Jarnević appeared with her prose texts, until the end of the 20th century and contemporary authors. The goal of the course is to get students to read key texts of Croatian women's literature in the specified period, to understand the concept and implications of female authorship in the context of the period covered, and to supplement the study of contemporary Croatian literature.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 2nd semester, 1st year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 4th semester, 2nd year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 6th semester, 3rd year*)
- » Croatology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective courses, 4th semester, 2nd year*)
- » Croatology (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate poetics in the history of Croatian literature
2. Name and determine the key authors of recent Croatian literature
3. Explain the basic problems of the proces of literary canonization considering the gender of the authors
4. Apply teaching techniques and interpretations of literature

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical. orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Single out and interpret the characteristics of the Croatian Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms
Constructively participate in discussions on croatological topics
Identify, describe and argue the influence of European and world literature on the Croatian Literary Canon
Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication
Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs

Croatology

Screening of student's work

0.5	Pohađanje nastave [EN]

Week by Week Schedule

1. Introduction to the course. Obligations and tasks. Introduction to the study of literature. History of literature with regard to authorship. Theory of authorship. Concepts of female authorship. Seminar: review of the literature, instructions for taking the exam.
2. The history of Croatian literature from the author's perspective. Croatian recent literature with regard to female authorship. Seminar: Virginia Woolf: *A Room of One's Own*.
3. Romanticism in Croatian literature: authors. Seminar: Dragojla Jarnević: *Domoljubne poviesti*. Jagoda Brlić: *Poetry*.
4. Realism in Croatian literature: authors. Part 1. Seminar: Marija Jambrišak, Jagoda Truhelka
5. Realism in Croatian literature: authors. Part 2. Seminar: Milka Pogačić, Ivka Kralj
6. Protomodernism in Croatian literature: authors. Part 1. Seminar: Kristijana Solvejgs.
7. Modernism in Croatian literature: authors. Part 2. Seminar: Ivana Brlić-Mažuranić.
8. Modernism in Croatian literature: authors. Part 3. Seminar: Adela Milčinović, Zdenka Marković.
9. Literature in 1920's. Seminar: Mara Ivančan, Fedy Martinčić.
10. Marija Jurić Zagorka: Seminar: works of Marija Jurić Zagorka.
11. Croatian women poets in 20th Century. Seminar: Vesna Parun.
12. Croatian women novelists in 20th Century, part 1. Seminar: Višnja Stahuljak, Sunčana Škrinjarić.
13. Croatian women novelists in 20th Century, part 2. Seminar: Slavenka Drakulić, Daša Drndić.
14. Croatian authors in 21st Century. Seminar: Olja Savičević Ivančević.

15. Conclusion: on Croatian literary canon and female authorship.
Seminar: evaluation.

Fieldwork 1

226646

Lecturer

izv. prof. dr. sc.
Monika
Komušanac

Course Description

Course objectives: introduce students to methods of field research; develop in students' knowledge on the subject through field work; equip students to differentiate between and understand various approaches to field work research; introduce students to significance of population for spatial processes and relations through direct field research; equip students through field work to understand methods of discovery, identification, and defining of demographic terminology, categories, and laws; equip students for independent field research work; provide students with skills for application of standard and distinct methods and techniques of field work; make students aware of distinct field work methodology and ways of identifying spatial reflections; acquaint students with development of certain spaces of Croatia using field examples; develop in students the skills to use field work techniques; explain to students during field work the correlation between population and regional development; equip students through field work to understand, elaborate, and forecast future changes; develop in students the knowledge on vulnerability of spatial potential using case studies.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain, analyse and understand theoretical and methodological concept in demography and migrations and their applicability in field work
2. Explain, analyse and understand logic and functional organisation of space
3. Explain, analyse and understand strategic significance of population within the concept of regional balancing
4. Explain, analyse and understand correlation between natural basis, social upgrading, and political dynamics within a particular space
5. Explain, analyse and understand general and regional concept of a functioning organisation of space
6. Explain, identify, define, solve and forecasting of space-related issues
7. Explain, identify and solve spatial dissonance through field work

ECTS Credits 2.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistant
Ivan Nađ, mag. educ.
math.

Grading

Regular attendance in class, completion of preliminary exam, participation in class discussions, submission of independent research paper.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

- Demonstrate the ability to terminologically understand demographic and immigrant terms
- Conduct relevant research on the Croatian resident and emigrant population
- Develop cognitive and operational skills for conducting research essential for development concepts and homeland security
- Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.
- Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Forms of Communication in Journalism

37896

Lecturer

izv. prof. dr. sc.
Vladimira Rezo

ECTS Credits 6.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours 60

Teaching Assistant
dr. sc. Marko Pavić

Grading

Attendance and participation in exercises (30 percent), independent practical work (50 percent), oral exam (20 percent).

Course Description

The aim of the course is to create a routine students for becoming familiar with and engaging in genres of objective journalism—news story, report and interview—and teaching students how to recognize a publication-worthy event, how to obtain information and process it into a news story or report.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate knowledge functioning of the media / editorial board.
2. Identify and write the required journalistic forms.
3. Demonstrate the ability to independently monitor course of events.
4. Demonstrate the skills of independent collection and processing of information.
5. Demonstrate the skills of independent news writing, reporting..
6. Demonstrate the skills of independent independently conduct an interview.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
adherence to grammatical. orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society
Inform about journalism and public relations

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize and describe Croatian language culture and use language skills in journalistic and proofreading jobs

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Inform about journalism and public relations

Prepare materials for media and public relations in Croatian and English

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Identify and compare the peculiarities of individual media

Identify and describe Croatian language culture and use language skills in journalistic and proofreading jobs

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of journalism, primarily those related to the types of information and news media coverage and practical work of journalists. Knowledge of the theoretical and practical level of basic, informative journalistic forms. Ability to independently recognize important media events and monitoring them.

Screening of student's work

1
ECTS Pohađanje nastave [EN]

1
ECTS Usmeni ispit [EN]

4
ECTS Praktični rad [EN]

6
ECTS

Forms of Teaching

» Vježbe u praktikumu

- » Interpretation of basic informative types of journalism on the theoretical and practical levels

Week by Week Schedule

1. From events to the news, communication channels, making newspapers,
2. Working in editorial board, desk, sources of information,
3. Introduction to the objective journalist forms,
4. Quality news / flaws in news reports,
5. Types of news,
6. Ways of writing a news,
7. Flash news,
8. Standard news,
9. News in a row, news on the occasion,
10. Selective listening and reading,
11. Field reporting,
12. Shortening the text, quotes and citations,
13. Embargo, state secret - correction,
14. Rule of inverted pyramid - writing the headline,
15. Expanded news.

Fundamentals of Cellular Biology and Genetics

115576

Lecturer

prof. dr. sc.
Srećko Gajović

Course Description

The general objectives of the course are to learn of the role of genetic factors in the normal behavior and in the event of occurrence of mental illnesses and to understand the basic principles of cellular organization of the central nervous system. Specific objectives are elaborated according to the topics of teaching.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic parts of the cell,
2. Explain the principles of translation and transcription, the role of proteins in cellular processes,
3. Explain the principles of inheritance, the methods of regulation of gene expression,
4. Apply the acquired knowledge to understanding the mechanisms of emergence and inheritance of hereditary diseases and disorders,
5. Use e-web materials in the field of cell biology and genetics in the preparation of presentations,
6. Develop a tree of inheritance of different genetic disorders (autosomal dominant-recessive, sex-linked),
7. Analyze the reviewed scientific articles in the field of mental disorder genetics,
8. Explain and present the role of genetic factors in behavior, especially in the development of mental disorders and abnormal behavior,
9. Identify the basic parts of the central nervous system at the microscopic level,
10. Identify the basic parts of neurons and types of glial cells.

Study Programme Learning Outcomes

Psychology

Critically judge theoretical approaches to the study of individual differences

ECTS Credits 3.0

Semester Winter

English Level L1

E-learning Level L1 (20%)

Study Hours
30
15

Teaching Assistant
izv. prof. dr. sc. Nino
Sinčić

Grading

Class activity - 5%, two preliminary exams - 80%, independent seminar assignment - 5%, written knowledge assessment - 10%.

Determine the biological and neurobiological bases of psychological processes and behavior

General Competencies

Preparing the students to more easily master the subject matter in the area of biological psychology by expanding their knowledge of cellular biology and genetics and the cellular organization of the central nervous system. Developing a critical approach to the understanding of the relationship of genetic determination and the environmental psycho-social factors in shaping of the phenotype.

3. Determine the biological and neurobiological bases of mental processes and behavior.

5. Critically assessing the theoretical approaches to the study of individual differences.

Screening of student's work

0.2
ECTS Pohađanje nastave [EN]

2.5
ECTS Kolokviji [EN]

0.3
ECTS Seminarski rad [EN]

3 ECTS

Week by Week Schedule

1. The development of molecular biology methods and impact on the development of psychology as a profession. Cell structure: introduction to the basic structure and function of cell parts: nucleus, cytoplasm, cell membrane, ribosomes, endoplasmic reticulum, mitochondria, lysosomes, Golgi apparatus.
2. Cell membrane system. Cell research methods.
3. Krebs cycle and energy production: introduction to the basic principle of oxidative cycle (citric acid cycle), and the forms and ways of creating and storing energy. The role of phosphorylation in cellular neural signaling.
4. Amino acids: introduction to the basic types and chemical structure of amino acids, proteins - chemical structure of proteins and conformational states. The role of proteins in the body.
5. From the nucleic acid to the chromosome 1: understanding the structure of nucleic acids and their multiplication. From the nucleic acid to the chromosome 2: packaging of nucleic acid within the chromosome, histones, coding and non-coding regions.
6. What are genes? Protein synthesis: the importance and role of protein synthesis. Mechanisms and processes of protein synthesis: messenger RNA, transport RNA, ribosomal RNA.
7. DNA replication and repair. The cell cycle and cell division - cycles and mechanisms of mitosis.
8. Mitosis and meiosis: introduce the main differences between mitosis and meiosis, spermatogenesis, oogenesis. The relationship of genotype and phenotype: understanding the concept of gene and allele.

9. Prions, viruses, viroids; reverse transcriptase and retroviruses: the central dogma of molecular biology, methods of virus multiplication, virus insertion into the cell genome. Possibilities and ways of regulation of gene expression, mechanisms of regulation of gene expression, gene regulatory sequence.
10. Genetic imprinting and cytoplasmic genetic systems; cloning - understanding the term "cloning" and distinguishing real cloning from creating a large number of identical twins. Chromosomal mutations: mechanisms of chromosomal mutations. Chromosomopathy - mechanisms of chromosomopathies, Down syndrome, Patau syndrome, Edwards syndrome, Super female syndrome, Klinefelter's syndrome, Turner's syndrome.
11. The difference between monogenetic and polygenetic disorders, methylation as a mechanism of gene expression. (The role of genes in the pathology of the Huntington's and Alzheimer's diseases, the role of genes in the pathology of schizophrenia and manic-depressive psychosis - exploring the basic clinical picture, a critical evaluation of the hypotheses about the role of genes and/or environmental factors in the development of these disorders. The role of genes in the pathology of mental and neurological disorders. (The influence of environmental factors during brain development in individuals with a hereditary predisposition to develop psychological and neurological disorders, and the possibility of reducing the incidence of these disorders. The role of genes in the pathology of autism and epilepsy - exploring the basic clinical picture, a critical evaluation of the hypotheses about the role of genes and/or environmental factors in the development of these disorders.)
12. Gene expression and the theory of evolution of human brain. The role of genes in the normal development and the environmental impact on the expression. The structure of cell membranes; receptors and ion channels. Signaling mechanisms between the cells, types of ion channels, receptor-ion channel, membrane and cytoplasmic receptors.
13. The cell structure of the nervous system: morphological and functional properties of different types of neurons and glial cells. Signaling mechanisms. Synaptic mechanisms.
14. Cellular receptors. Neurotransmitters: definition and classification. Neurotransmitters: chemical structure and functional properties.
15. Membrane potential. Action potential.

Lecturer

doc. dr. sc.
Erik Brezovec

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours
15
15

Grading

Obligatory class attendance and discussion; final written exam.

Course Description

The aim of the course is to teach students the application and methods of the market oriented and advertising research. To introduce to them the basic terms and concepts of market and advertising together with the main research methods in the field. To train them on how to carry out main tasks and duties of market researchers.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (soc (17147) - elective courses(3rd year), 5th semester, 3rd year)
- » Sociology -> Dual-major studies (Studij) (soc (17147) - elective courses(3rd year), 6th semester, 3rd year)
- » Sociology (Studij) (elective courses 1., 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, classify and explain concept of the market in classical sociology.
2. Apply sociological models and methods for the purpose of market and advertising research.
3. Demonstrate process of market research with its basic division on exploratory, descriptive and causal research.
4. Contrast primary and secondary data and their sources.
5. Define and explain application of the market research.

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Use theoretical concepts in the analysis of society
- Compare sociological theory and methodology
- Identify the basic concepts of statistics

Sociology

- Use sources of scientific information
- Use statistics in social research
- Compare sociological theory and methodology

Identify the basic concepts of statistics

General Competencies

Upon successfully passed exam, students will be able to:

Design a simple research project.

Use the computer software for the analyses qualitative data.

Develop the research question related to the subject/process/phenomenon of social interest.

Use different social sciences methods in the analyses of the relevant data.

Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Week by Week Schedule

1. Introduction: sociologist as market researcher
2. Defining market in classical sociology
3. Market, market society and the process of marketization
4. Process of commodification
5. Application of sociological models and methods in market and advertising research
6. Basic concepts of advertising
7. Process of market research
8. Exploratory, descriptive and causal research
9. Primary and secondary data
10. Application of market research
11. Analysis of examples of qualitative research 1. part
12. Analysis of examples of qualitative research 2. part
13. Analysis of examples of quantitative research 1. part
14. Analysis of examples of quantitative research 2. part
15. Repetitions, preparations for the exam

Mladen
Tomorad

ECTS Credits 3.0

Semester Winter

English Level L0

E-learning Level L1

Study Hours 30

Grading
Colloquium and student
paper.

Course Description

The aim of the course is to give students the most important knowledge about the development of the Ancient Egyptian funerary customs and architecture.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)
- » History (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce the most important cosmologies of the ancient Egyptian religion
2. Relate the most important knowledge about the gods and beliefs of the ancient Egyptians
3. Describe the development of the ancient Egyptian religion
4. Show the development of the funerary customs and their relations
5. Show the development of the funerary customs with the similar customs of the other nations in Mediterranean world
6. Show and evaluate development of the ancient Egyptian architecturs (tombs and temples)

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
adherence to grammatical. orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

History

History

Demonstrate the use of professional terminology,
 historiographical research tools and methodological principles of
 historical science
 recognize the interdisciplinary character of history and its
 relevance to other areas of knowledge and to the promotion of a
 number of moral, social and cultural values

General Psychopathology

38642

Lecturers

Petrana Brečić,
nasl. izv. prof.
dr. sc.

Domagoj
Vidović,
nasl. doc. dr.

Course Description^{SC}

To acquaint the students with characteristics of psychiatric disorders; epidemiology, diagnosis and classification of mental disorders. To understand the basic notions in general psychopathology. To acquaint with the application of research methods in the study of abnormal psychology. To understand the methods of clinical assessment and methods of communicating with patients with mental disorders.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define general psychopathological conditions
2. Differentiate and describe the basic notions related to mental disorders
3. Classify psychological disorders into categories
4. Identify the terms of psychopathological epidemiology
5. Design the hypothesis within different theoretical approaches in psychopathology
6. Explain the specifics of different research methods in psychopathology
7. Plan research in the field of psychopathology
8. Apply the principle of confidentiality in the relationship between psychologist and patient
9. Apply knowledge on conducting clinical interviews
10. Support the application of ethical standards in the work with patients

Study Programme Learning Outcomes

Psychology

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Assess mental status and classify diagnostic criteria for different psychological disorders

ECTS Credits 5.0

Semester Winter

English Level L1

E-learning Level L1

Study Hours
30
15

Grading

Participation in class - 10%; Seminar essay and its oral presentation - 20%; Clinical interview - 10%; First test - 30%; Second test - 30%. If a student does not take tests or achieve unsatisfactory result on one or both tests, student will take written exam that corresponds the tests by its scope, content and the ECTS.

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

Assess the mental status and classify the different diagnostic criteria for mental disorders.

Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.

Grading

Regular class attendance,
passing a colloquium,
discussion in class and
independent preparation
of a research task.

Course Description

Acquire knowledge about the possibilities of applying GIS in demographic analysis.

To train students in the skills of designing, planning and performing demographic analysis with the help of GIS and making cartographic and graphical representations based on analysis.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic methods of analysis of dynamic and structural characteristics of the population.
2. Explain the spatial units in the study population.
3. Reproduce sources of population data.
4. Use basic methods of analysis of dynamic and structural characteristics of the population.
5. Develop skills for creating a given thematic map of demographic content, processes, connections and relationships in GIS.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Use statistical, quantitative, graphic and geographic software packages

Propose political and legal solutions based on scientific research of demographic and emigrant content

Carry out analytical and scientific procedures of forecasting and modeling the future

Conduct relevant research on the Croatian resident and emigrant population

Interpret data on Croatian and global population and emigration

Global Strategy

226637

Lecturers

prof. dr. sc.
Marta Zorko

doc. dr. sc.
Danijel Jurković

ECTS Credits	2.0
Semester	Winter
English Level	L1
E-learning Level	L1 (5%)
Study Hours	15
	15

Grading

Students are expected to attend at least 12 sessions, participate in class discussions, write and present a seminar paper and take the final written exam.

Course Description

Course objectives: explain historical genesis of the global strategy and gain understanding of a strategic aspect of interrelated global processes and relationships; differentiate the contents and significance of specific scientific fields, subfields and disciplines, as well as their mutual interconnectedness in the process of research; explain spatial dynamics, development of human activity and socio-economic relationships analyse and connect the concepts of spatial development and shifting of the international centres of gravity, as well as the process of formation of countries and nations; explain national instruments of power; demonstrate a thorough understanding of the system of international security as one of the phenomena in the contemporary society; explore global relationships through the aspect of international security, factors of security architecture and mechanisms of spatial gap prevention as one of the causes of security threats; explain the influence of global processes on security of both Croatian and international geographic space; provide students with relevant know-how to conduct individual scientific research; enable students to understand, interpret and predict future global processes and relationships (i.e. global strategies) and their impact on the Croatian national security.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the historical genesis of global relationships
2. Explain the process of formation of countries and nations
3. Explain, connect and interpret the significance of natural resources in the context of advancement of civilizations and increasing of national/global strength (power)
4. Explain the mutual relationships both of the scientific-technical civilization and culture (value system) in the context of advancement, and sources of contemporary security threats and challenges
5. Define, explain and connect the concepts of global processes and relationships in the context of determining national interests and devising the national strategy and its components

6. Explain the security aspect of the global/national strategy both orally and in a written form
7. Explain and graphically depict global processes, relations and relationships

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Propose political and legal solutions based on scientific research of demographic and emigrant content

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Interpret data on Croatian and global population and emigration

General Competencies

Upon successful completion of the course, students will be able to:

Propose political and legal solutions based on scientific research and analysis of global and national security challenges of the Republic of Croatia.

Conduct analytical and scientific procedures for forecasting and modeling future scenarios of security and strategic developments in the region and the world, with special emphasis on Croatia.

Develop a critical approach to statistical data, legislation, and literature relevant to the analysis of national security and global strategic processes in the context of the Republic of Croatia.

Interpret and explain global and regional processes and their impact on national interests and strategic priorities of the Republic of Croatia.

Analyze and connect global strategic processes with national security and development policies of the Republic of Croatia.

Learning Outcomes - Intellectual (Cognitive) Skills

Upon successful completion of the course, students will be able to:

1. Explain the historical development of global relations and the formation of modern nations and states in the context of the international order.
2. Interpret the role of natural resources, transportation systems, and energy in the advancement of civilizations and the consolidation of national and global power.
3. Explain the interaction between scientific-technological civilization, culture, and value systems in the context of contemporary development challenges, security threats, and risks.
4. Define and interpret key global processes and relationships in the context of national interest formation and strategic development.
5. Analyze the security aspects of global and national strategies, including emerging threats such as cyber warfare and geopolitical risks.
6. Explain and visually represent global flows, spatial patterns, and relationships with an emphasis on demographic, migratory, and security dimensions.
7. Assess the position of the Republic of Croatia in the globalized world, including its role in European and international development, security, and demographic strategies.

Learning Outcomes - Practical and Generic Skills

Upon successful completion of the course, students will be able to:

1. Clearly and coherently explain key concepts related to global and national strategies, both orally and in writing.
2. Use basic visual tools (e.g., diagrams, timelines, tables) to represent global processes and relationships.
3. Apply basic course knowledge to simple real-world examples of international relations or global issues.
4. Collaborate in a team to solve basic tasks related to global challenges and national interests.
5. Use basic academic sources (textbooks, articles, official documents) when preparing short written assignments or essays.
6. Develop clear expression and basic presentation skills in an academic setting.

Connection of Learning Outcomes and Grading

Upon successful completion of the course, students will be able to:

1. Explain the historical development of global relations.
2. Explain the process of formation of modern nations and states.
3. Connect and interpret the significance of natural resources in the context of the advancement of civilizations and the growth of national/global power.
4. Explain the interaction between scientific-technological civilization and culture in the context of progress and security threats.
5. Define, explain, and connect global processes and relations in the context of national interests and strategy.
6. Explain orally and in writing the security aspects of global and national strategy.
7. Explain and visually represent global processes, connections, and relationships.

tion Interpret data on Croatian and global population and emigration

Glottodidactics

223567

Lecturer

doc. dr. sc.
Antonia Ordulj

Course Description

To provide a contemporary and historical overview and insight into the theoretical, psychological, neurolinguistic and sociological aspects on which glottodidactics as an interdisciplinary science is based. Explain and judge glottodidactics problems and individual factors that directly affect the second language acquisition. Discuss the process of second language acquisition in the context of other disciplines in the field of social sciences (psychology, pedagogy, sociology, demography) and humanities (linguistics, philosophy, history).

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe basic theories and concepts in the field of glottodidactics as an interdisciplinary science throughout history.
2. Analyze psychological, neurolinguistic and sociological aspects of glottodidactics.
3. Define communication competence.
4. Explain the process of first and second language acquisition and its historical development.
5. Explain and discuss individual factors of second language acquisition.
6. Describe similarities and differences between receptive and productive language skills in second language acquisition.
7. Differentiate research methods in second language acquisition.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours 30

Grading

Attending at least 12 teaching units, active participation in lectures, reading literature, taking the oral exam. Course participants will be continuously monitored in class, which counts as 20% of the total grade. The oral exam counts as 80% of the total grade.

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Determine the need for lifelong learning and professional development

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

General Competencies

To acquire and integrate knowledge through the example of complex changes arising from specific historical, social, and economic processes and cultural movements that have, over a long period of time, intersected within the Croatian cultural space.

To evaluate historical facts and processes of national, European, and world history, as well as the challenges of their interpretation.

To recognize the interdisciplinary nature of history and its relevance to other fields of knowledge, as well as its role in promoting a range of moral, social, and cultural values.

Screening of student's work

Greco-Roman Religion

37562

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

Purpose of this course is to become acquainted with Roman religious customs and regulations, with priests, devotion to major deities, taking into account the findings about original Roman beliefs and the influences from Greece and the Orient. The focus will be put on the religious year and the mythological stories that form the inevitable part of Roman literature. Parallels in the Greek, Illyrian and other Indo-European, Mediterranean, and Etruscan religion will be mentioned. Seminar includes reading the selection of text and preparing a presentation of a particular myth. Students are required to: prepare the texts, present the given myth and pass the exam after the semester is over.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Croatology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

ECTS Credits 3.0

Semester Winter/Summer

English Level L2

E-learning Level L1

Study Hours
15
15

Grading

Parts of the final evaluation are:
attendance, preparation and presentation of specified tasks, achievement on written and oral exam. It is necessary to present a paper before the exam.

- » History (Studij) (*elective general foundation courses, 6th semester, 3rd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Enumerate most important features and deities of Greek and Roman religion
2. Recount the most famous myths of ancient Greece and Rome
3. Recognise religious elements and allusions in the works of classical and Croatian latinist authors
4. Understand the religious background of classical texts, as well as the beliefs and customs mentioned in those texts
5. Produce a translation and critical commentary of a Latin text in regards to religion

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Recognize the needs and willingness to engage in lifelong learning

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

Croatology

Explain and analyze the components of Croatian culture and their connection

Describe, classify and explore Croatian archeological heritage

Describe, classify and explore Croatian art, music, theater and film arts

Justify and support the need and willingness for lifelong education

Recognize, describe and argue the influence of European and world literature on the Croatian Literary Canon

History

Demonstrate the use of professional terminology,
historiographical research tools and methodological principles of
historical science

Generate and conduct historical and other types of discussions

Identify important historical figures from different periods of
European history

Single out historical processes and explain their topic of
interpretation

recognize the interdisciplinary character of history and its
relevance to other areas of knowledge and to the promotion of a
number of moral, social and cultural values

Psychology

Integrate knowledge about cultural differences and critically
assess general principles, standards of good practice and work
that respects differences in a professional manner

Critically judge scientific and professional works in the field of
social, humanistic and biomedical sciences

Plan the search of literature, databases and other sources of
information

Support interdisciplinarity, establishing and maintaining
relationships with other experts, as well as relevant
organizations

Determine the need for lifelong learning and professional
development

Sociology

Create an effective research plan

Use sources of scientific information

Critically judge the current social situation

Recognize the social specificities of Croatian society

Compare different social phenomena in different cultures

Grading

Student will be evaluated according to the accomplishment on his final exam (in writing and oral), as well as according to the regular attendance and participation during classes.

Course Description

The goal of this course is to introduce students to introduce the students to basic aspects of Ancient Greek culture, from Minoan to Roman times. This gives them insight to the influence that the Greek culture exerted on the Roman, extremely profoundly in almost every aspect of life. Students will be acquainted with these influences through the lectures as well as by text examples read during the class. Obligations of the students include: regular attendance, preparation and discussion of selected texts and passing the exam after the semester has finished.

- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish the original Roman aspects from the Greek influence in the everyday life of Romans.
2. Describe a day in a life of a certain Greek's class (rich man, slave, woman...).
3. Indicate the areas of most profound influence of Greek culture upon the Roman.
4. Describe the functions, characteristics and specialties of certain aspects of Greek life (army, politics, religion).
5. Identify the Greek terms and transcribe from alphabet to Latin script and vice versa.
6. Explain the importance of Greek culture in the development of the Western civilisation.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
 adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
 adherence to the principles of academic integrity and ethical norms of research and publishing

Croatology

Classify, analyze and evaluate Croatian cultural, linguistic and political history
 Explain and analyze the components of Croatian culture and their connection
 Describe, classify and explore Croatian archeological heritage
 Describe, classify and explore Croatian art, music, theater and film arts
 Justify and support the need and willingness for lifelong education
 Mark, explain and interpret the role of exact sciences in the history of Croatian culture
 Recognize, describe and argue the influence of European and world literature on the Croatian Literary Canon
 Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

History

Identify historical facts and processes from European and national history
 Name and describe individual historical periods
 Express (in your own words) basic historiographical facts about world history
 recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values
 Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Plan the search of literature, databases and other sources of information

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Determine the need for lifelong learning and professional development

Sociology

Use sources of scientific information

Critically judge the current social situation

Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Compare different social phenomena in different cultures

General Competencies

Students will be able to compare the authentic Roman features of the everyday life and culture with its Greek counterparts. They will be able to describe the characteristics, functions and specialties of the various aspects of Roman society. They will be able to compose the scientific works regarding both Greek and Roman world view in the various areas of culture, and to recognise the influence of Greek culture in the works of the Roman literature that they shall study throughout their education and work.

Week by Week Schedule

1. Introductory class on the location of Greece and its history, especially the Mycenaean period and the alphabet.
2. The greatest Greek influence is evident in the Roman religion, and that is the subject of this class. We examine the most important beliefs, customs and deities.
3. Everyday life of Greeks: housing and customs.
4. Greek education: conditions, subjects, materials ...

5. Organisation, equipment and the tasks of Greek army, especially the Spartan one.
6. The everyday life of the Greeks, their dressing and food customs (e.g. symposia).
7. The political systems of Greek 'poleis'.
8. The "underdog" classes: women and slaves; comparison of their positions in Greek and Roman society.
9. The overview of the Greek literature, an area with influence as big as that of Greek religion or greater, with special focus on the works that influenced the Roman authors.
10. In continuation from the preceding class, we discuss the Greek philosophy and rhetoric and the influence it exerted on the Romans.
11. Greek colonisation enabled the contact between the Romans and the Greeks, and expanded the Greek culture throughout the Mediterranean world, as well as the coasts of the Black Sea and further. We also deal with the economy of the Greek and Roman civilisation.
12. We examine the contribution of Greek science to the Western civilisation, as well as the adaptations of the Roman calendar in the time of Caesar.
13. The various pastimes of the Greeks, especially festivities, such as Olympic games, dramatic festivals etc.
14. Greek art and architecture and its influence on the Roman, mentioning the most important artists and their works.
15. Summation class: review of the data acquired during the semester and resolving certain problems (according to the students' needs.)

- » Philosophy and Culture -> Dual-major studies (Studij) (*latin or greek, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the rules of correct reading and accent on ancient Greek text
2. Explain and understand ancient Greek philosophical terminology
3. Define the development of philosophical problems on the example of the development of philosophical terminology in Old Greek, Latin, Croatian and other languages

4. Show the linguistic and content influence of ancient terminology on Croatian scientific terminology
5. Analyze a simpler sentence in ancient Greek
6. Identify the basic grammatical forms and structure of the ancient Greek sentence

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
 adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Philosophy and Culture

Analyze the basic assumptions for scientific understanding of the world
 Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods
 Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them
 Interpret various cultural, social and political phenomena
 Judge the position, importance and relevance of one's own culture in creating personal and national identity
 Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition
 Determine the position and importance of humanities in the general structure of science

Communication Studies

Croatology

Define and apply the norm and grammatical concept of the Croatian standard language
 Describe, recognize and apply the specialties of the Croatian language in relation to other languages
 Adhere to linguistic, spelling and stylish norms of the Croatian language in the academic and non-academic discourse

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science
 Name and describe individual historical periods
 Identify important historical figures from different periods of European history

Historical demography

194400

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

The aim of the course is to introduce students to the significance of historical demography as an auxiliary historical discipline. Special emphasis is placed on understanding key demographic concepts and the processes that have shaped population structure and dynamics in the past. By working with historical sources and interpreting both quantitative and qualitative data, students will develop the ability to analyze historical processes from a demographic perspective and to understand the relationship between population trends and broader social, economic, and cultural contexts.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define social and economic relations in the past through the prism of historical demographics
2. Develop writing and presentation skills for seminar work
3. Describe the basic processes of population demographic development in the past;
4. Recognize the basic concepts of historical demographics
5. Use historical sources to investigate demographic changes in various historical periods
6. Relate demographic data to the social, economic, and political contexts of past eras
7. Explain and understand demographic data by applying basic methods of historical demography.
8. Develop a critical approach to sources and historiography in the field of historical demography

Study Programme Learning Outcomes

Course^{SC} Description

The aim of the course is to familiarize the students with the emergence and historical development of film and film art and the most important theories in this regard.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts of communicology associated with the film;
2. Recognise and describe the role of film in the society guided by its historical development;
3. Reproduce, apply and explain the basic theory of film as applied throughout history;
4. Classify and explain the history and prehistory of the film;
5. List the key figures in the history of cinema;
6. Indicate and explain the basic technological innovations and changes throughout the history of film.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

Course Description

The objectives of the course are aimed at learning about the history of Austria with special attention to the contextualization of national history. An attempt is made to show the context of historical processes within the Central European area, especially the historical context of peoples who lived in a monarchical framework.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 2nd semester, 1st year*)
- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 4th semester, 2nd year*)
- » History -> Dual-major studies (Studij) (*pov (17193); elective course -double major, 6th semester, 3rd year*)
- » History (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name the basic determinants of Austria's past from antiquity to the 21st century.
2. Define the fundamental problems of Austria's past, which are shaped by its geographical location
3. Explain the cause-effect relationships of various historical processes within each historical period
4. Compare historical events related to the figure and work of the Habsburg rulers with other European rulers
5. Evaluate the contribution of Austrian cultural achievements to European civilization
6. Compare the historical processes and connections of the Austrian and Croatian past

Course Description

The course goal is to familiarise you with the basic paradigms of the Croatian culture and art from the middle ages to the present day. So, during this course, you will get some knowledge and be able to recognize the most important cultural-historical facts about Croatia. These facts include basic knowledge about the origin of Croats and Croatian Glagolitic script. After that, you will learn about Croatian history including main events and influential people in cultural, social and political life. The oldest written texts, monuments and architecture will be presented to you using maps and other similar material. In the next step, you will be able to recognize some of the most important paintings of Croat painters, sculptors and architects. In the third step, the most important scientists, philosophers and writers will be presented to you. You will be able to also recognize some of specific art styles across Croatian cultural heritage.

History of Croatian Sociology

172543

Lecturer

prof. dr. sc.
Renato Matic

Course Description

The history of Croatian sociology is comparative-analytical and reflexive historical and sociological discipline that deals with the reconstruction of the social circumstances that have influenced the formation and development of sociology in Croatia, examines the process of its institutionalization and theoretical and empirical development, provides an overview of sociological heritage (typology of ideological orientations and theoretical directions of its main representatives, founders of special sociology), and evaluate their scientific relevance and contribution with regard to contemporary Croatian society and recent sociological research.

Reconstruction of the social circumstances means exploration of political, economic, cultural and social changes of the Croatian society of the period of formation of sociology in Croatia up to the present day.

In addition to the application of knowledge in the specific fields of sociology (sociology of Croatian society, systematic sociology, sociology of knowledge and science, social history of ideas, sociology, sociology), involves the use of additional scientific fields (history, ethnology, political science, law, economics, literature). In this sense is reflected in the general education function of the object.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 4th semester, 2nd year*)
- » Sociology -> Dual-major studies (Studij) (*soc (17147) - elective courses (3rd year), 6th semester, 3rd year*)
- » Sociology (Studij) (*elective courses 1., 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and understand the processes of modernization of Croatian society.
2. Explain and understand the impact of social, political, economic, technological, scientific, historical and cultural circumstances in the institutionalization and development of sociology as science and profession in Croatia.
3. Distinguish stages and types of development sociology in Croatia.

History of Croatian Theatre

37469

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

The subject dealing with the history of the Croatian theatre is concerned with basic literary and theatrical problems. They are mostly associated with the development of the dramaturgy and theatre sciences through the centuries in the connection with the analysis of specific dramatic texts as well as the theatrical performances. The studying of this subject will be concentrated in the Croatian cultural history. Participants will be introduced in various methodological problems of theater historiography and they will be trained for critical application of new approaches to contemporary theatre as well as to the history of the performing arts and their synthetic nature. Based on the structure of Croatian theater, based on the knowledge of poetics students will acquire a system of knowledge about the Croatian theater with particular insight into the history of it and its relations with other European theater, then also theatre of classical Greece to the latest achievements in this genre of literature. The course includes a working visits of the students to at least three theatrical performances or during the rehearsals. Course objectives include: acquiring of the fundamental knowledge of the theater, which will be presented as an overview of the focal points of the history of dramatic literature and also of the processes of making theatrical performances in Croatian cultural history. Acquisition of basic knowledge and skills connected with the interpretation of dramatic texts as well as theatrical context will help students to build systematic knowledge on this matter. Examples from the history of Croatian theater and drama will enable the students to consolidate their methodological approach based on chapters on the per formative dimension of dramatic texts. Special accent will be given to the problems of the science dealing with the composition of dramatic texts and then to their qualities that are close to the acting and performing of those texts.

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

The subject dealing with the history of the Croatian theatre is concerned with basic literary and theatrical problems. They are mostly associated with the development of the dramaturgy and theatre sciences through the centuries in the connection with the analysis of specific dramatic texts as well as the theatrical performances. The studying of this subject will be concentrated in the Croatian cultural history. Participants will be introduced in various methodological problems of theater historiography and they will be trained for critical application of new approaches to contemporary theatre as well as to the history of the performing arts and their synthetic nature. Based on the structure of Croatian theater, based on the knowledge of poetics students will acquire a system of knowledge about the Croatian theater with particular insight into the history of it and its relations with other European theater, then also theatre of classical Greece to the latest achievements in this genre of literature. The course includes a working visits of the students to at least three theatrical performances or during the rehearsals. Course objectives include: acquiring of the fundamental knowledge of the theater, which will be presented as an overview of the focal points of the history of dramatic literature and also of the processes of making theatrical performances in Croatian cultural history. History of Dubrovnik and the Dubrovnik Republic 214655

Lecturer

prof. dr. sc.
Darko Vitek

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours 30

Teaching Assistant
dr. sc. Jure Trutanić

Grading

The final grade is composed of the results of the oral examination and the evaluation of the students' activities during the lecture.

Course Description

Introduction to specific components of the history of Dubrovnik and the Dubrovnik Republic, its fundamental economic, political, social and cultural peculiarities and processes. Pointing out the significance of the Adriatic-Balkan and Mediterranean region as a broader context of Croatian medieval and modern history. Study of relevant literature.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)
- » History (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the historical and geopolitical preconditions and peculiarities of the origin and development of the Dubrovnik Commune, later the Republic.
2. Analyze the key social and economic processes that led to the rise of the city-state.
3. Define the basic components of political power and social strata in the Dubrovnik Republic.
4. Compare the order in the Dubrovnik Republic with neighboring states and empires.
5. Interpret the reasons for the centuries-long success of Dubrovnik's politics and diplomacy.
6. Evaluate the importance of the Republic of Dubrovnik as a Croatian historical affirmation.
7. Explain the consequences of the collapse of the Dubrovnik Republic on the development of the city

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Formulate and orally present knowledge about historical processes and data

Identify historical facts and processes from European and national history

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

History

Formulate and orally present knowledge about historical processes and data

Single out important historical figures from different periods of European history

Critically judge one's own work and defend one's position with arguments in team work

Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values

General Competencies

Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and for promoting a range of moral, social and cultural values

Learning Outcomes - Intellectual (Cognitive) Skills

Analyze the reasons for the longevity of a political system.

Learning Outcomes - Practical and Generic Skills

Critically read historical sources about the history of Dubrovnik.

Connection of Learning Outcomes and Grading

Assess the importance of Dubrovnik and the Dubrovnik Republic for the affiliation of Croatian culture to the Mediterranean cultural circle.

History of Media Communications in Croatia

28467

Lecturer

Mario
Stipančević,
nasl. izv. prof.
dr. sc.

Course Description

The course will enable students to understand the phenomena and concepts crucial to the development of journalism and the role of the media in the Croatian past. An overview of the development of journalism will enable an analysis of the link between socio-economic development and the emergence of journalism and the role of the media in political development. Reflections will be encouraged on the role of the media in society and the conditions that must be fulfilled for the media to play the role of "Fourth Estate". The aim of the course is to give students an account of the chronological sequence of the historical development of the Croatian media from the time of printing the first newspapers in Croatia to the appearance of radio and television as new media.

Study Programmes

» Communication Studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and explain most important turning points in history of Croatian journalism.
2. Identify the connection between journalism and social development.
3. List the most important newspapers and historical figures that have been marked by Croatian journalism in history.
4. Explain examples of the influence of technological and social development on journalism.
5. Explain the role of media in Croatian society throughout history.
6. Identify the challenges of new media and their interdependence with social development.
7. Assess the position of media in modern society in the historical context.
8. Explain the importance of understanding social processes in the Croatian past.

Study Programme Learning Outcomes

History of Modern Cities

284985

Lecturer

doc. dr. sc.
Vladimir
Šumanović

Course Description

Give an overview and insight into the complexity of modern cities and urban society while utilizing selected examples of Croatian cities while keeping in mind the context of European phenomena of urban development. The growth and development of cities were among the most visible factors of modernity in the 19th and 20th centuries. This course shall acquaint the students with the social changes and urban processes in the 19th and 20th centuries, the relationship of the city towards its environment, urban construction, population growth, housing, defining and experiencing urban space, cities as sites of power and the general political, cultural, social and economic characteristic of the development of modern cities based on Croatian examples, within a European and global context. The students will familiarize themselves with various methodological approaches to urban history and modern methods of researching the city.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)
- » History (Studij) (*pov (17191) - early modern period, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and analyze phenomena, processes and structures in modern cities based on selected examples
2. Apply contemporary methods of historical science in the research of urban history
3. Categorize various written or visual sources connected to urban history in the 19th and 20th centuries
4. Conclude academic and expert literature
5. Relate knowledge on various urban and social changes in the 19th and 20th centuries, while comparing and contrasting the said changes
6. Write individually an academic text
7. Apply knowledge and skills acquired in this course on other research issues

History of the Croatian Standard Language

188081

Lecturer

Mario Grčević,
prof. dr. sc.

ECTS Credits	3.0
Semester	Summer
English Level	L1
E-learning Level	L1
Study Hours	30
	15

Grading

Knowledge and adoption of subject matter will be monitored during the course (active participation, oral presentations and tests), and at the end of the semester there will be a written test and oral examination.

Course Description

The main objective of this course is to provide the students with a comprehensive description of the history of Croatian standard language in one place. In order to obtain an integral image of this phenomenon, the students will firstly adopt basic concepts of the theory of standard language with a special emphasis on the delimitation of concepts of literary and standard language. History of the Croatian standard language will be accessed in two ways: from the perspective of the so-called external linguistic history and from the perspective of internal linguistic history. The students will see the developmental path of Croatian standard language, while the main emphasis will be on the Croatian philological production over the centuries, as well as the basic features of development of language standards (grammatical, lexical and graphic). Through compiling seminar papers, the students will be encouraged to explore the abundant literature in this area, to an interdisciplinary approach to the problems of the history of the Croatian standard language, as well as applying the knowledge acquired through their education.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)
- » Croatology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate and learn basic terminology of the theory of standard language;
2. Explain the developmental path of the Croatian standard language;
3. Analyze and identify contemporary language issues in the Croatian standard language based on the diachronic image of this phenomenon;
4. Create and present a quality seminar paper on the history of Croatian standard language.
5. Describe Croatian linguistic production through centuries
6. Illustrate the main features of historical development of language norm

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Croatology

Croatology

Name, single out and describe the foundations of Croatian trilliteracy
Explain and argue the history of the Croatian literary language
Explain and analyze the components of Croatian culture and their connection

General Competencies

Adopting basic facts of the history of the Croatian standard language and getting an integrated perspective on Croatian standard language on diachronic and synchronic levels.

Forms of Teaching

- » Predavanja
 - » lectures
- » Seminar
 - » seminar

Week by Week Schedule

1. Standard language: terminology and nomenclature
2. The relations between standard language and its dialectal basis
3. The foundations of Croatian standard language
4. The beginnings of language standardization
5. Four streams of literary language development
6. History of spelling and orthography
7. Geographical and functional expansion of Stokavian dialect in literary works of the 18th century
8. The standardization of Croatian language in the context of standardization of Slavic languages
9. Period before Croatian national revival
10. National revival between ideology and linguistics
11. The official position of the Croatian language
12. Philological schools in the 19th century
13. Croatian standard language at the turn of the 20th century – disruption or stabilization?
14. A century of struggle for the survival – Croatian and Serbian as two separate languages
15. Croatian language today – a look from the outside and inside

How Language Works: Introduction into Pragmatics

228390

Lecturer

prof. dr. sc.
Šime Demo

ECTS Credits 4.0

Semester Winter/Summer

English Level L2

E-learning Level L1 (15%)

Study Hours
30
15

Grading

Points achieved at preliminary exams bring 80% of the grade, while attendance and activity bring 20%. Based on these parameters, the final grade will be proposed. It can be accepted or modified at an oral exam.

Course Description

This course deals with the relationship between language and its context. Whatever we say or write has an incomplete meaning until it is embedded into a concrete situation (e.g. time, place, goal, previous events, participants). By acquiring basic notions of pragmatic theory and analysis, we shall learn how people complement the said or written words with contextual information and in this way obtain the complete message. Through discussion and workshops, we will become aware to which degree our everyday communication depends on the context, but also how manipulating the relations between linguistic and extralinguistic reality is crucial for domains such as humour, advertising, and political polemics. We will learn how people coming from different cultures frequently understand the same utterances in different ways. Through the speech act theory we will observe the ways in which, if certain conditions are met, language can modify reality. The theory of politeness will show us how language helps shape hierarchical social relationships.

Knowledge of pragmatics will enable a better understanding of the mechanisms of verbal communication, which will help us build our own language and a critical approach to everything we hear or read.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective courses, 5th semester, 3rd year*)
- » Croatology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the difference between the uttered and and unuttered part of a message
2. Recognize the ways in which language can modify the reality with speech acts
3. Analyze communicational dynamics with the help of the concepts of pragmatics
4. Explain ways in which (im)politeness is realised in language
5. Explain pragmatically phenomena traditionally viewed in the context of style, rhetorics and logical errors
6. Explain examples of intercultural differences in communication

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Inform about journalism and public relations
Categorize and reexamine journalistic ethics
Think critically about topics related to journalism, public relations, communications and society as a whole
Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Croatology

Define and apply the norm and grammatical concept of the Croatian standard language
Explain the facts in the field of Croatian phonology, morphology and syntax and apply them in oral and written expression
Justify and support the need and willingness for lifelong education
Adhere to linguistic, spelling and stylistic norms of the Croatian language in the academic and non-academic discourse

Independent State of Croatia

214680

Lecturer

doc. dr. sc.
Vladimir
Šumanović

Course Description

The Independent State of Croatia (NDH) is an integral part of Croatia's past, which has so far been a one-sided and not clearly presented topic. Although this topic is constantly present in the Croatian public, it is not specifically addressed on the basis of original documentation and relevant scientific literature. The aim of this course is to systematically inform, analyze and critically address various aspects of NDH from a historical perspective.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the complex nature of NDH, a topic that continues to cause controversy and division in society today
2. Explain the short but substantively rich NDH period. An argumentative and critical approach focuses on developing an interest in understanding the nature of NDH.
3. Explain the position of the NDH in the context of European history
4. Explain the fundamental differences between NDH and other constituents on European soil of the period
5. Define the material learned through constant student-professor discussion
6. Explain the basic knowledge acquired that is important in modern democratic society

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Grading

The rating will be based on the following parameters: Participation in teaching Seminar paper
Oral exam

national history

Single out historical processes and explain their topic of interpretation

List historical sources for the study of national history

Apply the methodology of various historiographical fields and other research methods from the humanities

Learning Outcomes - Intellectual (Cognitive) Skills

Students will be able to present arguments on controversial historiographical topics.

Learning Outcomes - Practical and Generic Skills

Students will be able to critically read historical sources.

Connection of Learning Outcomes and Grading

Students will be able to discuss the different forms of totalitarian systems.

Inferential Statistics

200127

Lecturers

Toni Babarović,
nasl. prof. dr.
sc.

Iva Černja
Rajter,
nasl. doc. dr.

Course Description^{SC}

Introducing students to the basic concepts of inferential statistics and enabling them for statistical inference from sample to population, using basic parametric and non-parametric procedures; Explaining Central Limit Theorem and its implications on calculation of confidence intervals for μ , as well as on various forms of t-tests and analysis of variance models. Generating students adoption of statistical power concept, its importance, determinants and calculation in various test situations. Generating students systematic insight in prerequisite assumptions of specific inferential test and analysis of variance models and their application in proper choosing of parametric/nonparametric procedures for statistical hypothesis testing. Training the students skill for autonomous usage of parametric/non-parametric statistical tests for central tendencies measures, dispersion measures or correlation. Preparing students for critical analyzing of professional and scientific texts employing the basic inferential statistics procedures.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish statistical from non-statistical inference
2. Interpret and use one-tailed and two-tailed statistical hypothesis testing;
3. Generalize the basic logic of rejecting and not rejecting the null hypotheses (H_0) at t-test on all other tests (F , χ^2)
4. Reproduce derivations of test statistics and the characteristics of related theoretical distributions
5. Identify prerequisite assumptions of specific inferential tests and by using them properly decide to use or not the specific test.
6. Explain the errors in statistical testing and the importance of statistical power concept; apply parametric and non-parametric statistical procedures for testing the hypotheses on central tendency, dispersion and correlation measures.
7. Calculate the confidence interval for central tendency, dispersion and correlation measures.
8. Apply ANOVA models (one-way, two-way and repeated measures) to empirical data and test the accuracy of hypotheses using a computer program

ECTS Credits 6.0

Semester Winter

30

Teaching Assistant
dr. sc. Dora Popović

Grading

Class attendance - up to 12% of the course grade;
Quiz tests - up to 23% of the course grade;
Two mid-term written tests - up to 39% of the course grade;
Oral exam - up to 26% of the course grade;
Additional points- up to 5 % of the course grade.

Prerequisites

Descriptive Statistics

Prerequisites for
Differential Psychology
Experimental Methods

9. Evaluate advantages and limitations of specific hypotheses testing procedures applied in solving a research problem, and evaluate the selection of the most appropriate procedure.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

General Competencies

10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.

11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

18. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Forms of Teaching

- » Predavanja
 - » Two hours per week
- » Auditorne vježbe
 - » Two hours per week

Week by Week Schedule

1. Introduction to Inferential statistics course syllabus; Probability sampling, kinds of samples and sampling distributions; Parameters and statistics; Basic logic of statistical hypotheses testing; Null-hypothesis (H_0) and alternative hypotheses (H_1)
2. One-tail and two-tail H_0 testing: normal and other sampling distributions; Central Limit Theorem; z- versus t- distribution at H_0 testing on mean; Confidence interval for μ
3. General assumptions on t-test between two means; Dependent samples t-test: definition, research frame, H_0 , sampling distribution. Testing procedure in dependent samples t-test (small and large samples).
4. Independent sample t-test: definition, research frame, H_0 , sampling distribution. Assessment of standard error of mean difference (small and large samples) in relation to homogeneity of variance (Behrens-Fischer problem)
5. Confidence intervals for mean differences and variance; Type I, and Type II errors in statistical tests; Introduction to statistical power.
6. Statistical power calculation for 1 sample mean, for difference between two independent sample means, and for difference between two dependent sample means; Pearson correlation hypotheses testing. Testing the hypotheses on difference between two Pearson rs (dependent and independent samples).

7. Statistical power at Pearson r . Hypotheses testing on: (i) linear regression coefficient, (ii) difference between two linear regression coefficients, (iii) multiple correlation and multiple regression coefficients, (iv) partial correlations, and (v) other alternative correlation coefficients (point-biserial, biserial, and rank)
8. χ^2 -distribution and χ^2 -test: definition and importance; χ^2 -test at one-way classification (inductive derivation, H_0 , general formula, calculation). χ^2 -statistic and prerequisite assumptions.
9. χ^2 -test at two-way classification (typical situation, H_0 , general formula, calculation); Contingency tables 2x2 and Yates correction. Discussion on minimal f and one-tail/two-tail H_0 testing. Contingency coefficients (C , Φ , Φ_c).
10. Non-parametric tests for two samples (independent and dependent): Run test, Siegel Tukey test of variability equivalence and Wilcoxon Matched Pairs
11. Non-parametric tests for three or more samples (independent and dependent): Kruskal-Wallis test, Cochran Q test, Friedman's Rank test.
12. Definition and uses of ANOVA. Central Limit Theorem and the fundamental logic of a one-way ANOVA for independent samples. Assumptions and sources of variance in one-way ANOVA for independent samples. Sum of squares and degrees of freedom (total, between groups and within groups). F-ratio and operational calculation of one-way ANOVA.
13. Two-way ANOVA for independent samples: definition and reasons for its introduction, basic concepts, assumptions, sources of variance and dividing up the variance, calculation of the sum of squares and degrees of freedom.
14. Repeated measures ANOVA: key features and differences compared to the ANOVA for independent samples. Logic of the Repeated measures ANOVA and dividing up the variance. The calculation of the Repeated measures ANOVA (sum of squares, degrees of freedom and F-ratio). Assumptions for Repeated measures ANOVA.
15. Test.

Grading

Class attendance, seminar paper, group and collaborative work and exam.

Course Description

Introducing students to the role and way of functioning of the basic institutions of the Croatian people, society and state, as well as the historical context of their origin. Beside acquiring theoretical knowledge and their practical application during further study, students will have the opportunity to visit some of the institutions through fieldwork to gain an adequate insight into their work and contribution to culture, society and the state.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » History (Studij) (*elective general foundation courses, 1st semester, 1st year*)

- » History (Studij) (*elective general foundation courses, 5th semester, 3rd year*)
- » Psychology (Studij) (*elective general foundation courses, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and recognize the components of Croatian culture and their interconnection
2. Classify the construction, safeguarding and enhancement of identity with the help of institutions
3. Analyze and constructively engage in discussions on croatological topics
4. Identify and recognize deeper identity issues

Lecturer

izv. prof.
Mirjana
Milićević

Course Description

Identify and compare the theories and models of diaspora integration with its homeland and relate these to the Croatian context.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and compare the theories and models of integration and apply them in the Croatian emigrant context.
2. Explain concepts relating to the social, cultural, educational and financial potential of utilising transnational spaces.
3. Identify and compare the theories and models of transnational virtual social communities.
4. Identify and compare transnational processes and practices.
5. Explain, analyse, apply and find similarities and differences between the ideas and concepts of world models relating to diaspora policy, cultural tourism and diaspora, health tourism and diaspora for the potential integration of Croatia with its diaspora.
6. Identify patterns and create new ideas for Croatia's integration with the Croatian Diaspora

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Develop a sense of security and correctness in the research process in order to prove the conditionality of the population,

Lecturer

doc. dr. sc.
Matija Mato
Škerbić

Course Description

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the subject and methods of bioethics
2. Explain certain bioethical topics
3. Apply bioethics methodologies
4. Analyze, argue and orient in the key dilemmas of modern humanity
5. Compare and weigh options in moral dilemmas in professional and public life
6. Apply bioethical methods and insights for competent participation in the work of ethical and bioethical bodies

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Demography and Croatian Diaspora

Discuss ethical and bioethical issues in demographic and emigrant research -

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Interlingual features and structure of the Croatian language 190408

Lecturer

Bojan Marotti,
nasl. izv. prof.
dr. sc.

Course Description

The Croatian cultural space is a meeting point for different peoples, cultures, and even pleasures, and thus a multi-millennial space for touching a range of languages.

The Croatian people were in multi-ethnic communities or governed by different peoples whose languages were thus in strong contact with the Croatian. In these connections and touches, the Croatian language was an active recipient as well as an influencer. Students will become familiar with Croatian international contacts with other nations and countries in the context of linguistic influences.

Introduction to Artificial Intelligence

227468

Lecturer

izv. prof. dr. sc.
Sandro Skansi

ECTS Credits 3.0

Semester Winter/Summer

English Level L3

E-learning Level L3

Study Hours
15
15

Grading

Students' active participation, seminar work on a selected topic and an oral exam will be evaluated.

Course Description

Introduce the student to topics related to artificial intelligence (through the paradigm of deep learning), its foundations, applications, and challenges.

Learn to present the basic ideas of deep learning and develop basic artificial intelligence systems independently, as well as define the tasks that are currently posed to artificial intelligence.

Be able to precisely define the individual's relationship to artificial intelligence technologies and their role in society, as well as identify problems related to the security of artificial intelligence and its potential misuse, with an emphasis on ethical issues related to the security challenges of today's artificial intelligence.

Learn the basics of deep learning with Python (Anaconda distribution), from the fundamentals of Python to the implementation of a multi-layer artificial neural network that recognizes handwritten numbers.

Study Programmes

- » Croatology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 4th semester, 2nd year*)

- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Argue and rationally defend one's own philosophical understandings.
2. Evaluate interdisciplinary and take into account different scientific methodologies and views on special issues and problems of artificial intelligence.
3. Explain and judge the justification of various theoretical and practical proposals, respecting the peculiarities of various areas of life and work environments.
4. Use critical thinking and structural formal thinking
5. Assess the role of artificial intelligence and deep learning in society.
6. Evaluate security aspects and possible abuses of deep learning.

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Critically review different theories

Describe the features of the humanities and their interdisciplinary aspects

Evaluate philosophical concepts, arguments and theories

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Determine the need for lifelong learning and professional development

Introduction to Clinical Psychology

38645

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Course objectives: Introducing students with basic concepts of clinical psychology, teaching of the basics of clinical approach in psychology, differentiation and systematization of clinical interventions, presentation of the main ethical principles in the work of clinical psychologists, overview of the most commonly used methods of psychodiagnostics, critical thinking of the contemporary problems of clinical evaluation and psychotherapy, specification of abnormal behavior and perception.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and evaluate the criteria for defining normality.
2. Compare the field of clinical psychology with other areas of psychology and related disciplines.
3. Compare and analyze the differences and similarities between different theoretical systems in clinical psychology
4. Explain the specifics of the clinical approach.
5. Demonstrate the basic principles and methods of psychological assessment
6. Analyze and link individual clinical interventions
7. Evaluate areas of clinical psychologists' actions
8. Classify basic theoretical approaches and legality of psychological evaluation and counseling in different areas of applied psychology.

Study Programme Learning Outcomes

Psychology

Analyze the findings of psychological research in Croatia in the relevant cultural and social context and to recognize the possible peculiarities of the subject phenomenon for the Croatian population, in relation to other - European, or wider global - populations

Classify the basic theoretical approaches and laws of psychological assessment and counseling in different areas of applied psychology

ECTS Credits 3.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours
30

Grading

The condition for acquiring the right to attend the exam is attendance at the lectures and a maximum of 3 absences will be allowed. Students can pass a written part of the exam by passing both sessions. For passage to the colloquy, more than 52% of the correct response is required. Students who do not wish to attend the colloquia, as well as students who are not satisfied with the success of the colloquia, will take a written exam. Students are also required to access the oral exam, which corresponds to essay type questions.

Assess mental status and classify diagnostic criteria for different psychological disorders

Evaluate and develop own competences, knowledge and skills in accordance with changes and standards of the profession

General Competencies

6. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.

7. Assess the mental status and classify the different diagnostic criteria for mental disorders.

Introduction to Communication Sciences

86090

Lecturer

Tanja Grmuša,
nasl. izv. prof.
dr. sc.

Course Description

The main objective of the course is to introduce students to the communication sciences and communicology as an interdisciplinary and integrative science that seeks to address and improve communication opportunities, while the specific objectives of the study course are providing insight into the historical and contemporary communication and communicology themes and dynamics in order to master the basic knowledge of the area so as to enable the students to access and analyze communication on all its levels: intrapersonal, interpersonal, social and media.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Communication Studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish basic communication terms;
2. Compare certain forms of communication;
3. Argue the interdisciplinary character of communication studies as a science;
4. Evaluate the effects of communication on different areas of human activity;
5. Create different persuasion strategies and analyze their effectiveness;
6. Relate the functioning of interpersonal communication in different contexts;
7. Analyze critically media content and new media communication facilities;
8. Argue the reasons why it is necessary to know the dynamics of communication in everyday and business environment.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

ECTS Credits 5.0

Semester Winter

English Level L1

E-learning Level L1

Study Hours 30

Grading

15 % class attendance, 25 % participation in the discussions, 60 % colloquium and / or final exam.

Prerequisites for
Semiotics in Mass
Communication

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

General Competencies

Students will become familiar with the anthropological, philosophical and communicology approach to the communication at all levels. They will especially be well versed to properly use verbal communication and learn to properly evaluate and interpret non-verbal communication in different social and cultural environments. Students will be able to use arguments to express the importance of knowledge of communicology and will develop skills of critical perception, presentation and analysis of modern communication and dynamic models, particularly in relation to interpersonal communication and communication through new media.

Introduction to Developmental Psychology

37808

Lecturer

Gordana Buljan-Flander,
nasl. prof. dr.

Course^{SC} Description

Course content allows students to familiarize themselves with basic concepts and theories in the field of developmental psychology and acquire competencies for their description and differentiation. Students will acquire knowledge of different methodological approaches to human development studies and develop critical thinking when considering ethical research questions in the human population. They will also acquire basic knowledge of the normal and abnormal course of human development as well as implications for working with different age groups due to their specific development needs. Students will receive information on the developmental process from the prenatal age, with descriptions of major developmental tasks and changes in the biological, cognitive, social and emotional field of development.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish development theories regarding their contribution to the explanation of human development and the utilization of scientific research methods.
2. Compare methodological approaches to scientific research in developmental psychology
3. Describe developmental changes during the breastfeeding period
4. Explain the course of physical, cognitive and socio-emotional development of children
5. Compare orderly development, individual differences in development and developmental difficulties in areas of physical, cognitive and social-emotional development in first two years.
6. Prepare proposals for organizing a stimulating environment and involving children in activities that will encourage their development
7. Interpret the impact of parenting on child development and the implications of early research results for working with children, parents and educators;

ECTS Credits	3.0
Semester	Winter
English Level	L0
E-learning Level	L1
Study Hours	30

Grading

To complete the final exam and to form a final grade, it is compulsory to attend lectures, with a maximum of 3 absences. Students can pass a written part of the exam by passing both colloquia, each carrying 40% of the final grade. For passage to the colloquy, more than 52% of the correct response is required. Students who do not wish to attend colloquia, as well as students who are not satisfied with the success of the colloquy, have a written exam that meets the requirements of the colloquium conducted during the semester with the volume, content and the corresponding ECTS credits. Students are also obliged to access the oral exam, which corresponds to the essay type questions. The oral exam scores 20% of the final grade.

Study Programme Learning Outcomes

Psychology

- Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner
- Review the historical development and theoretical approaches in various branches of theoretical and applied psychology
- Determine the need for lifelong learning and professional development
- Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

General Competencies

- 1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
- 4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
- 8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.
- 19. Express the necessity of lifelong learning and professional development.

Introduction to Journalism

86089

Lecturers

doc. dr. sc.
Vanesa Varga

doc. dr. sc.
Tomislav
Janović

Course Description

The aim of the course is to familiarize the students with journalism, the characteristics and specificities of journalistic activity. Furthermore, they will become familiar with the journalistic profession and the role and functions of journalists, the tools and specific conditions of their work. The course enables the students to understand and use the basic concepts of journalism, both in theory and practice, and facilitates further study.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the basic concepts of journalism.
2. Employ the fundamental concepts in journalism both in other courses in the study and in practice.
3. Distinguish and explain the different theories and theoretical approaches to journalism.
4. Demonstrate the capacity to manage the resources needed for the scientific study of journalism and for following it daily for informative reasons.
5. Define and explain the functioning of modern journalism and how journalists themselves work.
6. Explain the way modern journalism functions and how journalists themselves perform their work.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Introduction to Psychology and Theoretical Systems in Psychology

Lecturer

doc. dr. sc.
Alena Gizdić

ECTS Credits	5.0
Semester	Winter
English Level	L0
E-learning Level	L1
Study Hours	15 45

Teaching Assistant
Jelena Flego, mag. psych.

Course Description

The main objective of the course is to acquaint students with the development of psychology, psychological knowledge and thinking through considering and analyzing the development of paradigms and schools, shaped by theoretical systems or directions in psychology. Throughout the course, students will be provided a historical overview of the development of psychology as a scientific discipline (psychology and antiquity, philosophical and scientific roots of psychology), will be provided an overview of the basic theoretical branches of psychology (eg developmental psychology, social psychology) and provide knowledge-based competencies for critical analysis major "classical schools", theoretical systems in psychology, with an emphasis on the possibility of comparing and comprehending. Different branches of applied psychology and the specific jobs of psychologists in those branches will be presented.

Grading

Class attendance (10%);
Preparation and presentation of a seminar paper – 20%; Two midterm exams – 70%.
The student must achieve at least 60% correct answers on the exams, and the final grade is determined as follows:
60% – 69%: sufficient 70% – 79%: good 80% – 89%: very good 90% – 100%: excellent

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the historical development of psychology
2. Recognize the philosophical and scientific roots of psychology
3. Compare basic and applied fields of psychology
4. Describe and explain the meaning of the theoretical approach, the schools and the scientific paradigm in psychology.
5. Describe the contribution of a particular theoretical system and direction to the development of psychology and its contribution to particular contemporary topics being explored in psychology.
6. Analyze and compare the results of Croatian and foreign research in the field of development of psychology and theoretical systems in psychology, and to explain cross-cultural similarities and differences
7. Describe the basic characteristics of the different fields of applied psychology and the different work places of psychologists
8. Compare and analyze differences and similarities between different theoretical systems in psychology.

Study Programme Learning Outcomes

Grading

Attendance at lectures, reading literature and participation in lecture discussions, preparation and presentation of seminar assignments and written exam or two colloquia.

Course Description

One of the objectives of the course is to introduce students with basic concepts of public relations: those concepts that should be abandoned as well as with the contemporary concept of public relations. The main goal of the course is to present the communication of organizations through contemporary model of public relations. Thus, after the main theoretical approaches, the course will bring students closer to the communication process of institutions and the rules that apply in this process to contemporary communication theories and research in the area of public relations. It is also one of the objectives of the course to encourage students' interest and increase awareness of ethical aspects of work in public relations.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*public relations, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the contemporary concept of public relations
2. Define the most important terms in public relations
3. Explain the most important communication theory relevant for public relations
4. Apply communication theory to public relations
5. Explain contemporary research in the area of public relations
6. Define managing process of public relations
7. Describe each phase of the public relations management process

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the

media and present knowledge about journalism, public relations, communication and society

Inform about journalism and public relations

Explain and describe public relations

Organize individual and team work

Identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Explain and describe public relations

Organize individual and team work

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply the knowledge of the basic concepts from public relations;

Identify and describe the place and role of public relations in the society;

Reproduce and explain the basic theory of communication, journalism, marketing, public relations and mass media;

Identify, explain and analyze the situation, innovations, challenges and issues concerning public relations;

Explain and critically analyze the acquired theoretical and practical knowledge;

Apply the skill of academic discussion and writing of academic texts.

Week by Week Schedule

1. Overview of the course and class obligations, the concept and definition of public relations
2. Clarifying the terms: public relations / press agency / journalism / advertising / propaganda / marketing.
3. Current situation of the profession: profile of employees in public relations, employment, employers, education.
4. Current situation of the profession: overview of public relations by activities, role in public relations.
5. Historical development of public relations (US, Europe, Croatia).
6. The position of the public relations department in the organization; the difference between two types of managers; the difference between the internal, external and mixed structure of public relations.
7. Public relations as a scientific discipline; system theory: the difference between system and subsystem, the difference between closed and open systems.

8. Communication and public opinion: Lippmann and public opinion, Shannon and Weaver's communication model, Schramm's communication model in korrelation with the Cutlip and Center's model of public relations.
9. Communication and public opinion: the Theory of the Stereotype, agenda setting theory, spiral silence theory.
10. Communication and public opinion: situational theory of publics (Grunig).
11. P James Grunig's Excellence theory of public relations and the theoretical communication model of Luke Brajnović.
12. The first phase of public relations management according to Cutlip and Center: research.
13. The second phase of public relations management according to Cutlip and Center: planning.
14. The third phase of public relations management according to Cutlip and Center: action, basic types of techniques and tools.
15. The fourth phase of public relations management according to Cutlip and Center: Measurement.

Prerequisites for
Experimental Methods

Course Description

Introducing students with basic principles of scientific work, developing critical thinking and introducing them to principles of reading scientific literature. The students will get acquainted with basic principles of scientific reasoning, basic components of scientific research and basic scientific methods in social sciences. They will also get introduced to the principles of writing the scientific paper and with ethical principles in scientific work.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish scientific and pseudoscientific approach.
2. Judge the question of causality in science.
3. Evaluate critically scientific papers and theories.
4. Analyze scientific methodology and fundamental elements of research process.
5. Assess dependent and independent variable in scientific research.
6. Distinguish research approaches, designs and methods.
7. Plan the control of relevant factors in experiment.
8. Prepare research report.
9. Appraise ethical questions in scientific research.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific

approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

General Competencies

9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

15. Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.

16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Introduction to Social Research Methods and Statistics 270490

Lecturer

izv. prof. dr. sc.
Ivan Burić

Course Description

The aim of the course is to provide insight into the proper conduct of social research methods and to train the students for the proper use, evaluation and interpretation of obtained data. The course objective is to introduce the students to the basic concepts in statistics and the techniques which are necessary for various applications in the field of communicology.

Study Programmes

- » Communication Studies (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, describe and apply the basic methods of social research.
2. Apply the statistical literacy and methodological competences and realize their importance in the modern society.
3. Employ the basics of statistics in order to use the media on the reflexive and productive level.
4. Apply statistical thinking within the framework of an educational process.
5. Use a computer and basic statistical programs.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Organize individual and team work

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Apply methods of social research and statistics

Prepare and create different forms of presentations and seminar papers

E-learning Level L2 (20%)

Study Hours
15
15

Grading

Lecture attendance, literature reading and participation in discussions with the professor and the colleagues (25% of the final grade), seminar assignment (25% of the final grade) and the final exam (50% of the final grade).

Prerequisites for
Statistics for
Communication Sciences

General Competencies

Apply the knowledge of the basic concepts of the methods in social science and statistics. Employ the basic methodological and statistical knowledge and techniques which are used in the practice of communicology, with an emphasis on the interpretation of statistical indicators, particularly those contained in the standard computer printouts. Define, describe and apply statistical thinking. Use the acquired skills of methodological presentation and communication (written and spoken). Use precise statistical ways of expression. Use a computer and the programs for the processing of statistical data. Organize data complexes into a coherent whole. Define research topics for scientific research in communicology.

Week by Week Schedule

1. Introductory lecture and the entire curriculum overview; Why we study the social research methods?
2. Research methods and techniques. Research methods classification: past experience method, intuition method, authority method, scientific method.
3. Types of social research.
4. Types of social research.
5. Research stages. Devising a conceptual research draft.
6. Research method and technique selection (data collection).
7. Survey.
8. Interview and experiment.
9. The concept of statistics, data and their collection, the division into descriptive and inferential statistics.
10. Editing data and forming statistical series.
11. Tabular and graphical presentation of data.
12. Mastering the skill of grouping, tabular and graphical presentation of statistical data in MS Excel.
13. Data analysis using relative numbers.
14. Mastering the skill of data analysis using relative numbers in MS Excel.
15. Application in communication sciences.

Grading
Preliminary exams replace
the written exam, if
passed successfully.

Course Description

Course objectives:

Introduce students to basic notions of Linear algebra, calculus, integrals and differential equations with applications to demography. Develop the ability of analytical and logical thinking.

Course content (syllabus):

1. Linear algebra. Matrices and types of matrices. Matrix operations. Determinants. Systems of linear equations. Applications to demography.
2. Differential calculus of one real variable. Real functions of one real variable. Limits. Continuous functions. Derivatives and computing derivatives. Increasing and decreasing functions. Convex and concave functions. Applications to demography.
3. Integral calculus. Indefinite integrals. Methods of integration. Definite integrals. Linear differential equations. Applications to demography.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply matrix operations to solve problems in demography.
2. Compute derivatives of functions of one variable.
3. Apply differential calculus of one real variable to solve problems in demography
4. Compute integrals.
5. Apply integral calculus to solve problems in demography
6. Solve linear differential equations.
7. Recognize problems in demography which can be modeled by using linear differential equations and solve them.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

- Illustrate the need for scientific studies on demographic and immigration issues
- Use statistical, quantitative, graphic and geographic software packages
- Carry out analytical and scientific procedures of forecasting and modeling the future
- Develop professional-scientific skills that will contribute to the effectiveness of activities related to the demographic and emigrant value system.
- Interpret data on Croatian and global population and emigration

General Competencies

- Illustrate the need for scientific studies on demographic and emigration issues.
- Use statistical, quantitative, graphical and geographical software packages.
- Implement analytical and scientific procedures for predicting and modeling the future.
- Develop professional and scientific skills that will contribute to the effectiveness of activities related to the demographic and emigration value system.
- Interpret data on the Croatian and World population and emigration.

Learning Outcomes - Intellectual (Cognitive) Skills

- Independently solve simple and complex mathematical problems.
- Apply deductive and inductive reasoning.
- Analyze mathematical models and evaluate their applicability in solving demographic problems.

Learning Outcomes - Practical and Generic Skills

- Apply mathematical models to specific demographic data.
- Apply mathematical models to calculate demographic indicators.
- Improve mathematical literacy and the ability to precisely express and argue conclusions.
- Develop critical thinking.

Connection of Learning Outcomes and Grading

Solve simple and complex mathematical problems independently. Knowledge assessment: homework, continuous monitoring, written exams.

Apply deductive and inductive reasoning. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Analyze mathematical models and assess their applicability in solving demographic problems. Knowledge assessment: discussion during exercises.

Apply mathematical models to specific demographic data. Knowledge assessment: Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Apply mathematical models to calculate demographic indicators. Knowledge assessment: homework, continuous monitoring, discussion during exercises, written exams.

Improve mathematical literacy and the ability to precisely express and argue conclusions. Knowledge assessment: discussion during exercises.

Develop critical thinking. Knowledge assessment: discussion during exercises.

	30

Course Description

The aim of the course is to convey to the students the theoretical and practical knowledge of Croatian standard language with special emphasis on its polyfunctionality and on its use in mass media. Language will be viewed primarily from point of view of its functional, social, individual and territorial multifacetedness. The main part of the course will consist of the comprehension of grammar and linguistic norms of the Croatian standard language so that the students will later be able to apply them in their writing, but also in verbal communication.

Grading

Students' work throughout the semester and class activities shall be monitored and evaluated as well as successful presentation of papers, colloquia. Two passed colloquia qualify for a written exam.

Study Programmes

- » Communication Studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the main characteristics of the Croatian standard language
2. Identify functional styles present in Croatian standard language and their particular features
3. Select the appropriate language aids in solving linguistic and stylistic issues
4. Use linguistic norm of standard Croatian language
5. Distinguish between good and bad linguistic expression
6. Apply the knowledge in their written and oral communication

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Organize individual and team work
Recognize and describe Croatian language culture and use language skills in journalistic and proofreading jobs
Prepare and create different forms of presentations and seminar

papers

General Competencies

Acquire and deepen theoretical knowledge of the Croatian standard language and its characteristics of autonomy, standardisation, spatial stability and the elastic stability in time and polyfunctionality. Students will reinforce their proficiency of norms pertaining to the Croatian standard language. Students will be able to utilise their knowledge in everyday communication.

Course Description

Subject goals are adoption of basics of Latin phonology, morphology and syntax. On that way, the interested students will be prepared for a more extensive encounter with the grammatical structure of the Latin language as well as, in the end, with more complex Latin texts important for Croatian culture; To provide a review of Latin philosophical terminology, to explain the influence of Latin philosophical terminology on Croatian; to allow the comparison of Latin and contemporary English philosophical terminology. Enable students to independently study the Croatian philosophical heritage of Latin expression.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*latin or greek, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the rules of correct reading and accent on ancient Latin text
2. Recognize forms of Latin changeable word
3. Apply learnt vocabulary in translating of simple philosophical Latin text in Croatian
4. Analyze the correlation between words from the Latin sentence to the corresponding syntax structures
5. Explain basic philosophical terminology which appears in Croatian language
6. Analyze and understand textx from Croatian philosophical and latin heritage

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical. orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods
Analyze and evaluate scientific and professional papers from

different complementary scientific fields and disciplines
 Analyze the basic assumptions for scientific understanding of the world
 Integrate knowledge of different cultures and identities and critically review their general principles and implications that come from them
 Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks
 Judge the position, importance and relevance of one's own culture in creating personal and national identity

Course Description

Introducing students to the legal, social and political position of Croats outside Croatia in relation to their home country and the countries of their residence.

Students will also get acquainted with the forms of legal protection and foreign policy (multilateral and bilateral) and domestic policy (constitutional and legal).

obligations of the Republic of Croatia towards Croats outside Croatia and the promotion of their interests.

Consider the legal issues of emigration and returnees and train students for analytical and critical interpretation and evaluation of issues related to

legal protection of Croats outside Croatia in order to be actively involved in defining the social, political and legal context of their protection.

Acquire basic knowledge and develop skills on comparative legal forms and measures of return and immigration and mechanisms of demographic renewal

population by accepting and valuing emigration as a developmental factor.

Teaching Assistant
dr. sc. Danijela Rupčić

Grading

Class attendance and discussion, project development and defense and oral exam. In addition to the classic ways of monitoring through lectures, seminar papers, exams, interviews, testing and the like, independent research papers are especially valued and through mentoring they are raised to the level of possible student appearance at scientific and professional conferences or publications in appropriate journals. It is a special motive for students in developing independence and in affirming their cognitive power. In this way, students can publish and create preconditions for future work and employment in research teams already during their studies.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the status, rights and obligations of Croats outside Republic of Croatia, returnees and immigrants
2. Explain the international and national legal framework and areas of protection of Croats outside the Republic of Croatia, returnees and immigrants, legal documents and implementing acts in the field of protection of emigrant rights and obligations, rights and obligations of returnees and implementation of demographic measures and policies
3. Identify entities involved in the programming and implementation of legal protection of emigrants and returnees, in particular the bodies responsible for the implementation of protection policies for emigrants and returnees and their general and specific competencies
4. Describe political, diplomatic, economic, cultural, social, educational, informational, organizational measures and activities for the protection of Croats outside the Republic of Croatia and returnees.
5. Analyze the political rights, especially the active and passive suffrage of Croats outside the Republic of Croatia and the measures of their inclusion in the political processes in the Homeland.
6. Identify specific items and the most significant measures of budgetary and tax policy in relation to Croatian emigrants

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Compare the values of different methods used in expert-scientific research on population and emigration in planning and development services.

Week by Week Schedule

1. Introductory lecture
2. Legal sources for regulating the status and protection of emigrants and returnees
3. Domestic and foreign policy protection of Croats outside Croatia
4. Multilateral and bilateral agreements and the principle of reciprocity
5. Strategy and Law on Relations of the Republic of Croatia with Croats Outside the Republic of Croatia

6. Legal status of Croats outside the Republic of Croatia and acquisition of Croatian citizenship
7. Legal protection of Croats in Bosnia and Herzegovina - the role of the Republic of Croatia in the protection of their equality and constitutivity
8. Legal protection of Croatian minorities in European countries
9. Legal protection of Croatian emigrants in other countries
10. Institutions responsible for the protection of the rights of Croats outside the Republic of Croatia and the issue of return
11. Active and passive suffrage of Croats outside the Republic of Croatia and their inclusion in the social and political life of the Republic of Croatia
12. Croatian emigration as a development factor - legal, political and social aspects
13. Legal regulation of return issues as demographic measures
14. Comparative overview of the legislation of Ireland, Italy, Israel and Poland in the issues of protection of emigrants and definition of measures for exploiting their development potential
15. Legal status of returnees and immigrants; legal framework, measures and activities of return and immigration to the Republic of Croatia

Logic 1

187819

Lecturer

doc. dr. sc.
Marko Kardum

Course Description

To introduce students to the basics of logic and its role in philosophy. Special emphasis is placed on comparing different deductive methodologies to introduce students to different approaches to formalizing deduction. In addition to deductive systems, within the course the student will learn how to recognize and question the validity of a conclusion, as well as the general ideas of contemporary logic and precise formalization of language and thought.

The course contributes to the development of critical thinking and structural formal thinking. It also contributes to the development of general logical-philosophical-methodological competencies of students as well as to explaining the basic philosophical aspects of logic.

Logic 2

Learning Outcomes

On successful completion of the course, students will be able to:

1. Compare different formal methods
2. Analyze different methods for formal reasoning
3. Analyze various aspects of deduction
4. Analyze structures and sentence meanings in informal reasoning
5. Interpret the validity of different conclusions and the validity and consistency of different statements and sets of statements
6. Create natural language sentences based on the language of formal logic and vice versa
7. None
8. None

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods

Analyze the basic assumptions for scientific understanding of the world

Create formal and informal fallacies in philosophical and non-philosophical discourse

Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Apply basic techniques of correct logical reasoning and conceptual analysis

Communication Studies

Croatology

History

Psychology

Sociology

General Competencies

Students will be able to:

1. Analyze problems of the main philosophical disciplines and evaluate different theories and methods of the main philosophical disciplines
2. Analyze basic assumptions for scientific understanding of the world
3. Develop formal and informal logical proofs for various philosophical arguments and their counterexamples
4. Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines
5. Apply techniques of correct logical reasoning and conceptual analysis

Grading

Two written exams and a final oral exam

Prerequisites

Logic 1

Course Description

Introduce the student to more complex logical topics, such as meeting theory, fuzzy and modal logic, induction formalizations and Turing machines. This introduces the student to both advanced methods in the logic and formation of language and with the basics of technology that defines today's society and culture. Special emphasis was placed on connecting logical topics with topics from other branches of philosophy and other logic of related sciences (linguistics, computing and mathematics). The College contributes to the development of critical thinking and structural formal thinking. It also contributes to the development of general logical-philosophical-methodological competences of students as well as to explaining advanced philosophical aspects of logic.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the adequacy of classical logic for the analysis of philosophical problems
2. Evaluate various nonclassical logics
3. Evaluate the possible formalizations of induction and machine learning
4. Evaluate the relevance of various logical formalisms
5. None
6. None
7. None
8. None

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines. problems. theories and methods

Analyze the basic assumptions for scientific understanding of the world

Create formal and informal fallacies in philosophical and non-philosophical discourse

Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Apply basic techniques of correct logical reasoning and conceptual analysis

General Competencies

After successfully finished course students will be able to (1) describe and interpret the philosophical (especially ontological) relevance of logical methodology, (2) apply the logical methodology in the treatment of philosophical problems like the relationship of truth and proof, objective world and abstract syntactic systems, scope and limits of mechanical procedures, the relationship between abstract and concrete objects etc.

Lecturer

doc. dr. sc.
Marica
Marinović
Golubić

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems thorough the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » Sociology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define social issues as research topics.
2. Evaluate different teoretical approaches.
3. Demonstrate conceptual basics of independent research.
4. Relate different approaches in solving of theoretical issues.
5. Modify and integrate actual social theories and write complex scientific papers.
6. Evaluate and judge critically and connect different theoretical approaches.
7. Show the importance of classical sociological theory teaching in its generality and specificity,
8. Synthesize learned through attempts of own contribution by writing written work, oral presentations, and setting up critical issues

Study Programme Learning Outcomes

inequality

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Explain the elements of social inequality

Compare sociological theory and methodology

Divide the types of scientific research

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Sociology

Define sociology as a science

Identify the main actors of certain social processes

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use sources of scientific information

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Explain the elements of social inequality

Compare sociological theory and methodology

Divide the types of scientific research

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Upon successfully passed exam, students will be able to:

Use the general knowledge of society and of social processes.

Explain the key structural factors that are shaping society.

Explain the social change using classical and contemporary sociological approaches.

Grading

Class attendance and participation in the course discussions are particularly taken into account, in addition to writing articles and the final written and oral exam.

Course Description

Present all possible ways of writing in weekly, monthly and bimonthly magazines and train students to write in magazines and periodicals with a critical perception of reality. Furthermore, the intention is to train students to work for a magazine or a periodical, that is, to participate in editorial board, collaborate with other members of the editorial staff and conduct some field work.

Study Programmes

- » Communication Studies (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define magazines and periodicals.
2. List, apply and identify common codes and standards of journalistic writing for magazines and periodicals.
3. Distinguish, in theory and use, between reporting for daily newspapers and that for magazines and periodicals.
4. Define and know the work of a magazine or periodical editorial staff of and a development process.
5. Demonstrate the knowledge and use of a news writing style in reporting.
6. Define, explain and apply the skills of editing a text.
7. List, identify and use typical magazine and periodical forms.
8. Demonstrate knowledge of and apply journalism ethics for work in magazines and periodicals.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Communication Studies

General Competencies

Apply knowledge of the basic concepts of communication sciences and journalism related to the subject; Identify and describe the place and the role of journalism and mass media in society; Explain and critically analyze the acquired theoretical and practical knowledge; Identify, explain and analyze the situation, innovations, challenges, and issues in the media and journalism; Apply acquired journalistic skills in reporting for magazines and periodicals;

Week by Week Schedule

1. Introductory lecture: Introduction to the course content and duties and tasks - the layout of the course.
Seminar: Introduction: the questionnaire is handed out for the purposes of a quality individual work and progress. Writing an article without using the computer for the sake of a better insight into the current writing ability of each student.
2. 2nd lecture: General standards of journalistic writing - general presentation of writing rules in journalism.
Seminar: Individual work with each student on the questionnaire and an article in order to gain a better insight into the current state of a student's journalistic writing, and then determine thematic areas in which each student will create topics for an impromptu editorial board and write articles.
3. 3rd lecture: Differences between daily and weekly / monthly publications: differences in the way of work, approach and thematic content of the publications.
Seminar: Surveying weekly and daily editions and identifying important differences.
4. 4th lecture: The role and importance of the editorial board. What is an editorial board, what purpose does it have and what is expected of a young journalist?
Seminar: Understanding the psychology of the editorial committee and the work on the topic development. How to identify appropriate topics and how to present them?
5. 5th lecture: From the editorial staff to the final text: a piece of journalism from the editorial staff to a text that is ready for printing.
Seminar: Incorporating TEXT FEATURES (headline, title and subtitle).
6. 6th lecture: The writing style and language: the manner in which a text is written, the basic rules, what we must, and we should not do in the text. Special emphasis on writing in magazines and periodicals.
Seminar: Incorporating TEXT FEATURES (headline, title and subtitle).
7. 7th lecture: Text composition: the 5W rule, the importance of the first and last sentence, introducing new people and information, the sequence of events.
Seminar: Shortening the text to a preset size, adjusting it to the available newspapers space.

8. 8th lecture: Developing the topic in writing: setting, presenting research results, new insights, conclusion-making and commentary.
Seminar: Shortening the text to a preset size, adjusting it to the available newspapers space.
9. 9th lecture: Relationship towards information sources: personal contacts and responsibilities towards people from whom we receive information; written/tangible/sources; where and how to verify information.
Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.
10. 10th lecture: Relationships and duties in the newsroom: the importance of cooperation with other colleagues in the newsroom.
Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.
11. 11th lecture: Responsibility towards the editor, owner and reader.
Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.
12. 12th lecture: Journalistic forms. Special reference to magazines and periodicals.
Seminar: Individual presentations of finished research projects and presentation of content.
13. 13th lecture: Establishing a journalist profile - professionalization: how journalists can improve their skills.
Seminar: Photograph selection and signing.
14. 14th lecture: Responsibility and ethics! The most common mistakes in magazines and periodicals.
Seminar: Photograph selection and signing.
15. 15th lecture: A visit from the chief editor of one of the leading Croatian weekly or monthly newspapers.
S: Writing an article of 3 standard pages + an outline of 600 characters.

Marin Držić

215209

Lecturer

prof. dr. sc.
Viktorija Franić
Tomić

Course Description

The course is a monographic study on Croatian renaissance playwright Marin Držić with references to all of his non-literary and literary texts. Course is divided into sections concentrated on the most important points of Držić's life, all of his dramas will be studied in according to the knowledge of normative poetic and than in relation to the situation that reigned in their own time in visual arts, in music, sciences and this will be connected with the state of spiritual and ideological consciousness. Special attention will be paid to the erudite strata with regard to the possible parallels between experiences of Siena humanistic circle and Držić's results in his Sheppard dramas. During the course will be studied the forms of political consciousness in the Renaissance and their reflection on the reality of Dubrovnik and Držić attempts to change the rules of the game with the power. Students will investigate the impulses that Držić could receive from his predecessors at the scenes of Dubrovnik and his parody of their models and scenic languages. Special attention will be given to the multi-layered Držić's messages. During the course will be studied the circumstances and the iconographic consciousness during the performances. Insight will be taken to the concept of Renaissance from Burckhardt book on Culture of the Renaissance in Italy to the latest views on this epoch produced in the studies of new historicism. Attention will be given to the concept of mannerism in Držić's plays, as well as intertextual relations in his plays to the most important authors of his time Pietro Aretino, Thomas Morus, Niccolo Machiavelli and Baldasare Castiglione. The generic system of renaissance drama will b studied due to the standardization of comedy and tragedy, and the so-called. middle genre, pastoral drama. There will be described and studied numerous thematic domain in Držić' texts emphasizing the glossary in which will dominate fortune, conspiracy, utopia, love and beauty. Držić's place in the Croatian literary canon and cultural history will be established during this course and the students will become aware of the canonization process of Držić that was specially intensive in the last hundred years and was subject of various ideological strategies.

1. Establishing Držić's place in the Croatian and European literary canon. Contributions of Đuro Matijašević, Ignjat Đurđević, Saro Crijević, Sabo Dolci, F. M. Appendini, Šime Ljubić and Franjo Petračić's edition of Držić's dramas in 1875. Rešetar's contribution in the fixing of Držić's opus. Questions of authorship and their resolution. Partially preserved texts. Lost literature of Croatia.

Grading

Students are required to actively participate in all forms of teaching. Monitored activity of students during the teaching process. Each of program assignments including the elaboration of seminar participates in the formation of the final rating. Students commitment will be tested by passing a regular examination period in written and oral exam.

2. Writer's biography is analyzed on the basis of all known sources. The assumption about the year of the writer's birth. The lacunae in the documents from author's maturity to the unclear circumstances of his death in Venice after the conspiracy against the rulers of Dubrovnik. Analysis of some key documents: the election at the position of the rector of the Church of All Saints in 1526. Travel and stay in Siena and election for student rector. Travels with Count Rogendorf to Vienna and to Constantinople; attacks on Držić in Dubrovnik after return and after the performance of his first play *Tirena*. The document about the death of Držić's friends Pero Primović in Venice. Political memorandum from the 1566.

3. Theater and dramatic literature before Marin Držić in Dubrovnik: Plays by Džore Držić, Mavro Vetranović and Nikola Nalješković and their opus. The circumstances of early theatrical presentation in Renaissance Dubrovnik as well as outline of cultural and spiritual life of the city since the arrival of Ivan from Ravenna to the birth of Marin Držić. Filippo Diversis book as an important source for the cultural history of the Dubrovnik Republic. Book of Benedict Kortuljević as a source for mentality history in the time before Marin Držić.

4. Marin Držić in Siena. The development of the Italian Renaissance theater. The experience of Elijah Crijević with Plaut and his study on the prologues written for the Roman Academy of Pomponius Leto. The outlines of the Italian Renaissance dramaturgy: Poliziano, Ariosto, Machiavelli, Aretino, Dolce, Grotto. The term Renaissance from Burckhard to today and the causes of its metamorphosis.

5. Držić's comedy *Pomet*. The secret of its lost text. Modern reconstruction of *Pomet*. *Tirena* and accusation of plagiarism. Views of various literary historians on the affair with accusation and the interpretation based on Držić's and Vetranović's statements. The performance of *Tirena* and its first and second Prologue. About the pastoral genre in the Renaissance. Excursus: *Tirena* as the source of Gundulić's *Dubravka*

6. Novel *od Stanca*. The interpretation of the text with special regard to the attitude towards the III.th Comedy by Nikola Nalješković. Linking of this texts with Hektorović prose letter to doctor Vanetti. Motif of the beard cutting from the ancient tragedy to the Renaissance comedy. Topic of syphilis in literary and non-literary texts, of the early modern period. Aretino's *Imaginations*. Amataus Luzitanus in Dubrovnik and his text about the treatment of Sabo Bobaljević.

7. Theater within the theater in Držić's *Venus* and *Adonis*. Analysis of mannerist style in this drama. Mythology in the Renaissance and its iconography. Pictures from Bagnocavallo with the theatrical scene in Dubrovnik from 1519. Držić's poetry. What is the collection and about its place in Croatian literature. Petrarch and his followers in Croatia. The reasons and results of antipetrarchism. 8. Comedy *Uncle Maroje* as Držić's most successful drama. The circumstances of its performance 1551. and the problem of chronology. About the realization of Držić's dramas during performances in the private houses, public spaces and in the main square. Držić stages and their relation to related experiences in the renaissance theaters of Europe at that time. Analysis of *Negromant* speech as utopian text. Different interpretations of *Uncle Maroje* by: Živko Jeličić, Leo Košuta, Frano Čale, Slobodan Prosperov Novak.

9. City and cities in *Uncle Maroje*. Držić's cities. Connections of Držić with Machiavelli's *Il Principe*. Female figures in comedy *Uncle Maroje*. Amendments to the end scenes of *Uncle Maroje*: Mihovil Kombol, Ranko Marinković, Antun, Šoljan.

10. Theme of twin brothers in theater history: Menaechmi and Amphitryon of Plaut. Držić's Pjerin. Damaged play Đuho Krpeta as an example of the mixture of the pastoral and the comic genre.

11. Analysis of two Držić's smaller comedies: Arkulin and Mande. Comic theories from Plato and Aristotle to the surrealist, Bakhtin and Frye.

12. Marin Držić and his interpreters. Views of literary historians who have interpreted Držić's place in national history of literature from Vatroslava Jagića to our time. Problems of plot in the renaissance comedy. Analysis of Držić's relations to Plaut comedies. The description of Dubrovnik oligarchs rule in Držić's conspiratorial letters.

13. Mannerism in Pastoral drama Grižula. Parody and the play with the words in this drama. Marin Držić William Shakespeare's predecessor. Direct parallels among their works. Shakespeare connection with Croatian literature. The premiere of Falstaff in Zadar, Romeo and Juliet theme in Gučetić's tragedy Dalida, the same sources in Palmotić's Pavlimir and in Shakespeare's The Tempest. 14. The tragedy Hecuba from 1559. and her relations with Euripides and Italian writer Lodovico Dolce.. Hecuba read in mannerist key. Prohibition of two Hecuba's performances and reasons for that practice. Manuscripts of Hekuba. Nikola Gučetić as an actor in Hecuba. Nikola Gučetić and his circle Figure of woman slave as the former queen. Comparison with Posvetilište Abramovo by Mavro Vetranović.

15. Držić's conspiratorial letters to Cosimo I de 'Medici 1666. Jean Dayre. The conspirators in the Renaissance. Utopia by Thomas Morus. Death in Venice as a literary theme and as a part of Držić's biography. Držić's death as a literary theme of the playwrights in 20th century.

- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze literary and non-literary texts of Marin Držić and other writers of Croatian Renaissance.
2. Analyze of changes in the treatment of drama writing during various epoch and capability to explain the causes of these changes from the ideological point of view and also through the changes of poetic conventions and norms. The capability to identify literary genres: comedy, tragedy and pastorals and analyze their individual examples
3. Develop the capability for thematic analysis of literary works especially glossary dominated by keywords such as: fortuna, virtù, conspiracy, utopia, love, beauty. The capability of analyzing individual works from the perspective of renaissance poetic and also through most prolific contemporary methodological instruments.
4. Develop of the ability to read and to interpret literary works as sources for the history of ideas, of mentality and of Croatian national identity. The students will be capable to read Držić's texts as sources for the cultural history of Croatia.
5. Recognize the development of national and supranational literary I canon, and be prepared to determine the position of the Croatian writer in both European and national canon.
6. Recognize terminology characteristic for the study of dramatic works in the analysis of the major works of Marin Držić.
7. Use the glossary connected with drama, theories in the analyses of most important Marin Držić's dramas.
8. Develop the ability of critical thinking based on primary and secondary literature and skill in writing term papers on the opus of Marin Držić and of contextual and intertextual relations that are formed by his texts

Marketing Communications and Publicity 28502

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

The main objective of this course is to introduce students to the basics of marketing communications and publicity, as well as their role in the marketing process. Students should acquire the basic concepts and theories and be able to apply them.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*public relations, 4th semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*public relations, 6th semester, 3rd year*)
- » Communication Studies (Studij) (*public relations, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, understand and apply integrated marketing concepts, principles and the terminology in a business and non-profit environment.
2. Explain and understand the role of integrated marketing communications and of the professionals who use it in an organization;
3. Define, explain and use the skills of advertising campaigns, press releases, sales promotion, and other elements of the promotional mix;
4. Develop a unique promotional plan for real companies;
5. Demonstrate the ability to understand the role and importance of publicity of organization and its products.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

- Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society
- Inform about journalism and public relations

Mass Communication Research: A Historical Overview

38841

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

The aim of this course is to introduce students to the historical development of the media and mass communication research and to direct them to its current systematics as well as to the different approaches and theories that emerged from these researches. In the practical part, students will conduct their own research projects based on the most important theories of mass communication.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and describe the role of communication sciences in society
2. Describe and explain the key events and processes in the history of communication science, the development of the most important research and authors
3. Define the research topics for scientific research in communication science
4. Reproduce and explain the most important research topics of mass communication studies, their authors and the theories derived from them
5. Explain and apply methods of critical analysis to the acquired theoretical knowledge.
6. Apply theoretical knowledge on their own research projects.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

ECTS Credits	4.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	15
	15

Grading

Of particular importance for grading are the attendance of classes and taking part in discussions. Papers (presentations and student papers) and written exam.

Prerequisites

Academic Literacy
Introduction to Journalism
Originators of Communication Sciences and Their Works

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Identify and describe Croatian language culture and use language skills in journalistic and proofreading jobs

Communication Studies

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Recognize and describe Croatian language culture and use language skills in journalistic and proofreading jobs

General Competencies

Identify and describe the position and role of communication science in society. Indicate and explain key events and processes of history of communication science, especially the most important researches. Define research topics for scientific research communications. Reproduce and explain the fundamental research of mass communication, and theories arising from them.

Screening of student's work

Media and Journalism Genres

117213

Lecturer

Zlatko
Vidačković,
nasl. doc. dr.

Course^{SC} Description

The aim of the course is for students to acquire knowledge on the classification in the field of journalism in order for them to understand the journalistic discourse as a specific discourse in public communication. Classification of areas is a fundamental prerequisite for a scientific approach to study and understanding of the types and genres. The types and genres are the basis of all communication, including the communication in the media.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 4th semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 6th semester, 3rd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognise the characteristics, values and goals of certain media and journalistic genres
2. Distinguish specific characteristics and importance of genres as means of journalistic expression
3. Describe and analyze individual media and journalistic genres (talk show, diary, daily news, interview)
4. Compare genres with respect to the type of media (print, radio, television, web portal)
5. Assess the impact of convergence and converged media on the structure of genres
6. Critically analyze the deforming of certain basic journalistic genres in the process of development of commercialization, tabloidization and sensationalism in the media

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Inform about journalism and public relations
 Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media
 Recognize and compare the peculiarities of individual media
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Inform about journalism and public relations
 Identify the foundations and theories of communication science and journalism, public relations and mass media
 Identify and compare the peculiarities of individual media
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers

General Competencies

Apply the knowledge of basic concepts from communicology and journalism;
 Reproduce, apply and explain the basic theories of journalism and mass media that relate to genres;
 Explain and critically analyze the acquired theoretical and practical knowledge; Recognize, explain and analyze the situation, innovations, challenges and issues in the media and journalistic genres.

>90: Excellent (A/5) 80–89: Very Good (B /4) 70–79: Good (C/3) 60–69: Satisfactory / Pass (D/2) <60: Fail (F/1)

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Organize individual and team work

Recognize and compare the peculiarities of individual media

Recognize the needs and willingness to engage in lifelong learning

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Organize individual and team work

Identify and compare the peculiarities of individual media

Recognize the needs and willingness to engage in lifelong learning

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Prepare and construct work assignments in the interdisciplinary field

Prepare and create different forms of presentations and seminar papers

Psychology

Analyze the findings of psychological research in Croatia in the relevant cultural and social context and to recognize the possible peculiarities of the subject phenomenon for the Croatian population, in relation to other - European, or wider global - populations

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Determine the need for lifelong learning and professional development

General Competencies

By completing the Media Psychology course, students of Communication and Psychology achieve the following program-level learning outcomes:

1. Develop the ability for critical thinking about the influence of media on individuals and society.
2. Apply theoretical knowledge from psychology and communication studies in the analysis of media phenomena.
3. Conduct research in the field of media psychology using contemporary scientific research methods.
4. Analyze and evaluate media content and its effects on perception, emotions, and behavior.
5. Communicate and present scientific and professional findings clearly and in an organized manner, both in written and oral form.
6. Develop interdisciplinary competencies, linking knowledge from psychology and communication studies with practical application in media contexts.

Learning Outcomes - Intellectual (Cognitive) Skills

Through the Media Psychology course, students will develop intellectual (cognitive) skills that include the ability to analyze psychological processes in the reception and interpretation of media content, evaluate the credibility of information sources, and critically compare different theoretical approaches to media effects. They will also acquire competences to create conceptual models for explaining the psychological impact of new media technologies and to predict possible psychological and social consequences of exposure to different media content.

Learning Outcomes - Practical and Generic Skills

Through the Media Psychology course, students will develop practical and generic skills that include applying oral and written communication and presentation skills, using modern digital tools in research and professional contexts, and working collaboratively in teams to solve complex tasks. Students will acquire skills of independent and cooperative research, critical thinking and reasoned debate, as well as the ability to integrate knowledge from media psychology with other disciplines and apply it in practical situations.

Connection of Learning Outcomes and Grading

In the Media Psychology course, student learning outcomes are assessed through a seminar paper and two midterm tests or a written exam. The seminar allows students to practically apply their intellectual and generic skills, including research, analysis, and critical processing of media and psychological topics, as well as presentation and argumentation of their findings. The midterm tests and written exam assess understanding of theoretical concepts, the ability to analyze and evaluate media phenomena, and the ability to connect theory with practice. This ensures a comprehensive evaluation of intellectual, practical, and generic learning outcomes.

Media Relations

50140

Lecturer

izv. prof. dr. sc.
Ivana Greguric

Course Description

The aim of the course is to explain the importance of media relations by applying the relevant communication theory and the contemporary model of public relations. The introductory lectures will present also the historical development of media relations, which enables the students to gain insight into the differences with the contemporary model of media relations, which is the subject of teaching in this course. Contemporary model are based on research: both media and organizations. Therefore, students will be introduced not only to the importance of research, but also to methods of analyzing both the media and the organization. Furthermore, the mediation of information as well as the information management process will be explained more closely. In this context, the vertical and horizontal flow of information within the organization will be defined. Also, the basic values needed to achieve quality relations with journalists will be highlighted. For a contemporary model of media relations, strategic planning and valuation methods are of crucial importance, therefore to these topics will be also given a significant space. With particular emphasis on form and style, students will be introduced to the most important tactics in media relations, such as press releases, interviews, press conferences. Organization's web sites and organization's social networks will be also included.

Marko Jerković

ECTS Credits 5.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours
30

Grading

Written exam: 40 %; oral
exam: 60%.

Course Description

The main aim of this course is to provide students with basic knowledge about the medieval period, and to acquaint them with the main political, institutional, social, economic, cultural and religious medieval trends. Besides acquiring knowledge in basic data, students will be encouraged to analyse characteristically medieval processes in comparative perspective and to develop sensibility for changes that were occurring during a thousand year long period. Students will be able to perceive peculiarities of medieval society, and to detect social, religious and political continuities and discontinuities from the late antiquity to the early modern and even until modern era. The aim is, also, to elaborate medieval history topics which were insufficiently analysed in historiography and those which require new interpretations.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » History (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify causes of new political geography of the European territories from 4th to 7th century
2. Describe main processes in social, cultural and political history of medieval times
3. Describe key turning points in the development of medieval civilisation
4. Analyze process of layering medieval civilisation onto Western and Eastern societies
5. Describe main directions of Arab conquest
6. Explain changes in European society around the year 1000
7. Describe medieval political systems
8. Analyze relations between Church and the state in the Middle Ages
9. Identify changes in society in the late medieval period

Study Programme Learning Outcomes

Dual-major studies

History

History

- Identify historical facts and processes from European and national history
- Name and describe individual historical periods
- Identify important historical figures from different periods of European history

General Competencies

After finishing the programme student will be able to:
 describe historical processes,
 explain cause and effect relations of historical events and processes,
 identify major issues in interpretation of history,
 tell what is the interpretation of history,
 design his/her own conclusion on different historical events and processes,
 demonstrate the importance of interdisciplinary interpretations of historical events,
 reconstruct historiographic tools in making conclusions of historical processes and events.

Course Description

The aim of the course: to develop the ability and skills associated with the basic methodology of the scientific work and research in historical sciences, to gather sources and literature relevant with the various historical topics, to review and analyse them, and to write various scientific works with the help of the IT technologies.

Study Programmes

» History (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce methodology of the scientific work related with historical sciences
2. Explain historical sources and literature
3. Relate and reproduce types of historical sources
4. Identify and compare the various problems of the methodology in historical sciences
5. Reproduce the important selection of sources for various historical research
6. Use of tables, graphs in scientific research
7. Classify the scientific works and their structure
8. Reproduce of the main terms related with the writing of the scientific works and preparation for print
9. Use of the gained knowledge in writing of the scientific works and bibliographies
10. Identify plagiarism and know how to avoid it

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

History

Single out historical processes and explain their topic of

interpretation

Express (in your own words) basic historiographical facts about world history

Use the computer, the Internet and other technical and digital aids to process historical data

Create a game, quiz or questionnaire based on historical figures and events from different periods of the Croatian past

Norm and classify historical literature and sources

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

General Competencies

After successful course students will be able to:

explain methodology of the scientific work related with historical sciences,

name types of historical sources and discuss sources and literature,

identify the importance of historical sources in historical research,

produce tables, graphs and databases in historical research,

define the main terms related with the writing of the scientific work and prepare it for print,

evaluate the importance of the gained knowledge and to use it in process of writing,

identify plagiarism,

name the most important institutions in which the historical sources are kept.

Grading

1. Written exam / colloquia: 60% 2. Seminars: 25% 3. Oral exam: 15%

Prerequisites

Macrosociological Theories

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems thorough the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 5th semester, 3rd year*)
- » Sociology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define concepts of sociological theories established in 1960s and 1970s.
2. Explain three main theoretical approaches: symbolic interactionism, phenomenology and exchange theory.
3. Use aquired analytical tools for understanding of social phenomena.
4. Apply all mentioned sociological theories.
5. Combine sociological theories and write complex science papers.
6. Evaluate approaches and individual interpretations of sociological theories.
7. Explain the importance of modern sociological theories in their generality and specificity
8. Analyze the appropriateness of contemporary thought about society in the current empirical situation and concrete social and cultural conditions

Study Programme Learning Outcomes

Dual-major studies

Sociology

Define sociology as a science

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality
 Use theoretical concepts in the analysis of society
 Critically judge the current social situation
 Explain the elements of social inequality
 Compare sociological theory and methodology
 Divide the types of scientific research
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

Sociology

Define sociology as a science
 Identify the main actors of certain social processes
 Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality
 Use sources of scientific information
 Use theoretical concepts in the analysis of society
 Critically judge the current social situation
 Explain the elements of social inequality
 Compare sociological theory and methodology
 Divide the types of scientific research
 Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Upon successfully passed exam, students will be able to:
 Use the general knowledge of society and of social processes.
 Explain the key structural factors that are shaping society.
 Explain the social change using classical and contemporary sociological approaches.

Migration theory

194394

Lecturer

Snježana
Gregurović,
nasl. doc.

Course Description

Introduce students to the basic concepts and theoretical concepts, causes and consequences of migration. A critical and interdisciplinary approach to migration topics through a historical and contemporary perspective on migration. Develop an understanding of the complexities of ethnic relations in migration and post-migration processes with an emphasis on the identity of Croatian emigrant communities in a European and overseas perspective.

Study Programmes

» Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize migration, ethnic and post-migration processes
2. Recognize the causes and consequences of migration waves from the Croatian area
3. Identify Croatian emigrant communities and describe their ethnic and identity characteristics
4. Apply theoretical frameworks for historical migration
5. Apply theoretical frameworks of contemporary migration
6. Use terms related to migration, ethnic and post-migration processes

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability to terminologically understand demographic and immigrant terms

Propose political and legal solutions based on scientific research of demographic and emigrant content

Conduct relevant research on the Croatian resident and emigrant population

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the political circumstances that caused the initiation of military and police operations and actions
2. Analyze the key military and police forces that participated in the implementation of military operations from 1992 to 1995
3. Apply acquired knowledge to understand political processes in the Republic of Croatia and Bosnia and Herzegovina
4. Explain the results of the implementation of military and police operations to create preconditions for ending the war in the territory of the Republic of Croatia and Bosnia and Herzegovina
5. Explain the different points of view of the three peoples in BiH regarding the organization of that country
6. Show the key military and political figures who participated in the decision-making process on launching liberation operations

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Use a computer, the Internet and other technical and digital aids for processing historical data

List the historical sources for studying national history

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Use the computer, the Internet and other technical and digital aids to process historical data

List historical sources for the study of national history

Apply the methodology of various historiographical fields and other research methods from the humanities

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

General Competencies

- demonstrate points of contact between contemporary historical sciences and other humanistic, social and natural sciences
- critically judge and evaluate personal historical understandings and attitudes
- show interdisciplinarity and critically judge different scientific methodologies and views on special issues and problems
- apply established historical terminology and nomenclature
- to support the further development of the historical profession based on the principles of scientific rationality, international recognition, scientific excellence and honesty

Military and Political Aspects of the Battle of Vukovar

270365

Lecturer

doc. dr. sc.
Mijo Beljo

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours

15

15

Teaching Assistant
dr. sc. Nikolina Šimetin
Šegvić

Grading

Activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is oral.

Course Description

The defence and occupation of Vukovar are symbols of the Croatian War of Independence and the process of establishing an independent Croatian Republic. The aim of the course is to familiarise students with the various sources of the study subjects Vukovar Battle, to point out the importance of the defenders of Vukovar and health care, but also to describe the significant contributions of women to the events in Vukovar in 1991.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the media image of the battle of Vukovar
2. Classify the course, the success and difficulty of defending the city in the context of all the battlefields of the war,
3. Show the importance of ordinary people in the defense of the city
4. Discover the testimony of witnesses / participants in the battle with media reports and based on that create potential interpretations,
5. Analyze historiographical controversies of the battle of Vukovar.
6. Review various historiographical interpretations of the events in Vukovar and its surroundings

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

List the historical sources for studying national history
 Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science
 Single out historical processes and explain their topic of interpretation
 List historical sources for the study of national history
 Norm and classify historical literature and sources
 Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

General Competencies

After finishing the programme student will be able to:
 write an essay on different historical period,
 defend his/her own opinion in discussions on different historical events and processes,
 reconstruct historiographic tools in making conclusions of historical processes and events,
 interpret historical sources,
 combine different historical processes.

Week by Week Schedule

1. Getting to know the students with the course commitments - insight into the geographical area of Vukovar and its surroundings
2. The historical context of the battle for Vukovar
3. Media reports on the battle of Vukovar
4. The role of CDF's in the battle of Vukovar
5. The attitude of state authorities towards the battle of Vukovar
6. The role of the international community in the battle of Vukovar
7. Croatian Radio Vukovar
8. General Blago Zadro
9. Vukovar hospital
10. Ovčara
11. The role of women in 1991
12. The media image of Vukovar in 1991
13. Vukovar defenders - guardians of Croatia
14. Vukovar defenders on other Croatian battlefields

Week by Week Schedule

1. Introduction: an introduction to the study of modern Croatian literature. Basic concepts. Concepts of the end of century, Impressionism, Neoromanticism, Secession. Term of "historical moderna". Poetic and historical determinants of the historical moderna. Historical moderna: political, literary and cultural context. Seminar: Seminar assignments. Student obligations.
2. Prose of the historical moderna: forms, tendencies. Short story, novella, novel, travelogue. Janko Leskovar, Antun Gustav Matoš, Dinko Šimunović, Milutin CihlarNehajev, Vladimir Nazor, Josip Kosor, Ivan Kozarac, Ivo Vojnović, Franjo Horvat Kiš, Ivana Brlić Mažuranić. Seminar: Work on the text: by A. G. Matoš, Janko Leskovar.
3. Lecture: Poetry: poetic conception, the creators. Antun Gustav Matoš, Vladimir Vidrić, Milan Begović, Dragutin Domjanić, Vladimir Nazor, Ivo Vojnović, Fran Galović, Janko Polić Kamov. Seminar: Work on the text: Vladimir Nazor: "Istarske priče" (Istrian stories) (selection). Ivana Brlić Mažuranić: "Priče iz davnine" (Tales of Long Ago). Vladimir Vidrić: poetry. Fran Galović: poetry.
4. Modern drama. Milan Ogrizović, Ivo Vojnović, Milan Begović. Notions of the avant-garde, expressionism. Josip Kosor, Janko Polić Kamov, Vladimir Čerina, Ulderiko Donadini. Seminar: Work on the text: Ivo Vojnović: "Dubrovačka trilogija" (Dubrovnik Trilogy). Milan Begović: Pustolov pred vratima (Adventurer at the Door)
5. Preliminary exam: written assessment of understanding, interpretation. Seminar: Dinko Simunovic: "Duga, Muljika, Alkar" Milutin CihlarNehajev: "Bijeg" (Escape).
6. Literature after Modernism. Miroslav Krleža. Seminar: Work on the text: Miroslav Krleža: "Gospoda Glembajevi" (The Noble Glembays). "Na rubu pameti" (On the Edge of Reason).
7. Layering of literature: high/low. Milan Begović. Marija Jurić Zagorka. Seminar: work on the text: M. Jurić Zagorka: "Kneginja iz Petrinjske ulice" (The Princess from Petrinjska Street).
8. Poetry. Croatian young lyric. Antun Branko Šimić, Tin Ujević, Miroslav Krleža, Gustav Krklec, August Cesarec, Dobriša Cesarić, Dragutin Tadijanović, Drago Ivanišević, Ivan Goran Kovačić, Marin Franičević. Seminar: Work on the text: Antun Branko Šimić: poetry. Tin Ujević: poetry. Dobriša Cesarić: poetry. Dragutin Tadijanović: poetry.

9. Lecture: poets of the Second Moderna. Jure Kaštelan, Vesna Parun, Nikola Miličević, Josip Pupačić, Slavko Mihalić, Milivoj Slaviček, Ivan Slamnig. Seminar: Jure Kaštelan: poetry. Slavko Mihalić: poetry. Vesna Parun: poetry. Ivan Slamnig: poetry.
10. Prosaicists and playwrights: the second half of the 20th century. Ranko Marinković, Petar Šegedin, Vladan Desnica, Slobodan Novak, Mirko Božić, Marijan Matković, Ivan Raos. Seminar: Work on the text: Ranko Marinković: "Kiklop" (Cyclops).
11. Prose, continuation. Fantasists. Prose in jeans. Woman letter. Sunčana Škrinjarić, Irena Vrkljan, Slavenka Drakulić, Dubravka Ugrešić. Ivan Slamnig, Antun Šoljan. Ivan Aralica, Nedjeljko Fabrio. Seminar: Work on the text: "Proljeća Ivana Galeba" (Springs of Ivan Galeb). S. Novak: "Mirisi, zlato i tamjan" (Scents, gold and frankincense).
12. Postmodern poetry. Danijel Dragojević, Branko Maleš, Boris Maruna, Zvonimir Mrkonjić, Anka Žagar, Delimir Rešicki etc. Seminar: Antun Šoljan: "Izdajice" (Traitors). Danijel Dragojević: poetry.
13. Modern/Postmodern prose: continuation. Goran Tribuson, Pavao Pavličić, Stanislav Habjan, Edo Budiša, Zoran Ferić. Perceptions of high/heavy and low/light literature and postmodern interpretation. Seminar: Work on the text Nedjeljko Fabrio: "Vježbanje života" (Exercising life). Irena Vrkljan: "Svila, škare" (Silk, scissors).
14. Contemporary prose. Seminar. Work on the text: Stanislav Hajban: "Nemoguća varijanta" (Impossible variant). Goran Tribuson: "Povijest pornografije" (History of pornography). Zoran Ferić: "Anđeo u ofsajdu" (An Angel in offside).
15. Course evaluation. Preliminary exam.

Course Description

Introduce the students to the Croatian modern and postmodern literature. Read canonical texts from selected periods. Introduce the students to strategies of periodisation and literary-historical overviews of the periods in question.

Study Programmes

» Croatology -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and explain the literary canon of the Croatian literature in the modern and postmodern periods;
2. Explain the manner of articulation and functioning of the literary canon;
3. Identify the foundations of canonical authors' opuses in the Croatian modern and postmodern literature;
4. Describe and write a short academic text on a literary topic which will demonstrate elementary academic literacy (referencing, quoting).

Study Programme Learning Outcomes

Dual-major studies

Croatology

Single out and interpret the characteristics of the Croatian Literary Canon, describe, present and argue the history of Croatian literature, apply literary-theoretical terms

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

General Competencies

Describe and explain the literary canon in the Croatian literature of the modern and postmodern periods. Explain the manner of articulation and functioning of the literary canon.

Modern English and the Media

38845

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

To make effective use of sociolinguistic competences.

To enable students to develop strategies of successful communication.

To enable students to apply the acquired strategies through discussions in complex linguistic situations.

To enable students to express their personal attitudes on a particular topic.

Study Programmes

» Communication Studies (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate registers and conventions of communication processes in the context of changing socio-cultural environment.
2. Explain their personal views and attitudes closely reasoned in different communication situations.
3. Recognize and make correct use of English idioms and phrases to accomplish communication.
4. Demonstrate and contribute to discussions and debates by effective use of modern professional terminology related to the media and communication sciences in the English language.
5. Demonstrate autonomous presentation of a topic of choice in the English language.
6. Write autonomously a seminar essay in English.
7. Use expressions and structures characteristic for language of the media

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Categorize and reexamine journalistic ethics

ECTS Credits 4.0

Semester Summer

English Level L3

E-learning Level L1

Study Hours 60

Grading

Regular attendance and active participation in classes 20%; presentation of a topic of choice 10%; seminar essay 30%; oral final exam 40%.

Prerequisites

English for Journalists
Writing in English

Think critically about topics related to journalism, public relations, communications and society as a whole
 Organize individual and team work
 Write texts and prepare other materials for media and public relations in Croatian and English
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers

General Competencies

Apply and make effective use of the acquired basic concepts related to modern journalism in the English language.
 Express themselves clearly and concisely in spoken and written word in the English language with emphasis on English for journalists and public relations.
 Explain and critically analyse the acquired theoretical and practical information.

Motivation

37810

Lecturer

izv. prof. dr. sc.
Zrinka Greblo
Jurakić

Course Description

The course is developed in order to acquaint the students with systematic compendium of scientific concepts and understandings in area of motivation, as well as the development and implementation of scientific concept of motivation in general and specifically with concept of motivation in learning, motivation in sports and labor. Particular emphasis is put on the implementation of motivational psychology's theoretical cognition in everyday life and professional practice.

Study Programmes

» Psychology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and differ basic principles of motivational processes influence on behavior and achievement, as well as external and internal influences on motivation.
2. Apply the knowledge of the nature of motivation on understanding of its nature and its correlation with other mental processes and human wellbeing.
3. Generalize motivational processes knowledge on special cases and phenomenon in professional work.
4. Estimate abstractly logical relations between motivational and other mental processes.
5. Evaluate research projects and scientific articles in the area of motivation.
6. Create new scientific ideas to verify the relations between motivational processes and activity outcomes.
7. Apply the motivational techniques in different settings
8. Estimate which motivational approach is appropriate for specific case

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific and professional works in the field of

Neurobiology of behavioral disturbances and psychiatric disorders 144875

Lecturer

prof. dr. sc.
Zdravko
Petanjek

Course Description

The general aim of the course is to familiarize students with the basic characteristics of the most common mental illnesses and their biological background, with special emphasis on the characteristic features visible with methods of brain imaging.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic psychological and neurological characteristics of the major psychopathological disorders
2. Explain the relationship between biological predisposition and external factors in the development of behavioral disorders and mental illness,
3. Apply the theoretical and practical knowledge in understanding of symptoms of major mental disorders and abnormal behavior
4. Apply their knowledge in practical work with patients, using functional brain imaging (EEG, fMRI, PET, MEG)
5. Create multimedia presentations with clinical examples which show the correlation between damage/dysfunction of certain brain areas and psychopathological condition,
6. Analyze the scientific articles in the field of neurobiology of psychopathology
7. Explain the role of biological factors in the development of mental disorders and abnormal behavior

Study Programme Learning Outcomes

Grading

Class attendance and discussion, colloquium, written exam and seminar paper. In addition to the classic ways of following through the lecture, colloquium, seminar papers, exams, interviews, tests, etc. are especially valued independent research papers and through mentoring is raised to the level of a student's possible appearance at scientific and professional conferences or publishing in appropriate journals. It is a special motive for students in developing independence and in confirming their cognitive forces. In this way, students can publish and create preconditions for future work and employment in research already during their studies teams.

Course Description

develop students' knowledge and skills related to the organization of space and society

□ to enable students to understand the functioning of administrative-territorial organizations

□ to acquaint students with the basic identity forms of the state

□ to enable students in discovering, recognizing and defining concepts, categories and laws related to statehood

□ to train students for independent scientific research work related to the consideration of state concepts

□ to enable students to apply standard and special methods and techniques in research of state models

□ explain to students the specifics of Croatian statehood

□ to acquaint students with the development of global and regional influence on statehood

□ to develop in students the application of developmental projection methods and models of assessment of state functionality

□ explain to students the basic conditionality for the development of the Croatian geographical area and society

□ enable students to understand, explain and anticipate future development issues, trends, conditionality and

consequence of the spatial and social organization of the total Croatian population

□ to develop students' knowledge of endangering basic systems in Croatian society and space

□ to enable students to learn about the foundations of the survival of Croatian statehood

□ to develop in students a sense of the need for a common identity as a precondition for a new state concept

□ consider Croatian identity as the foundation of a new concept

□ to look at the Croatian population in a unique concept

Study Programmes

» Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define spatial, social, theoretical and methodological concept of the new statehood
2. Combine thinking, graphic, cartographic, computational and other methods in considering state processes, connections, relations and models, strategic significance of the new concept of the state
3. Define, observe, define, address and forecast changes in the new concept of the state
4. Explain the spatial discrepancy of the existing statehood
5. Develop the skills of written and oral consideration and explanation of the basics of the new model
6. Explain the spatial and social logic and the overall Croatian potential

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Use statistical, quantitative, graphic and geographic software packages

Demonstrate the ability to terminologically understand demographic and immigrant terms

Screening of student's work

New ethical culture

187891

Lecturer

doc. dr. sc.
Matija Mato
Škerbić

Course Description

The primary aim of the course is to introduce to the students the basic categories and the categorical limitations of traditional ethics in facing the challenges of scientific and technical civilization. Next aim is to help students to properly approach the historical circumstances ("heuristics of fear") and conceptual flows that articulate the need for a new understanding of responsibility (the "ethics of the future"). Furthermore, to introduce students the most important projects within the new ethical culture, but also to the deviations that are manifested modern forms of abuse of ethics, ethical bodies and procedures. By combining lectures, student presentations and seminar discussions students will be able to achieve the didactic goals of existential enjoyment and competent approach to the problems of the contemporary world. Problem deepening and additional attractiveness of the content will be achieved by involving guest experts on specific topics. In addition to acquiring theoretical competences, the aim of the course is to train and capacitate the students for proper participation in the work of ethical and bioethical bodies in the society.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 4th semester, 2nd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and describe the underlying concepts and the distinction of ethics
2. Analyze and evaluate the features of scientific and technological progress within the social environment and the reasons for the emergence of bioethics
3. Define and describe the underlying concepts, persons, authors and publications that are crucial to the development of bioethics or new ethical cultures
4. Prepare, demonstrate and explain the underlying framework of new ethical or bioethical problems and their social manifestations
5. Select and orientate in bioethical and scientific thinking
6. Apply integrative thinking, respect the principle of interdisciplinarity and multiperspectivity

ECTS Credits 3.0

Grading

In agreement with the teacher, the student chooses one of the programmatic texts (under numbers 3, 9 or 13) and 1-2 books/articles from the list of compulsory literature.

7. Analyze and orientate in the key moral contemporary human dilemmas, as well as on possible moral dilemmas in professional and public life
8. Identify and detect forms of abuse of ethics, ethical bodies and procedures

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
 adherence to the principles of academic integrity and ethical norms of research and publishing
 adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods
 Analyze and evaluate scientific and professional papers from different complementary scientific fields and disciplines
 Describe the features of the humanities and their interdisciplinary aspects
 Judge scientific knowledge for the purpose of generating research hypotheses and supporting a scientific approach to cognition
 Determine the position and importance of humanities in the general structure of science

Non-Experimental Methods

86410

Lecturer

Goran Milas,
nasl. prof. dr.
sc.

Course Description

The main objectives of the course are to introduce students to the basics of the non-experimental methodology and the different modalities of its use. Through lectures, students will get to know the basics of the non-experimental methodology, the reasons for its use, and basic designs through which it is applied. Students will also be acquainted with the way of conceiving non-experimental research and writing a report or research paper based on it.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the non-experimental designs and different modalities of their use
2. Analyze the different segments of non-experimental research approaches
3. Evaluate the non-experimental studies
4. Apply non-experimental designs in their own research
5. Create the research that will make advantage of the non-experimental design

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

ECTS Credits 4.0

Semester Winter

English Level L1

E-learning Level L3 (10%)

Study Hours

Organisational Psychology

28729

Lecturer

izv. prof. dr. sc.
Maša Tonković
Grabovac

Course Description

The course provides a detailed overview of the basic psychological knowledge in the area of human labour. Through learning about different topics such as job analysis, working capacity and performance, selection and training of personnel, evaluating work performance, motivation to work, absenteeism and accidents and the impact of physiological processes in the performance, the students will acquire the knowledge necessary for psychologists working in the organization.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain key concepts and theories in work psychology, including motivation, job satisfaction, stress, and organizational behavior.
2. Assess and critically analyze employee work ability and performance.
3. Evaluate factors influencing employee motivation and well-being.
4. Plan the procedures of job analysis
5. Design a selection procedure and choose appropriate selection methods.
6. Assess professional development needs and plan employee development activities.
7. Develop preventive strategies to maintain employee health and well-being.
8. Outline findings and recommendations effectively, tailored to the target audience.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Classify the basic theoretical approaches and laws of psychological assessment and counseling in different areas of applied psychology

ECTS Credits 5.0

Semester Summer

English Level L1

E-learning Level L2 (8%)

Study Hours
30
15

Teaching Assistants
dr. sc. Eta Krpanec
dr. sc. Dora Popović

Grading

Midterm exams / Written exam: 2 × 35%; Seminar paper: 20%; Class attendance: 10%.

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Plan the search of literature, databases and other sources of information

Determine the need for lifelong learning and professional development

General Competencies

Integrate knowledge of fundamental psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior).

Classify basic theoretical approaches and principles of psychological assessment and counseling in different applied psychology fields.

Critically evaluate fundamental principles of psychological ethics and relate ethical principles to various areas of psychological practice.

Organize and present professional and scientific reports based on empirical data, using scientific literature and adhering to international standards, either independently or in a team.

Plan literature searches, including databases and other information sources.

Examine the historical development and theoretical approaches in different branches of theoretical and applied psychology.

Identify the need for lifelong learning and professional development.

Learning Outcomes - Intellectual (Cognitive) Skills

Explain key concepts and theories in work psychology, including motivation, job satisfaction, stress, and organizational behavior.

Assess and critically analyze employee work ability and performance.

Evaluate factors influencing employee motivation and well-being.

Plan the procedures of job analysis

Learning Outcomes - Practical and Generic Skills

Design a selection procedure and choose appropriate selection methods.

Assess professional development needs and plan employee development activities.

Develop preventive strategies to maintain employee health and well-being.

Outline findings and recommendations effectively, tailored to the target audience.

Connection of Learning Outcomes and Grading

The midterm exams (or final exam) will assess the following learning outcomes:

- Explain key concepts and theories in work psychology, including motivation, job satisfaction, stress, and organizational behavior.
- Assess and critically analyze employee work ability and performance.
- Evaluate factors influencing employee motivation and well-being.
- Plan job analysis procedures.
- Design a selection procedure and choose appropriate selection methods.
- Assess professional development needs and plan employee development activities.
- Develop preventive strategies to maintain employee health and well-being.

The seminar paper will assess the following learning outcomes:

- Explain key concepts and theories in work psychology, including motivation, job satisfaction, stress, and organizational behavior.
- Present findings and recommendations effectively, tailored to the target audience.

Prerequisites for
Mass Communication
Research: A Historical
Overview
Media Law
Semiotics in Mass
Communication
Theories of Media and
Mass Communication

Course Description

Introduce the students to the development of communicology through works (books, articles, films, TV and radio features), theoreticians, scientists, journalists and public relations specialists who have contributed most to the present development of communicology as a science and of mentioned professions studied theoretically.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Communication Studies (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply basic concepts in communicology.
2. State the crucial theoreticians and scientists associated with the emergence and the development of communicology, reproduce and explain their basic theories or researches.
3. State and explain crucial events in the history of communicology.
4. Define the freedom of the press and the freedom of expression, explain and analyze their development through history.
5. State, reproduce and explain the basic theories of communication and communicology.
6. State and explain the basic learning or discoveries of authors in read, watched or listened works.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Think critically about topics related to journalism, public relations, communications and society as a whole
 Present knowledge about journalism, public relations, communications and society using different communication methods

Communication Studies

General Competencies

Apply the knowledge of the basic concepts in communicology. Identify and describe the place and role of communicology in the society. Reproduce and explain the basic theories of communication and communicology. State and explain the crucial events in the history of communicology. Work efficiently and independently.

Grading

STUDENT OBLIGATIONS

Class attendance is obligatory (minimum of 70%); Students are obliged to actively participate in classes; Students are obliged to write two essays; ECTS CREDITS: Class attendance 1 credit, class activity 1 credit, first essay 1,5 credits, second essay 1,5 credits;

GRADING AND

EVALUATION: Student class attendance and participation are graded – exam essays

ATTENDANCE AND

ACTIVITY Students are required to attend classes (minimum of 70%) in order to qualify for grading. For ten points from activity the students shall receive a higher grade by one. ESSAYS

Students are obliged to write two essays. The first essay must be submitted to the address kroatologija@gmail.com by 15/11/2013 at the latest. The second essay must be submitted to the address

kroatologija@gmail.com

6. Distinguish, evaluate and assess the learners and support the decision in this regard with arguments.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Croatology

Croatology

Justify and support the need and willingness for lifelong education

Identify, describe and argue the influence of European and world literature on the Croatian Literary Canon

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Sociology

General Competencies

The overview of the history of world literature is a part of the teaching of literature in primary and secondary schools. In terms of the taught subject matter it presents extremely important cultural knowledge about the development of the human spirit. With regard to human rights it raises the awareness of the relationships in the society, the family and the internal psychological processes of the individual. After finishing the course "Overview of the History of World Literature", the students will be able to: notice the differences in terms of content and meaning in the field of literature and culture. This will contribute to the development of their cognitive skills and aesthetic sensitivity. As a result, the students will be able to better and more fully understand the traditional and contemporary culture across a diachronic and synchronic overview.

Forms of Teaching

- » Predavanja
 - » heuristic class
- » Seminar
 - » Problem solving oriented class

Week by Week Schedule

1. Course details elaborated according to the schedule of teaching
2. Calendar:
3. The concept of world literature and of literary periods
4. The beginnings of literature (reading: Gilgamesh)
5. Literature of antiquity (reading: Sophocles: Antigone)
6. Medieval literature (reading: Carmina Burana)
7. Renaissance literature (reading: Dante: Inferno)
8. Baroque literature (reading: Pedro Calderon de la Barca: Life Is a Dream)
9. Literature of Enlightenment and Classicism (reading: Moliere: The Miser)
10. Literature of Romanticism (reading: Goethe: The Sorrows of Young Werther)
11. Literature of Realism (reading: Dostoevsky: Crime and Punishment)

by 13/12/2013 at the latest. There are three available topics for the first essay: 1. The influence of antiquity on the Medieval, Renaissance and Baroque literature; 2. The character of a woman in the Medieval, Renaissance and Baroque literature; 3. The development of drama from the period of antiquity to the Enlightenment and Classicism. The students may choose from three topics for the second essay: 1. The conflict of reason and senses in the literature of Romanticism; 2. The attitude of the social system toward the individual in the literature of Realism; 3. The influence of the Avant-garde on the contemporary literature.

ESSAY GRADING AND POINTS: Each essay should have between 1200 and 1500 words (3-4 pages). Each essay shall receive between 1 and 10 points. An essay may not receive more than the maximum number of points from the presented areas: 1. Knowledge of the theoretical literature 2 points 2. Good understanding of the topic 2 points 3. Good knowledge of the context surrounding the topic 1 point 4. Good use of professional language and expression 1 point 5. Systematically supported facts and meaning 2 points 6. Originality of ideas and their presentation and support 2 points. Essays are graded in the following manner: 6 points - sufficient (2), 7 and 8

12. Literature of Moderna (reading: Charles Baudelaire: The Flowers of Evil)	points - good (3), 9 points
13. Contemporary literature (reading: Alessandro Baricco: Ocean Sea)	- very good (4), 10 points
14. Final knowledge assessment and grading	- excellent (5).

Learning Outcomes

On successful completion of the course, students will be able to:

1. Maintain quality social contacts in the context of peer support
2. Examine the social context and their own attitudes/values towards people with disabilities
3. Recognize ethical challenges in providing peer support
4. Explain and support with arguments the applicability of social policy in direct work with people with disabilities
5. Write work plans for providing peer support
6. Provide peer support to students with disabilities in the academic setting

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Communication Studies

Communication Studies

Croatology

History

Psychology

Sociology

Discuss social issues in Croatian society

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Critically judge the current social situation

General Competencies

The course is declared as a university course and is not tied to a particular study programme.

Week by Week Schedule

1. Peer support (1 lecture + 1 exercises): Introduction to peer support. The analysis of concrete examples, a student with a disability and his peer - provider of support - establish adequate and appropriate form of support.
2. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of the persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
3. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.

4. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
5. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
6. General characteristics of persons with disabilities (5 lectures + 3 exercises): Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
7. Human rights (2 lectures + 0 exercises): Introduction to the importance of human rights, especially of persons/students with disabilities. International and regional instruments for the protection and promotion of the rights of persons with disabilities. National frameworks and institutions for the protection of the rights of persons with disabilities. Advocating for the rights of people with disabilities.

8. Human rights (2 lectures + 0 exercises): Introduction to the importance of human rights, especially of persons/students with disabilities. International and regional instruments for the protection and promotion of the rights of persons with disabilities. National frameworks and institutions for the protection of the rights of persons with disabilities. Advocating for the rights of people with disabilities.
9. Accessibility of higher education to persons with disabilities (2 lectures + 3 exercises): A review of existing legal regulations that enables work on assuring equal opportunities for students with disabilities in the higher education system of the Republic of Croatia; overview of the special rights of students with disabilities; analysis of the current state of accessibility to higher education institutions in the Republic of Croatia. Specific needs of students with disabilities and the obstacles they encounter in the academic environment through practical examples. Forms of support for students with disabilities (institutional, individual).
10. Accessibility of higher education to persons with disabilities (2 lectures + 3 exercises): A review of existing legal regulations that enables work on assuring equal opportunities for students with disabilities in the higher education system of the Republic of Croatia; overview of the special rights of students with disabilities; analysis of the current state of accessibility to higher education institutions in the Republic of Croatia. Specific needs of students with disabilities and the obstacles they encounter in the academic environment through practical examples. Forms of support for students with disabilities (institutional, individual).
11. Basics of multiculturalism (2 lectures + 2 exercises): Introduction to the theory and practice of multicultural education and multicultural counseling. The three-part model of multicultural competence. Sensitization to work with people with disabilities.
12. Basics of multiculturalism (2 lectures + 2 exercises): Introduction to the theory and practice of multicultural education and multicultural counseling. The three-part model of multicultural competence. Sensitization to work with people with disabilities.
13. Attitudes toward people with disabilities (1 lecture + 2 exercises): The definition of attitude and attitude components. Origin of attitudes. The relationship between attitude and behavior. Changing attitudes. Attitudes towards people with disabilities. Using a questionnaire on the attitudes toward people with disabilities.
14. Ethics (2 lectures + 2 exercises). Ethical principles in the relationship between a student and an assistant - a student with disabilities. Ethical issues and dilemmas in the relationship between a student and an assistant - a student with disabilities. Peer support skills (0 lectures + 10 exercises): The importance of recognizing our own feelings and the feelings of others. Appropriate display of feelings. The importance of empathy in human relations. Developing skills of empathy. Setting boundaries in relationships. Assertiveness skills. Academic skills (0 lectures + 2 exercises): The components of responsible and assertive learning. Cooperative learning. Planning and organizing time. Devising individual plans (0 lectures + 5 exercises): On the basis of acquired knowledge and skills, each student, under supervision, devises an individual support plan for the upcoming semester.

15. Ethics (2 lectures + 2 exercises). Ethical principles in the relationship between a student and an assistant - a student with disabilities. Ethical issues and dilemmas in the relationship between a student and an assistant - a student with disabilities. Peer support skills (0 lectures + 10 exercises): The importance of recognizing our own feelings and the feelings of others. Appropriate display of feelings. The importance of empathy in human relations. Developing skills of empathy. Setting boundaries in relationships. Assertiveness skills. Academic skills (0 lectures + 2 exercises): The components of responsible and assertive learning. Cooperative learning. Planning and organizing time. Devising individual plans (0 lectures + 5 exercises): On the basis of acquired knowledge and skills, each student, under supervision, devises an individual support plan for the upcoming semester.

Peer Support for Students with Disabilities

262093

Associate Lecturer

Martina Horvat,
dr. sc.

Course Description

The course holder is the University of Zagreb, and it is held at the Faculty of Education and Rehabilitation Sciences, University of Zagreb.

The course can be enrolled through 3 models (A, B, C):

A. Preparatory workshop (15 Lectures + 30 Exercises), provision of peer support (75 Exercises + group consultation 15 Exercises):

5 ECTS: 2 ECTS preparatory workshops (education) + 3 ECTS realization of peer support during one semester (achieving ECTS points is confirmed by "passed". Student work is not graded.)

B. Providing peer support (75 Exercises + 15 hours of group consultation):

3 ECTS: implementation of peer support during one semester (prerequisite: previously completed model A or C; the achievement of ECTS points is confirmed by "passed". Student work is not graded.)

C. Preparatory workshop (15 Lectures + 30 Exercises): 2 ECTS: preparatory workshop/education (Achieved student competencies are monitored through the activity of participating in a preparatory workshop and through an oral exam, and are evaluated grade.)

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)

Grading

Models A and B: The achievement of ECTS credits is confirmed with a "pass." Students' work is not graded. The students' achieved competencies are monitored through the quality of creating Individual Plans and the quality of providing peer support. Model C: The achievement of ECTS credits is confirmed with a "pass." The students' achieved competencies are monitored through their participation in a preparatory workshop and an oral exam. They are graded as follows: excellent (5), corresponding to the letter grade A; very good (4), corresponding to the letter grade B; good (3), corresponding to the letter grade C; sufficient (2), corresponding to the letter grade D; and insufficient (1), corresponding to the letter grade F.

Week by Week Schedule

1. Preparatory Workshop (15 hours of lectures + 30 hours of exercises):

Peer Support (1 hour of lectures + 0 hours of exercises):
Introduction to peer support.

2. 2. General Characteristics of People with Disabilities (9 hours of lectures + 9 hours of exercises): Defining basic concepts, classification of impairments/disabilities, active policy measures, and support models (2 hours of lectures, 1 hour of exercises).
 Motor impairments and chronic illnesses: Etiology and phenomenology of motor impairments and chronic diseases, abilities and limitations of students with motor impairments and chronic diseases, barriers for these students in higher education, and ways to overcome them (1 hour of lectures, 1 hour of exercises).
 Visual impairments: Blindness and low vision; characteristics, abilities, and specific functions of students with visual impairments; difficulties in everyday academic life for students with visual impairments; possibilities and importance of support (1 hour of lectures, 2 hours of exercises).
 Understanding hearing impairments: Deafness and hearing loss; specifics in speech and language acquisition; sign communication; needs in higher education; support systems. Specifics, characteristics, abilities, and needs of students with deafblindness and their support system in everyday academic activities (1 hour of lectures, 1 hour of exercises).
 Specific learning disabilities: Features and definition of dyslexia; support for students with dyslexia, dysgraphia, and dyscalculia (1 hour of lectures, 1 hour of exercises).
 Students with ADHD: Difficulties for students with ADHD; adaptations and support for students with ADHD in higher education (1 hour of lectures, 1 hour of exercises).
 Students with Asperger's syndrome: Asperger's syndrome; neurodiversity and perspectives of individuals on the spectrum; functioning of students with Asperger's syndrome; support and forms of adaptation (1 hour of lectures, 1 hour of exercises).
 Mental illnesses and disorders: Types of mental illnesses and disorders; causes and prevalence; support options in higher education. Sensitization for the needs of students with disabilities in the academic environment (1 hour of lectures, 1 hour of exercises).
3. 3. Human Rights (1 hour of lectures + 1 hour of exercises): Introduction to the significance of human rights, especially the rights of people/students with disabilities. International and regional instruments for the protection and promotion of the rights of people with disabilities. National frameworks and institutions for the protection of the rights of people with disabilities. Advocacy for the rights of people with disabilities.
4. 4. Accessibility of Higher Education for People with Disabilities (1 hour of lectures + 1 hour of exercises): Overview of existing legal regulations that enable activities aimed at equalizing opportunities for students with disabilities in the higher education system in Croatia; presentation of the special rights of students with disabilities; analysis of the current state of accessibility in higher education institutions in Croatia. Specific needs of students with disabilities and barriers they face in the academic environment through practical examples. Forms of support for students with disabilities (institutional and individual).
5. 5. Basics of Multiculturalism (1 hour of lectures + 1 hour of exercises): Introduction to the theory of multiculturalism and the practice of multicultural education and counseling. A three-part model of multicultural competence. Sensitization for working with people with disabilities.

6. 6. Attitudes Towards People with Disabilities (1 hour of lectures + 1 hour of exercises): Definition of attitude and its components. Origins of attitudes. Relationship between attitude and behavior. Changing attitudes. Attitudes towards people with disabilities. Application of an attitude questionnaire towards people with disabilities.
7. 7. Ethics (1 hour of lectures + 1 hour of exercises): Ethical principles in the student assistant – student with disabilities relationship. Ethical issues and dilemmas in this relationship.
8. 8. Peer Support Skills (0 hours of lectures + 10 hours of exercises): Importance of recognizing one's own feelings and the feelings of others. Appropriate expression of feelings. Importance of empathy in interpersonal relationships. Developing empathy skills. Setting boundaries in relationships. Assertiveness skills.
9. 9. Academic Skills (0 hours of lectures + 2 hours of exercises): Components of responsible and assertive learning. Collaborative learning. Planning and organizing time.
10. 10. Creation of Individual Plans (0 hours of lectures + 4 hours of exercises): Based on all acquired knowledge and skills, each student, under supervision and in collaboration with a student with disabilities, creates an Individual Support Plan for the student with disabilities.
11. Implementation of Peer Support (0 hours of lectures + 75 hours of exercises + 15 hours of supervision): After the preparatory workshop, based on the created individual plan, peer support is provided for 75 hours per semester, in agreement with the student with disabilities, with 15 hours of supervision and an evaluation meeting (depending on the chosen model).

doc. dr. sc.
Alena Gizdić

Course Description

To familiarize students with the concepts and theories in the field of perception.

Study Programmes

» Psychology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe human sensory system and the way how sensation is formed.
2. Compare different sensory systems regarding to stimulus, sensory organs, the way sensation is formed.
3. Explain perception of depth, perception of shape, perception of motion, and constancy of perception.
4. Explain connection between stimulus and sensation.
5. Describe phenomena of attention.
6. Compare different perceptive illusions and explain their background.
7. Analyze subjective factors of in perception.
8. Name perceptual disorders.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Create appropriate forms of communication and cooperation in different professional environments

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Determine the biological and neurobiological bases of

Course Description

The objective of this course is to introduce students with basic topics from philosophical and cultural anthropology. Starting from the philosophical-anthropological precept of the man as a Being in the world; his social, spiritual, traditional and operative dimension; it will be present diversity of cultures and the possibilities of their interpretation. The second aim is to analyze the historical development of philosophical and cultural anthropology as a scientific discipline and to get acquainted with the most important cultural-anthropological theories and their main representatives. Furthermore, there is a judgment and evaluation of approaches and research questions of cultural anthropology as well as a critical judgment on the possibility of applying theoretical knowledge at their own local level.

Grading

For the final grade, attendance at classes, activity at seminars, successful preparation of a seminar paper and taking an oral exam are monitored.

Course Description

The main goal is to educate and train students for understanding, critical analysis, as well as the ability to communicate complex cultural phenomena, observed in the context of historical, social, ideological, political, and other circumstances. To this end, the teaching methodology will be adapted to allow a philosophically based approach to the multidimensionality of culture.

Week by Week Schedule

1. Introduction: thematic review; subject specificity; defining culture and its determination towards the non-cultural; forms and ways of cultural manifestation; culture and education; culture and civilization; ways of researching cultural phenomena; holistic approach; methodology (pluriperspectivity).
2. Critique of the bipolar scheme that rationalities and formal methods of opposing humanistic sensibility;
3. I. Kant and his notion of the Enlightenment; German Romanticism; Herder i 'the idea of education (Bildung); A. Bastian: 'basic ideas' (Elementargedanken; Humboldt and 'Weltanschauung';
4. English Romanticism; M. Arnold and the Opposition of Culture and Anarchy; culture as a humanistic ideal; culture as a form of civilization; folklore; J.J-Rousseau: Culture and the 'Natural Order'; Anthropologist E. Tylor - the first use of the meaning of culture in its universal meaning;

5. Cultural evolution; Understanding cultural processes using Darwin's theory; W. James: a comparison of biological and sociological evolution; natural selection and social variability; H. Spencer: application of evolutionary principles to cultural thought ('social Darwinism'); Cultural 'heritage' and biological model of evolution; R. Dawkins: Theory of memes - analogies between biological and cultural evolution (memes - genes); Critiques of Dawkins Theory; An attempt to overcome the biology-culture analogy and to perceive their mutual influence and conditioning (how culture production affects gene expression).
6. Instead of memes - symbols; E. Cassirer: Man as an animal symbolicum; What makes a symbol? Symbolic forms: myth, language, science, art, religion, history; Essay on Man (selected chapters).
7. E. Cassirer, Philosophy of Symbolic Forms (1-3); Cassirer - a philosopher who significantly contributed to overcoming the gap between the natural sciences (Naturwissenschaften) and the humanities (Geisteswissenschaften) and to finding links between the analytical and continental philosophical tradition.
8. E. Cassirer: The 'Logic' of Humanism (The Logic of the Cultural Sciences); Determining the new science of culture in relation to Hegel and Heidegger. While the natural sciences are characterized by a representative function (Darstellungsfunktion), the cultural sciences rely on the expressive function (Ausdrucksfunktion).
9. M. McLuhan (Gutenberg Galaxy; Global Village) and the idea of collective identity. Culture, mass media, and mass media.
10. Culture and cognition Contrary to the beliefs of classical cognitivism, the idea will be affirmed that cognition cannot be reduced only to mental processing that can be expressed in a propositional form, but that cognition is essentially articulated through meanings generated by cultural creativity; The relationship of cognition and emotion.
11. Culture in the context of the philosophy of mind; Understanding the mind from the perspective of contemporary cognitive and neuroscience; Constitution of the human mind in the context of culture (enculturation)
12. Multiculturalism and interculturality Globalization processes and multiculturalism; The fate of national culture in the context of globalization processes; Multiculturalism: a threat or an opportunity?
13. Culture as 'good' (tangible and intangible); Various forms of cultural manifestation in the modern world: culture of behavior, behavior, speech, healthy living, dressing, eating, driving
14. Pop (Ular) Culture, Culture and Ideology; 'Cultural Revolutions'; J. Derrida and 'deconstruction'; Post-modernism and post-post-modernism.
15. The future of culture: culture in the circumstances of artificial intelligence and robotics. Critique of UI (H. Dreyfus).

Course Description

Philosophical insight into the social life of man and the historical forms of organizing society. A philosophical approach to the history and conceptions of man, culture and society in different historical epochs. Philosophical understanding and interpretation of the purpose and meaning of history.

Study Programmes

» Philosophy and Culture -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the specificity and importance of philosophy of history in the study of philosophy
2. Explain the difference between ancient and modern understanding of history
3. Define basic philosophical concepts
4. Identify philosophical problems and solutions in the original texts
5. Argue about major philosophical problems and schools
6. Recognize the philosophical views of the author in the original texts
7. Name the main authors and their main works, philosophical concepts, problems and schools
8. Argue about major philosophical concepts, problems, and schools

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Critically review different theories

Explain the relationship between humanities and other sciences and integrate different knowledge of their characteristics

Describe the features of the humanities and their interdisciplinary aspects

Judge the position, importance and relevance of one's own culture in creating personal and national identity

ECTS Credits 3.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours 30

Grading

The overall course work during the semester is evaluated. The final grade is derived from participation in class work and grades at the oral exam. Assessment at the oral exam includes an assessment of reading the original literature.

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Course Description

Main goal of collegium Physical education and sports is raising the awareness of importance of engaging in physical activity and sports, learning new and preserving already acquired motor knowledge and skills in order to influence anthropological characteristics (subcutaneous fat and muscle mass) as well as motor, functional, cognitive and conative skills and improving health and fitness. Also, the task of the course is to satisfy the need for movement, as well as to train students for rational, meaningful use of leisure, as well as to contribute to a quality life at a young age, maturity and old age.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Communication Studies (Studij) (*required course, 1st semester, 1st year*)
- » Croatology -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Croatology (Studij) (*required course, 1st semester, 1st year*)
- » History -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)

- » Sociology -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » Sociology (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the need and importance of regular exercise in maintaining health and improving quality of life
2. Develop the abilities, traits and positive attitudes defined within the physical and health education area that contribute to more successful study
3. Apply part of basic kinesiological and practical motor knowledge of particular kinesiological activity
4. Create an active rest (active break between learning, during leisure time)

5. Develop positive attitudes and thinking and maintain developed self-discipline and work habits
6. Use motor knowledge and skills for physical exercise or competition
7. Demonstrate the basic elements of a particular kinesiological activity
8. Explain the basics of the influence of regular exercise on health

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Critically review different theories

Analyze, develop and evaluate your own work and progress in learning, understanding and explaining different philosophical problems

Determine the need for lifelong learning and professional development

Communication Studies

Organize individual and team work

Recognize the needs and willingness to engage in lifelong learning

Prepare and construct work assignments in the interdisciplinary field

Course Description

Political communication is one of the most important elements of the politics, which is itself based on mutual communication of individuals as well as on common knowledge that arise as a result of communication. In contrast to the idea of mass communication, which typically represents a process of targeted one-way flow of information, the concept of political communication, especially in democratic societies, includes also the interrelationship of factors in the political process and the methods and ways of conveying information. The methods of political communication reveal the true identity of a political system. The public space in its role of a place of communication and shaping of public opinion in modern western democracies becomes a sophisticated mechanism of various information transfer. In this context, the media is becoming less an instrument of media policy and more a kind of stock exchange for information and the boundary is lost between the sender and the recipient, and the participants are required to have specific skills at their disposal. Development of media brings changes in the structure of political communication and creates new political priorities.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 2nd semester, 1st year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 4th semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 6th semester, 3rd year*)

- » Communication Studies (Studij) (*elective courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify key concepts of political communication, and describe the main types of political systems and their communication methods.
2. State and explain the development of methods of political communication through history;
3. Define, identify and explain the various models of political communication;
4. Classify the primary actors in political communication and explain their roles in shaping public opinion and political campaigns.
5. Compare different forms of political propaganda and propaganda techniques, and assess their impacts in historical and contemporary political contexts.
6. Plan and conduct an content analysis of digital communication channels of political parties or options during the electoral period.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Think critically about topics related to journalism, public relations, communications and society as a whole

Explain and describe public relations

Identify and compare the peculiarities of individual media

Apply social science methods and identify research topics suitable for journalism, media, public relations and communications research

Prepare and construct work assignments in the interdisciplinary field

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Think critically about topics related to journalism, public relations, communications and society as a whole

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of communications and journalism related to political communication; Identify and describe the place and role of political communication in society; Reproduce, apply and explain the basic theories of political communication and public opinion; Identify, explain and analyze the situation, innovations, challenges and problems in application and research of political communication and public opinion; define, explain and distinguish the effects of political media, attitudes, knowledge and behavior of the audience;

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

2.5
ECTS Kolokviji [EN]

1 ECTS Projekt [EN]

4 ECTS

Week by Week Schedule

1. Introductory Lecture – an overview of the course, syllabus, practical assignments, midterm exams, and student responsibilities.
2. The development of political communication and political thought evolution; types of political systems: the evolution of political thought, the structure of political systems, and the advancement of political communication methods.
3. Political communication: Key concepts, actors, and scope: The concept of political communication, the primary stakeholders in communication, methods, and channels of communication.
4. Political publics and public opinion: Public opinion and the public sphere, the public and characteristics of group membership, types of audiences in political communication, the motivational dimension of audiences, public opinion research in politics, the impact of the public on political communication.
5. Politics, media, and public relations: Media and topics of domestic and foreign policy, activities and techniques of political public relations at various levels of government, within institutions and political parties, strategic communication, and ethical considerations.
6. First Midterm Exam.
7. Political marketing, advertising, and digital political communication: Political branding, political marketing – concepts and characteristics, visual identity – colors, symbols, advertising.
8. Electoral campaigns and political communication: The commercialization of politics, types and characteristics of electoral campaigns, strategic elements, value orientation of the campaign, carriers of the political message.
9. Political propaganda: Concept, types and forms of propaganda, fundamental elements in the study of propaganda, propaganda techniques, catalysts of aggression in politics, information warfare, examples from traditional and digital communication channels.
10. Digital political communication: channels, characteristics, content, audience

11. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
12. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
13. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
14. Student projects – content analysis of the official digital communication channels (website and social media) of a political party or option during the electoral period.
15. Second Midterm Exam

ECTS Credits 4.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours 30

Grading

Lecture attendance - 10%;
First test - 45%; Second
test - 45%.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the political institutions, processes and issues from the perspective of political geography and geopolitics.
2. Differentiate the types of borders on the land and sea.
3. Explain the most important inter-state conflicts and disputes last sixty years.
4. Define the countries according to the type of government.
5. Define the basic geopolitical terms.
6. Define basic geographical concepts.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Communication Studies

Croatology

History

Psychology

Sociology

General Competencies

Understanding the basic characteristics of politics through the processes of creation, development, functioning, and disappearing of political-territorial units (countries) in the world.
 associate general knowledge about society and social processes
 point out the conflicting opinions and alternative hypotheses in various social issues
 point out the contradiction and common features of assumptions
 different political, religious and cultural orientation
 identify cause-and-effect relationships among social phenomena
 show the key structural factors that shape society
 combine different theoretical assumptions in the study of social phenomena

Week by Week Schedule

1. Definition of political geography. Belgium
2. Development of political geography. Exclaves and enclaves. Kosovo.
3. Country. Nation. Cyprus.
4. Theories of the creation of a country. Afghanistan.
5. Borders, borders on the land, creation of borders. Northern Ireland.
6. Criteria for demarcation, types of borders. Croatian borders. Territorial dispute between Croatia and Slovenia. Tibet.
7. Borders on the sea, borders of the air space. Israel (Palestine).
8. Test
9. Types of the countries according to the government. North Korea.
10. Capital City. Cuba
11. Dependent areas. Greenland. Gibraltar. Antarctica.

12. Border regions. Electoral geography. Caucasus.
13. International relations. Landlocked countries. Ukraine. Quebec.
14. Geopolitics and geostrategy. Kashmir. Arctic.
15. Geopolitics of the cold war. Vietnam.

Population Policy

269767

Lecturer

doc. dr. sc.
Monika Balija

ECTS Credits	3.0
Semester	Winter
English Level	L0
E-learning Level	L1
Study Hours	15
	15

Grading

Students are expected to: attend class, be active at class discussions, read literature, present their seminar and write homework assignments.

Course Description

Course objective is to capacitate students to comprehend system of measures and actions which affect demographic processes especially natural and mechanical population movement for the purpose of reaching certain specific population movement aligned with economic, social, health, political and other aims. One of the objective is also to explore possible effect of economic and social policy on labour force and overall population development.

Theme and field elaboration:

Concept, principles and objectives of population policy,

Types of population policy.

Population policy features.

Correlation of population policy and labour market.

National population policy in Croatia- theory and experience,

Projection of world population movement and population policy development.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and define types of population policies
2. Explain public policy influence on population development
3. Compare measures of population policy in Europe and worldwide
4. Explain and analyse effects of family policy measures on fertility
5. Select efficient type of population policy for demographic threatened countries

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Illustrate the need for scientific studies on demographic and immigration issues

Conduct relevant research on the Croatian resident and emigrant population

Interpret data on Croatian and global population and emigration

Compare the values of different methods used in expert-scientific research on population and emigration in planning and development services.

Pos-Industrial Society

285534

Lecturer

doc. dr. sc.
Ivan Perkov

Course Description

Introduce students to the sociological theories of post-industrial society according to D. Bell, A. Touraine, M. Castells and J. Fourastie. Enable students to acquire and apply the theories and basic sociological concepts of postindustrial society. Teach students how to operationalize these concepts using examples of empirical research on changes in social structures that lead to post-industrial society.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 6th semester, 3rd year*)
- » Sociology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain theoretical concepts and empirical models of post-industrial society.
2. Explain and evaluate concepts and empirical research on the changes in modern division of labor, socio-economic and socio-professional structure.
3. Evaluate the impact of technology on social change and the importance of an interdisciplinary approach to research these topics.
4. Write research on changes in the socio-professional structure.
5. Analyze the data from the research and interpretation of the results.

Study Programme Learning Outcomes

Dual-major studies

Sociology

Define sociology as a science

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Recognize the indicators of social pathologies

Comprehend and interpret the ways particular sociological

work, final exam.

theories originated, as well as their significance and application

Compare different social phenomena in different cultures

Sociology

Identify the main actors of certain social processes

Explore social inequality and consider the factors, societal institutions and social categories that contribute to such inequality

Use sources of scientific information

Use theoretical concepts in the analysis of society

Critically judge the current social situation

Explain the elements of social inequality

Comprehend and interpret the ways particular sociological theories originated, as well as their significance and application

General Competencies

Use the general knowledge of society and of social processes.

Explain the key structural factors that are shaping society.

Explain the social change using classical and contemporary sociological approaches.

Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.

Week by Week Schedule

1. Meaning of the concept of post-industrial society
2. Basic sociological concepts from the theory of post-industrial society
3. Socio-historical factors in establishing the post-industrial society
4. Basic features of post-industrial society according to the theory of D. Bell
5. Dimensions of technological change and the "revolution" in the materials
6. A critical approach to the concept of post-industrial society by A. Touraine

7. The theory of M. Castells: informationalism as a developmental form of post-industrial capitalism
8. Company services as a sociological concept
9. Working in the service society: a critical review of postindustrial polarization on socio-professional structure
10. Changes in the socio-professional structure as an empirical indicator of post-industrialization
11. The new division of labor - the micro and macro approaches
12. The negative social consequences of postindustrial change
13. The process of demographic transition and changes in the labor market
14. Feminization of labor as a factor of post-industrial society
15. Croatian society in the post-industrial age - social development or regression?

Practicum in Biological Psychology

37803

Lecturer

prof. dr. sc.
Zdravko
Petanjek

Course Description

The overall objective of the course is to identify morphological and functional organization of the brain in practice, with particular emphasis on structures important in the processing of complex mental functions in humans. Specific objectives are elaborated per lecture subjects.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and identify fundamental parts of the central nervous system, the main morpho-functional division of the cerebral cortex, laminar organization and basic morphological properties of neurons in the human cerebral cortex;
2. Recognize and identify on the map of the human cerebral cortex functional specialization of different areas;
3. Recognize and identify the main structures of the limbic system;
4. Apply their knowledge in practical work using different instruments for brain imaging (MRI, fMRI, PET, MEG, EEG);
5. Use of multimedia web educational materials of the field of neuroscience in the preparation of presentations;
6. Create multimedia presentations with clinical examples that show the correlation between damage / dysfunction of specific brain areas and functional failure;
7. Analyze (basic level - recognition of basic structure) brain imaging records.

Study Programme Learning Outcomes

Psychology

Determine the biological and neurobiological bases of psychological processes and behavior

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

Evaluate basic content from complementary social, humanistic and biomedical disciplines.

ECTS Credits 4.0

Semester Winter

English Level L0

E-learning Level L1

Study Hours
15
45

Teaching Assistants

Tin Luka Petanjek, dr. med.

Matija Vid Prkačin

Grading

Active participation in classes - 10% Exercise - 20% Two written colloquia - 25% Two practical colloquia - 35% Oral exam - 10 %

General Competencies

3. Explain the biological and neurobiological foundations of psychological processes and behaviour.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
13. Value the basic contents from the complementary social, humanistic and biomedical disciplines.

Week by Week Schedule

1. The cell structure of the nervous system: morphological and functional properties of different types of neurons and glial cells.
Computer exercise: neuron, synapse, membrane potential, action potential.
Neurotransmitters and receptors (metabotropic and ionotropic), routes of synthesis of neurotransmitters, temporal and spatial integration of afferent stimulation on neurons.
2. The general morphology of the central nervous system: spinal cord, brain stem and cerebellum, diencephalon, basal ganglia and the cerebral cortex
Computer simulation of 3D anatomy of the brain: recognition of the fundamental parts of the computer program 3D anatomy of the human brain:
spinal cord, brain stem, cerebellum, thalamus, hypothalamus, basal ganglia, cerebral cortex lobes.
3. Morphology of the cerebral cortex: frontal, transverse and sagittal sections.
Exercises on cadavers: the external morphology and cross-sections of the central nervous system: spinal cord, brain stem, cerebellum, thalamus, hypothalamus, basal ganglia, cerebral cortex lobes.
4. Functional neuroanatomy of sensory and motor pathways.
Parallel, hierarchical and topical organization.
Motor and sensory systems: recognition on the schemes: dorsal columns, spinothalamic system, pyramidal and extrapyramidal motor system, visual and auditory pathway, spinal ganglia, endogenous analgesia system, specific thalamic nuclei.
5. Functional neuroanatomy of ascending reticular activating system (ARAS) in the brainstem: raphe nuclei, substantia nigra, ventral tegmental area, locus ceruleus.
Exercises on cadavers: the peripheral nervous system, brain and spinal nerves, autonomic nervous system, sympathetic and parasympathetic nervous system, sensory and autonomic ganglia, the spinal nerves, phrenic nerve, wandering nerve, facial nerve, the trigeminal nerve.
6. Functional neuroanatomy of activation system of mediobasal telencephalon: the hypothalamus, basal nucleus of Meynert, amygdala, septal area.
Exercise in microscopy: Histological structure of the cortex: differentiation of paleocortex, archicortical layers and neocortex in Nissl preparations. Golgi-stained neurons and other methods of presentation of nerve structures: Weigert, intracellular coloring, immunocytochemical methods.

7. Morpho-functional parts of the pyramidal neuron - afferent and efferent projections, dendritic spikes. Practicum of using slides: cortical connections, Weigert preparation, axonal layers of white matter of telencephalon, display projection with DTI techniques, long and short corticocortical connections, reciprocal thalamocortical connections.
8. Columnar organization of the visual cortex: oculodominant, orientation and metabolic column. The structure of eye and ear: identification of the fundamental parts of the eye (cornea, sclera, choroid, retina, ciliary body, lens, vitreous, pupil and optic nerve) and the ear (outer, middle and inner ear, cochlea, semicircular ducts, auditory and vestibular nerve, ossicles) on the models. Display native preparations of the eye and ear.
9. Homeostatic maintenance: the hypothalamic-pituitary axis, autonomous / endocrine reflexes of the hypothalamus, portal blood flow of the hypothalamus, statins and liberins, adeno-pituitary, neuro-pituitary.
Anatomy of the hypothalamus: identification of the fundamental parts on diagram, the model and the native preparation. The medial and lateral hypothalamus, MFB, preoptic supra-optical region, tuber-infundibular area, mammillotegmental area.
10. Functional properties of the hypothalamus: the role of the hypothalamus in maintaining biorhythms, sexual orientation, the limbic system.
The autonomic nervous system: sympathetic and parasympathetic, sympathetic and parasympathetic ganglia, the hierarchical level of the autonomic nervous system, autonomic structures of the brain stem, the hypothalamus as the main regulator of the autonomic and endocrine systems, identifying on diagram.
11. Papez circuit: the hippocampus, cingulum, mammary body, anterior nucleus of the thalamus, fornix, mammillo-thalamic tract.
Anatomy of the limbic system: Papez circuit, the amygdala, the central limbic continuum, medio-basal (septal) area, hypothalamus, hippocampus, fornix, identifying on diagram, the model and the native preparation.
12. Functional properties of the amygdala: role in fear and directing instincts. Histological organization of the limbic system: paleokortex, archicortex, mesocortex, medio-basal telencephalon, hippocampal formation, identifying on diagram and microscopic appearance.
13. The hippocampus and the neural circuits of learning: the dentate gyrus, perforant path, mossy fibers, Schafer collaterals, CA1 and CA3 area.
Anatomy and histology of associative areas of the brain: identifying different associative areas (dorsolateral, orbito-medial, medial-peri-cingulate cortex, parietal area, gyrus angularis and supramarginalis) on diagram, the model and the native preparation. Magno-cellularity - a histology slides.
14. "Cognitive" neurons and "cognitive" neural circuits: role in the development of the highest (and peculiar to human) cognitive functions, and relevance to psychopathology.
The morphology of the brain - the visual presentation of magnetic resonance imaging. Recognizing the fundamental structure of the brain on MR image, correlation with histological sections, demonstrations of brain imaging using MR.

15. Imaging the brain functional activity: MEG, PET, functional magnetic resonance, quantitative EEG display, correlation of MR and CT. Display of brain activity - EEG. Demonstration of 64-channel EEG. Multimedia presentation of direct cortical and intracortical EEG recording. Application of EEG in the diagnosis of pathology of epilepsy (multimedia presentation).

Sheme za vježbe

Prehistory and the First Civilisations

93907

Lecturer

doc. dr. sc.
Eva Katarina
Glazer

Course Description

Students are introduced with the earliest periods of human history; with the emphasis on prehistoric cultures in Croatia and the earliest cultures of the Near East.

Study Programmes

- » History -> Dual-major studies (Studij) (*required course, 1st semester, 1st year*)
- » History (Studij) (*required course, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Outline the most important periods in the history of mankind and define them
2. Interpret historical sources
3. Explain the context of ancient history
4. Reconstruct cause and effect relationship connected with ancient history
5. Compare the processes of development of early statelike formations
6. Identify the most important persons from ancient history
7. Write an essay on most important cultural achievements in ancient history
8. Compare mythology and religion of ancient civilizations

Study Programme Learning Outcomes

Dual-major studies

History

History

Identify historical facts and processes from European and national history

Name and describe individual historical periods

Single out historical processes and explain their topic of interpretation

Express (in your own words) basic historiographical facts about world history

ECTS Credits 3.0

Semester Winter

English Level L2

E-learning Level L2

Study Hours 30

Grading

Student activity will be monitored throughout the entire semester. Attendance is mandatory. The final exam is written and oral.

Create a game, quiz or questionnaire based on historical figures and events from different periods of the Croatian past
 recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values
 Apply the methodology of various historiographical fields and other research methods from the humanities
 Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

General Competencies

After finishing the programme student will be able to: define historical processes typical for certain historical period; summarize basic information of the Croatian and the World history; compile a list of literature for ancient history; describe historical processes; explain cause and effect relations of historical events and processes; compare historical processes of different periods; interpret historical sources; appraise the value of historiographic interpretations.

Course Description

Get acquainted with the facts, biographies, destinies, ideals, deeds and significance of Croatian important persons in the diaspora since the end of the First

World War II to the end of the twentieth century and their sacrifices in different ways for Croatia.

Accept their existence as an important segment of the idea of Croatian survival, statehood and Croatian identity in Croatia and Croatia

emigration.

Get acquainted with the formation of public perception of them from different aspects, which, if necessary, denies the Croatian patriotic approach and their positive

works.

Recognize their work in the middle and in the second half of the twentieth century when many top Croatian intellectuals and great patriots were forced

to political, social and cultural exile and life in Croatian exile.

Through lectures, independent research, mentoring, seminar presentation, get to know and objectively evaluate the civic yield academically

famous Croats (in alphabetical order): Aleksa Benigar, Pero Tutavac Bilic, Milan Blazekovic, Antun Bonifacic, Luka Brajnovic, Ante

Bruno Busic, Vilim Cecelja, Ante Ciliga, Vladimir Ciprin, Vjenceslav Cizek, Nikola Colak, Ivona Doncevic, Krunoslav Draganovic, Bogdan

Vugdelija, Stanko Vujica, Milka Vukusic and Dusan Zanko.

To develop among students a genuine interest in the life and work of Croatian greats, who are studied within this course, and a positive

research curiosity, in order to discover and possibly explore other Croatian figures in the diaspora.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain to students the historical and political conditionality of emigration, activities and evaluation of Croatian greats
2. Develop students' knowledge of the Croatian value system, regardless of planned perceptions
3. Describe to students the activities of Croatian important persons in the diaspora and their role in the service of preserving and developing the idea of the Croatian state
4. Explain to students the connection between the process of creating the Republic of Croatia and the role of individuals from the diaspora in the creation, defense and preservation of Croatian statehood
5. Describe to students the role of international actors in the processes of international acceptance and condemnation of Croatian emigrants and individuals in it
6. Develop knowledge about the individual role of emigrants in understanding the potential of emigrants and show and prove its importance for the Croatian people and their home countries: Croatia and Bosnia and Herzegovina.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Discuss ethical and bioethical issues in demographic and emigrant research -

Build the personality of students through the definition of Croatian identity values within the framework of the overall Croatian population

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Develop a scientifically independent opinion on demographic and emigrant issues

Develop a sense of security and correctness in the research process in order to prove the conditionality of the population, emigration and economy

Grading

Max number of points:
compulsory attendance
80% = 10, both tests
passed = 30, written
exam = 30, oral
examination = 10, activity
in class = 20, a total of
100 points. Grades on
tests and final exam: 51-
63 = 2, 64-75 = 3, 76-87
= 4, 88-100 = 5.

Course Description

The aim of this course is for the students to implement their knowledge of orthographic and linguistic norms of Croatian standard language acquired during their studies by making an assessment of diverse texts, to gain practical experience in editorial and proofreading activities and to learn what they can edit in a text and how they can do it so the given text complies to the norms of the Croatian standard language. With constant practice during classes and doing their homework assignments, students will gain the basis for editing and proofreading, and also learn how to constantly improve their techniques. There will be at least one opportunity to talk with an editing professional.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*elective courses, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*elective courses, 1st semester, 1st year*)
- » Communication Studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate the following concepts: linguistic accuracy, standard and usage, functional styles;
2. Distinguish the concepts of editing, proofreading and revision;
3. Describe and utilize linguistic tools;
4. Analyze and edit a text on paper;
5. Analyze and proofread a text of the paper;
6. Analyze and proofread a text on a computer;
7. Analyze and edit a text on a computer;
8. Outline and observe punctuation and grammar errors in public communication;

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Communication Studies

General Competencies

Broaden the conversance of the mother tongue and practically apply the knowledge on a text.

Psychology of Adulthood and Aging

38640

Lecturer

Andreja Brajša-
Žganec,
nasl. prof. dr.

Course^{SC} Description

The aim of the course is to introduce students to the knowledge on physical, cognitive, emotional, and social development in early, middle, and late adulthood from the lifespan developmental perspective. Through the course, the students will be acquainted with different theoretical approaches to the development in adulthood and ageing, different factors that affect adult development, and research methodology in the field. Students will also acquire knowledge on developmental problems in adulthood and ageing. This course should enlarge the knowledge of students on developmental changes in adulthood and ageing, and consequently offer them the opportunity to develop and enlarge their own professional attitudes and skills.

Study Programmes

» Psychology (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define characteristics of physical, cognitive, emotional, and social development in early, middle, and late adulthood.
2. Differentiate specific research methodology in developmental psychology in relation to the research in other fields of psychology.
3. Explain research results in the adulthood and ageing psychology in accordance with knowledge in developmental psychology.
4. Relate adulthood development theories to the previously acquired knowledge of developmental psychology theories.
5. Compare developmental tasks in early, middle, and late adulthood.
6. Apply the acquired knowledge of the adulthood and ageing psychology in research, and in professional task demonstration.
7. Explain, individually and in teamwork, theoretical and research findings of the adulthood and ageing psychology
8. Analyze and compare the Croatian and international research results in the field of lifespan developmental psychology and explain cross-cultural similarities and differences.

Grading

Students' achievement is continually evaluated through certain activities. A student can achieve a maximum of 100 points according to following arrangement: 10 points for individual seminar task presentation, 10 points for group task presentation, and 80 points (two times 40) for mid and end term tests OR written exam. Points are turned into final grade as follows: 60-69% - pass (2); 70-79% - good (3); 80-89% - very good (4); 90-100% - excellent (2).

Create appropriate forms of communication and cooperation in different professional environments

Critically judge theoretical approaches to the study of individual differences

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
5. Compare theoretical approaches to the study of individual differences.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Psychology of Childhood and Adolescence

37809

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

After completing the course and passing the exam, students will understand the principles of human development and know the changes in the physical, cognitive, social and emotional development and personality development in early childhood, middle and late childhood and adolescence. Students will acquire skills that enable them to distinguish between typical development and developmental problems in children and adolescents and to identify developmental risk and protective factors at the individual, family, peer group and the wider social environment levels. Based on this knowledge, through individual work, seminars and group discussions, students will acquire the skills to plan activities to promote positive behaviour and prevent undesirable behaviour in children and youth.

Study Programmes

» Psychology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe developmental changes in the physical, cognitive and socio-emotional development during early, middle and late childhood and adolescence;
2. Explain the mechanisms and processes underlying the changes in abilities, perceptions and behaviours during childhood and adolescence;
3. Choose appropriate approaches and methods to evaluate various skills, behaviours and attitudes in children and adolescents;
4. Compare normative development, individual differences in development and developmental problems in the physical, cognitive and socio-emotional development in childhood and adolescence;
5. Predict and evaluate the effects of biological changes, parents, family, peers, school and the wider community on the physical, cognitive and socio-emotional development in childhood and adolescence;
6. Identify developmental risk and protective factors, the problems and difficulties that can occur in children and adolescents and their causes and consequences;

ECTS Credits 5.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours

15

Teaching Assistant
Jelena Flego, mag. psych.

Grading

To complete the final exam and to form a final grade, it is compulsory to attend lectures, with a maximum of 3 absences. Students can pass a written part of the exam by passing both the colloquia, each carrying 30% of the final grade, while the seminar paper produced and presented presents 20% of the final grade. For passage to the colloquy, more than 52% of the correct response is required. Students who do not wish to attend colloquia, as well as students who are not satisfied with the success of the colloquy, have a written exam that meets the requirements of the colloquium conducted during the semester with the volume, content and the corresponding ECTS credits. Students are also obliged to access the oral exam, which corresponds to the essay type questions. The oral exam scores 20% of the final grade.

7. Evaluate and recommend interventions at individual, family, school and society aimed at addressing the problems and difficulties in the development and the promotion of optimal development in childhood and adolescence.

Study Programme Learning Outcomes

Psychology

Create appropriate forms of communication and cooperation in different professional environments

Organize and present professional and scientific reports based on empirical data using scientific literature and respecting international standards, independently or as a team

Determine the peculiarities, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on physical, cognitive and socio-emotional development

General Competencies

Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Psychology of Communication

239940

Lecturer

izv. prof. dr. sc.
Lovorka
Brajković

Course Description

The main goal is to acquaint students with the basic communication processes and skills necessary to work in the field of psychology. Students will acquire new knowledge, skills and methods to improve communication skills, become aware of possible obstacles in establishing good communication and will be able to propose an appropriate procedure for solving difficulties in the communication process.

Study Programmes

- » Psychology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Psychology (Studij) (*elective courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the types of interpersonal communication
2. Distinguish types of communication according to the basic goal
3. Explain communication processes depending on the group of people
4. Identify difficulties in the communication process
5. Assess the suitability of the type of communication with respect to the basic goal
6. Analyze the communication problem and offer a solution

Study Programme Learning Outcomes

Psychology

Integrate knowledge about cultural differences and critically assess general principles, standards of good practice and work that respects differences in a professional manner

Create appropriate forms of communication and cooperation in different professional environments

Plan the search of literature, databases and other sources of information

Course Description

The aim of the course is to provide students with an overview of the types, theories and basic principles of human learning. To compare human learning with that of animals and machines. To integrate findings of applied research on learning within the context of one of the three main approaches to the study of learning: behaviorism, cognitive learning and social learning. Upon course completion, students will be familiar with different types of learning and will be able to recognize their application in everyday life.

Study Programmes

» Psychology (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic principles of human learning.
2. Identify and describe main approaches to human learning.
3. Compare the principles of learning in humans, machines and animals.
4. Apply knowledge of the basic principles of learning to specific learning situations in everyday life.
5. Discuss the contribution of the various individual characteristics to the success of the learning process.

Study Programme Learning Outcomes

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Psychology of Memory

200126

Lecturer

doc. dr. sc.
Alena Gizdić

Course Description

The objective of the course is to introduce students to the principles and mechanisms supporting human memory and theoretical underpinnings of different memory systems. Finishing the course will enable students to understand and analyze basic methodologies in the psychology of memory, to compare different research traditions, and differentiate normative and pathological memory processes. By applying basic memory principles and mnemonics students will be able to plan and design adequate procedures for memory improvement.

Study Programmes

» Psychology (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe basic component processes involved in the process of memory.
2. List and compare different memory systems in terms of the information stored and mechanisms enabling the workings of each system.
3. Identify factors related to memory efficacy.
4. Differentiate between normal and pathological process in memory systems.
5. Apply the knowledge of memory systems with the aim of improving one's memory.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Course Description

The purpose of this course is to provide students with view of the contemporary theoretical and applied aspects of the psychology of sport and exercise. Students will learn in which circumstances different psychological (e.g. personality traits, emotional states) and environmental factors may enhance or undermine sport performance. In addition, they will gain knowledge of procedures and techniques which may help athletes in achieving optimal mental state. Special attention will be devoted to the psychology of youth sports and to positive and negative effects that sports can have on young athletes' mental health. Students will understand the role of physical activity in improving mental health and personal well being and they will learn psychological strategies effective in adopting regular exercise as a new healthy habit.

Study Programmes

- » Psychology (Studij) (*elective courses, 1st semester, 1st year*)

Grading

Midterm Exams / Written

Exam: 80%; Practical

Project: 20%

Course Description

The course Public Relations in Culture and Sports provides students with a fundamental understanding of communication and media practices within the sports and cultural sectors, with a particular emphasis on the application of public relations techniques in promoting activities of sports and cultural institutions and managing events. The aim of the course is to develop the ability to critically analyze various media strategies, branding, and crisis communication, as well as the use of digital tools in promoting sports and cultural events. Through theoretical lectures and practical assignments, students will become proficient in applying contemporary communication strategies and understanding the role of media in shaping public perception in these sectors. The course covers the historical development of the relationship between sports, culture, and the media, communication strategies, branding, advertising, event media management, and the digital transformation of public relations. Students will learn how to identify key media practices and theoretical frameworks, explain the role of media in promotion, analyze branding strategies, develop digital communication strategies, and anticipate crisis situations. The course aims to equip students with the skills necessary for managing public relations, promoting sports and cultural events, along with media management.

Study Programmes

- » Communication Studies (Studij) (*elective courses, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify key media practices in sports and cultural institutions and recognize their historical development.
2. Explain the role of media in promoting sports and cultural institutions and describe how mass media influences the development of sports and culture in public discourse.
3. Apply communication strategies and public relations tools in sports and cultural institutions, with a focus on audience engagement.
4. Analyze different branding and advertising strategies in sports and culture and compare examples of successful campaigns.
5. Identify key theoretical frameworks of public relations in sports and culture and describe their application in real cases.
6. Develop a digital communication strategy that includes social media, online branding, and digital tools for promoting sports and cultural events.
7. Predict potential crisis situations in sports and cultural organizations and develop strategies for effective resolution.
8. Analyze and interpret student projects, focusing on environmental analysis and media guide creation, and assess the effectiveness of proposed media activities.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Explain and describe public relations

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Communication Studies

Prepare materials for media and public relations in Croatian and English

Explain and describe public relations

Organize individual and team work

Identify and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply the knowledge of the basic concepts of public relations, primarily those associated with PR in culture and sports.
 Define, explain and critically analyze the characteristics of public relations in culture and sports.
 Apply the acquired public relations skills and techniques.
 Work effectively independently and in a team.

» This course will teach students the theoretical basis of the techniques and tools in public relations and apply them to the practical skills and abilities in strategic public relations

» Seminar

» Seminars provide students with the practical use of individual communication and organizational skills in the application of techniques and tools of public relations.

Week by Week Schedule

1. Public relations: theoretical knowledge in terms of the use of techniques and tools; impact and utilisation;
2. Public relations in the context of the media market: theoretical

- determination and practical action;
3. Evaluation of the relations with the media as the target public and intermediary in communication with other participants;
 4. Tools and techniques in relations with the target public: mastering the techniques of written communication;
 5. Practice and writing of releases for the press and the media;
 6. Internal communication: techniques and the importance of communicating with the internal public;
 7. Preliminary exam 1
 8. The importance and mastering of the techniques in event management;
 9. Press conference: preparation and mastering the techniques of public appearance;
 10. Online public relations and the relationship between the disciplines of marketing and public relations;
 11. Communication strategies: defining the target public, selecting key messages;
 12. Defining strategic communication and selecting tactics;
 13. Reactive and proactive media relations;
 14. Modern trends in daily communication with the target public in the corporate and administrative environment;
 15. Preliminary exam 2

Public services and population

194399

Lecturer

doc. dr. sc.
Monika Baliija

Course Description

Course objectives: develop in students scientific knowledge pertaining to the correlation between public systems and population dynamics within the framework of theoretical concept; provide students with the necessary skills to help them differentiate and understand similar scientific fields, branches, and disciplines, as well as multi-disciplinary approach to research of the dynamics between public systems and population; introduce students to relevance of population dynamics in the planning of public systems; make students competent in discovering, identifying, and defining terminology, categories, and laws within the field of demography and public systems; equip students for independent research related to the relation between population and development of public systems; equip students for application of standard and specific methods and techniques of research of correlation between population

dynamics and public systems.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize economic, spatial and social logics through fieldwork and application of scientific technology
2. Recognize relevant computational and graphical methods in the process of reviewing and clarifying public-population relationships
3. Use GIS in methodological and technical terms when solving problems.
4. Use cartographic methods and projections in considering, clarifying and transferring the legalities of the underlying subject relationship
5. Design a research assignment proposal

Course Description

To introduce students to qualitative methods in psychological research, specific characteristics of qualitative methods compared to quantitative methods. To enable students to prepare, conduct and analyze qualitative research.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the ability to discern when the application of qualitative methodology is appropriate, and when quantitative methodology is more suitable
2. Demonstrate the ability to conceptualize and plan qualitative research studies
3. Develop the ability to conduct qualitative research
4. Apply thematic analysis and other forms of analysis of qualitative data
5. Evaluate critically the findings and conclusions of qualitative research
6. Apply the findings of qualitative research in practice and in future research

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

Course Description

The Renaissance period is a very significant period in European culture that is generally characterized by the renewal of ancient culture and the new evaluation of the human spirit and human capabilities. The basic goal of the course is to acquaint students with the main features of Renaissance philosophy and thought in general, and they mainly relate to a new approach to authority, a new worldview, or a new cosmology that also required a new approach to man, or anthropology and general development of new scientific disciplines and methods. Following this, students will get acquainted with the most important representatives, topics and problems of Renaissance philosophy.

Study Programmes

» Philosophy and Culture -> Dual-major studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the place and meaning of Renaissance philosophical themes and problems within the history of philosophical thought.
2. List the main representatives of Renaissance philosophy and their main works.
3. Define the basic currents, themes and problems of Renaissance philosophy
4. Recognize the place of Croatian Renaissance philosophy in the European context.
5. Explain key terms and definitions and show their development and reception

Prerequisites

History of Media
Communications in
Croatia

Course Description

The aim of the course is to familiarize the students with the development of Croatian journalism since the advent of radio and television as new media of public information at the beginning of the 20th century, until today and the emergence of the Internet as the latest media of public information, with particular emphasis on the current information system of the Republic of Croatia.

Study Programmes

» Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the most important events and milestones in the history of Croatian journalism and journalism in the 20th and early 21st century.
2. Classify and put into the context key periods in the history of Croatian journalism of the 20th century, and their dependence on the political, social and economic turmoil, but also technological progress.
3. Identify the most important names that marked the Croatian journalism in the 20th century, and the most important print and electronic media in Croatia.
4. Develop and conduct short independent research on a topic of modern communication media in Croatia.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Inform about journalism and public relations
Classify, describe and explain the development of world and Croatian history of mass communication and journalism and their research methods

Organize individual and team work
 Present knowledge about journalism, public relations, communications and society using different communication methods
 Prepare and create different forms of presentations and seminar papers
 Prepare and construct work assignments in the interdisciplinary field

General Competencies

Indicate and explain key events and processes in the history of media communication in Croatia, from the advent of radio and television as new media of public information at the beginning of the 20th century until the present times, in which the Internet dominates as the latest means of public media. Enumerate, explain and distinguish the most important printed and electronic media in Croatia (agencies, daily and weekly newspapers - national, regional and local, the system of HRT, private radio stations, private television, and the most important portals on the Internet). Identify, analyze and explain the specificities of media activity, with a focus on the media market of audience and marketing. Define, identify and critically analyze key challenges and problems of journalism in the 20th and early 21st century, and the characteristics of contemporary journalism and information systems in the Republic of Croatia.

Research, Measurement and Restraining Corruption. 126250

Lecturer

prof. dr. sc.
Irena Cajner
Mraović

Course Description

The aim of the course is to introduce students to the phenomenon of corruption in a comparative perspective and to gain the skills necessary to identify and analyze corruption. The purpose of the course is to introduce students with instruments for the detection, prevention and effective methods of restraining corruption in modern societies, especially in transitional and unconsolidated democracy countries. Therefore, students will be familiar with the most important works in this area and will analyse all the relevant aspects of corruption.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 4th semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define corruption.
2. Identify and classify the manifestations of corruption in modern societies;
3. Compare the basic features of corruption in developed democratic countries and in transitional countries
4. Identify ways of measuring corruption
5. Explain the meaning and objectives of international instruments to restrain corruption
6. Explain the impact of the European Union on restraining corruption

Course Description

The aim of the course is to acquire skills in the application of certain quantitative research methods and designs in psychology, interpretation of the results and presentation of results in the context of the advantages and limitations of certain methods and designs. Based on insights into research results and practical experience in the role of participants, students will develop skills in selecting methods and designs appropriate to research problems, skills in recognizing their advantages and limitations, skills in interpreting results and scientific reporting based on empirical data using scientific literature.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the scientific knowledge of previously conducted research and theories in order to generate research hypotheses.
2. Prepare and conduct quantitative scientific research.
3. Conclude about the researched constructs on the basis of the integration of knowledge from the scientific literature with empirical data from their own research
4. Analyze critically the knowledge of the researched constructs in the context of the limitations of the used methodology.
5. Argue the appropriateness of individual research methods and designs in relation to the research problem.
6. Prepare scientific and professional reports on research results processed by appropriate statistical methods.

Study Programme Learning Outcomes

Psychology

Analyze assumptions and apply appropriate methodological and statistical knowledge in order to answer specific research questions and determine the advantages and limitations of various research methods and statistical procedures in psychology and related scientific disciplines

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Psychological
Measurement
Non-Experimental
Methods

Critically judge scientific and professional works in the field of social, humanistic and biomedical sciences

General Competencies

9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.

11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

Learning Outcomes - Intellectual (Cognitive) Skills

Critically evaluate scientific findings from previous research and theories in order to generate research hypotheses.

Critically analyze knowledge about the investigated constructs in the context of the limitations of the applied methodology.

Learning Outcomes - Practical and Generic Skills

Design and conduct quantitative scientific research.

Prepare scientific and professional reports on research findings analyzed using appropriate statistical methods.

Connection of Learning Outcomes and Grading

Draw conclusions about the investigated constructs by integrating insights from scientific literature with empirical data from one's own research.

Justify the appropriateness of specific research methods and designs in relation to the stated research problem.

Screening of student's work

ECTS Pohađanje nastave [EN]

1
ECTS Istraživanje [EN]

2
ECTS research reports

1
ECTS preparing for classes

5
ECTS

Forms of Teaching

» Vježbe u praktikumu

» conduction of experimental and non-experimental research with students as participants; writing scientific reports based on collected data

» Terenske vježbe

» students perform observations in natural conditions and conduct surveys on the field

Week by Week Schedule

1. Introductory lecture, importance of the course, random selection and random scheduling
2. General instructions for preparing and writing a report, giving instructions for writing the first report, conducting research for the first topic (T1: Simple experimental design)
3. Experimental workshop - part 1, conducting research for second topic (T2: Complex experimental design)
4. Writing the first report, giving instructions for writing the second report
5. Experimental workshop - part 2, conducting research for the third topic (T3: Experiment or Quasi-experiment)
6. Feedback for the first report, writing the second report, giving instructions for writing the third report
7. Observation workshop, instructions for conducting research for the observation method (T4: Observation)
8. Feedback for the second report, writing the third report, giving instructions for writing the fourth report
9. Workshop on correlation research, submission of data for the observation method
10. Survey Workshop - part 1, instructions for conducting research for the survey method (T5: Survey)
11. Feedback for the third report, writing the fourth report, giving instructions for writing the fifth report
12. Survey workshop - part 2, submission of survey data
13. Feedback for the fourth report, writing the fifth report
14. Workshop on choosing an appropriate research method, answering student questions
15. Feedback for the fifth report, final discussion and evaluation of the work

Resistance in Croatian history from the Early modern period to modern times

270149

Lecturer

doc. dr. sc.
Vladimir
Šumanović

ECTS Credits 4.0

Semester Winter

English Level L3

E-learning Level L1 (10%)

Study Hours 30

Grading

Regular class attendance is a condition for taking the written exam.

Course Description

The aim of the course is to analyze and explain the causes and forms of resistance to different forms of feudal and state power in the period of modern and contemporary national history in a diachronic sequence. Social, religious, political and military groups and prominent individuals are studied as bearers of resistance. Thematically, the course covers the key manifestations of the resistance of the Croatian and Serbian people on Croatian territory to various forms of feudal and central government, and to the bearers of socio-political power. Particular attention will be paid to the turning years of Croatian history, which were marked by the disappearance of old and the establishment of new state communities, and the related resistances.

Study Programmes

» History (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the motivation, action and fate of prominent resistance bearers
2. Explain the clash of different interests and perspectives of the studied historical subjects
3. Analyze the causes of conflicts and wars on Croatian territory in the period of modern and contemporary history
4. Explain the historical conditioning of recurring patterns of behavior of nations and individuals
5. Generate and lead discussions on controversial topics of Croatian history

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of

historical science

Formulate and orally present knowledge about historical processes and data

Generate and conduct historical and other types of discussions

Single out historical processes and explain their topic of interpretation

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

Learning Outcomes - Intellectual (Cognitive) Skills

Generate and lead discussions on controversial topics of Croatian history.

Learning Outcomes - Practical and Generic Skills

Read and compare thematically related sources from different historical periods.

Connection of Learning Outcomes and Grading

Analyze the causes of conflicts and wars on Croatian territory in the period of modern and contemporary history.

- » Communication Studies (Studij) (*public relations, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Support claims with arguments in accordance with logical patterns.
2. Defend from eristic tricks.
3. Demonstrate the skill to design statements for different media.
4. Demonstrate the analytical approach to drafting a speech and present it.
5. Prepare and develop argumentation strategies in a debate.
6. Apply the manners in speaking.
7. Demonstrate the ability to adjust voice and pronunciation for a public speaking appearance

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Organize individual and team work

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Communication Studies

Organize individual and team work

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Rhetoric is a comprehensive discipline that is integrated into almost all university programmes since the teaching and professional activity in communicology are for the greatest part performed through speech. It is expected that the adopted principles of rhetorical discourse, which necessarily implies the pursuit of truth, will ennoble all speaking efforts of students, in the context of text creation and its performance.

Roman Comedy

38874

Lecturer

izv. prof. dr. sc.
Maja Matasović

Course Description

The goal is for the students to learn the basic concepts of Roman comedy: its beginnings, varieties, types of humour, famous authors and works. It will be represented mostly through the works of Plautus and Terence, but also other Roman comic writers. Main themes will be illustrated by the text examples, viewing, in addition to the aforementioned, the differences between Greek and Roman comedy.

Study Programmes

15

Grading

Class attendance and working on class assignments are taken into account, while exam is written and oral to demonstrate the skills acquired.

- » Psychology (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Sociology (Studij) (*elective general foundation courses, 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)
- » Sociology (Studij) (*elective general foundation courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the comic genres in roman literature and their main representatives
2. Describe their life situations and conditions in which they created their works
3. Describe the characteristics of individual authors' style.
4. Compare the differences in language and style of different dramatic works, of different authors and periods.
5. Provide literary analysis of Roman comic works (in regard of the Roman world view, today's rules of achieving humour, and importance of these works today).
6. Write scientific papers on Roman comedy and related themes.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society
Recognize the needs and willingness to engage in lifelong learning
Prepare and construct work assignments in the interdisciplinary field
Prepare and create different forms of presentations and seminar papers

Croatology

Explain and analyze the components of Croatian culture and their connection
Describe, classify and explore Croatian art, music, theater and film arts
Recognize, describe and argue the influence of European and world literature on the Croatian Literary Canon

History

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)
Integrate knowledge about cultural differences and critically

assess general principles, standards of good practice and work that respects differences in a professional manner

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Sociology

Discuss social issues in Croatian society

Use sources of scientific information

Critically judge the current social situation

Compare different social phenomena in different cultures

Lecturer

prof. dr. sc.
Zvonimir Čuljak

ECTS Credits 3.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
30

Grading

On the basis of two tests
or written exam

Course Description

Course objectives are:

1. Present the main elements of Ruđer Bošković's scientific and philosophical work (in natural philosophy, metaphysics, epistemology, methodology and philosophy of science) as well as his achievements in other areas (e.g. technical expertise, diplomacy, poetry).
2. Correlate the main elements of Bošković's scientific and philosophical work with the respective scientific, philosophical, political, and cultural contexts.
3. Analyze the main philosophical concepts, attitudes and arguments used by Bošković.
4. Enable students to interpret and understand relevant Bošković's works (in translation).
5. Enable students to understand the main concepts and terms used by Bošković.
6. Enable students to evaluate Bošković's theories and arguments.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 4th semester, 2nd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the main elements of Ruđer Bošković's scientific and philosophical work (in natural philosophy, metaphysics, epistemology, methodology and philosophy of science)
2. Relate the main elements of Bošković's scientific and philosophical work with the respective scientific, philosophical, political, and cultural contexts.
3. Explain the main concepts and terms used by Bošković
4. Analyze Bošković's theories and arguments in the context of the history of science and the history of philosophy

5. Evaluate the significance of Bošković's scientific work in the history of science
6. Evaluate the significance of Bošković's philosophical work in the context of the 18th century philosophy

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Analyze distinctive features of academic philosophy with its standard disciplines, problems, theories and methods

Critically review different theories

Explain the relationship between humanities and other sciences and integrate different knowledge of their characteristics

Explain and evaluate some of the classic philosophical arguments within standard philosophical disciplines

Evaluate philosophical concepts, arguments and theories

Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation

Sectoral Public Relations

285541

Lecturer

doc. dr. sc.
Danijel Jurković

Course Description

The aim of the course is to familiarize the students with the fundamentals of public relations (PR) and strategic communications in a variety of sectors: corporate and business communications, PR in government agencies and the public sector, PR in politics, the civil sector, relations with the local community, establishing communication between sectors. The students apply the theories of PR in practice, learn the differences in PR for certain sectors, the characteristics of public, external and internal relations and communication, and in particular the importance of strategic planning and resources that PR uses in practice.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*public relations, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*public relations, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*public relations, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, distinguish and apply in practice the basic theories of PR.
2. Demonstrate knowledge and distinguish the characteristics of sectoral PR and apply the acquired knowledge specifically to each sector.
3. Apply the tools that PR uses in its work.
4. Analyze the social, economic and political context of PR.
5. Distinguish good from bad practice and know the relevant examples of good communication in various sectors.
6. Demonstrate progress in critical thinking and the skill of articulating problems.

Teaching Assistant
dr. sc. Žanina Žigo

Grading

The final grade is based on the students' activity throughout the semester, the assessment of the seminar assignment and the score in the final written exam.

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Inform about journalism and public relations

Explain and describe public relations

Organize individual and team work

Identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Explain and describe public relations

Organize individual and team work

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply the knowledge of the basic concepts of public relations, especially in relation to the effects of sectoral PR;

Identify and describe the place and role of public relations in the society, especially sectoral PR;

Reproduce, apply and explain the basic theories of sectoral public relations;

Identify, explain and analyze the situation, innovations, challenges and problems in communicology and sectoral public relations;

Explain and critically analyze the acquired theoretical and practical knowledge.

Forms of Teaching

» Predavanja

» lectures with interactive techniques; using ppt presentations, video materials

» Seminar

» interactive work and discussion; individual preparations for seminar; team work

Week by Week Schedule

1. Introduction to PR. Definitions, development of PR, PR role in organizations. Interactive work in teaching, group discussions to determine the initial knowledge and the understanding of the subject.
2. The role of PR. Demarcation between PR and related disciplines and sectors. The position in the dominant coalition. Professionalism.
3. PR in the corporate sector and corporate communication. The position, role, characteristics. Basics of the excellence theory.

4. PR in the corporate sector - business roles, strategies, planning in the organization.
5. Organizational dynamics and PR - building internal relations within the organization.
6. PR in politics. Rhetorical theory. PR and political campaigns.
7. Rhetorical theory and the art of persuasion.
Practical work - analysis of a case problem from the environment.
8. Theory of relations. PR in the public sector. Issues management. Activism.
9. Stakeholder theory. PR in the non-profit sector. Relationship between PR and activism, and the politics of pressure.
10. Communications risk management. Establishing relations with interest-influence groups. Example of a communication related to environmental issues.
11. Corporate social responsibility. Sustainability, CSR and PR. The role of communication in establishing of CSR processes.
Practical assignment: instructions for writing the final paper - a critical thinking essay.
12. Corporate Social Responsibility. Sustainability, CSR and PR. The role of communication in establishing CSR processes.
Professional ethics. Practical assignment - analysis of a problem case from the environment.
13. Measurement and evaluation of the effects of PR.
14. PR and multidisciplinary. Differences in PR applications in various sectors.
15. Storytelling. New communication channels.

Security Sociology

130871

Lecturer

prof. dr. sc.
Irena Cajner
Mraović

Course Description

Studying main sociological and other theories students will come to understand the multidimensional phenomenon of security as a prerequisite for a successful physical, spiritual and material development of the society (an individual, groups, entire society and the state). They will learn about theoretical model of security and main elements of the national and private security systems of a modern society and state, as well as the basic organizational, structural and functional forms of security at the individual, national and international level.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17099) - elective courses (2nd year), 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective courses, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain main sociological and other theoretical concepts regarding the phenomenon of security.
2. Classify security challenges, risks and threats to modern society.
3. Analyze tasks, structure and subject of internal security system.
4. Analyze tasks, structure and subject of the defence system.
5. Outline contemporary civil-military relations in democratic societies.
6. Explain forms and methods of work in private security sector.
7. Explain of multidimensional oversight of security sector (professional, political, judicial, of civil society).

Study Programme Learning Outcomes

Dual-major studies

Sociology

- Discuss social issues in Croatian society
- Recognize the indicators of social pathologies
- Recognize the social specificities of Croatian society

Forms of Teaching

- » Predavanja
 - » Processing of teaching material
- » Seminar
 - » Students read in advance the default text and continue the process of learning in the class on the basis of discussion about this and other group activities.

Week by Week Schedule

1. Course introduction. Basic sociological and other theoretical concepts related to the phenomenon of security (realism, liberalism, Marxism, constructivism, pluralism, Copenhagen school of security, human security);
2. Security as a need, goods, value. The theoretical model of national security (security policy: the policy process, actors and factors; safety structure, security self-organization of a civil society) in contemporary societies
3. Threats to contemporary society (security challenges, risks and threats) at the national, supra-national and global level.
4. The national security system (case studies); (National) security policy - forms, processes, actors, factors.
5. The internal security system (1): tasks, structure, subjects; Internal security policy; Plural policing.
6. The internal security system (2): The police; The State Attorney's Office; Intelligence and security services; Customs; Judicial police; Local/municipal police; Inspection service and other agencies of formal social control.
7. The first test
8. Defence system (1): tasks, structure, subjects; Defence policy; Armed forces: organizational, hierarchical, communicational, motivational structure.
Defence system (2): Civil-military relations. Civil defence, defence planning and crisis management.
9. The system of protection and rescue: tasks, structure, subjects.
10. National security system management: the government, the prime minister, ministers, the parliament, the president, the National Security Council.
11. Private security as a non-state security factor in modern societies; Foundations of legitimacy of private security - theoretical and practical explanations.
12. Private security services: forms, areas of work, powers of security officers.
13. Oversight (professional, political, judicial, of civil society) of security sector.
14. The second test

Semiotics in Mass Communication

86092

Lecturer

doc. dr. sc.
Tomislav
Janović

Course Description

The main objective of this course is to provide insight into the basic knowledge of semiotics, with special reference to its interdisciplinary nature, understanding it as a point of blending of life sciences and the science of signs (T. Sebeok). The specific objective of the course is to prepare students to understand semiotics as a science, general semiosis and communication systems, as is reflected in the broad range - from everyday communication over a public (and mass) communication to the aesthetic structure of language, image and sound signals - in order to evolve a character into a sign and recognize opportunities of semiotic interpretation of texts of all kinds of media (print media in general, front pages, promotions, photos, music, film).

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*required course, 4th semester, 2nd year*)
- » Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare historical development of semiotics and its content
2. Explain basic author approach to semiotics and basic concepts such as sign and symbol
3. Argue importance of familiarity with knowledge of semiotics in the study of communication sciences
4. Describe the role of signs and symbols in everyday life;
5. Analyze and interpret signs and symbols in print media, promotional materials and photography
6. Use the acquired knowledge on semiotic interpretation of mass media
7. Estimate quality and capabilities of application of stereotypes and manipulation through media
8. Analyze in critical manner the media content from the semiotic point of view
9. Argue the reasons for importance to be familiar with semiotics of mass media

Study Programme Learning Outcomes

ECTS Credits 4.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours 30

Grading

10% attendance, 10% active taking part in discussions for blog work, 80% colloquia and/or exam.

Prerequisites

Introduction to Communication Sciences
Originators of Communication Sciences and Their Works

Prerequisites for Theories of Media and Mass Communication

Dual-major studies

Communication Studies

- Organize individual and team work
- Identify the foundations and theories of communication science and journalism, public relations and mass media
- Prepare and create different forms of presentations and seminar papers
- Prepare and construct work assignments in the interdisciplinary field

Communication Studies

- Organize individual and team work
- Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media
- Prepare and construct work assignments in the interdisciplinary field
- Prepare and create different forms of presentations and seminar papers

General Competencies

Students will learn about the semiotic point of view at the human being who is animal symbolicum - a being of symbol, because human is the only one with the opportunity and ability to create symbols and think and live in a world of symbols. Since the language, myth, art, religion and media are parts of that universe, and symbols become part of human communication, students will be trained not only to notice, but also correctly interpret the various signs and symbols conveyed to us daily by the media in different social and cultural environments. Students will be capable of arguing the reasons why it is necessary to have knowledge about the semiotics of mass media, and will develop skills of critical perception, presentation and analysis of media ranging from printed media to new media through which signs and symbols can be created, but also to manipulate, stereotype and ideologize modern society .

Week by Week Schedule

1. Introductory lecture and introduction to the subject course, presentation of required reading and duties
2. History of semiotics I
3. History of semiotics II
4. Sign, symbolism, symbols, meaning;
5. Semiosys. Semiotics: systems of symbols and communication process;
6. Language and language codes;
7. Semiotics of media;
8. Semiotics of (newspaper) text;
9. Semiotics of television;
10. Semiotics of (daily) newspaper;
11. Semiotics of photography;
12. Semiotics of film;
13. Semiotics of commercials;
14. From a sign to a symbol: communication role a symbol has in mass media.

Social Management

201333

Lecturer

izv. prof. dr. sc.
Dario
Vučenović

Course Description

Provide students with insight and understanding of the developed skills and required knowledge of general and social management as a deliberate activity - management and leadership activities and the importance and position of social management in the political, communication, diplomatic and general public sector from the perspective of different influences in making strategic decisions.

Teach students about the range and specifics of managerial technologies by applying effective and functional management in a social setting.

Introduce students and instruct them on the application of critical thinking and objective evaluation of managerial decisions in the field of human resources, financial, media and regulatory decisions and advocacy and diagnosis of possible consequences on social laws and the social value system. Recognize and enhance the influence of the political, legal, regulatory and socio-economic environment on the functionality of social and communication management when making managerial decisions in companies and institutions in the real and public budget sector and in general in various branch social institutions.

Develop a fundamental approach to social management and set up a theoretical and methodological conception of social governance and decision making in the function of the overall development of the Republic of Croatia.

Study Programmes

- » Sociology (Studij) (*elective courses (2), 1st semester, 1st year*)
- » Sociology (Studij) (*elective courses (2), 3rd semester, 2nd year*)
- » Sociology (Studij) (*elective courses (2), 5th semester, 3rd year*)

ECTS Credits 4.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
15
15

Teaching Assistant
doc. dr. sc. Goran Radoš

Grading

In addition to the classical teaching methods, students will be graded according to the activity of the class, the level of the discussion itself and the specialty they will show during their participation in the class. Additional criteria will be related to the seminar paper and its explication, the midterm exam and the written and oral exam, while the encouragement towards independent research work will be a constant.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and clearly define basic managerial terms and specific managerial peculiarities of management in social frameworks in public, media and similar institutions.
2. Name at least five (5) primary legal and regulatory acts to standardize and determine the behavior of socially owned (state, public...) companies in a market-regulated environment.
3. Name the key normative framework and the necessary sub-legal regulations (from the founding to the present day) that set up the system of social law management in the Republic of Croatia, describe the functional and organizational components of national governance and explain the reasons for their existence with respect to determining the value system of Croatian society.
4. Differentiate the roles of social management in different branch activities, and to consider the function of management, systematic editing, program definitions and financing methods for nationally relevant activities, and to classify old / new social values for the purpose of national information and social needs.
5. To solve the function of social management in both real and imaginary case studies through analytical situations with simple input premises that influence decision making.

Course Description

The aim of the course is to introduce students to modern social media technologies, the concept of communication channels, and the

classification of social media. Furthermore, students will engage in philosophical content analysis using critical thinking, and will apply

the results in business and private case studies. Content analysis will be conducted using classical philosophical methods of informal

logic.

Study Programmes

- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 3rd semester, 2nd year*)
- » Philosophy and Culture -> Dual-major studies (Studij) (*elective courses, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply techniques of correct logical reasoning and conceptual analysis
2. Interpret various cultural, social, and political phenomena
3. Apply general and specific scientific principles and rules of logical reasoning in research, argumentation, and the presentation of various tasks
4. Support interdisciplinary approaches in analyzing and solving philosophical problems while respecting the specifics of philosophical argumentation
5. Recognize the need for lifelong learning and professional development

Study Programme Learning Outcomes

Dual-major studies

Philosophy and Culture

Interpret various cultural, social and political phenomena

Apply general and specific scientific principles and rules of logical conclusion to your own research, argumentation and presentation of various tasks

- Apply basic techniques of correct logical reasoning and conceptual analysis
- Support an interdisciplinary approach in analysis and solving various philosophical problems, taking into account the specifics of philosophical argumentation
- Determine the need for lifelong learning and professional development

Learning Outcomes - Intellectual (Cognitive) Skills

1. Define basic concepts of social media
2. Define basic concepts of content analysis
3. Describe the distinction between social media and social networks
4. Explain and use social media tools

Learning Outcomes - Practical and Generic Skills

1. Apply methods of informal logic
2. Implement critical thinking and content analysis in case studies

Connection of Learning Outcomes and Grading

1. Develop skills in managing social media

Social Media in Public Relations

290349

Lecturer

doc. dr. sc.
Tomislav
Janović

Course Description

The course Social Media in Public Relations provides students with a comprehensive understanding of the role of digital tools and platforms in contemporary public relations practices. Through theoretical lectures and practical tasks, the course covers key aspects of using social media for brand promotion, crisis communication, political communication, and influencer marketing. Students will gain knowledge in planning, implementing, and evaluating communication strategies on social media, with a focus on analytical tools and tracking key performance indicators (KPIs). The course also explores innovations such as artificial intelligence and content personalization, enabling students to anticipate future trends in digital communication.

Study Programmes

Midterm Exams / Written
Exam: 80%; Practical
Work: 20%

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify digital communication channels and their specific application in public relations.
2. Apply social listening and analytics techniques to identify trends and opportunities for strategic communication on social media.
3. Plan communication activities and content on brand social media according to their target audiences.
4. Recognize how social media shapes consumer behavior and brand perception, and apply these insights in the design of communication strategies.
5. Create creative content strategies for social media that enhance audience engagement and contribute to achieving brand objectives.
6. Assess the success of digital campaigns using key performance indicators (KPIs), analytical tools, and techniques.
7. Recognize the role of social media in political communication, analyze their influence on political campaigns, and critically approach ethical issues related to content manipulation.
8. Predict future trends in social media and their impact on public relations, with an emphasis on innovations such as artificial intelligence, content personalization, and emerging platforms.

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Explain and describe public relations

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize and compare the peculiarities of individual media

Present knowledge about journalism, public relations, communications and society using different communication methods

Communication Studies

Prepare materials for media and public relations in Croatian and English

Organize individual and team work

Identify and compare the peculiarities of individual media

Prepare and create different forms of presentations and seminar papers

Forms of Teaching

» Predavanja

» Seminar

Week by Week Schedule

1. Introductory Lecture – an overview of the course, syllabus, practical assignments, midterm exams, and student responsibilities.

2. Introduction to Social Media and Public Relations
 - a comprehensive overview of the theoretical frameworks of mass communication and social media, with a particular focus on the digitalization of public relations, an analysis of the role of key social media platforms, and an exploration of the application of Web 2.0 technologies in contemporary communication practices and online public relations.
3. Digital Communication Channels
 - a concise overview of key digital communication channels in public relations, including various social media platforms (Facebook, Instagram, Twitter, YouTube, TikTok), the importance of blogs and microblogging, essential characteristics of successful websites and SEO optimization, as well as trends in mobile communication and the use of mobile applications, with a particular emphasis on emerging platforms
4. Creative Content and Communication Strategies on Social Media
 - key formats of creative content, content planning and adaptation for social media platforms, as well as the design, development, and personalization of social media strategies and campaigns.
5. Influencers and Brand Impact
 - the role of influencers in branding, the process of selecting the right influencer, collaboration strategies, measuring the success of influencer campaigns, and the ethical considerations of transparency and authenticity in influencer marketing.
6. First Midterm Exam
7. Crisis Communication Management and Ethics in Social Media
 - key aspects of crisis communication with a focus on social media, including rapid response, information transparency, and ethical challenges, along with an analysis of successful crisis campaigns and strategies that utilize social media for effective information dissemination.
8. Measuring the Success of Digital Campaigns
 - tools for measuring digital campaigns, defining campaign goals, key performance indicators (KPIs), use of analytics tools, tracking and optimizing ROI, and examples of successful campaigns with a focus on measuring results and optimizing strategies.
9. Political Communication on Social Media
 - the role of social media in political communication, the digitalization of political campaigns, citizen mobilization, the impact of algorithms on political discourse, and ethical challenges, with examples of viral campaigns and political movements on social media.
10. Innovations and the Future of Social Media in Public Relations
 - technological advancements and their impact on social media, the application of artificial intelligence and content personalization, the development of new platforms and formats, the integration of social media with other communication channels, and future trends and challenges in digital PR.
11. Student Projects - Analysis and Communication Strategy of a Brand on Digital Communication Channels (Website and Social Media)
12. Student Projects - Analysis and Communication Strategy of a Brand on Digital Communication Channels (Website and Social Media)
13. Student Projects - Analysis and Communication Strategy of a Brand on Digital Communication Channels (Website and Social Media)

Grading

Class attendance and participation - 10%;
Research study and presentation - 10%; Two colloquia - 80%. A test of knowledge through two colloquia will be organized (in case of non-passing or unsatisfactory achievement on colloquia students can take the final exam, which, by volume, the content and the corresponding ECTS meets the colloquia.

General Competencies

Apply knowledge and understanding of concepts and theories in the field of social cognition and perception, attitudes, prejudices, self, social influence and group process. Critically evaluate theoretical approaches and research methods.

Learning outcomes:

2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).

9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Society and Religion: 13th - 15th Century 130475

Lecturer

doc. dr. sc.
Eva Katarina
Glazer

Course Description

The main goal is to acquaint students with the fundamental processes that characterized the relations between society and religion in the higher and late Middle Ages. Also, the aim is to familiarize students with the most important primary sources and recent literature relevant to this matter. Apart from mastering basic facts and historical processes, students will be encouraged to analyse comparatively the popular religious movements and to approach the topic interdisciplinary. The goal is to train students to work with sources, diplomatical and narrative ones, related to the topic of the relations between religion and society in late medieval period.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)
- » History (Studij) (*pov (17190) -elective courses: medieval history, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the basic historiographical questions about inter-religious contacts in the Middle Ages
2. Describe the processes in social, cultural and church history of the Middle Ages
3. Indicate the main trends associated with the relations between society and religion in the Higher and Late Middle Ages.
4. Explain interreligious relations.
5. Identify the most important representatives of the hagiographic system.
6. Explain the influence of ecclesiastical institutions on medieval society.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Society and Sustainability

130891

Lecturer

doc. dr. sc.
Ivan Perkov

Course Description

The aim of the course is to familiarise students with the complex interactions between humans, society and the environment. The course focuses on the concept of sustainable development as the dominant global concept governing the relationship between civilisation and the ecosystem. Students are introduced to the complex social processes that have led to the global ecological crisis (urbanisation, industrialisation, globalisation, McDonaldisation...). The main ecological and social problems of humanity are analysed, such as climate change, consumption, accumulation of waste. The concept of sustainable development is defined and analysed in depth, and a critical assessment of its global success is also made. Students learn about the decades-long development of global environmental awareness. Sustainability and sustainable development are considered and analysed in the context of the theory of post-industrial society and the theory of risk society. The values and normative frameworks of sustainability at local, global and international levels are introduced and analysed. The relationship between economy and sustainability is thoroughly analysed and the concept of circular economy is presented and described in detail. Special attention is given to current and specific issues such as smart cities, modern mobility, sustainability of global food production. Contemporary environmental activism and the role played by modern digital media are analysed and presented.

Course Description

The objective is to acquaint the students with classical sociological theory with the emphasis put on the contemporaneity of classical theoreticians and to ensure they acquire knowledge, skills and competences in order to be able to analytically and critically master classical theoretical concepts, basic sociological terms, and theoretical paradigms on the level of operative application. This means the students are prepared for the study of sociological theories (classical and contemporary) of other special sociological disciplines on later study years as well as for the writing of a paper on the level of a book report.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*required course, 2nd semester, 1st year*)
- » Sociology (Studij) (*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the widest range of classical theoretical perspectives in sociology aware of their philosophical origins.
2. Argue the importance of developing critical (self)awareness and interdisciplinary approach.
3. Analyze the dialectical interconnectedness and interdependence of theory and practice.
4. Describe the socio-historical context of the origins and developments of sociological theory.
5. Interpret the relevance of the French revolution, political revolutions, and the industrial revolution in the context of the newly appearing social sciences.
6. Define the basic sociological concepts of Henri de Saint-Simon and Auguste Comte.
7. Interpret organicism and basic sociological concepts of Herbert Spencer, evolutionism in sociology, social Darwinism and the theories of state formation.
8. Define basic concepts of the formal German and American sociology (Chicago school).
9. Analyze the basic concepts of structuralism.
10. Define the basic tenets and concepts of functionalism in sociology.

ECTS Credits 7.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours
30
30

Grading

Attendance at lectures and seminars is monitored and recorded, and makes together with active participation in class 10% of the final grade. Individual oral presentation of the previously assigned topic and the writing of a seminar paper each carry 10% of the final grade. Passing tests (continuous assessment exams) or the written exam and the final oral exam make a maximum of 70% grade (excellent).

Lecturer

prof. dr. sc.
Irena Cajner
Mraović

Course Description

The aim of the course is to acquaint students with the basic concepts of sociology of contemporary media within the context of Croatian society and, also, conducting an analysis of the relational relationship of contemporary tendencies to the influence of technologically generated digital reality in global (and thus Croatian) society and the process of redefining sociologically important constructs of space, time, body, identity, patterns of sociability, media construction of social reality and more. Also, the goal is to introduce students to the sociological theories of contemporary media according to the works of R. Shields, M. McLuhan, J. Baudrillard and H. Hromadžić and enable students to adopt and apply theoretical concepts and basic sociological concepts of digital society and apply these concepts and theories to the analysis of the phenomenon within the context of Croatian society.

topic and seminar
presentation, colloquia

Course Description

The course deals with the theoretical research of the concept of space as a physical place and space as an arena of social phenomena and relationships. Spatiality is a dimension that is regularly included in the definitions of various sociological phenomena, and in this course, different notions of space within sociological theory are analyzed, with an emphasis on the theories of urban sociology. The space is analyzed through an interdisciplinary approach that includes urban sociology, the theory of architecture and urban design, and contemporary sociological theories.

Study Programmes

- » Sociology -> Dual-major studies (Studij) (*soc (17098) -elective courses (1 st year), 2nd semester, 1st year*)
- » Sociology (Studij) (*elective courses 1., 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic terms of the sociology of space
2. Identify different concepts of space
3. Analyze and critically reflect on theories of space within a broader sociological theory
4. Relate the concept of space with different phenomena within urban sociology
5. Demonstrate an understanding of how theories are constructed
6. Point out the key problems of the sociology of space
7. Argue and present, orally and in writing, specific topics within the sociology of space

Grading
Attendance and current participation in classes, homework and participation in projects during classes

Course Description

provide the knowledge and skills needed for quantitative data analysis using computer software. The course prepares students for

the use of modern and for social sciences current and relevant computer tools. The programming language R is one of the standards in

demographic analysis.

apply these tools to solve specific problems in the field of demography, economics, geography, sociology and other disciplines in

which require quantitative data analysis. Independent use of programming language R with knowledge of appropriate statistical

method allows students a wide application in the analysis of complex relationships and cause-and-effect relationships in all disciplines that contain

structured data.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use the basic syntax of the programming language R
2. Develop database loading skills and adapt the database to your own research focus
3. Reproduce acquired knowledge of statistics and demographic methods in computer software
4. Explain and apply the acquired knowledge of demographic theory to specific data analyzes
5. Explain and visualize the results of demographic analysis

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Illustrate the need for scientific studies on demographic and immigration issues

Use statistical, quantitative, graphic and geographic software packages

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Compare the values of different methods used in expert-scientific research on population and emigration in planning and development services.

Week by Week Schedule

1. basic concepts of the R programming language
2. data loading
3. data manipulation
4. data visualization
5. functions, iterations, and models
6. demographic models in computer software
7. dissemination of results

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the movement of the number and distribution of the world's population.
2. Explain the natural-geographic conditioning of the development and distribution of the world population.
3. Explain the socio-economic conditionality of the development and distribution of the world population.

ECTS Credits 2.0

Semester Winter/Summer

English Level L0

E-learning Level L1

Study Hours
15
15

Teaching Assistant
Dino Bečić, mag. geogr.

Grading

Regular attendance at classes, passed mid-semester test, discussion in class and independent preparation of a research assignment.

4. Explain the impact of population development and distribution on the environment.

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Explain the gravity of the problem of today's level of demographic negativity and emigrants' separation from their home country

Demonstrate the ability to terminologically understand demographic and immigrant terms

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

dr. sc.

Course Description

To gain knowledge about specific disorders and diseases in psychopathology; categorization of mental illness; clinical features of disorders; diagnostics, epidemiology, comorbidity; course and prognosis; and various forms of treatment. To learn the methods of clinical assessment and methods of communicating with patients with mental health disorders. The adoption of the specific role of psychologists in the diagnostics and treatment of persons with mental disorders.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish between normal and psychopathological.
2. Classify psychological disorders into categories.
3. Define criteria for mental disorders and diseases.
4. Compare different types of treatment of mental disorders and diseases.
5. Create the working diagnosis on the basis of clinical interview.
6. Apply the principle of confidentiality in the relationship between psychologist and patient.
7. Apply knowledge of cultural specificity in differential diagnostics procedure

Study Programme Learning Outcomes

Psychology

Critically judge the basic principles of psychological ethics and connect the principles of psychological ethics with different areas of psychological activity

Support interdisciplinarity, establishing and maintaining relationships with other experts, as well as relevant organizations

Assess mental status and classify diagnostic criteria for different psychological disorders

ECTS Credits 4.0

Semester Summer

English Level L1

E-learning Level L1

Study Hours
30
15

Grading

Participation in class - 10%; Seminar essay and its oral presentation - 10%; First test 30%; Second test - 30%; Clinical interview - 10%; Oral exam - 10%. If a student does not take tests or achieve unsatisfactory result on one or both tests, student will take written exam that corresponds the tests by its scope, content and the ECTS.

General Competencies

7. Assess the mental status and classify the different diagnostic criteria for mental disorders.

14. Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.

15. Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.

Course Description

Familiarize students with biographies of 20th century statesmen

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)
- » History (Studij) (*pov (17192) - elective courses history 19th-20th century, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the historical course and specific processes of certain historical epochs
2. Analyze the peculiarities of certain historical periods and know the terminology
3. Recognize the interdisciplinary features of history and its relevance to other fields of knowledge and to the promotion of a range of moral, social, and cultural values
4. Analyze the causes and consequences of social, economic and cultural changes that occur during the period of action of individual statesmen
5. Define an argumentative opinion about the role and importance of the leading statesmen of the 20th century
6. Describe the most important actors and organizations that shaped the history of the 20th century

Study Programme Learning Outcomes

Dual-major studies

History

History

Formulate and orally present knowledge about historical processes and data

Identify historical facts and processes from European and national history

Norm and classify historical literature and sources

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a

number of moral, social and cultural values

Week by Week Schedule

1. introduction to the subject
2. Theodore Roosevelt and Franklin Delano Roosevelt
3. Antonio de Oliveira Salazar
4. Pio XII.
5. Winston Churchill
6. Charles de Gaulle and Harry Samuel Truman
7. Alcide De Gasperi, Robert Schumann and Jean Monnet Omer Marie Gabriel
8. Konrad Hermann Josef Adenauer
9. Richard Milhous Nixon and Ronald Wilson Reagan
10. Ivan Pavao II.
11. Václav Havel and Lech Wałęsa
12. Franjo Tuđman: the shaping of a statesman
13. Franjo Tuđman and the founding of the Republic of Croatia
14. Franjo Tuđman and the founding of the Republic of Croatia
15. Recapitulation, one-day field lesson (visit to a museum or similar place) with a corresponding lecture.

Statistics for Communication Sciences

28469

Lecturer

Iva Černja
Rajter,
nasl. doc. dr.

Course^{SC} Description

The main goal of the course is to introduce students to basic statistical concepts and techniques needed for various applications in communicology. Students, through lectures, exercises, readings and autonomous problem solving learn difference between descriptive and inferential statistics, graphical and numerical display of data, calculate and estimate average values, mod, median, learn basics in probability, learn discrete and continuous probability functions, calculate and interpret variance and standard deviation, Bernoulli, binomial, uniform, exponential, standard normal and normal probability functions. Students will be acquainted with all fundamental statistical knowledge and techniques which are being used in business practice with emphasis on interpretation of statistical parameters contained in computer outputs. Students develop statistical way of thinking and learn precise statistical manner of communication. It is expected that students demonstrate clear statistical interpretation of the results.

Study Programmes

» Communication Studies (Studij) (*required course, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply knowledge of fundamental concepts from other social sciences involved in the study program.
2. Define, describe and apply the basic methods of social research.
3. Demonstrate statistical literacy and methodological competence and realize their importance in modern society.
4. Apply and use the basics of statistics and statistical methods to the media to use the reflective and productive level.
5. Use of statistical thinking and develop awareness for the need of the same.
6. Explain the functions of statistical indicators in teaching, the criteria for their selection and use.
7. Select appropriate methods and techniques.
8. Collect data for statistical analysis.

Study Programme Learning Outcomes

Dual-major studies

ECTS Credits	4.0
Semester	Winter
English Level	L1
E-learning Level	L1
Study Hours	15
	15

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises, and orally

Prerequisites

Introduction to Social Research Methods and Statistics

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Apply methods of social research and statistics

Apply social science methods and identify research topics suitable for journalism, media, public relations and communications research

General Competencies

Use the general knowledge of society and of social processes.

Design a simple research project.

Organize the implementation of a simple research project.

Use the computer software for the analyses qualitative and quantitative data.

Use different social sciences methods in the analyses of the relevant data.

Employ the adequate methodological approach in the research of social phenomena.

Screening of student's work

Teaching Croatian as a Foreign Language 234350

Lecturer

doc. dr. sc.
Antonia Ordulj

ECTS Credits 3.0

Semester Winter/Summer

English Level L1

E-learning Level L1

Study Hours

15

15

Grading

The work of students will continuously be monitored through participation in classes and seminars, which will make up 20% of the total grade. Taking the oral exam accounts for 80% of the total grade.

Course Description

To provide a modern insight into teaching Croatian as foreign language and enable students to teach Croatian for non-native

speakers independently. Explain and judge the general and specific features of acquiring and teaching Croatian as foreign language.

According to the Common European Framework of Reference for Languages (CEFR), to discuss communication competence and

levels in Croatian as a foreign language. Analyse the characteristics of teaching inflected and non-inflected parts of speech and

lexical units in Croatian as a foreign language. Analyse teaching activities in teaching Croatian as a foreign language.

Study Programmes

- » Communication Studies (Studij) (*elective general foundation courses, 2nd semester, 1st year*)
- » Communication Studies (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

- » Sociology (Studij) (*elective general foundation courses, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and distinguish basic terminology in second language teaching.
2. Explain acquiring Croatian as a foreign language by heritage speakers.
3. State the definition of communication competence and distinguish levels in Croatian as a foreign language according to the Common European Framework of Reference for Languages.
4. Explain and distinguish foreign language teaching methods.
5. Explain and discuss the acquisition of cases, verb types, and lexical units in the teaching of Croatian as a foreign language.
6. Explain the characteristics between receptive and productive skills in acquiring Croatian as a foreign language.
7. Select and implement teaching activities in Croatian as a foreign language.

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Prepare and construct work assignments in the interdisciplinary field

Croatology

Explain the facts in the field of Croatian phonology, morphology and syntax and apply them in oral and written expression

Describe, recognize and apply the specialties of the Croatian language in relation to other languages

Justify and support the need and willingness for lifelong education

Adhere to the principles of academic honesty, methodology of scientific work and ethical norms of research and publication

Croatology

Explain the facts in the field of Croatian phonology, morphology and syntax and apply them in oral and written expression

Describe, recognize and apply the specialties of the Croatian language in relation to other languages

Justify and support the need and willingness for lifelong education

Adhere to linguistic, spelling and stylistic norms of the Croatian language in the academic and non-academic discourse

History

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

Psychology

Integrate knowledge about basic psychological processes and traits (perception, memory, learning, motivation, emotions, personality, social behavior)

Determine the need for lifelong learning and professional development

Sociology

Compare different social phenomena in different cultures

General Competencies

Express, distinguish, and use the norm and grammatical concepts of the Croatian standard language.

Identify and explain the characteristics of the Croatian language concerning other languages.

Understand and interpret Croatian phonology, morphology, syntax, and vocabulary facts.

Apply language knowledge in written and oral communication, editing, and proofreading.

Adhere to the Croatian language's linguistic, orthographic, and stylistic norms in academic and non-academic discourse.

Grading

Tasks will be corrected and jointly commented on in the seminar. The acquired knowledge and skills will be checked by a written exam in Microsoft Word in the computer lecture hall. The student will be evaluated on the basis of timeliness and success during the semester and success in the final assessment of the knowledge.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Learning how technical format text in Microsoft Word
2. Learning how to properly communicate with the teacher by e-mail
3. Learning how to refer to other texts and to compile a list of references
4. Learn how to write a term paper.
5. Learn how to present a term paper in Microsoft PowerPoint
6. Become familiar with the legal circumstances of intellectual property

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Philosophy and Culture

Apply basic techniques of correct logical reasoning and conceptual analysis

Communication Studies

Croatology

Croatology

Adhere to linguistic, spelling and stylistic norms of the Croatian language in the academic and non-academic discourse
Apply linguistic knowledge in written and oral form, in lector, editorial and correctors' jobs
Apply basic computer skills

History

Sociology

Use theoretical concepts in the analysis of society
Present research results regarding particular social phenomena and issues to a specialist and non-specialist audience alike
Divide the types of scientific research

Course Description

Introduction to the history of ancient and late antique period of the Croatian continental area, critical comparison of typical Roman elements in provincial centers, their development through a given time epoch, and finding similarities and differences with the original template (Rome). Students working group will be able to analyze the basic terms of Roman history in the continental Croatia, interpret and explain events and processes, connect them together and to compare the different results and conclusions of processing materials. Indirectly is expected development of critical thinking and evaluation of composing and ability comparisons.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)
- » History (Studij) (*pov (17189) -elective courses-ancient history, 1st semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of the Roman expansion over the continental Croatia
2. Analyze the origins and development of Christianity
3. Explain the structure of the military administration
4. Explain the consequences of the Roman conquest
5. Combine knowledge of the importance of the ancient urban centers (Siscia) in connection with Dalmatia and the continental Croatia, and the consequences for the formation of Croatian ethnic community
6. Explain penetration of the Avars and Slavs in the continental Croatian soil, the impact of these events on the Roman provincial urban centers, and the collapse of the Empire in that territory at the end of the 6th and early 7th century

Study Programme Learning Outcomes

Dual-major studies

History

Demonstrate the use of professional terminology,
historiographical research tools and methodological principles of

historical science

Identify historical facts and processes from European and national history

Critically judge one's own work and defend one's position in team work with arguments

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

History

General Competencies

After finishing the programme student will be able to:

1. explain cause and effect relations of historical events and processes,
2. reconstruct historiographic tools in making conclusions of historical processes and events,
3. compare historical processes of different periods,
4. distinguish difference between important and non-important facts within historiographic interpretation,
5. differentiate specificities of historical periods.

Week by Week Schedule

1. Introductory lecture, introduction to the subject and literature
2. Historical sources (material and written)
3. From civil wars on the territory of ancient Italy to Principate-effects of our historical lands
4. Roman army, pacification and urbanization Illyria, indigenous people and the process of Romanization
5. City / town planning throughout history; appearance of a Roman provincial city, Vitruvius, Gaius Velleius Paterculus
6. Siscia - example of the provincial center of continental Croatia
7. Andautonia and Roman roads in the area; Roman roads
8. Ad Fines, Ad Quadrata and Aquae Balissae
9. Aquae Iasae, Aquae Vivae, Iovia, Lobor
10. Roman administration and Roman province in today's Croatia; Provincial Economy
11. Cibalae
12. Certissia and Mursa
13. Danube limes and Sirmium
14. Illyrian Provinces in late antiquity and the early development of Christianity in today's Croatian territory and during the fall of the Roman Empire on the territory of Illyria (597 to 640) end of the ancient town planning; significance and consequences
15. Fieldwork

The Great Figures of Christianity: Between History, Tradition, and Myth

270101

Lecturer

doc. dr. sc.
Eva Katarina
Glazer

Course Description

The primary objective of this course is to acquaint students with some of Christianity's most influential figures who helped shape the Western Civilization. Participants will, among other things, delve into Augustine's theology, explore the solitary life of St. Antony, journey through St. Paul's missionary travels, and unravel the historical contexts of eminent Christian martyrs who opposed Nazism. Moreover, the course provides a unique opportunity for students to engage with primary sources, offering a vivid glimpse into the lives of Christianity's most significant figures. Students will read ancient and medieval stories about figures such as St. Pachomius and St. Benedict, dig in the St. Francis of Assisi's world of poverty and renunciation, and delve into the speeches of Martin Luther King Jr. Furthermore, an interdisciplinary approach is central to our study, incorporating insights from cultural anthropology, sociology, and theology. This perspective aids in understanding critical concepts associated with these figures, such as martyrdom, asceticism, and political theology. By the end of the course, students will gain comprehensive knowledge of pivotal events and processes that have shaped the Christian faith, equipping them with a deeper understanding of its historical and cultural significance.

Study Programmes

Theoretical and Methodological Concepts 269769 in Demography

Lecturer

izv. prof. dr. sc.
Monika
Komušanac

Course Description

Course objectives: equip students to identify, define, and explore the subject matter of demography; introduce students to distinctions of theoretical and methodological concept in demography; equip students with skills for application of standard and specific methods and techniques for population; provide students with an understanding of theoretical differences between demography and similar approaches; teach students the meaning of content, links, processes, and relationships in space and society · introduce students with spatial identification and modelling upon; introduce students to the meaning of demographic analyses in development planning; equip students with skills for forecasting and modelling of future demographic laws; provide students with understanding of objective spatial reality; develop in students the knowledge of significance of demographic potential; develop in students' knowledge and skills related to organisation of space and society; equip students to understand the functioning of administrative territorial organisations; introduce students to fundamental identity forms of a state · provide students with skills to explore, identify, and define terminology, categories, and laws pertaining to population; provide students with knowledge and skills for independent research work pertaining to population analysis; equip students for application of standard and particular methods and techniques for population research; make students aware of demographic distinctions in Croatia; introduce students to development patterns of global migrations; equip students to apply development modelling methods and models for population; provide students with an understanding of fundamental correlation between population dynamics and the development of geographical space and society in Croatia.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 6th semester, 3rd year*)

ECTS Credits 3.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours
15
15

Teaching Assistant
Borna Mažar, mag. geogr.

Grading

Regular attendance in class, completion of preliminary exam, participation in class discussions, submission of independent research paper.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain, consider and understand the spatial, social, theoretical and methodological concepts of demography
2. Explain, consider and understand the logic and functional organizations of demographic development potential
3. Explain, consider, understand and apply different research methods in the analysis of demographic processes, links, relations and models
4. Explain, consider and understand the strategic significance of population
5. Explain, consider and understand the correlation between natural basis, social upgrading and demographic potential
6. Explain, consider and understand the general and regional concepts of organization of space and society

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Demonstrate the ability for scientific conceptualization of the topic and write and present scientific papers.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Conduct relevant research on the Croatian resident and emigrant population

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop a scientifically independent opinion on demographic and emigrant issues

Week by Week Schedule

1. Introduction to theoretical and methodological concept in demography.
2. Scientific classification and approaches.
3. Inner and outer subject of research.
4. Philosophy, logic and functionality of space and society.
5. Population throughout history.
6. Research methods and techniques.
7. Geographical space and social framework.
8. Principles of classification of order of magnitude of demographic conditionality.
9. Fundamental nature of demography.
10. Social science and interdisciplinary field.
11. Grading in research approach.
12. Forecasting and modeling the objective demographic reality.
13. Autonomy of the demographic theoretical concept.
14. Meaning and role of the theoretical concept of demography within entire development.
15. Establishing and popularizing of demography.

Theoretical Systems and Models in Personality Psychology

38643

Lecturer

Boris Mlačić,
nasl. prof. dr.
sc.

Course Description

Provide explanations of major theories (both classical and contemporary), models and research in psychology to the students. identify relations between findings from the different theories and research. Explain man as a whole. Describe the main theoretical approaches in personality psychology. Describe the specific theories within the main approaches. Argue the importance of the personality in everyday life. Interpret a measurement of individual differences.

Study Programmes

» Psychology (Studij) (*required course, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic features of different theoretical approaches to human personality.
2. Apply the acquired knowledge in the seminar activities.
3. Distinguish the main approaches to human personality.
4. Write an essay.
5. Apply acquired knowledge in later professional work.

Study Programme Learning Outcomes

Psychology

Classify the basic theoretical approaches and laws of psychological assessment and counseling in different areas of applied psychology

Critically judge theoretical approaches to the study of individual differences

Critically judge scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to knowledge

Plan the search of literature, databases and other sources of information

Review the historical development and theoretical approaches in various branches of theoretical and applied psychology

ECTS Credits 5.0

Semester Summer

English Level L0

E-learning Level L1

Study Hours

30

15

Teaching Assistant
Ida Dukić, mag. psych.

Grading

Classes and seminars attendance - 10%;
Student paper - 20%;
Colloquium (mid-term exam) - 30% Final exam - 40%

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
6. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Screening of student's work

0.5
ECTS Pohađanje nastave [EN]

1.5
ECTS Kolokviji [EN]

2 ECTS Pismeni ispit [EN]

1 ECTS Seminarski rad [EN]

5 ECTS

Week by Week Schedule

1. Definitions of personality importance of personality psychology for the overall psychology, characteristics of theories of personality, personality theories in relation to other disciplines of psychology, research methodology personality.
2. Freud's psychodynamic theory of personality: personality structure - id, ego, superego, personality dynamics, personality development, defense mechanisms, free association, dream analysis, case studies.
3. Jung's analytical theory of the individual personality - the ego, the personal unconscious, collective unconscious, attitudes, interaction of personality, personality development, Jungian typology.
4. Social-psychology psychoanalytic theory: Adler (desire for superiority, inferiority complex, a complex of superiority, lifestyle, birth order and personality), Fromm (psychoanalysis and Marxism), Horney (anxiety, neurotic needs) and Sullivan (interpersonal theory of psychiatry, tension, transformation of energy).
5. Erikson contemporary psychoanalytic theory (Erikson's theory of psychosocial development, eight stages of man, psihohistory).
6. Lewin topological theory of personality (living space, living space region, valence, vectors, locomotion).
7. Cognitive theory of personality:
Kelly theory of personality - personal constructs, the basic postulate and its derivations, a continuum of cognitive awareness.
8. Cognitive-experiential theory of self-concept (Epstein - the nature of personality theories that emphasize the reality, the system of experience, maladaptive schemas, constructive opinion).
9. Humanistic theory of personality:
Maslow's humanistic theory of personality - assumptions about human nature, hierarchy of needs, self-actualization, man - integrated and creative being).

10. Rogers phenomenological theory - the importance of self-concept (self), the tendency of actualization, the world of experience, a fully functioning person, therapy focuses on the client).
11. Behavioral theories of personality:
Skinner's operant conditioning (behavior laws, classical and instrumental conditioning, superstitious behavior, social behavior, abnormal behavior).
12. Miller-Dollard SR theory (innate disposition for behavior, learning process, higher mental processes, social context, adoption of neuroses, psychotherapy).
13. Theories of social cognition; Bandura and social learning theories - the principles of observational learning, processes of retention, production and motivational processes, reciprocal determinism, self-system, self-efficacy; Mischel's theory - cognitive personality variables, the importance of the situation, cognitive-affective theory of personality; Rotter - primary and broader concepts of social learning, psychological needs, locus of control, interpersonal trust.
14. Structural-dispositional approach: Allport's personological theory of personality - personality, character and temperament, the concept of personality characteristics, dispositions, propria, functional autonomy, measuring personality, the study of expressive behavior, idiographic approach;
Cattell's factorial-analytic theory of personality traits - factor analysis, features personality - Surface and original, dynamic properties, ergos and sentiments, L, Q and T data, factor analysis of the individual; Eysenck's dimensional-biological typology of personality - extraversion, neuroticism and psychoticism, description and causation in explanation of personality, the biological basis of personality.
15. Five-factor model: Velepetori model - personality dimensions in natural language - psycho lexical access, taxonomy descriptors of personality traits in different languages, creating a paradigm of personality, cross-cultural comparisons of the taxonomies; Fiove-factor model (Costa and McCrae) - dimensions of personality questionnaires.

Course Description

Introduce students to the characteristics of print media as well as the printed communication

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts in the field of print media and journalism in the print media.
2. List, explain and apply the basic theories of the press as media, journalism and the production process in print media
3. List, identify and reproduce basic stages of development of the press and key events and individuals in its history.
4. Define, explain and understand the production process in press.
5. Identify and explain the today situation in the press, its innovations, challenges and problems and analyze them.
6. Apply journalistic skills acquired at the seminar classes.
7. Define, identify and independently use any news type.
8. Explain and critically analyze the acquired theoretical and practical knowledge.

Study Programme Learning Outcomes

Dual-major studies

active command of one foreign language in academic communication in general
adherence to the principles of academic integrity and ethical norms of research and publishing

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communication and society

Inform about journalism and public relations

Prepare materials for media and public relations in Croatian and English

Categorize and reexamine journalistic ethics

Organize individual and team work

Identify the foundations and theories of communication science and journalism, public relations and mass media

Identify and compare the peculiarities of individual media

Recognize the needs and willingness to engage in lifelong learning

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

Categorize and reexamine journalistic ethics

Organize individual and team work

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize the needs and willingness to engage in lifelong learning

Recognize and compare the peculiarities of individual media

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

General Competencies

Apply knowledge of the basic concepts of journalism that are in connection with printing and print communications.

Identify and describe the role and place of the print journalism in today society.

Reproduce, apply and explain the basic theory of the printing press and printed journalism. Explain and critically analyze theoretical and practical knowledge acquired. Identify, explain and analyze the situation, innovations, challenges and problems in printing and printed journalism. Apply journalistic skills acquired on the course for the purpose of writing a newspaper report.

Week by Week Schedule

1. A brief historical overview of the development of the printed journalism;
2. State of the press in the world today;
3. Printed media: features, functions, specifications and types;
4. Daily newspaper: function, specification and organization;
5. Production of a daily newspaper: journalistic (editorial, editor, journalist), printing (printing technology, design and graphical layout of newspapers) and selling phase of the production
6. Economic aspects of daily newspapers production;
7. Modern organization of a daily newspaper: publisher, editor, editorial board
8. Sections: domestic politics, foreign politics, city, regional, sports, cultural, graphics, etc.;
9. Sections: domestic politics, foreign politics, city, regional, sports, cultural, graphics, etc.;
10. Forms of expression in the dailies: news genres;
11. Forms of expression in the dailies: analytic genres;
12. Forms of expression in the journals: journalistic genres;
13. Typology (division) of the press;
14. IT evolution and press: new forms of communication and information;
15. Newspapers of the future: e-newspapers, newspaper upon request;
Main topics of the seminar portion of the course are: short news forms, lead, development of the lead; work with sources, citation and quotations; collecting, processing and verification of information, reporting on events: press conferences, accidents and disasters, courtrooms, conferences and sessions, observation and reporting; communication use, verification and processing; interview; reasoning attitude new possibility, review, comment and articles, reviews and criticism; sectoral journalism.

Theories and Systems of Radio Communications

28495

Lecturer

Tanja Baran,
nasl. doc. dr.
sc.

Course Description

Main aim of this course is to get students acquainted with basic theories and systems of radio as media, and with basics of radio journalism. Special emphasis is going to be placed on historical development of radio, normative definitions and formats of radio broadcasting, technological dimension, program formatting, types of radio genre, style of radio journalism and basic principles of editing.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)

- » Communication Studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify radio development throughout history and basic principles of radio as media in traditional and digital media environment.
2. Demonstrate hearing of radio as socially and politically relevant media which is important for social processes and for critical analysis of radio genre and supported contents.
3. Demonstrate critical understanding and analysis of format of radio-station as well as differentiating of program-organizational scheme and program format.
4. Analyze and compare historical development of radio in comparison with other traditional media on the basis of theoretically grounded research.
5. Identify basic principles of normative structure and functioning of radio as media in Croatian media system.
6. Estimate importance of radio as media in social democratic processes, as well as its role in information, education and entertainment of listeners.

Week by Week Schedule

1. lectures
 Acquaintance with literature, student obligations, the method of conducting classes and taking exams.
 Introduction: how television studies approaches the study of television (inseparable variables: industry-text-audience).
 The first unit: the textual landscape of television/1. part: planned flow:
 - Raymond Williams: planned flow and the temporal nature of television
 - planned flow in practice
 - vertical and horizontal planned flow.
 - planned flow and generic nature of television.
2. Lectures
 - planned flow and creation of meaning: aliveness, "co-presence" and intimacy
 - planned flow and creation of meaning: television text is not 'pure'
 - John Ellis: individual text is itself segmented
 - non-linear TV: personalized planned flow.
 The first unit: the textual landscape of television/2. part: TV as domestic media and the 'small screen':
 - John Ellis: the differences between television and film
 - the realism of television
 - John T. Caldwell: televisuality (television stylistic visual strategies)
3. Seminar
 Determining and deepening knowledge about the part of the material listened to, discussion about the material:
 - McQueen (2000), p. 19-23: "John Ellis and 'experiencing television'"
 - Creeber (2006), p. 12-19: "TV form and aesthetics"
 - interview with Creeber: <http://25fps.cz/2016/glen-creeber-interview/>
 Merging theory and practice: students keep a television viewing diary of themselves, their family and their closest friends (a sample of 10 people) for a week - they note which of the learned features of television they noticed, note the differences between the habits of individual family members; if they are currently away from their family, they record the habits of their roommates, interview their family by phone, record their habits. The results are presented in class and discussed.
4. Seminar
 History of television:
 Bignell and Woods (2023), p. 93-94: in the chapter "Inventing television technologies": three eras of television development according to Ellis
 Perišin (2010), p. 25-61: "History of television: from entertainment to politics"
 (notes are presented in class and discussed)
 Lectures
 The first unit: the textual landscape of television/3. part: TV as Bard:
 - television discourse influences us
 - John Fiske and John Hartley: the bardic function of television

5. Seminar

Determining the part of the material heard and discussing the material: the bard and the representation of reality

- group 1: Bignell and Woods, 2023: Television representation and identity, p. 232-248
- group 2: McQueen, 2010: Representation and stereotype, p. 179-207

(notes are presented in class and discussed)

Combining theory and practice: students, after studying the literature on the bardic function, keep a television viewing diary for a week. They choose linear television content: a Turkish soap opera, a western police series, a western sitcom (at least one episode each) and two to three factual content of their choice; for a week, they keep a diary of watching television about what kind of picture of the world each of these contents gives us, guided by the theoretical concept of the bardic roles of television.

Lectures

First unit: textual landscape of television/4. part: TV text spills over into other media:

- convergence
- transmedia storytelling

6. Seminar

Determination of the listened part of the material and discussion of the material:

Creeber, 2006: Post TV? The Future of television (together with a Case study), p. 160-168 (notes are presented in class and discussed)

Transmedia storytelling: combining theory and practice on the example of the transmedia series Skam:

Theoretical part: Bignell and Woods, 2023: 78-79, 265-266 (notes are presented in class and discussed)

Practical part: students follow the series Sram (HRT; domestic version of Skam) and analyze through which media and in what way the story of the series develops.

Notes are presented in class and discussed.

7. - Verification of the fulfillment of obligations from the seminar
- Intermediate exam

8. Lectures

Second unit: television narratives and genres/1. part: TV narratives:

- seriality and narrativization as characteristics of television
- the concept of narrative
- the structure of the television narrative
- serial types: episodic series/show; series/series of shows; miniseries/short series
- hybrid serial types of application and application of the division into types on fictional and factual content

9. Lectures

Second unit: television narratives and genres/2. part: TV genres:

- genre concept
- television as a genre medium
- the main television generic groups
- contemporary division of television genres

10. Seminar
Determination of the listened part of the material and discussion of the material:
- Creeber, 2008: Introduction: What is genre, p. 1-13
- Perišin, 2010: Television news in genre theory, p. 95-118 (notes are presented in class and discussed)
Combining theory and practice (also connecting the first and second parts of the material):
First part: students from literature (Bignell and Woods, 2023; Creeber, 2008; McQueen, 2010) choose to theoretically treat one genre of their choice. They describe the chosen genre and its typical conventions, and as an example they use a specific TV text that they watched. They state and explain to which serial type and generic group that text belongs.
11. Seminar
Second part: students conduct a survey among family members and friends (at least 10 respondents) and present the results:
What is their favorite genre?
What pleasures do they find in watching that genre (what do they like)?
Do they like to watch that genre alone or in company (with whom)?
What do they think - what values does that genre promote?
Does identification and parasocial relationships with the characters occur?
Students compare results for individual genres.
Lectures
Third unit: audience:
1. The Uses and gratifications theory: motives for watching television
2. Theories of effects applied to television
12. Seminar
Determination of the listened part of the material and discussion of the material:
Čerepinko (2011): Theory of benefit satisfaction, p. 142-146; Theory of Cultivation, p. 155-159; Theory of priority setting, p. 159-163 (notes are presented in class and discussed)
Lectures
3. Stuart Hall: theory of coding and decoding of TV text (polysemic; three positions of decoding TV text)
4. Theory of the active audience of cultural studies (socio-cultural determinants of television reception)
13. Seminar
Determination of the listened part of the material and discussion of the material:
Čerepinko (2011): Cultural hegemony, ideology and cultural studies, p. 150-155; Theory of social responsibility of the media, p. 146-150; Spiral of Silence, p. 163-165 (notes are presented in class and discussed)
Lectures
5. The concept of television culture
6. Henry Jenkins: television and the concept of fan culture
7. Qualitative and quantitative industrial research of the TV audience

Theories of Media and Mass Communication

270939

Lecturer

doc. dr. sc.
Vanesa Varga

ECTS Credits 5.0

Semester Winter

English Level L1

E-learning Level L1

Study Hours

15

15

Prerequisites

Academic Literacy

Introduction to Journalism

Originators of
Communication Sciences
and Their Works

Semiotics in Mass
Communication

Course Description

Familiarize the students with the theoretical definition and research of mass media since the beginning of the 20th century, when it was indirectly (literary criticism, Frankfurt school) and ideologically aimed (liberals, Marxists) through the theories generated by direct study of the media and their role in society, until postmodernism.

Study Programmes

- » Communication Studies (Studij) (*required course, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the role, function and objectives of the theory of media and mass communication
2. Distinguish theories of media and the theories of mass communication and their characteristics.
3. Assess the role of the studied theories in the historical development of communicology, theoretical studies and scientific research of mass communication and media.
4. Identify connections between different theories and teachings, explain and analyze them.
5. Demonstrate the ability to summarize and critically present larger materials (books)

Study Programme Learning Outcomes

Dual-major studies

adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse
adherence to the principles of academic integrity and ethical norms of research and publishing

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Research, recognize and interpret relevant literature that

studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Think critically about topics related to journalism, public relations, communications and society as a whole

Organize individual and team work

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

General Competencies

Reproduce and explain the basic theory of mass media originated in the researched period. Apply knowledge of the basic concepts of the theory of media and communication studies. Discuss and reflect critically studied media theory.

Course Description

The main goal of this course is to develop students' understanding of the breadth of approaches to historical science and the profession. Students will gain insight and experience in various applications of acquired knowledge adapted to the undergraduate level of study. Special emphasis will be placed on different approaches to solving and presenting historical-themed tasks intended for professional audiences, but also for the general public. In addition to individual and team work in completing tasks, innovation and creativity in solving tasks will be encouraged, as well as student participation in various manifestations, events and forms of practical work in order to acquire habits and experience from the undergraduate level, which will help them build their CV. The emphasis will be on presenting tasks created during classes and communicating historical topics and projects to different types of audiences. The course also aims to connect history students with national institutions and other entities related to the labor market, as well as with graduated historians who have pursued various careers after completing their studies, which is in line with the scientific and didactic standards of the Department of History of the Faculty of Croatian Studies, which encourages thinking about future research careers from the undergraduate level. The ultimate goal of this course is to provide students with a set of methods and skills that will help them understand the breadth and possibilities of the historian's profession, adapted to the modern era.

Study Programmes

- » History -> Dual-major studies (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)
- » History (Studij) (*pov (17191) - early modern period, 3rd semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and list different types of historical sources, classify them and identify their availability and possibilities of use and presentation for scientific and public purposes
2. Classify historical research or assignments as professional or popular and differentiate between approaches to one or the other
3. Demonstrate and plan individual or group historical research

4. Create individual or group historical research at a student scientific and professional conference or adapt it for communication with the public through traditional and contemporary media
5. Develop organizational skills
6. Create and publish short reports on current events in the field of history

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science
Use a computer, the Internet and other technical and digital aids for processing historical data
Critically judge one's own work and defend one's position with arguments in team work
Norm and classify historical literature and sources
Recognize the interdisciplinary character of history and its relevance to other fields of knowledge and to the promotion of a number of moral, social and cultural values
Collect professional bibliography through library catalogs and internet databases and present them with arguments

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science
Generate and conduct historical and other types of discussions
Use the computer, the Internet and other technical and digital aids to process historical data
Norm and classify historical literature and sources
recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values
Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner
Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

General Competencies

1. Identify and list different types of historical sources, classify them and identify their availability and possibilities of use and presentation for scientific and public purposes.
2. Classify historical research or assignments as professional or popular and differentiate between approaches to one or the other.
3. Demonstrate and plan individual or group historical research.
4. Create individual or group historical research at a student scientific and professional conference or adapt it for communication with the public through traditional and contemporary media.
5. Develop organizational skills.
6. Create and publish short reports on current events in the field of history.

The role of Latinisms in the Croatian language

239796

Lecturer

doc. dr. sc.
Lucija Krešić
Nacevski

Course Description

The aim of the course is to become familiar with the role of Latin loanwords in the Croatian language, their history and characteristics of use.

Study Programmes

- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 2nd semester, 1st year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 4th semester, 2nd year*)
- » Croatology -> Dual-major studies (Studij) (*kro(16533): elective courses double major croatology, 6th semester, 3rd year*)
- » Croatology (Studij) (*elective courses, 2nd semester, 1st year*)
- » Croatology (Studij) (*elective courses, 4th semester, 2nd year*)
- » Croatology (Studij) (*elective courses, 6th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define "latinism".
2. Analyze the role of Latinisms in Croatian language.
3. Describe the processes of using Latinisms in the Croatian language.
4. Analyze the cultural processes that lead to the use of Latinisms.
5. Describe the heritage of Western European culture in Croatian culture,
6. List the influences of Roman culture on Croatian territory.

Study Programme Learning Outcomes

Dual-major studies

adherence to the principles of academic integrity and ethical norms of research and publishing
adherence to grammatical, orthographic and stylistic norms of the Croatian language in academic and non-academic discourse

Croatology

Name, single out and describe the foundations of Croatian

ECTS Credits 3.0

Transition, State, Diaspora

226934

Lecturer

doc. dr. sc.
Jadranka
Polović

Course Description

Course objectives: to introduce students with theoretical approaches to statehood, transition and diaspora; to empower students to understand post-Cold War processes in the Eastern, Central and Southeast Europe; to introduce students to the creation of the Republic of Croatia and the Croatian Homeland War; to empower students to understand the overall social context, presenting itself as a challenge to transitional processes; to introduce students to the role of international actors during the process of international recognition, ending the war and the transition strategy selection, as well as the conditions for NATO and EU membership; to empower students to participate independently in the projects of scientific, economic, cultural and various other modes of cooperation with the Croatian diaspora; to empower students to understand, clarify and to predict the future, global migratory trends, as well as the connected security

issues for the region.

E-learning Level L1

Study Hours

15

15

Grading

Regular class attendance, passed preliminary exam, participation in discussion during the course, independent research work

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and recognize the migratory cycles and integration models, which serve the Croatia's development
2. Define and explain the selective migration flows within the context of a non-identify population
3. Identify the areas of possible integration and functional economic linkage between Croatia and emigration, within the context of security and development
4. Identify, explain and develop models of connecting the state of Croatia and emigrant communities, through various forms of integration
5. Identify the potential of the emigrant community (Croatian diaspora) and to link with them in various different integration patterns in order to fulfil a particular Croatia's need

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Carry out analytical and scientific procedures of forecasting and modeling the future

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Develop a critical attitude towards statistical data and literature relevant to research on the population and Croatian emigration

Develop the ability to demonstrate the need of the population and emigration in the service of social and political decision-making

Interpret data on Croatian and global population and emigration

Week by Week Schedule

1. Introduction: Familiarise the students with the structure, content and objectives of the course; teaching methods employed, evaluation used, the student's obligations, proposal of topics for seminar papers, deadlines
2. Defining fundamental concepts: transition, state and diaspora; presentation of the theoretical approaches
3. Croatia as a part of the former Yugoslavia (1945-1991): political and economic processes, inter-ethnic relations, emigration, Croatian Spring, Croatian emigration and identity
4. Geopolitical changes in Europe and the new structure of Post-Cold war order / Southeast Europe: geographical, historical and political regional determinants
5. Political, economic and social disintegration of Yugoslavia: introduction to war; US reaction; diplomatic initiative of the European Community
6. Croatia 1990-1995: creating a state, defending the national identity (Serb rebellion, Croatian politics towards the B&H, contextual analysis of the military actions - „Flash“ and „Storm“)
7. The role of the Croatian diaspora in supporting the Croatia's independence (humanitarian, military assistance, lobbying)
8. International recognition of Croatia and the great powers
9. Croatian transition: (transformation of both the political and economic system, creating a new values system, foreign policy goals – EU and NATO membership)
10. Critical review of the transitional processes in Croatia, during the 1990's (analysing the factors of failure - war, poor economic, tycoon privatization, resistance to change, corruption and nepotism, Croatia under informal international sanctions, absenteeism investment, the first decade of independence as a "lost developmental period"
11. Impact of external actors, interest of the big powers and international organizations on integration processes and transformation, democratization and Europeanization of Croatia (international recognition, preservation of territorial integrity, choosing a transitional political and economic models as the transitional strategy, conditions for EU and NATO accession); Croatia with regard to the impact of the Conditionality Policy (Copenhagen Criteria): EU political conditions as the default political framework for transformation enactment, modernization and Europeanization of Croatia
12. The impact of Conditionality Policy (Copenhagen Criteria): EU political conditions as the default political framework for transformation. modernization and Europeanization of Croatia
13. Croatia as an EU member: political, demographic, economic and social challenges
14. Croats in Bosnia and Hercegovina as an important issue for the Croatian foreign policy (Croatia as a Dayton Agreement signatory, government strategy for protecting the Croatian people, weakened B&H constituency)
15. Geopolitical environment of the Republic of Croatia (Bosnia and Hercegovina, Kosovo; Macedonia and Serbia) and the underlying security challenges

Typology of Migration

269724

Lecturer

izv. prof. dr. sc.
Monika
Komušanac

Course Description

The aim of the course is to present multidisciplinary theories and concepts of international migration, with a critical review of contemporary trends in Croatian society.

Study Programmes

- » Demography and Croatian Diaspora -> Dual-major studies (Studij)
(*required course, 2nd semester, 1st year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use basic concepts: migration, spatial mobility, types of migration, migrant groups and post-migration social processes
2. Use micro-meso-macro approaches to explain migration
3. Use knowledge of migrant networks and generation of migration flows
4. Apply knowledge of transnational social spaces
5. Apply knowledge of forms of organizing migrants
6. Apply knowledge of classical and new approaches to explaining migrant integration

Study Programme Learning Outcomes

Dual-major studies

Demography and Croatian Diaspora

Summarize knowledge about the demographic conditionality of the overall development and demonstrate its importance for Croatia by understanding the emigrant potential.

Demonstrate the ability to terminologically understand demographic and immigrant terms

Understand the relationship between population movements and economic, social and geographical laws, as well as emigrant potential and the overall development of Croatia

Develop cognitive and operational skills for conducting research essential for development concepts and homeland security

Interpret data on Croatian and global population and emigration

Course Description

The Visual communication course is designed to provide students with comprehensive theoretical knowledge and practical skills necessary for critically understanding and applying visual communication. Students will systematically explore the role of visual communication in both traditional and digital media, and will develop strategies for effectively conveying visual messages, with a particular focus on digital platforms.

Through in-depth study of key elements of visual identity, including typography, color, and logos, as well as analysis of various graphic design products and visual communication media, such as posters, photography, and video, students will develop the ability to critically analyze and interpret visual messages. The course provides the necessary knowledge and tools for applying acquired theoretical concepts in practical projects, including the creation of posters, logos, and digital visuals, thus integrating theoretical knowledge with practical skills.

Study Programmes

- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies -> Dual-major studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 3rd semester, 2nd year*)
- » Communication Studies (Studij) (*kom- (16525): media, 5th semester, 3rd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Synthesize relevant theories and approaches from the field of visual communication to critically analyze contemporary media content.
2. Analyze the role of typography, color, and shapes in shaping visual messages and their impact on audience perception.
3. Create visual identities using the fundamental principles of visual design, adapted to specific social and cultural contexts.
4. Define basic characteristics of visual communication in various periods and influence of visual communication on media.

5. Explain and critically evaluate the effectiveness of visual communication across different media.
6. Develop strategies to improve visual communication in digital media.
7. Apply the knowledge and skills acquired through theory in practical projects, including digital visuals, posters, and infographics for specific target audiences.
8. Evaluate the impact of political visual strategies on audience perception and behavior during political campaigns

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Organize individual and team work

Write texts and prepare other materials for media and public relations in Croatian and English

Recognize and compare the peculiarities of individual media

Recognize and identify the foundations and theories of communication science and journalism, public relations and mass media

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Prepare and create different forms of presentations and seminar papers

Communication Studies

Demonstrate the use of computer, the Internet and other technical and digital aids in journalism, as well as for data processing

Prepare materials for media and public relations in Croatian and English

Organize individual and team work

Identify and compare the peculiarities of individual media

Identify the foundations and theories of communication science and journalism, public relations and mass media

Search professional bibliography through library catalogs and various online databases and identify and use scientific sources (bibliography, documents, internet pages) in various humanities and social fields related to communications, journalism and public relations

Prepare and create different forms of presentations and seminar papers

Screening of student's work

0.25
ECTS Pohađanje nastave [EN]

2.5 ECTS Kolokviji [EN]

1 ECTS Seminarski rad [EN]

0.25
ECTS Praktični rad [EN]

4 ECTS

Week by Week Schedule

1. Introductory lecture – an overview of the course, syllabus, practical assignments, midterm exams, and student responsibilities.
2. Introduction to visual communication - Nonverbal communication, the concept and development of visual communication, the concept of an image, semiotics, connotative and denotative meaning.
3. Brand and visual communication: Marketing, integrated marketing communications, the concept of a brand, the development of brand communication, verbal and visual brand identity, elements of brand identity.
4. The role of color in visual communication: Color theory, color models, psychology of color, colors in marketing and advertising, rules and theories of color combinations, colors in digital design.
5. Graphic design and design principles: The concept and history of graphic design, graphic techniques, basic design principles, application of design principles in various media, tools and software for graphic design.
6. Typography in visual communication: Fundamentals and development, elements of typographic design, typography as an integral element of brand visual identity, practical application of typography.
7. Logo – design and application: The concept and types of logos, the development and use of trademarks and logos worldwide, elements of logo design, logo analysis, practical logo creation.
8. First midterm exam
9. Poster – design and application: The concept, development, and use of posters, types of posters and their application, the impact of posters on the development of advertising, key elements of poster design, the poster as a visual and artistic form, characteristics of poster design in different artistic periods, the persuasive role of posters, posters and propaganda, practical poster design.
10. Visual communication in digital media: transformation of communication, digital technologies, social media and visual content, content format adaptation, user experience (UX), digital visual advertising of brands.
11. Photography and video in visual communication: history and role in media communication, styles and functions, ethics, basic principles of photographic composition, the role of video in visual communication, application in media, marketing, and advertising.

12. Animation, interactive design, and the future of visual communication: concept, styles, and principles of animation, interactive design in digital media, virtual and augmented reality, artificial intelligence.
13. Infographics and data visualization: concept, history, the role of infographics in visual communication, types and basic principles of infographics, information hierarchy, types of data visualizations, interactive visualization, infographics in marketing and media, practical exercise in creating infographics.
14. Visual Communication in the political sphere: development and characteristics of political visual communication, political campaigns and visual rhetoric, photography and video in the political sphere, communication channels.
15. Second midterm exam

5. Analyze various data on the history of the Vlachs and critically assess the credibility of claims, assumptions and arguments of individual historians
6. Explain and analyze the phenomena, processes and structures that the Vlach population went through during the early modern period in Central and Southeastern Europe
7. Distinguish ideas about the linguistic, cultural and social conditions of the Vlachs, the influence on other European peoples, relationships and possible permeations
8. Recognize the legacy of Wallachian culture and language in Central and Southeastern Europe

Study Programme Learning Outcomes

Dual-major studies

Croatology

Identify different theoretical approaches to the study of Croatian culture

Constructively participate in discussions on croatological topics

Explain and analyze the components of Croatian culture and their connection

Identify, connect, single out and argue the fundamental components of Croatian geography, enology, ethnology, gastronomy

Croatology

History

Demonstrate the use of professional terminology, historiographical research tools and methodological principles of historical science

Name and describe certain historical periods

Single out important historical figures from different periods of European history

Norm and classify historical literature and sources

Collect professional bibliography through library catalogs and internet databases and present them with arguments

History

Single out historical processes and explain their topic of interpretation

Use the computer, the Internet and other technical and digital aids to process historical data

recognize the interdisciplinary character of history and its relevance to other areas of knowledge and to the promotion of a number of moral, social and cultural values

Collect professional bibliography through library catalogs and internet databases and present them in an argumentative manner

Apply the methodology of various historiographical fields and other research methods from the humanities

Judge the social and ethical context of historical science with an argumentative attitude and supporting clear principles of the subject science

Week by Week Schedule

1. Introductory lecture
2. The meaning, concept and definition of the Vlach name
3. Theories and controversies about Vlach ethnogenesis
4. Vlach culture, language and society
5. European historiography on the Vlach issue
6. Vlachs in Central Europe
7. The position of the Vlachs in the Ottoman Empire
8. Church organization of the Vlachs in Central and Southeastern Europe
9. Settlement of Vlachs on the territory of Croatian lands
10. Vlachs on the territory of Croatian lands before the anti-Ottoman wars
11. The Habsburg Monarchy and the Vlachs
12. Vlachs and stećci
13. Croatian and Serbian historiography about the Vlachs
14. Vlachs during the 20th century in Central and Southeastern Europe
15. Concluding considerations

Writing in English

38006

Lecturer

Adrian Jadranko
Beljo,
v. pred.

Course Description

To expose students to effective writing techniques in journalism, within the context(topics) covered in the required literature

To enable students to differentiate between the main styles, registers and functions of written texts

To enable students to master the rules of punctuation, sentence and paragraph structure

To enable students to apply the acquired strategies in independent writing (headlines, paragraphs, reviews, reports, etc.)

Study Programmes

» Communication Studies (Studij) (*required course, 4th semester, 2nd year*)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use effectively their enhanced writing skills in the independent preparation of written texts related to journalism
2. Recognize and make correct use of a range of vocabulary focusing on specific terminology in the following areas: work, unemployment and welfare; crime and punishment; diplomacy and war; entertainment and arts; sports
3. Use word transformations, synonyms, antonyms, collocations
4. Demonstrate the integration of acquired grammatical and other knowledge and skills for the purpose of writing structured texts correctly
5. Use authentic materials and texts to further expand their vocabulary and enrich their spoken and written language

Study Programme Learning Outcomes

Dual-major studies

Communication Studies

Identify the influence of the media on society and culture on the media and present knowledge about journalism, public relations, communications and society

Inform about journalism and public relations

ECTS Credits 4.0

Semester Summer

English Level L1

E-learning Level L3

Study Hours 60

Grading

regular attendance and active participation in classes 30% work on the course portfolio 30% written exam 40% (students must achieve a score of at least 60%)

Prerequisites for Modern English and the Media

Research, recognize and interpret relevant literature that studies mass communication and professional texts in the field of communication studies (literary, linguistic, historical)

Categorize and reexamine journalistic ethics

Think critically about topics related to journalism, public relations, communications and society as a whole

Write texts and prepare other materials for media and public relations in Croatian and English

Present knowledge about journalism, public relations, communications and society using different communication methods

Prepare and create different forms of presentations and seminar papers

Prepare and construct work assignments in the interdisciplinary field

General Competencies

Apply and make effective use of the acquired basic concepts related to communication sciences in the English language. Express themselves clearly and concisely in the written form in the English language with emphasis on English for journalists and public relations. Work efficiently both as individuals and as team members.

Week by Week Schedule

1. Characteristics of formal and informal writing style – differences in vocabulary, sentence structure, choice of grammar, etc.
2. Differences in register – presenting the same information using various registers.
3. Cohesion – the appropriate use of linking words (conjunctions and sentence adverbials).
4. Punctuation – joining sentences by means of participle and relative clauses.
5. Punctuation – the effective and appropriate use of commas, parentheses, colons and other punctuation marks.
6. Description – how to make a description interesting.
7. Description – how to make a description interesting.
8. Giving instructions and advice – avoidance of the imperative.
9. Narrative – linking events in chronological order, writing short newspaper article.
10. Narrative – linking events in chronological order, writing short newspaper article.
11. Vocabulary focusing on specific terminology in the following areas: work, unemployment and welfare; crime and punishment; diplomacy and war; entertainment and arts; sports, introduced through a range of authentic materials.
12. Vocabulary focusing on specific terminology in the following areas: work, unemployment and welfare; crime and punishment; diplomacy and war; entertainment and arts; sports, introduced through a range of authentic materials.
13. Autonomous writing tasks and student presentations.
14. Autonomous writing tasks and student presentations.
15. Autonomous writing tasks and student presentations.
